Sir:-

Re- Pumping Plant and Irrigation
System for part of Kamloops Indian
Reserve No. 1.

Pump located at Industrial School.

Irrigable area 355 acres.

At the request of Mr. Duncan G. Scott, Deputy
Superintendent General of Indian Affairs, and after
consultation with Mr. J. F. Smith, Indian Agent at
Kamloops, we have prepared designs and estimates for a
pumping plant with a capacity of 3500 U.S.G.P.M., to
serve an irrigable area of 355 acres of the Kamloops
Indian Reserve.

Pumping Plant

The pumping plant is to be located near the
present irrigation pumping plant at the Kamloops
Industrial School. At this point there is ground
high enough to carry a ditch quite close to the river,
so that only 450 feet of pipe line will be required.
Another great advantage of this site is that power
can be obtained from the present transmission line
at very little extra expense and without any transformers.

Main Ditch

The main ditch line will start at an
elevation of 75 feet above low water and 15 feet
higher than the present Industrial School ditch. It
will be 3 miles in length, of which 1 mile will be
through the Industrial School property. For the
first 2 miles the ditch line will be along the hillside
just north of the wagon road, and in this section a
great deal of fluming will be required. The last mile
will be through cultivated land and will be practically
all earth ditch.

Land

The land that will be served by this plant
is shown on the accompanying plan. The total area is
445 acres, of which at least 355 acres is first class
irrigable land. It is all fenced and 90% of it is
cleared; but it does not produce satisfactory crops
at present on account of lack of water.

Area "A", east of the Kamloops road and
north of the flooded land, contains 160 acres; much
of this was irrigated and cultivated at one time.
Probably 90% of it could be brought under cultivation
from the proposed system with very little trouble.

Area "B", west of the Kamloops road and
north of the flooded land, contains 110 acres, most
of which has never been irrigated. In some spots the
soil is rather light; and the land lies in ridges so
that it cannot be irrigated as easily as the other

two areas

Indian Affairs. (RG 10, Volume 6447, file 882-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR COPY

two areas. It is estimated that at least 50% of it is good irrigable land.

Area "C", just north of area "B" and lying between the road and the C. N. R. track, contains 175 acres. This includes some of the most productive land on the reserve and it is quite close to the Indian village. It is estimated that 90% of it is good land which could be irrigated from the proposed system with very little change in the existing ditches.

The total area of irrigable land is therefore as follows:-

	Total	Proportion Irrigable	Irrigable Acreage
Area A	160 acres	90%	144 acres
Area B	110 "	50%	55 "
Area C	175 "	90%	156 "
Totals 445 acres			355 acres.

Cost

As shown by the attached estimates, the cost of the whole plant, including transmission line, main ditchline and main laterals, is \$15,750, or less than \$45.00 per acre. This provides for first class construction throughout. Current prices are given for the machinery, supplies and labor.

Power

In view of the rapidity with which the surplus power from the municipal power plant is being contracted for, it would be wise to enter into a contract with the city for the 100 H.P. required as soon as it is decided to build the plant.

Machinery

In order to secure delivery of this machinery in time for installation next spring, the order should be placed before the end of December if possible.

Operation

The officials of the Indian Department are thoroughly familiar with the advantages of irrigation by pumping and know of the results obtained from the plant we installed at the Kamloops Industrial School in 1918.

If the land to be served by the proposed plant is properly divided among the Indians, and a competent agriculturist engaged to advise them in their farming and to be responsible for the operation of the irrigation plant, according to the plan discussed with Mr. Scott when he was in Kamloops, there seems to be no reason why the whole proposition should not be quite successful.

Your obedient servant,

L. G. Swan
Division Engineer.

L. G. Swan, Esq.,
District Chief Engineer,

Re Pump-

116659-5 Industrial School,
Kamloops, Feb. 10, 1921.

548484

Dear Mr. Scott:

The Automatic Electric Pump and ~~Pressure~~ Tank have now been in operation over a month.

It is only when a man has learned by experience all the ills that can afflict a gasoline engine, such as carbon, spark plugs, batteries and timers, that he really appreciates an electric motor. We have had the experience and we now prize the new machinery at their proper value.

The cost of operation under the old regime proved very expensive. Besides the gas, oil, batteries and repairs, the gasoline engine required the attention of a man for three or four hours each week. The account for gasoline alone rarely fell below ten or fifteen dollars a month. During January the cost of electricity for the new motor is three dollars and ten cents! And the pressure is on the taps in the house continually.

We wish to thank you sincerely for this great improvement. We feel sure the Department will feel as pleased as we to learn that the system gives satisfaction.

With best wishes,

I remain,
Very truly yours,
James McGuire O.M.S.

JAN 31 1921

Dear Mr. Scott:

547774

I am presenting to the Department a requisition turning mostly upon repairs which we would be pleased to make, if possible, during February.

The lumber is for the construction of two portable chicken houses which I would like the boys themselves to construct now for use during summer. - We started by buying a score of hens two years ago. Having learned how to operate an incubator and brooder we have increased to nearly two hundred pullets. We are trying to profit by our ideal dry climate to make further advances.

Being assured of favorable consideration,
I remain,

Very truly yours,

James McGuire O.M.S.

Dear Mr. McLean,

I wish to thank you sincerely for the supplies granted us by your last letter.

They are not so great: no, but they are timely. So it has been for the supplies granted us those last two years. By the advantages thus given, we have been able to turn our irrigation system to the best advantage. The fact of having a barn full of hay and a silo full of corn is duly appreciated after the periods of no crops and soaring prices.

Each year now becomes easier, the crops more abundant, the children more contented.

With best wishes,

I remain,

Very truly yours,

James McGuire O.M.S.

The Multi-Motor washer is provided with a swinging reversible wringer which is driven and operated automatically in connection with the washer.

Operating Washer and Wringer

Press the foot on the pedal of the starting wheel, starting the engine. When the tub is filled and the lid is closed, turning the latch that holds down the lid, throws the machine in gear and starts the washer. When the tubful is washed, unlatching the lid

Figure 4

stops the washer, and lifting the lid throws the wringer in gear. Turning the latch again to position as when holding the lid, starts the wringer.

When the first tubful of clothes are out of washer, the closing and latching of the lid starts the machine on the second batch. The wringer may be left in gear and can be swung into position to wring from the rinse to the

bluing tub or from bluing to clothes basket, while the second tub is washing.

The whole operation of washing and wringing, after starting the engine, is one of opening and closing the tub; and either washing or wringing, or both at once, are performed and controlled in the same way. Any woman or even a child big enough to help about the house can operate the Multi-Motor perfectly.

An important feature of the Maytag wringer is the safety lever. Should the clothes by accident wind around the rolls, a light blow on the safety lever instantly releases the upper roll. This safety device is a protection to the wringer and absolute insurance against possible injury to the clothes or the person who feeds the wringer.

The Multi-Motor is made only by the Maytag Company and sold only by authorized Maytag dealers.

It offers to every rural household a labor-saving utility equal to anything obtainable in the best equipped city home.

Come in and get all the information about this wonderful machine and let us demonstrate it in your own home.

Fig. 5—The Wringer as Released by the Safety Lever.

POOR-COPY

THERE is no escaping laundry work on the farm. Even if economy permitted the employment of the commercial laundry, that convenience is seldom available for the great majority of rural homes.

The only solution of the washday drudgery problem is the use of the power washer. The hand washing machine proved a great advance over the

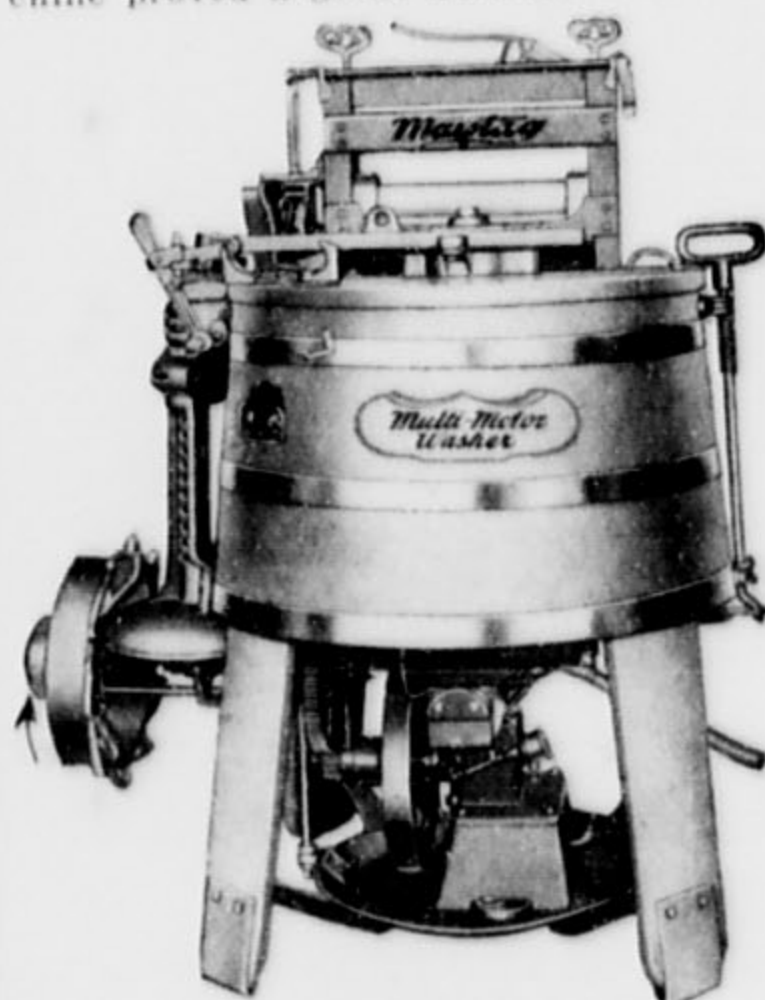

Figure 1

tub and washboard, but modern household management everywhere demands more advanced labor saving laundry equipment, equal to the superior types found in the city home. But this was not possible for the great majority of rural homes until the invention and perfection of the

MULTI-MOTOR WASHER.

This machine contains its own power plant—a small engine installed under the tub, just as a motor is attached to

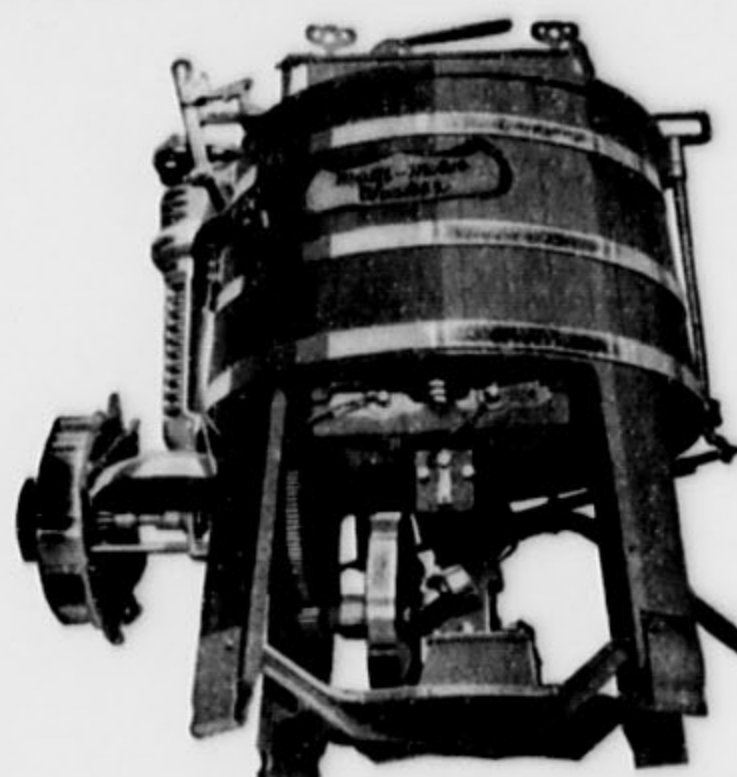

Figure 2.—Engine and Method of Attachment.

the electric washer. The engine is started by simply pressing the foot on the starting pedal, which spins and starts the motor. The power supplied is as constant and steady as the electric current.

And there is positively nothing complicated or cumbersome about this engine and no difficulty in its operation. It has only three working parts and these are run in an oil bath which insures perfect and continual lubrication. The engine has no valves, no turning gears, no drip waters, as is common in gas engines. Nothing to get out of order. Any woman can start and stop the engine without the least difficulty, and while running, it takes care of itself.

Figure 2 shows the engine attached to the washer. Notice how small it is, and how firmly attached to all four of the washer legs. It is mounted on a pan which prevents oil from dripping on the floor and is provided with a flexible exhaust tube of sufficient length to conduct the exhaust, with all odor, smoke and noise, out of a con-

venient window or into a chimney, thru furnace or stove, if need be.

Figure 3 illustrates the engine detached from the washer. Notice the simple compact lines of external construction. The internal construction is just as simple, and its operation is constant and dependable at all times.

Notice the two belt pulleys on the end of the shaft, one 4 inches and the other 10½ inches in diameter. With these the owner of the Multi-Motor has a little power plant of her own to do the churning, cream separating, and other such odd jobs.

The farmer's wife who possesses a Multi-Motor washer is not dependent upon the whims or necessities of the men folks. Where the washing is done

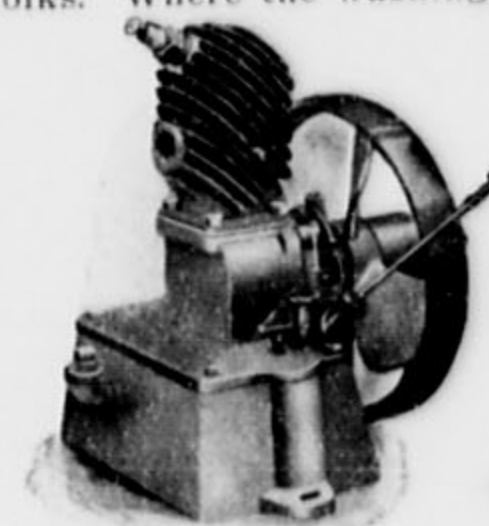

Figure 3

by power from the ordinary farm power plant, the men almost invariably have some urgent use for it on washday, and the woman must often resort to the tub to get her washing out in time.

The Multi-Motor does away with all that delay and worry and hard work, making the performance of washday duties regular and orderly without disturbing any other farm activities.

It requires no special room or building to house the Multi-Motor, as it takes up no more space than a hand power washer. It can be set in the kitchen and do the washing under the supervision of the housewife while she is attending to other house work or caring for the children.

CANADA**

This little booklet is respectfully dedicated to the thousands of women the world over who have not yet been emancipated from the slavery of wash day.

JIMMY MALONE, husband of Mary Malone, swung down the street this Monday morning with his great free stride and there was happiness in his heart. It shone from his eyes and from the little smile wrinkles at the corners of his mouth.

At the entrance to the store he met his friend, the Hotelman, who had come over to make the purchases for the week.

"By the looks of your face you've had good news, or you've made a million dollars or something," said the man from the Hotel.

"Well now, come in and I'll be telling you of it. Two years ago you took me into your back kitchen to see Connor wash your clothes, and your good wife demonstrated to my entire satisfaction that if I wanted to keep Mary happy and contented I should go to the hardware man and buy her one of the contraptions to do her washing.

"I went and bought the thing while Mary was away on a little vacation, and then brought her home like a tickled kid. When she saw it she threw her ar-r-rms around my neck and wept with joy; 'twas something she had been wanting for years and years and never asked for; and me—I'd been so close to my own affairs that I never gave her hard work a thought.

"Well, Connor has been sending letters and booklets to me telling of his other machines and of his wringers; he says he wants Mary to be satisfied in every way. The other day he wrote and told me of hitching electric power to one of his Washers, and now all a woman has to do is put the clothes in the machine with the water, attach the electric cord to the lamp socket, turn on the power, and away it goes as sweet as anything.

"He told me that he was able to take all the hard work out of wash day, and that just as I added equipment to my store to save time and labor, so should I do the same thing for Mary. I wrote back and told him to have the hardware man get one of the Washers and I would look it over; if it took work away from Mary then I was going to have it.

"So the other day it came, and I went over to see it. It was that simple a child could run it, and I had one of the things sent over to the house. This morning Mary was up bright and early and had her washing on the line before I left, and all the time the work was being done she was getting breakfast and tidying up the house, singing away as happy as a lark on a bright May morning.

"When I left, she said, 'Jimmy, this morning I'm going down to your store at ten o'clock to visit you just to show that I appreciate this wonderful gift that you've given me—and incidentally to show off to my neighbors. I can hear them say, 'There goes Mary Malone trapesin' off, and it only the middle of

*You owe it to yourself
to possess one of these
Washers.*

the morning—I hear she has an Electric Washing Mac. Jimmy's good to her all right; luck is with some people.' Can you beat it?"

"What's so wonderful about this machine of Connor's, is it better than the old style? If it is I want one over at the Hotel."

"Wait now," said Jimmy, "and I'll give you a demonstration. I'm the hardware man and you're my customer: 'So you've been sending most of your clothes to the laundry and the rest of the stuff your wife does at home—hm-m-m. Man, did you ever realize that the laundries wear out more clothes and linens for you than you do yourself; did you ever know that clothing or linens washed in a Connor Washing Machine will last five times as long as if you send them out?"

"And did you ever realize that your clothing is dumped in with clothing from every part of the city and all washed together? And did you ever figure out whether you would care to wear a garment that had been rubbing up against the garments of someone who might have some contagious disease or be extra dirty? I can see by your face that you wouldn't have it so.

"All right—that brings us down to the point where you would have your clothing washed at home if it were possible for your wife to do the work or to get some girl to do the work for her. It is well

FIVE

ARCHIVES PUBLIQUES
CANADA**

POOR COPY

nigh impossible to get servants to do the work in the home; the day of the old-fashioned washerwoman is past. It means that you must either send it out or do it yourself.

"The woman who does her own washing by hand in the old-fashioned way skimps on her clean clothes; she knows better than anyone else the hard work that must be done before that linen will be clean again. She knows what each unclean garment, handkerchief, tablecloth, napkin, sheet, costs before it is nice and fresh.

"Did you ever bend over a tub and do a week's washing? No, you didn't, and if you did you would get so sick and tired of it that you would immediately go out and hire someone to do it for you—or send it to the laundry.

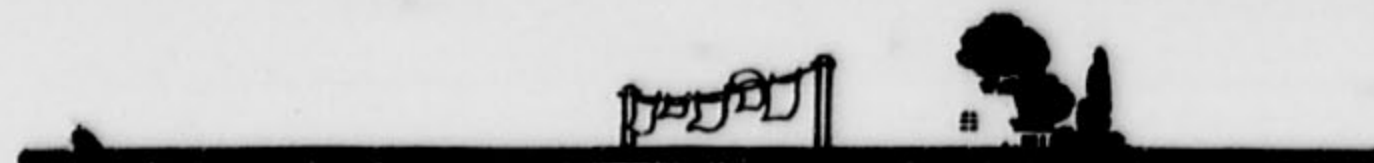

"You point out a home to me where they have all the clean linen and clothing they need and I'll show you a Washer in their cellar or laundry.

"Years ago—and in some parts of the world it is done to-day—

SIX

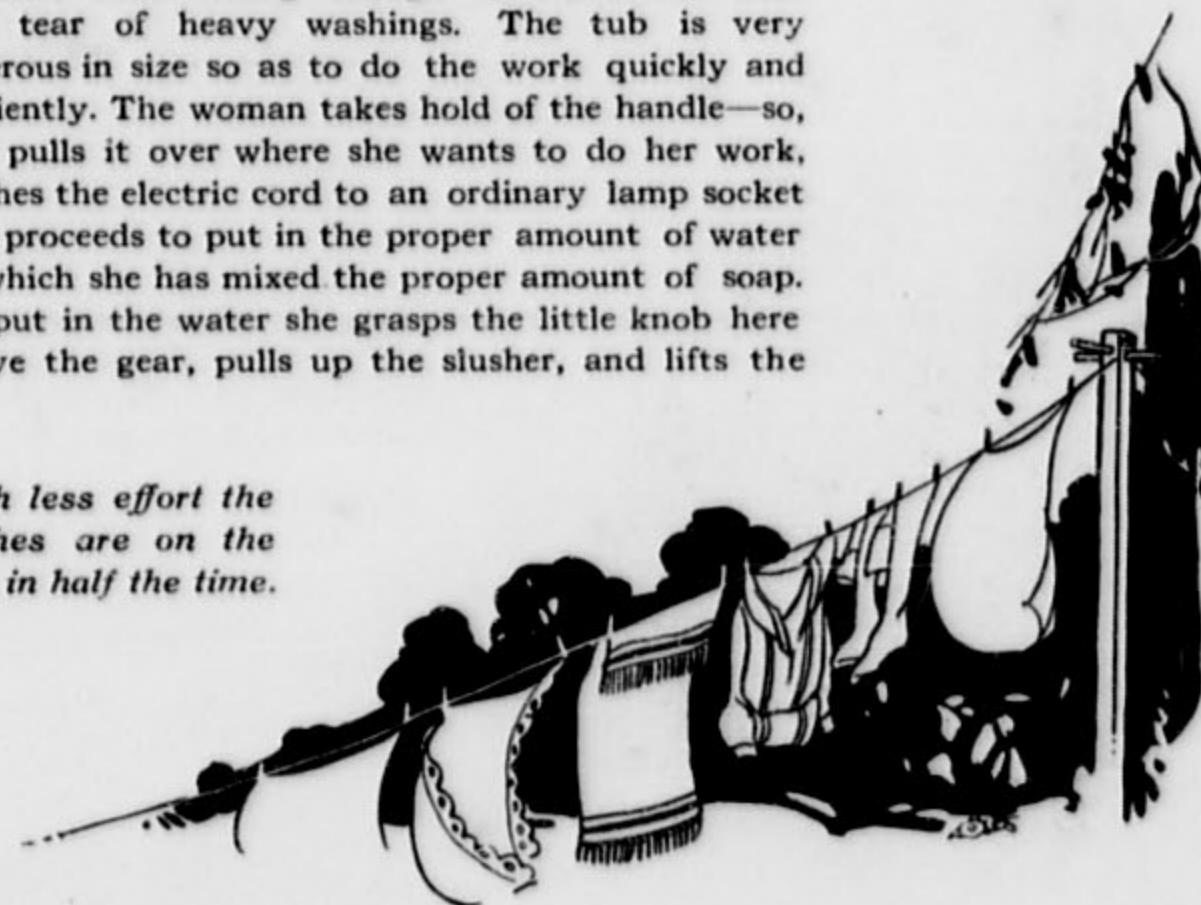

*It is so easy to handle.
The slightest pull will
roll it into position.*

people washed clothing by taking it to the river, dipping it into the water and beating it over a stone to force the water through the fabric. Then came the washboard where the clothing was rubbed up and down, the popular belief being that the rubbing took out the dirt; and then it was discovered that the dirt was taken out of the fabric by forcing the water through it. So the washing machine was developed.

"Now, here is a solution of all the washing problems in your home. It says plenty of clean linen and plenty of clean clothing. It says longer wear for every washable thing you own. It is a Connor "Perfection" Electric Washer. Here we have the Washer, built strong enough to stand the wear and tear of heavy washings. The tub is very generous in size so as to do the work quickly and efficiently. The woman takes hold of the handle—so, and pulls it over where she wants to do her work, hitches the electric cord to an ordinary lamp socket and proceeds to put in the proper amount of water in which she has mixed the proper amount of soap. To put in the water she grasps the little knob here above the gear, pulls up the slusher, and lifts the

POOR-COPY

lid—a very easy thing to do. She puts in the clothes, closes down the lid, turns on the power, and away it goes, quiet and business-like.

"Remember all you have in the machine is water and soap, two purifying properties. The mechanical arm, at the end of which is the latest type of wooden dolly, slushes the clothes back and forth through the water, *taking out all the dirt*. It is done as well as if it were done by hand, and there is no wear, no tear, no rubbing.

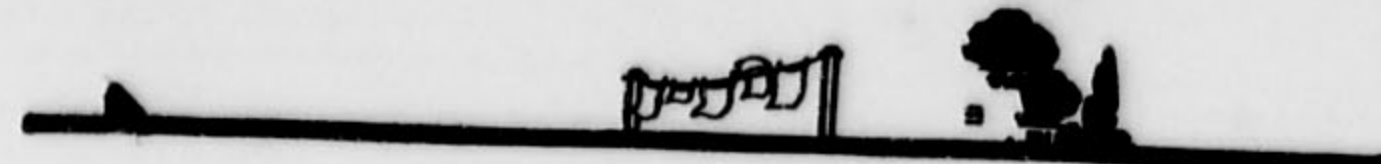

"And the woman can go on with any other work she wants to do. She doesn't have to watch the machine; doesn't have to watch the children to see that they do not get hurt with it, for all the wheels and gears are enclosed so that there isn't the slightest possibility of anyone getting hurt or caught. The Washer works on.

"When the clothing is washed, it is ready for the wringer. The clutch handle is pulled back,

Shift the lever and the Washer starts working—a child can operate it.

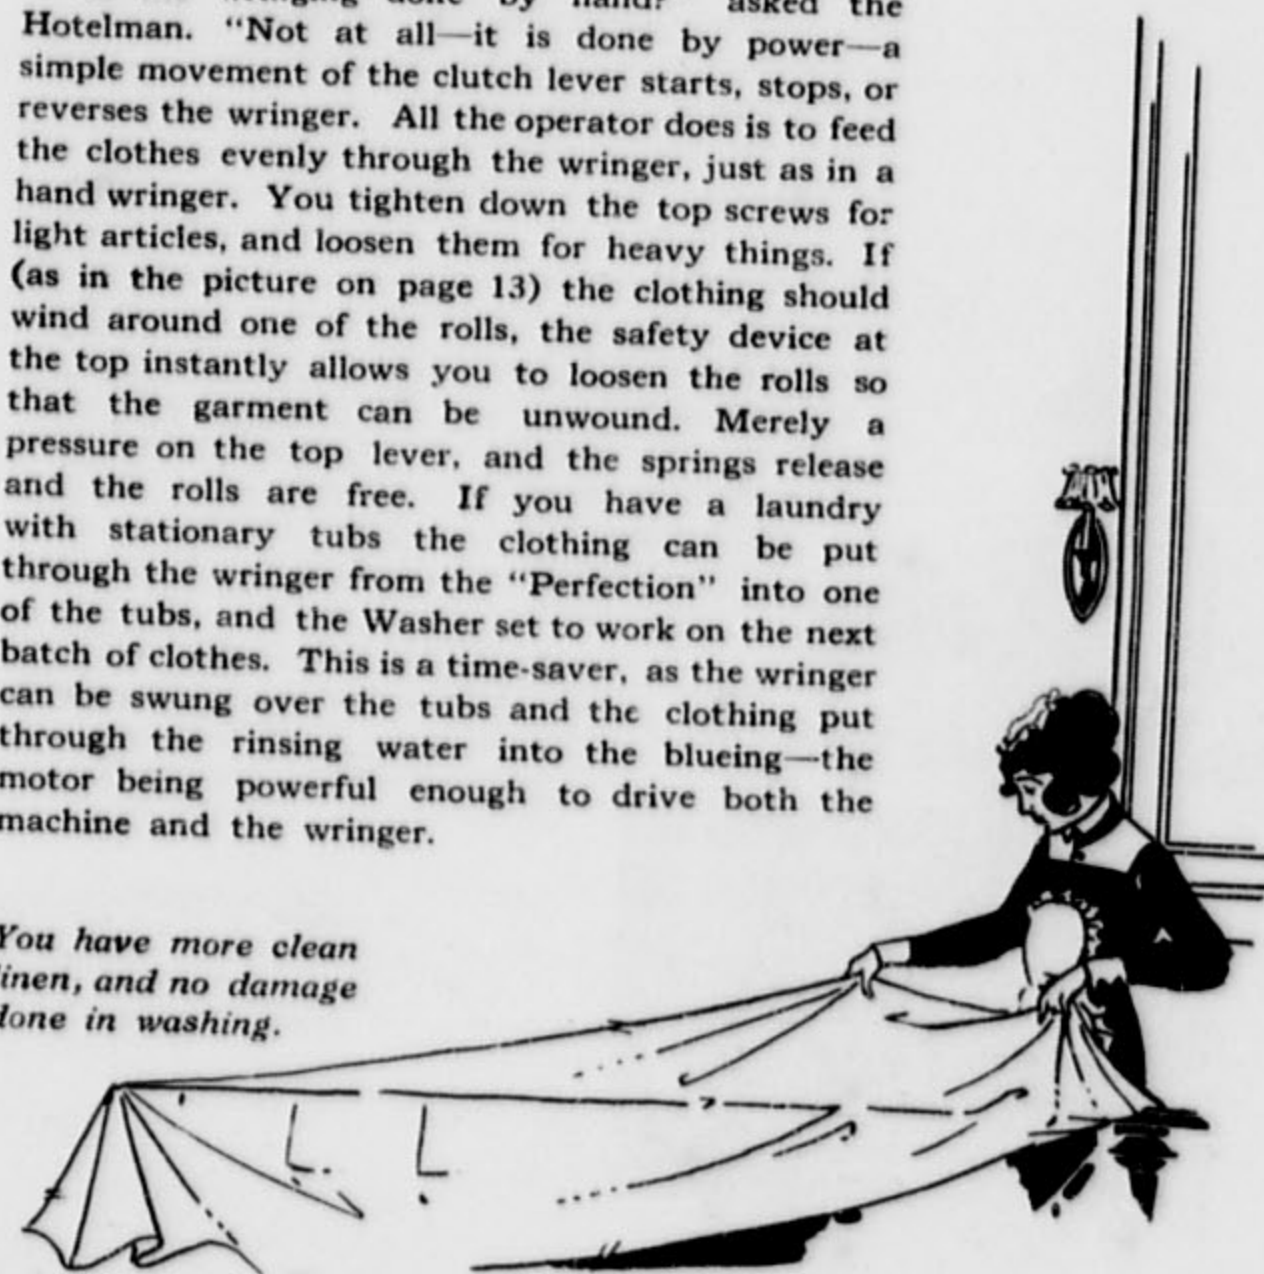

EIGHT

which stops the washing process; the cover is lifted and the wringer swung into place ready to wring out the clothes which have been washed." (Shown on Page 10.)

"Is the wringing done by hand?" asked the Hotelman. "Not at all—it is done by power—a simple movement of the clutch lever starts, stops, or reverses the wringer. All the operator does is to feed the clothes evenly through the wringer, just as in a hand wringer. You tighten down the top screws for light articles, and loosen them for heavy things. If (as in the picture on page 13) the clothing should wind around one of the rolls, the safety device at the top instantly allows you to loosen the rolls so that the garment can be unwound. Merely a pressure on the top lever, and the springs release and the rolls are free. If you have a laundry with stationary tubs the clothing can be put through the wringer from the "Perfection" into one of the tubs, and the Washer set to work on the next batch of clothes. This is a time-saver, as the wringer can be swung over the tubs and the clothing put through the rinsing water into the blueing—the motor being powerful enough to drive both the machine and the wringer.

You have more clean linen, and no damage done in washing.

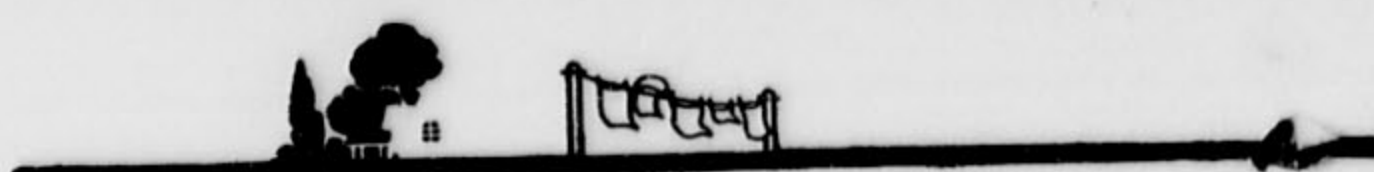

NINE

Indian Affairs. (RG 10, Volume 6447, file 882-5, part 2)

**PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA**

POOR-COPY

"At the bottom of the wringer there is a water board which can be moved from one side to the other, depending upon which side the clothes are being fed into the rolls. The twelve-inch extra wide wringer rolls are of the best quality white rubber, are soft and pliable, will wring dry and give years and years of efficient service.

"I might say right here that these wringers are the best that this or any other country produces, and have proven by years of service they are truly a woman's friend.

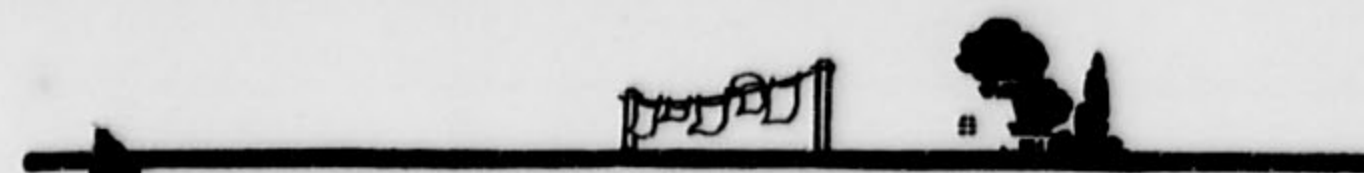

"When the washing is finished, the water can be run off in a few minutes by merely turning the tap. Usually a hose attachment will carry the water to the drain or out of the house as the case may be.

"Now in all this, the hardest work the woman has to do is to lift each garment from the water to put it through the wringer—just a few minutes' work which can be accomplished with very little effort. There is no bending over smelly sudsy water, no back-breaking rubbing, no wearing out of clothes. There are no heavy tubs to lift or empty; electricity does all the hard

The wringer can be swung out to any position and securely locked there.

TEN

work, at a cost of only a few cents per washing. You get up in the morning and do not hear any complaints about the hard work. The woman looks forward to her Connor "Perfection" Electric—she is able to get her clothes on the line in just an hour or so, depending upon the size of the washing. She has no heavy work to do, and while the clothes are being cleaned she can be doing her regular household routine work. All the washing is out of the way by the middle of the morning and when you go home at noon there is no trace of it. You have your meals in the same way you do on other days—there is no odor of soap throughout the house.

"And the best part of it all is that you have something for your money at the end of the year. You have the machine, just as good as the day you bought it, and you have clothing and linens that have not been worn out, and you know that every cent you have spent is right there in the home where you can see results.

"Now, I know that you like plenty of clean linen—clean towels daily—clean sheets a couple of times a week, clean shirts and handkerchiefs and

The over size rubber rollers of best quality will not break the buttons.

POOR-COPY

socks. And your wife and children like plenty of clean clothing. If you are a slave to the public laundries you skimp on clean clothes and clean linen; you know that every shirt or tablecloth or handkerchief that is soiled means so much added to the expense of running your home. With the Connor "Perfection" Electric Washing Machine you can forget these little expense bills; you can use all the clothing you like and know that the women of your home will not have to break their backs getting the washing done at the beginning of the week. Right here you get the *entire investment back in perfect satisfaction*—in the feeling that you are no longer a slave to the laundries.

"And the satisfaction in your home! Why, it is worth the price of the Washer to know that things are running along in a fine way, that you will not have to depend on

You can swing wringer over the stationary tubs and wring clothes while the washing goes on.

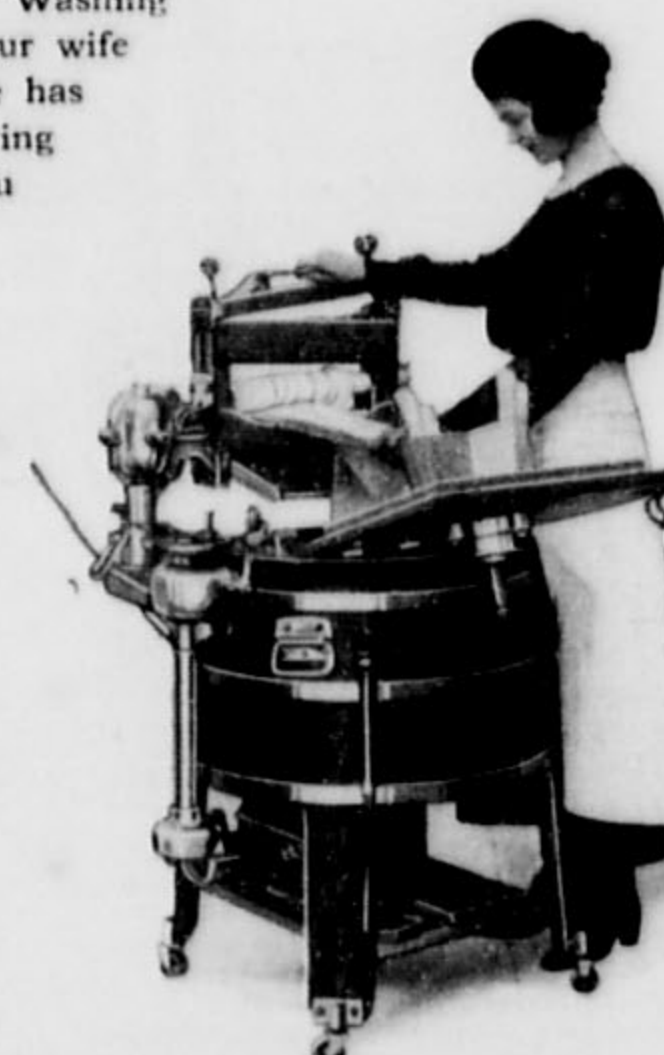

TWELVE

washing plans, that wash day will be just the same as any other as far as the work is concerned. You buy years of life for your wife, if she does the washing. You buy years of satisfaction for her in the knowledge that her clothing is being washed in her own home where she can superintend every detail of it, knowing that it is being washed clean and that it is not mixed with linens from every home in the city.

"Just as you would install a machine for farm, office or factory, to do the work in a better way, to save time and labor, you should install a Connor "Perfection" Electric Washing Machine in your home, so that your wife may conserve time and labor. She has just as much right to a labor saving device as you have — don't you think so?

"Now, when shall I send one to you?"

Safety release separates the rolls when necessary.

AND JUST THIS WORD FROM US—

ON the opposite page you will see a mechanical outline illustration of the Connor "Perfection" Electric Washer. It points out to you the many features which our friend, Jimmie Malone, explained to his friend, the Hotelman, one Monday morning.

You will note the sturdiness of the construction—the legs all of one piece from the top of the tub to the floor. There is nothing that is poorly constructed. The Connor Organization has put its very best efforts into making this Washer an economical labor saver for the thousands of women who are doing their own washing—and for those who will find it more convenient to do the washing in the home.

The gears are machine cut and run noiselessly. All connections and fittings are made so that there is no looseness to cause undue wear.

With proper care, even under the heaviest working conditions, this Washer should last a lifetime and give good service whenever used.

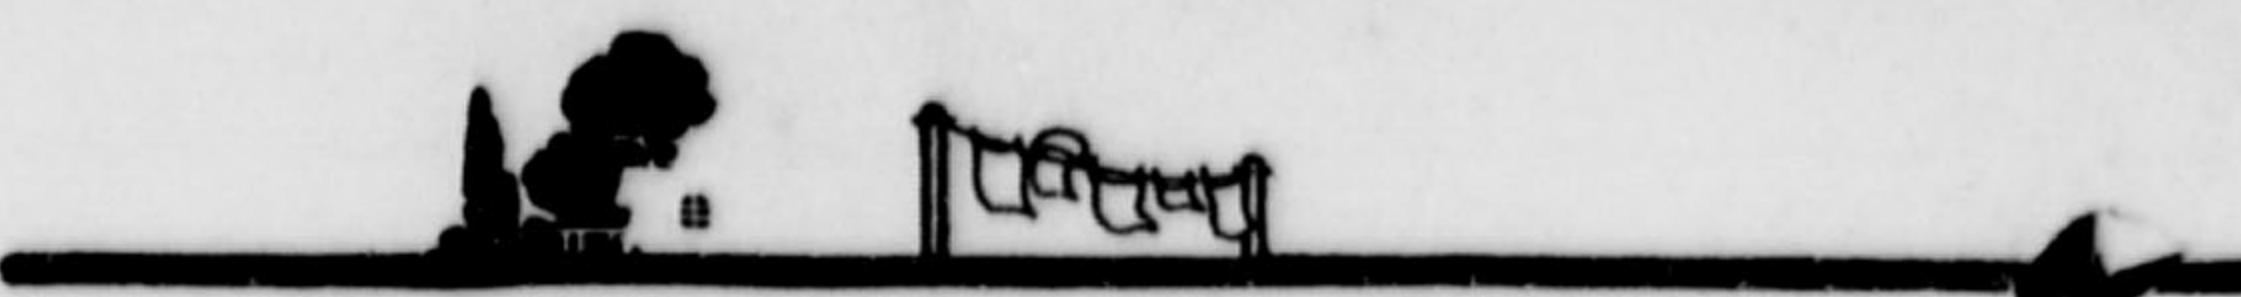

With each machine we enclose full directions, very carefully prepared, which will enable you

THE DAY OF THE WASHBOARD IS OVER A PERFECT METHOD TAKES ITS PLACE

NO longer is the washing of clothes dependent upon physical exertion—either of the housewife or of those she may employ!

After thousands of years of following in the beaten path of custom, it has been proved unnecessary to rub clothes to pieces in order to remove the dirt. It has been proved unnecessary to sacrifice human health and happiness in accomplishing a menial task.

Electricity—the greatest power for the aid of humanity discovered since the world began—is the magic force that has made this possible. This same giant of energy that has transformed the industrial world—that has meant to your husband's factory, office, farm, whatever it may be, inestimable saving of time, labor and money—has now been applied to solving the problems of the home, chief among which, as you and every woman will agree, is the problem of wash-day.

The Electric Clothes Washer is the appliance through which this force is enabled to perform its marvellous

work. And when we say that BlueBird is the "Aristocrat of Washing Machines" we are well within the facts, for BlueBird is the *de luxe* product of the industry, as well in its outward dress as in the inner details of its construction—a wonderful triumph of Canadian mechanical genius and manufacturing ability—an Electrical Washer and Wringer built for those people in every walk of life who appreciate that only quality truly represents value—built to last a lifetime and to perform the most efficient work in the shortest time and in the most economical way.

The Canadian Made BlueBird Electric Clothes Washer operates on the oscillating principle, which, by continually forcing the water through and through fabrics, washes them CLEAN without injury, wear or damage to even the frailest garments and thoroughly washes even the heaviest blankets.

The clothes are placed in the BlueBird tub, the switch is turned, and in from twelve to fifteen short minutes its rocking action has flushed the hot

suds and water through the clothes, literally thousands of times, without once rubbing them or tearing them, but cleaning them to a degree unknown to those who have not washed by this absolutely ideal process.

Then, while the second tubful of clothes is being washed by the same process, the first has passed through the **power-driven wringer** into the rinse-water, again through the same wringer into the bluing-water and from the bluing-water into the clothes basket—the quiet, sturdy little motor, actuated by the energy carried through two small wires, doing it all at a cost of from one to five cents for a whole week's wash!

If you want to know—and what woman does not want to know—the whole story of what BlueBird means to the Canadian housewife, call on your nearest dealer in electrical household appliances. If he does not handle BlueBird, write the BlueBird factory at Brantford and ask for a copy of the epoch marking book, "Out of Bondage."

CANADA

POOR-COPY

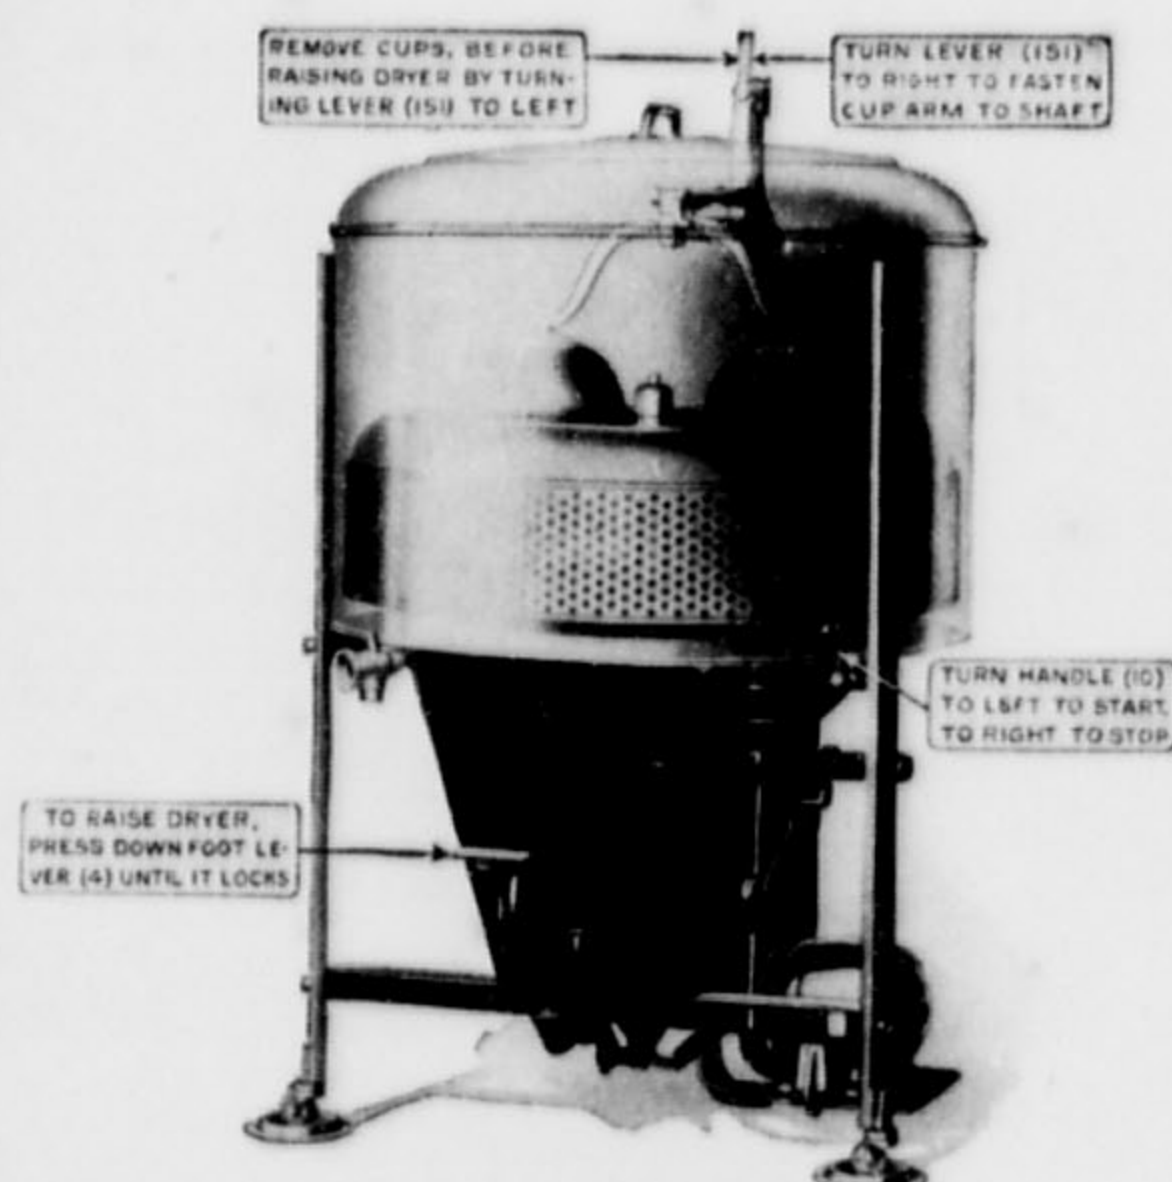

Washing Operation

ONE turn of the handle and the "LAUN-DRY-ETTE" with its polished copper vacuum cups forces the soapy water thru the clothes and thru the perforations of the inside tub, then sucks it back again until the clothes are thoroly clean.

In fifteen minutes, the vacuum cups have forced the soap and water thru the clothes, equal to three thousand nine hundred rubs on a washboard. Imagine the relief from back-ache,—tired arms and swollen hands that this remarkable machine affords.

When Extremes Meet

Rag rugs, blankets, cotton filled comforts, silks, lingerie and laces are all alike to the "LAUN-DRY-ETTE"—nothing too bulky or too fine for it to handle, and BEST of all, without the slightest injury or wear to the fabric.

PHANTOM VIEW
TUB LOWERED—READY TO WASH

THE "LAUN-DRY-ETTE" washes the clothes by the well known Vacuum Cup Process. These cups are suspended on a shaft, which works up and down while the copper inside tub containing the clothes is slowly revolving.

On the downward stroke the sudsy water is forced thru the fabric,—the bottom of the tub being perforated,—permitting the soap and water to pass thru and under the clothes, while on the upward stroke the soapy water is sucked back again thru the mesh of the clothes.

The copper vacuum cups, which come in contact with the clothes while washing, have a smooth rolled edge, so that any possibility of wear or damage to the clothes is entirely eliminated, making it possible to wash the most delicate pieces without the slightest injury.

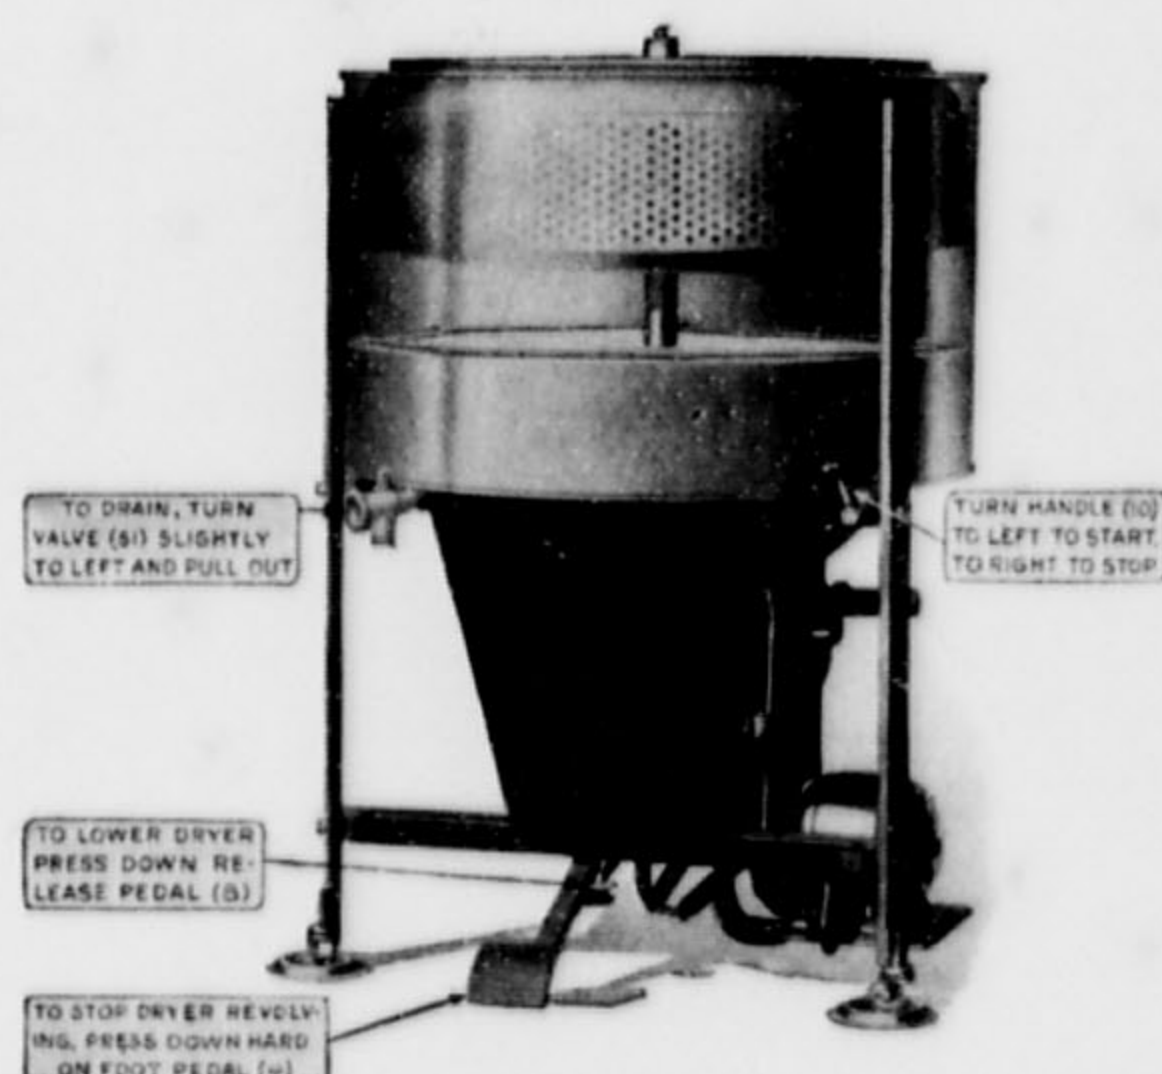

Drying Operation

THE wringerless principle of the "LAUN-DRY-ETTE" is its chief feature and is an especial boon to the housewife or laundress.

This new and patented device bridges the gap between work and ease and makes it possible to dry an entire load of clothes,—wringer dry,—in one to two minutes without handling.

Think of the time saved! In the old wringer way each piece has to be lifted out of the hot suds by hand or with a stick, and run thru the rubber rolls, regulated to suit the thickness of each article, or the clothing will not be uniformly dry. The "LAUN-DRY-ETTE" dries each piece the same, irrespective of its thickness and leaves the clothes without deep creases or wrinkles, saving time in drying and making ironing easier.

PHANTOM VIEW
TUB RAISED—READY TO DRY

THE LAUN-DRY-ETTE is the only home laundry machine on the market that DOES NOT REQUIRE A WRINGER. Using CENTRIFUGAL FORCE it dries the clothes wringer dry in one minute and thereby eliminates the many disadvantages attendant upon the use of the former. By pressing the foot pedal down, the inside tub is raised out of the water, a turn of the handle and the tub commences revolving, forcing the water out of the clothes thru the perforations.

In addition, if desired the "LAUN-DRY-ETTE" will dry a load of clothes ready to iron, if the dryer is allowed to operate approximately fifteen minutes.

DOR-COPY

WHETHER you do your washing yourself or employ a servant, it is necessary to devote a certain amount of time on wash day to the laundry,—the length of time depending upon the efficiency of the laundress or the mechanical means at hand.

In the first place,—Can you depend upon the laundress to handle your clothes as carefully as you would yourself?

Isn't it necessary to inspect the clothes after they are washed? Are they perfectly clean? Are the delicate pieces torn?

Have you lost quantities of buttons which later have to be sewed on by yourself?

Are the colors faded,—and finally, in these days of high cost of living,—have you got two dollars worth of efficiency and cleanliness?

IF necessity compels you to do the laundry work yourself, don't you want to feel free to leave the laundry if the baby cries—or a neighbor drops in? You don't want to be tied down to a wash board or a washing machine that will not operate without your undivided attention.

Now,—wouldn't it be a comfort to be able to forget all this and have an electrical servant to take all of this work and worry off your mind and when wash day arrives have your mind and hands free to do as you choose?

The "LAUN-DRY-ETTE" with its beautiful polished copper tub and its patented nicked dryer, washes and dries the clothes without handling or injury. In the succeeding page we tell you how this wonderful servant solve your wash day problem.

The Great West Washer

The wings of the overhead shafting are made of heavy castings and babbited, and are bolted to angle iron supports.

All metal parts coming in contact with water are made either of brass or galvanized iron to insure durability. All wood parts on the outside of the machine are finished with shellac varnish with black trimmings.

The tank is easily emptied by the drain pipe placed in the bottom and equipped with a gate valve of sufficient size to allow free passage of all dirt and refuse.

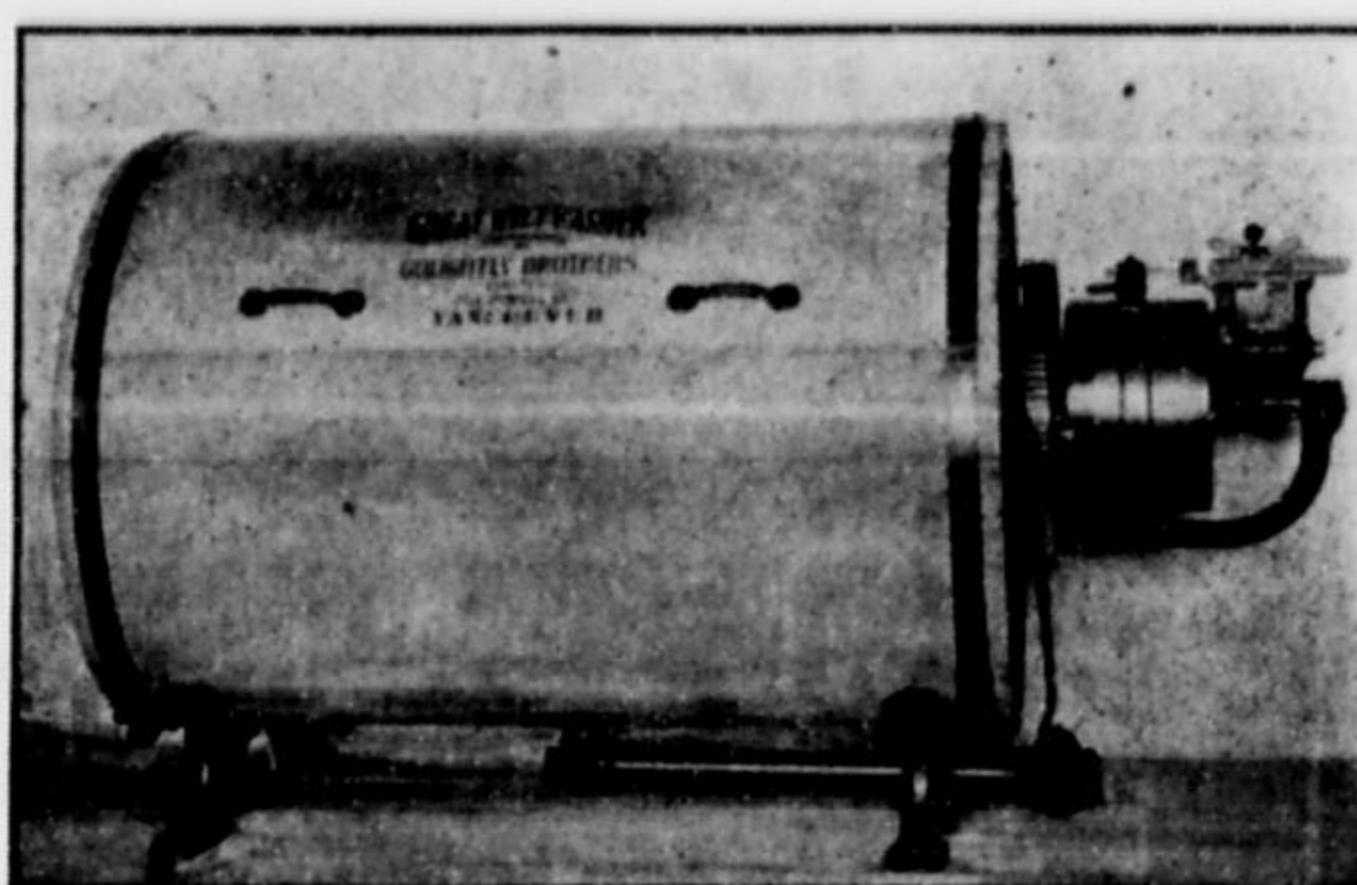

Century motors, which are absolutely reliable are used on all motor-equipped machines.

The "A" series of machines are complete in themselves, and require no installation except that required to connect the motor. They are exactly the same as illustration.

No. 2 A- 50 shirts. Inside cylinder 27 1-2 x 33 in. Floor measure 8'7 x 2' 11.
Belting, 1 1-2 & 2 in. Motor, 1-2 H.P.

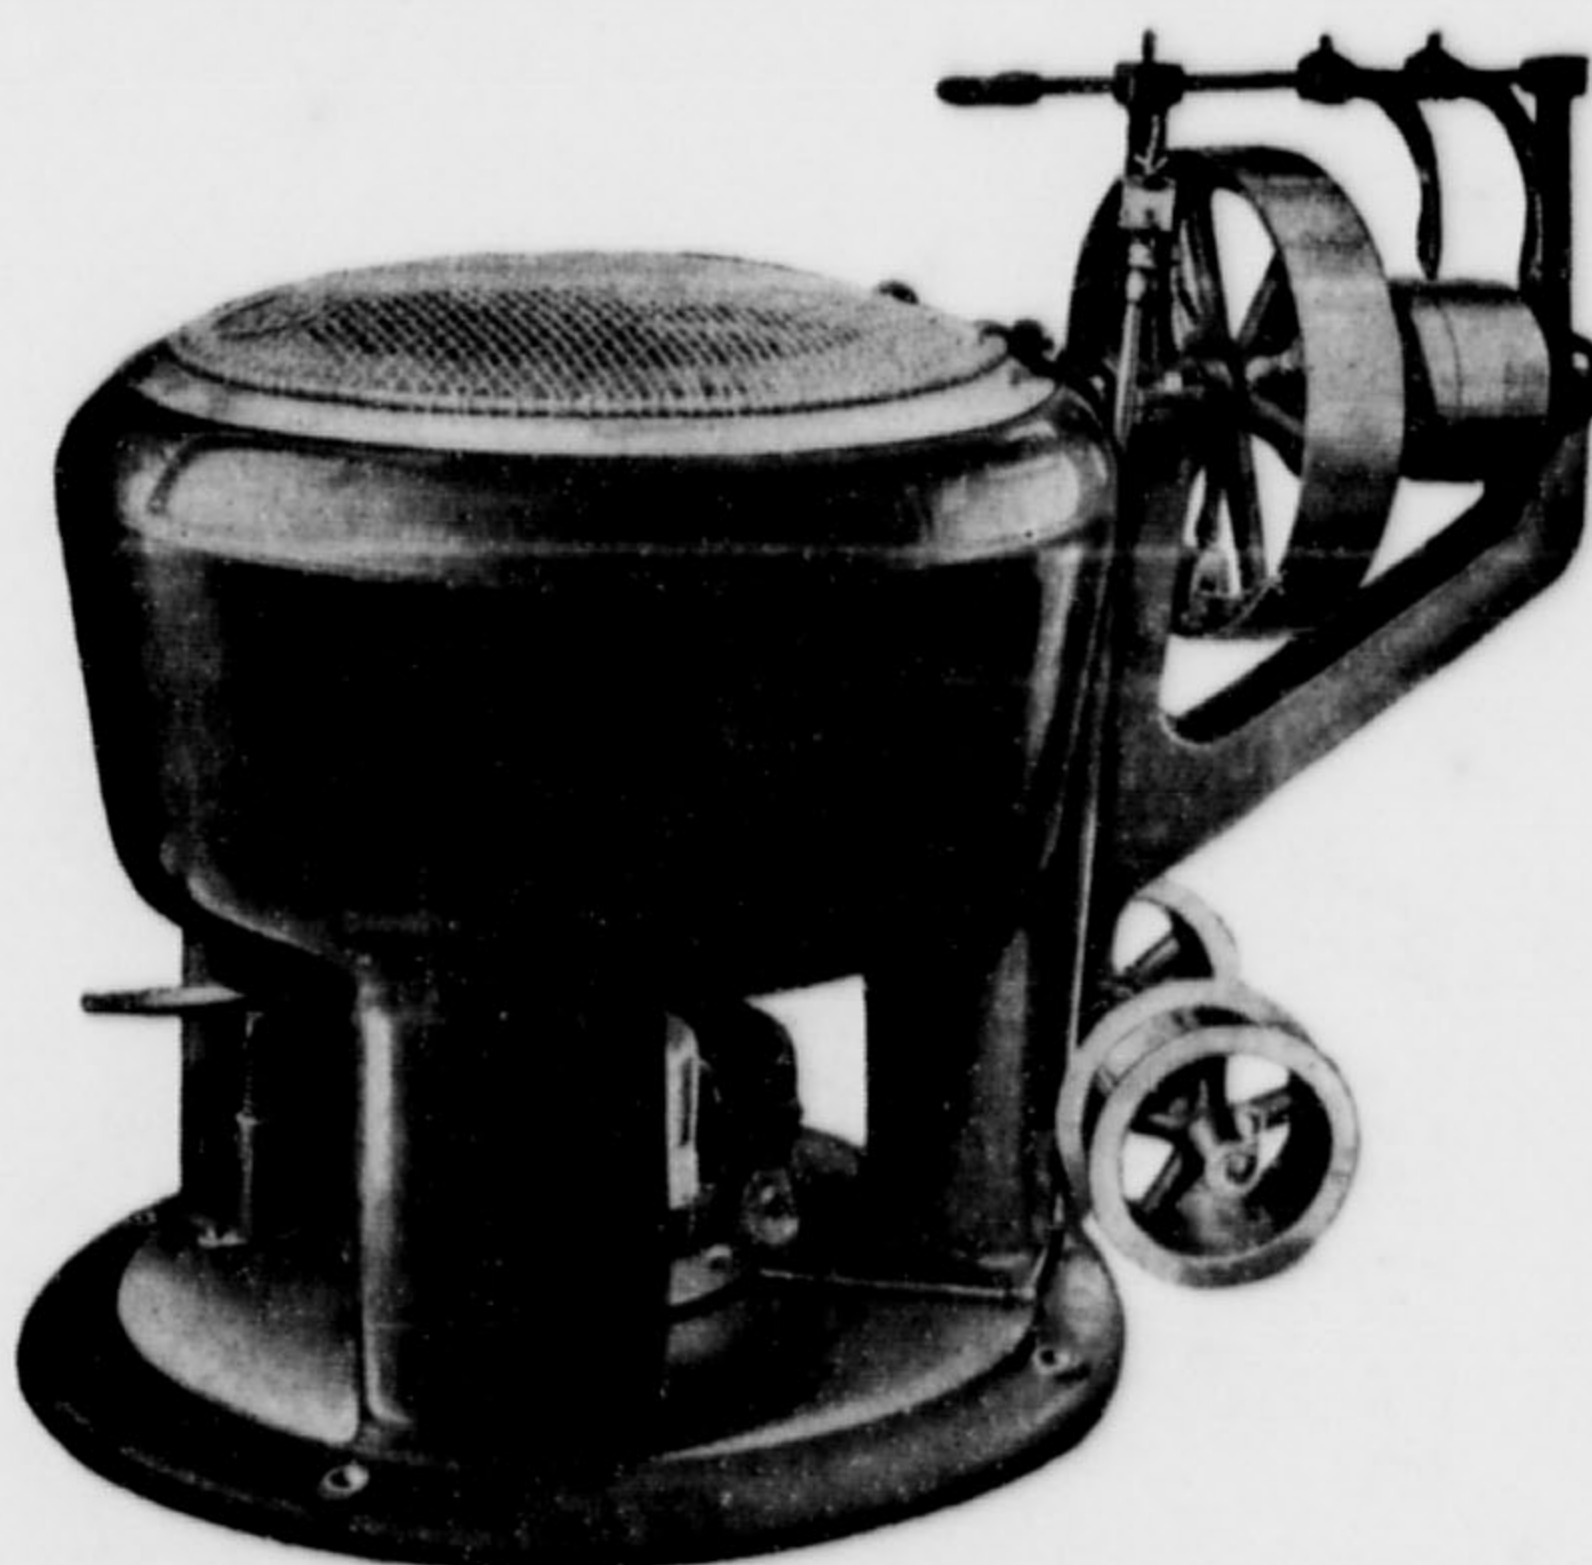

The "B" series comprises the machine only, with no motor and no overhead shafting. To install them, belting, shafting, pulleys, motor or engine, etc. is required. This type of machine was designed primarily for driving from a line shaft, or where a gasoline engine is necessary.

No. 2 B - Fifty shirts
Inside cylinder 27 1-2 x 33
Floor measure 6'7 x 2'11
Belting, 1 1-2

No. 3 B - 100 shirts. Inside cylinder, 36 x 50. Floor space 7'4 x 3'8. Belting 2 in
Larger machines built to specifications

P. O. Box 775

Victoria, B.C. 21st January, 1921.

File 116659/5.

547512

Sir:-

Referring to your letter of 26th October last in which you requested me to obtain prices for a washing machine and wringer for the Kamloops Indian Industrial School from dealers in laundry machinery and suggested that I consult with the Principal regarding the kind of machinery he required, I beg to say that I obtained prices from all the local dealers for various kinds of machines, but these all appeared to be more for household use than for an institution. I wrote to the Reverend Principal and sent him the literature dealing with these machines and he was of the opinion that none of them would be suitable for the work at the school and then suggested that Messrs. Golightly Bros., of Vancouver, manufactured a washing machine and wringer which would answer his purpose and I got in touch with this firm. This machine is called "The Great West Washer" and Messrs. Golightly Bros. informed me that one of their firm visited the Kamloops School recently and looked into the matter and concluded that the proper thing to instal would be one of their No. 2-A machines with $\frac{1}{2}$ H.P.S.P. electric motor combined as shown on the attached circular marked (A), and a piece of 13/16 shafting with two boxes and three necessary pulleys for counter shaft to drive the wringer, which is a large size one with rubber rollers and fitted with fast and loose pulleys. The price submitted is \$430.00 f.o.b. Vancouver.

The Principal informed me they also required a small laundry stove for heating irons. This can be obtained locally from the Albion Stove Works at a cost of \$11.00 f.o.b. Victoria. It will heat twelve irons at a time but would keep twenty-four irons in use, as one set of irons can be heated while the other set are being used. This stove is used a great deal in a number of the local laundries.

The other electric washing machines on which prices were obtained are as hereunder:-

- (B) Laun-Dry-Ette, wringerless washer, \$240.00 f.o.b. Victoria, Hickman Tye Hardware Company.
- (C) Blue Bird, \$200.00 f.o.b. Victoria, Carter Electric Company.
- (D) The Connor, \$150.00 f.o.b. Victoria, Messrs. Hawkins & Hayward.
- (E) The Maytag, \$150.00 f.o.b. Victoria, Messrs. Weiler Bros.

The Secretary,
Department of Indian Affairs,
Ottawa, Ontario.

Indian Affairs. (RG 10, Volume 6447, file 882-5, part 2)

ARCHIVES PUBLIQUES
CANADA

POOR COPY

Circulars dealing with these latter machines are also herewith enclosed lettered "B" "C" "D" and "E". I am of the opinion, however, that it would be of little use to the school to instal a single machine of any of these makes, the best one of which I consider to be the Laun-Dry-Ette, two of which would cost \$480.00 or \$50.00 more than a single "Great West" washing machine and wringer, and therefore think it would be best to instal one of this kind and also the laundry stove, which would cost \$441.00 plus freight to Kamloops.

Your obedient servant,

H. E. Ditchburn

Dear Mr. Scott:

I have indulgence for my little postman who, anxious to render service, picked up the unfolded letter, treating of Motor, Cutter and Alfalfa Seed, folded it, placed it in the addressed envelope and posted it, before I had collected all the price enclosures concerning the Alfalfa Seed. - The price will not exceed thirty-five cents a pound. - I shall forward them in a day or two.

Yours very truly,
James McGuire O.M.I.

April 20, 1921.

Dear Father McGuire,-

I have your letter of the 12th instant, in which you ask for some further expenditure on the Kamloops industrial school.

I regret very much that I am not able to comply with your request. I have endeavoured to be as liberal as possible, fully appreciating the character of the work that you are performing at this institution, and I have, as a matter of fact, made expenditures on this school that really should have been made from the earnings. This fiscal year, however, my funds have been still further curtailed, and the greatest economy will have to be exercised to enable us to keep our many schools on a working basis.

W. S. M. - ocl
Duncan

Dear Mr. [unclear]

At the beginning of the new year I am requesting three articles from the Department:

1. An Electric Motor of ten horse power and its installation: Approximate cost, Motor \$4.25, Install \$100.00.
2. Corn or Ensillage Cutter \$230.00.
3. Alfalfa seed, three hundred pounds: \$100.00.

Silo, corn and ensillage have passed from experiment to fixture: with the irrigation plant they are here to stay. However reluctant, I must face the Motor and Cutter.

Last year I borrowed both and was fortunate enough to escape serious damage; as it was, we lost about twenty tons. The borrowing system is bad: the machines might be damaged while with us: when our corn is ready, other is ready and we must wait; the delay thus occasioned might easily cause the loss of the entire crop by frost. This would mean disaster; hence the request.

It should be noted that last fall a meter for the use of domestic water supply was placed in the yard in preparation for the installation of the motor for the ensillage cutter: this foresight now facilitated and reduces the cost of installation.

For us the crops of corn and alfalfa possess educational value. They are easily handled, and as a result do not interfere with the boys' classes. With them and the barn and silo new, we can teach

the boys irrigation, seeding, cultivation, saving of hay, filling of silos, together with the proper care and feeding of both beef and dairy cattle. Since September the boys have not lost an hour's class. In all our improvements this point has been kept steadily in view.

In case the Department decides not to grant our entire request, might I suggest that we begin by installing the motor? We have been happy in following system. Let us not now swerve from it.

Hoping you are very well and with best wishes,

I remain,
Very truly yours,
James McGuire O.M.I.

Dear Mr. Scott:

Industrial School,
Kamloops May 16, 1921
553132

Last spring we lost some three weeks before the water could reach the top of the delivery pipe, which being of wood stave, leaked badly after drying out in the winter. We lost both time and money.

In September the Department furnished us with cement to encase the pipe. The work lasted nearly a month. The other day we primed the pump to test the quality of our work. What was our delight to find that upon turning on the switch the water gushed from the upper delivery without the pipe leaking a drop! If after being soaked with water it withstands the frost of next winter the work will be permanent.

The Department will be glad to learn that such a small expenditure gives so great an advantage. We are very pleased ourselves and we wish to thank you for it.

With best wishes,

I remain,
Very truly yours,

Ottawa, June 22, 1921.

Memorandum:

Mr. Scott.

A short time ago the Department erected a large barn in connection with the Kamloops Industrial School. At present the building is lighted by lanterns. This is a rather unsafe method in a building of this kind.

The Indian Agent has made application and recommends that the barn be wired for electric lighting. The estimated cost of the work is \$223.00, and I would recommend that the Agent be authorized to have it carried out.

2 letters

Ottawa. September 1, 1921.

Sir,-

The Department is in receipt of a letter from Rev. Jas. McGuire, O.M.I., Principal of the Kamloops Industrial School, requesting authority to purchase lumber, etc., for that institution.

He is being informed that the Department approves of the purchase of the following:-

1200 feet of flooring for the kitchen and laundry.

7 locks and 4 sheets of galvanized iron, 6 feet long, for doors and boys' washroom.

2000 feet of rough lumber for wagon tracks and spillways in the irrigation ditches.

In purchasing the above, prices should be obtained from different firms and the purchase made from the firm quoting the lowest price.

When forwarding the account it should be accompanied by a memo. showing the firms asked to quote and the prices quoted by them.

Before making these purchases you should consult the principal.

Your obedient servant

A. F. MacKenzie

Ottawa. September 1, 1921.

Reverend Sir,-

I have to acknowledge the receipt of your letter of the 19th ultimo, requesting authority to purchase material and equipment for the Kamloops Industrial School.

In reply I beg to say that, as economy has to be exercised to enable us to keep our schools on a working basis, the Department is unable to accede to all the request contained in your letter. You may, however, purchase the following:-

- (1) - 1200 feet of flooring for the kitchen and laundry.
- (2) - 7 locks and 4 sheets of galvanized iron, 6 ft. long, for doors and boys' washroom.
- (4) - 2000 feet of rough lumber for wagon racks and spillways in the irrigation ditches.

Mr. Agent Smith is being instructed to make the above purchases. Before doing so he will consult you.

Dear Mr. Scott:

The expenditure on our house has not been great. Most of its infirmities, the natural attendants of old age, we have borne ourselves. We have no intention, however, of neglecting necessary repairs.

1. We are asking flooring, twelve hundred feet, for the kitchen and laundry.

2. Seven locks and four sheets, six feet long, of Galvanized Iron, for doors and boys' washroom.

3. Seven pairs of scissors and two Singer sewing machines (now forty-five each) for the sewing room.

4. Two thousand feet of rough lumber for wagon racks and spillways in the irrigation ditches.

We are submitting this request to the Department for final decision.

With best wishes,

I remain,

Very truly yours,

James McGuire O.M.I.

De Mr. W. C. C. 562525

Only a few days ago the final details of installing the electric power and motor near the silo were completed. It will enable us to cut the ensilage, crush grain and saw wood.

You will oblige me much by conveying to the Department our due appreciation of this improvement. With gasoline there is no end of trouble and loss of time: a cold morning, carbon, batteries, spark plugs, and men and boys standing around until the bell would ring! With electricity, if there are twenty minutes for work, we can walk to the machine, throw the switch and work. At school where the clock must regulate activities, every day brings home to a man the perennial advantages of such an improvement. We appreciate it. And we are anxious that the Department should realize our appreciation.

Yours very truly,

Industrial School,
Kamloops, Feb. 10, 1922.

563277

Dear Mr. Scott:

Meat must always remain a most important factor in food or provision. We now have some sixty head of beef cattle. With our irrigation system and barn we hope to supply our own beef. This autumn there will be twelve fit for the purpose.

And now for the larder? The keeping of meat here has always been, and still remains at all seasons, a serious problem. It will now prove more serious if animals which are fit for the block in the fall must be kept over winter to be slaughtered only as needed.

A refrigeration plant I have always thought of as part of the new kitchen. But in the event of it being utterly impossible to build this year, (which I hope it is not,) would it not be possible to proceed with the construction at least of the refrigerating plant? It would obviate waste. It would not be expensive. It would be a permanent improvement answering a constant requirement. When we have not, and cannot have under existing circumstances, cellar accommodation for provisions, it is easily realized how important this feature becomes.

Hoping that this point will receive your attention at your convenience,

Mr. Duncan C. Scott,
Deputy Supt. General,
Ottawa, Ont.

I remain,
Very truly yours,
James McGuire O.M.S.

Sir,-

I have to acknowledge the receipt of your letter of the 8th instant, enclosing a communication from the principal of the Kamloops Industrial School, requesting that authority be granted to purchase kitchen utensils and wire for fencing, together with quotations received for supplying the same.

In reply I beg to say that the Department cannot authorize the expenditure involved in the purchase of these supplies.

The quotations received are returned herewith as they may be required.

Your obedient servant,

Russell C. Ferrier

Industrial School,
Kamloops, ^{Feb. 8,} Jan. 23, 1922.

Dear Mr. Scott:

In regard to the requisition which we are now presenting, I would call your attention to the Wire for fencing and to the Kitchen utensils.

Heretofore the hogs have most of the time occupied small pens between the house and the river. Our aim has been to remedy this unsanitary condition, prolific source of flies, by enclosing an alfalfa patch which makes excellent pasture. This is now ready and we wish to enclose it at once.

Like Wellington at Waterloo, we have been praying for night or Blucher to come in the form of a new house! So far we have not been quite so fortunate as the Iron Duke! We have, however, had slight reinforcements and these, especially during visits or haying time, require us to ask a slight increase, not renewal, of our Kitchen utensils.

Knowing that this requisition will receive your usual kind attention,

I remain,

Very truly yours,

James McGuire O.M.I.

EXD.

Dear Mr. Scott:

~~No Answer~~
~~Permit~~ me to say a word about
our toilets and house water system.

Our outdoor toilets in winter cause us
those troubles inseparable from their use by little
children in cold weather. They postpone the call
of nature sometimes so that accidents occur.....
In the summer we use lime and disinfectant. But
the coming warm season will force us, I am afraid,
to build new toilets.....

The water comes into our kitchen, laundry
and boys' washroom, none of which is frost-proof.
Every precaution is taken at night to drain pipes as
far as possible. Even then, there are no tools about
the place so frequently and so hurriedly pressed into
service as the saw and pipe-cutter. It is inevitable.

There is no shout nor wail about these
conditions. We try to meet them cheerfully. A year ago
I said that to put off the building of our house
more than another year would prove a dangerous
experiment. These were some of the things I had in
mind; with the course of time they become more
critical.

Is health a necessary concomitant of
adverse housing conditions?... We have sixty-five
children here with red faces and glorious appe-
tites! And plenty to satisfy them, thank God!
The motive in speaking of these matters

arises from our inability to find for them our-
selves a remedy. Besides, a knowledge of them pre-
vents surprise. - No reply is expected.

Hoping your health is as good as ours,

I remain,

March 9, 1922. 19

664452

Sir,—

I beg to report that during the winter, considerable difficulty was experienced at the Industrial School with the domestic water system.

Several freezings up of pipes occurred, and on one occasion the services of the City Electric thawer had to be secured to thaw the main from the pneumatic pump to the building. This main pipe has, no doubt, been laid several years ago, and has now become so rusted that it can hardly be used in the laundry.

On my recent visit to the School, I examined the discharge from the main through the several distributing pipes in the buildings. All showed the decay in the main, that to the laundry being the worse. The water cannot be used for washing. I was also shown garments which were washed after the water had been running for several hours, and notwithstanding this fact, there were practically ruined.

I would therefore recommend that authority be given for the purchase and laying of 325 feet of 2" galvanized pipe between the pneumatic tank and the distributing pipes in the main building and 228 feet of 1½" from thence to the laundry. 2" galvanized pipe is quoted at 42¢ a foot and 1½" galvanized at 32¢ per foot.

I am recommending the authorization of this expenditure as I consider it an absolute necessity and one which calls for immediate action.

Your obedient servant,

John L. Smith
Indian Agent.

Re Water-

116659 5, Industrial School,
Kamloops, July 13, 1922

Dear Mr. Scott:

569794

Antoine Larue, like other Kamloops Indians, cannot have sufficient water from the Paul Lake Creek. For a year I might try to supplement the supply with our pump. But this could not continue for obvious reasons.

The pump, however, for all the land West between us and the fall on the road going North, must be placed near ours. We occupy the strategic position. Our power line might, therefore, be utilized and our ditch going West likewise might be made a double part to play. - Brief, also, you need someone like me to take charge of that pump.

This is, of course, the only question worth considering in regard to the entire Reserve. - And I am discussing this question with you, not with the present Indian Agent. - You would oblige me much by stating clearly on what conditions the Department would cooperate financially for the installation of such an irrigation plant. We would hasten slowly, say a year hence.

Yours very truly,

James McGuire O.M.I.

Re Pasture

Industrial School,
Kamloops, July 13, 1922.

Dear Mr. Scott:

569796

For pasture our beef cattle must go to the Indians. This year we took them some forty miles to Adam's Lake Reserve. A scrub bull there caused us considerable damage. There is danger of the cattle crossing Cold Creek and of being lost between there and Scotch Creek Reserve: the Indians themselves built a brush fence to obviate the latter difficulty for this year.

This is a splendid range and both the Indians and I wish to use it. To do so we wish to build a wire fence from the lake to the bluff or creek cutting off the only two men causing trouble and the access to Scotch Creek.

About thirty spools of barb wire would be required at about five dollars a spool. If you could authorize us to make this expenditure or part of it we would complete the fence this fall.

Of these Indians Etienne had Adrian, Napaire and Sam at School, all now working with him, Leon had Cecilia, Rebecca, Regina, Narcisse and Lillie, the three two first respectively married, the three last still here at School. - Men of this kind explain our success here: a little aid only tends further to build the school in their minds.

Mr. Duncan C. Scott,
Deputy Supt. General, Ottawa, Ont.

Dear Mr. McLean:

567652

JUN 1 1922

Will you grant me authority to buy two thousand feet of rough lumber for flooring (mostly) and repairs for our "white house" which we are fitting up for poultry?

Our Milk Cows, dairy barn and silo, produce satisfactory results; the Beef Cattle give good promise; some forty hogs are making gains; but the Poultry, owing to improper housing, have not advanced. We wish to remedy this by the repairs requested. The portable houses, of which we have too few, given us last year by the Department, have enabled us to make important gains this spring in little pigs and chickens. What we have we wish to hold.

The Northern Construction, from whom we must buy, quoted me over the phone fourteen dollars a thousand for the lumber.

Yours very truly,

James McGuire O.M.I.

Industrial School,

Kamloops, March 8, 1922.

564765

Dear Mr. McLean:

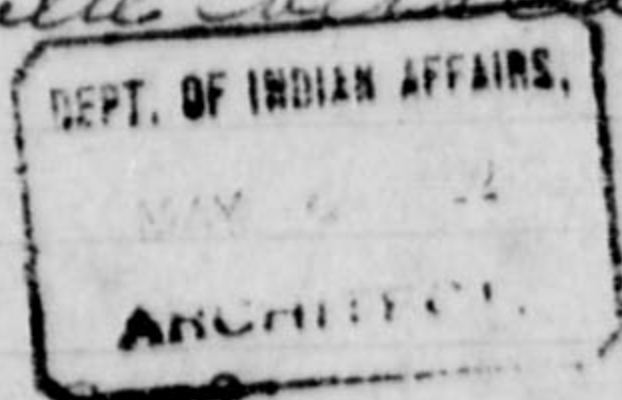

Under separate cover I am returning to you the blue print copy of the refrigerating plant.

A refrigerating plant is of prime importance here. Lack of it causes great waste and serious inconvenience.

The one portrayed, however, would require too great a quantity of ice owing to our hot summers; besides, the temperature could not be brought below freezing. To store meat during winter and to preserve it during summer we would have to freeze it.

Owing to the importance of this plant for us, I am requesting the Department to ask the Dominion Water Power Branch, at Ottawa, to allow their Office here prepare plans for a suitable plant or to modify those already sent. This would prove the safest and cheapest way.

Hoping this aid may be granted me as in the past, in a matter in which I am not well versed,

I remain,
Very truly yours,
James McGuire O.M.I.

DEPARTMENT OF INDIAN AFFAIRS

CANADA

Ottawa, March 23rd, 1922.

Approved
MEMORANDUM,

SC
To Mr. Scott.

Indian Agent Smith has reported that Kamloops Industrial School are having considerable difficulty with their domestic water supply system. The pipe supplying water to the institution is badly decayed, and the water therefore, is unfit for use in the laundry. The pipe has frozen several times during the past winter, and on one occasion it was necessary to obtain the services of the City Electric Thawer to thaw the main from the pump to the building. The estimated cost of repairing this pipe line would be \$586.00 which is \$380.00 for labour and \$286.00 for pipe.

If you give favourable consideration to their request, it might be suggested that the Department will supply the pipe, if the school authorities will look after the installation of same.

KAMLOOPS INDUSTRIAL SCHOOL

BM

I noticed at the time of my visit this summer that new buildings are needed here, with the exception of the barn, ice house and 2 pump houses. The boys' dormitory is is very poor. The main building, in which is a girls' dormitory, the offices and chapel, is fair. Two classrooms are outside - no co-education. I advised the principal to keep in mind the general plans when locating the ice house this summer. All the land is irrigated. An electric pump supplies the power and has been a wonderful help to the school. The pigs and hens are along the river bank. Father McGuire strongly recommended that an agent, sympathetic to the school and to the Oblate Fathers, doing Indian work in the vicinity, be appointed when the present one resigns. Father McGuire is quite interested in making the school a centre of farming instruction and would give active help in a following-up system for graduates.

Dear Mr. Scott:

Could I see you going to or coming from Vancouver? Even if you do not pay us a visit, I would board the train and see you for a few minutes, if you give me the date by wire or letter.

Your visit during the summer, save from a personal point of view, gave me no satisfaction. The Minister had no definite proposal to make: the other Ministers had not been consulted on the matter! -

We are trying to carry on here in spite of difficulties which should have been removed years ago. In view of this fact the very indefinite stand taken by the Government in regard to our building is very far from satisfactory. I am requesting you so to state the case to the Minister at the earliest opportunity.

We are not ugly people, Mr. Scott, but you have us in a corner and I dare say we will have to fight. Could you have anything definite on the matter before coming West? Could you put sixty thousand on the spring estimates to erect part of the main building to house the boys and teachers?

Yours very truly,
James McGuire O.M.I.

October 10, 1922.

Dear Father McGuire,-

I have your letter of the 3rd of October. As we will be preparing our estimates for the new year before very long, I think you might give me some details with reference to the capacity of the proposed new building. I think you stated to Hon. Mr. Stewart and myself that you could readily recruit from two hundred to two hundred and fifty pupils for this school. We do not of course wish to contemplate a larger building than is necessary, but on the other hand we desire adequate accommodation. If our demands on the Exchequer for this building are acceded to, it would be possible to commence work next season. Let me know your mind fully at as early a date as possible.

Yours very truly,

JCH

Duncan

Deputy Superintendent General.

REPORT
ON
PROPOSED INSTALLATION OF A REFRIGERATING PLANT
at
KAMLOOPS INDUSTRIAL SCHOOL
KAMLOOPS, B.C.

Sept 28/22

Prepared for the Department of Indian
Affairs.

by-

Dominion Water Power Branch.

Kamloops, B. C.

Sir:-

In accordance with instructions contained in your letter of August 3rd and after a consultation with the Reverend Father McGuire, I have the honor to submit for your approval the following design of a Refrigerating Plant to be installed in the Kamloops Industrial School as requested by the Department of Indian Affairs.

DESCRIPTION -

The proposed plant will be of the "Ammonia compression direct-expansion" type and will be situated in a concrete building containing two compartments having dimensions as follows.

Engine Room 8' x 5' x 7', Storage Room 12' x 9' x 8'. The temperature maintained in the Storage Room will be approximately 25°F. and sufficient space has been provided in the design, to permit of 10 beef carcasses being stored in this room at the same time, together with a large amount of eggs, vegetables and milk, etc.

INSULATION -

Insulation of the storage compartment will be obtained by the use of specially constructed walls, roof and flooring, situated inside the main concrete building as shown on the accompanying plan; each wall and roof will consist of the following material.

2 - 1 inch layers of Tongue and Groove sheeting with two layers of insulating paper between them, 1 - 6" layer of slag wool, 2 additional layers of 1" Tongue and Groove sheeting lined with insulating paper on the inside and so arranged that there is an air space of 1" between

REPORT
ON
PROPOSED INSTALLATION OF A REFRIGERATING PLANT
at
KAMLOOPS INDUSTRIAL SCHOOL
KAMLOOPS, B.C.

Sept 28/22

Prepared for the Department of Indian
Affairs.

by-

Dominion Water Power Branch.
Kamloops, B. C.

Sir:-

In accordance with instructions contained in your letter of August 3rd and after a consultation with the Reverend Father McQuire, I have the honor to submit for your approval the following design of a Refrigerating Plant to be installed in the Kamloops Industrial School as requested by the Department of Indian Affairs.

DESCRIPTION -

The proposed plant will be of the "Ammonia compression direct-expansion" type and will be situated in a concrete building containing two compartments having dimensions as follows.

Engine Room 8' x 5' x 7', Storage Room 12' x 9' x 8'. The temperature maintained in the Storage Room will be approximately 25°F. and sufficient space has been provided in the design, to permit of 10 beef carcasses being stored in this room at the same time, together with a large amount of eggs, vegetables and milk, etc.

INSULATION -

Insulation of the storage compartment will be obtained by the use of specially constructed walls, roof and flooring, situated inside the main concrete building as shown on the accompanying plan; each wall and roof will consist of the following material.

2 - 1 inch layers of Tongue and Groove sheeting with two layers of insulating paper between them, 1 - 6" layer of slag wool, 2 additional layers of 1" Tongue and Groove sheeting lined with insulating paper on the inside and so arranged that there is an air space of 1" between

Indian Affairs. (RG 10, Volume 6447, file 882-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR-COPY

them. (see accompanying plan)

Insulation of the floor will be obtained by the use of specially prepared cork insulating material 2 inches in thickness laid in hot asphalt and protected from above by a flooring of cement 2 inches in depth.

PLANT -

The proposed plant will have a capacity of 1 ton refrigeration per 24 hours and will be of the "Ammonia compression direct-expansion" type, electrically operated as follows,-

- 1 Ammonia compressor
- 1 Ammonia condenser
- 1 liquid Ammonia receiver
- 1 Oil trap

1 5 H.P. motor and belt (220 volt, 60 cycle, 3 phase,
900 R.P.M.)

Pipe coils for Storage Room

1 Congealing tank together with all mains, gauges, valves, hangers, etc.

The above plant will be installed in the engine room of the concrete building and the water for its operation will be obtained from the present domestic Water Supply tank situated in the school grounds.

A congealing tank of the following dimensions 3' x 10' x 6" will be provided in the Storage Room to obviate the necessity of operating this plant continuously for 24 hours.

BUILDING -

As stated above the building will contain 2 compartments and will be constructed entirely of concrete the floor and walls being 8" thick reinforced for temperature stresses and having a flat reinforced concrete roof 4" thick which will be carried by 1 - 8" I Beam as shown on the accompanying plan.

Sufficient excavation will be undertaken to permit of the building being placed partly below the surface of the ground and the main roof will be protected from the direct rays of the sun by an additional shade roof, constructed of timber, which will be

(3)

carried on the outside walls of the building. (see accompanying plan)

OPERATION -

The above plant is designed so that by the use of the congealing tank its operation for the full 24 hours per day will not be necessary and by the exercise of proper care that plant may be closed down for periods of from 8 to 10 hours without damage occurring to any of the foodstuffs which may be stored within the same.

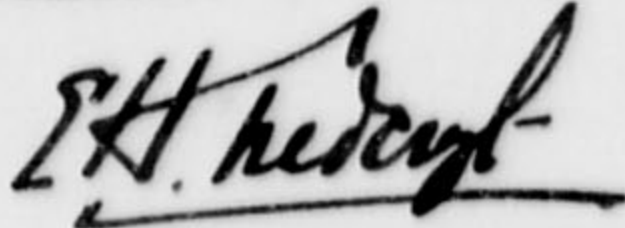

COST OF INSTALLATION -

The total cost of installation will amount to \$4286.00 and will include the construction of the concrete building and insulating compartment, the purchase and erection of all machinery, including all water and power connections, etc.

COST OF OPERATION -

The above plant will require to be operated for an average period of about 7 hours each day throughout a season 6 months in the year and will entail a monthly expenditure of approximately \$33.00 for power charges, equal to a total annual expenditure of \$198.00.

Your obedient servant,

Acting Division Engineer.

DEPT. OF INDIAN AFFAIRS,
NOV 13 1922
ARCHITECT.

116659-5B.

November 13, 1922,

Dear Sir,-

Upon request from this Department, plans and specifications were prepared by the Dominion Water Power Branch for the proposed construction of a cold storage plant for the Kamloops Industrial School, B. C.

As I understand that you have consented to have this work performed under the supervision of your District Engineer, as was previously done in similar cases, I would ask you to kindly arrange at once with that officer to proceed with this work as early as possible in accordance with the plans and specifications already submitted.

As it is found that the erection of this refrigerating plant should be proceeded with, within a limited time, it was considered advisable that this work be performed by day labour, and that all materials required should be purchased by the officer in charge in conjunction with the Indian Agent who will hire the necessary labour, all of which should be done in accordance with the Regulations of the Dominion Purchasing Commission.

I may respectfully add that it is of the greatest importance that this work should be carried out as speedily as possible as any delay would result in a considerable unnecessary expenditure for the Institution.

I am to-day sending a copy of this letter to Mr. Smith, Indian Agent, instructing him to give your officer all necessary assistance in connection with this work.

J. B. Chalmers, Esq.,
Director, Dominion Water Power Branch,
Dept. of the Interior,
Ottawa, Ont.

Your obedient servant,

J. D. McLean,
Asst. Deputy and Secretary.

Indian Affairs. (RG 10, Volume 6447, file 882-5, part 2)

November 13, 1922.

Sir,-

Encl.

I beg to enclose herewith copy of letter addressed to Mr. J. B. Challies, Director of the Water Power Branch, Interior Department, authorizing the construction of a cold storage plant for the Industrial School at Kamloops, B. C., under the supervision of their District Engineer in conjunction with you.

I would ask you to give any of the officers appointed to supervise this work, all possible assistance in order that this work might be carried out as speedily as possible; without, however, incurring any additional unnecessary expenditure.

JWS
It is understood that you are to obtain competitive prices for all materials required and that you will arrange for the hiring of the labour, which should be thoroughly competent in the respective trades employed, so that this installation, when completed, shall fully meet the purpose intended, and that it will not require further alterations, as has been the case in similar constructions.

Kindly advise me from time to time of the progress of the work, also of the names of the firms from whom prices are being invited for the refrigerating machinery only.

JWS
If possible the estimated cost of the work, \$4300.00, should not be exceeded.

Your obedient servant,

J. F. Smith, Esq.,
Indian Agent,
Kamloops, B. C.

Memorandum
Memorandum.

Honourable Charles Stewart:-

There is a recognized need of an ice house and refrigerator for the storing of beef at the Kamloops Industrial School in British Columbia. The Dominion Water Power Branch has made a report relative to the type of building and the nature of the equipment that is required. Plans and specifications have been prepared, and an estimate of \$4300 has been made by competent engineers.

I have hesitated to ask for your authority for this expenditure, but recent communications from the Rev. Father McGuire, Principal of the school, have revealed the extreme desirability of erecting the refrigerator without delay. A considerable saving will be effected this year and in a short time the building will have paid for itself.

The Dominion Water Power Branch has been approached, and they are willing to instruct their District Engineer at Kamloops to supervise the work. Their officials will purchase the materials necessary and in conjunction with the Department representative will hire the necessary labour. I am informed that the refrigerator can be ready for use in a few weeks, and the Rev. Principal has consented to postpone until the Christmas season the butchering of his cattle.

I respectfully recommend that authority be given for this expenditure. \$2172 is available from an item for this specific purpose in the Supplementary Estimates 1922-23. The funds needed over and above this amount can be provided from the General Vote for Indian Education.

Dear Mr. Ferrier:

On the occasion of your visit you informed me that our request for a refrigerator had been granted. Our beef and pork are now ready and we can learn nothing further of the plant. After so much hard work to secure these necessary articles of food, shall we be forced to throw them on the market now for nothing, and then turn round and throw away our money for miserable trash from the butcher shops, and then wonder why our children are undernourished?

It can still be erected this fall, but it is high time to begin. - If, as may prove the case, it is decided to place the refrigerator in the new house, it is not difficult to see that the new house is long past due, and that the lack of it will take the meat from the children's mouth the meat for which they and I labored faithfully.

Can you oblige us by giving us information at once?

Yours very truly,

James McQuire O.M.S.

DEPARTMENT OF INDIAN AFFAIRS

CANADA

Ottawa, October 17, 1922.

MEMORANDUM.

MR. SCOTT.

The Department is to-day in receipt of a report and estimate of the cost of a refrigerating plant, from the Dominion Water Power Branch which was prepared on a request from this Department, for the Kamloops Indian Industrial School, B. C.

As you know, it had already been decided to provide for this school an ordinary ice house for the storing of meats and other perishable food during the summer months. After giving further consideration to this project, it was considered that this kind of refrigerator would not meet the requirements of this institution. A great number of cattle kept by this school, have to be slaughtered in the Fall, owing to the lack of fodder, and the temperature which can be obtained in an ordinary ice house such as that first granted, (+40° Fahrenheit) is not sufficient to ensure the proper keeping of this meat.

The above mentioned project comprises the building of a cold storage room of sufficient space to permit the storage of ten beef carcass at the same time, together with a large amount of other food which has to be kept in a fresh condition for a short time. The low temperature required to keep the meat frozen during an indefinite period (20°) is supplied by an ammonia refrigerating plant having a congelating capacity of one ton per twenty-four hours. This machinery would consist of an ammonia compressor and condenser operated by a 5 H.P. electric motor. The cost of the building which would be built of reinforced concrete would amount to about \$1,800.00; the machinery and the extension of the power line would cost approximately \$2,500.00, making a total of \$4,300.00 for the whole installation.

With reference to the cost of operation, it would be necessary that the machinery be operated from seven to ten hours per day throughout the season of six months, entailing a monthly expenditure of \$33.00 which gives a total annual expenditure of \$198.00. This amount will, of course be paid by the school together with all other operating expenses.

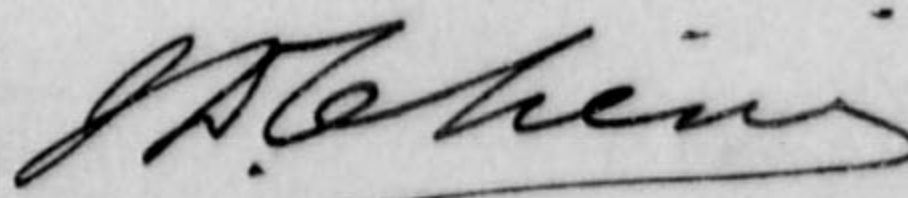

Indian Affairs. (RG 10, Volume 6447, file 882-5, part 2)

**PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA**

BOR-COPY

After carefully examining this project as submitted by the Dominion Water Power Branch, I am positive that no other scheme could meet the requirements of such an institution. The ordinary ice cooling process has never proven satisfactory in cases where large quantities of meats have to be preserved, and the cost of the construction and maintenance of a small plant of the same capacity as that already described would amount to at least \$1,800.00.

The Artificial refrigerating system would be a permanent improvement which would not incur further expenditure from the Department for its maintenance or operation, and in view of the relatively low expenditure involved, I would strongly recommend that this system only be taken into consideration in preference to the other, and that the necessary authorization be given to the Dominion Water Power Branch to proceed with the work before the cold season definitely sets in.

Departmental Engineer.

Indian Affairs. (RG 10, Volume 6447, file 882-5, part 2)

Sir,-

I beg to acknowledge the receipt of your letter of October 11th last in regard to a report covering the cold storage building for the Kamloops Industrial School. This report has been received and is forwarded herewith.

It is noted that on page 3 of the report the item "Cost of Operation" only covers the cost of power, while the cost of labour and charges for interest and depreciation, which would be important in a commercial plant, may not be necessary to consider in this case, probably some allowance should be made for supplies and for maintenance.

Re: Heating
New Building

116659-5 Industrial School,

Kamloops, Jan. 31, 1923.

578752

Dear Mr. Scott:

The heating of the new building will prove expensive in any case; it might be well to use every precaution against that expense.

The plans presented provide especially for light, somewhat to the detriment of heat. Light, as you know, abounds here: there is but little danger of having it insufficient. Might it not be well to ask the architect to reduce the window space, especially in front? As sketched it would be very warm from the sun in summer and cold in winter.

By reducing the length of the building and augmenting the width, a great saving in heat would ^{also} be effected. There would be less light but more heat.

If care were taken in the installation of the heating system to provide for cutting off the steam from any section, fall and spring heating might cost less. The boiler should burn either wood or coal.

It is well to realize that as there is no grazing land belonging to the school for beef or range cattle, neither is there any timber berth for a supply of wood. If this matter were taken up in the near future, something of the kind might be had in the vicinity of the Shuswap Lakes. Lately we have burned mill wood. At the Nor. Construction Mill, seven miles away, we

have it for the hauling. From the Adams R. Lumber Co. at Chase it costs us about three dollars a cord. Provision should be made to avail ourselves of these supplies while they last.

Would it be well to facilitate the heating of the house as much as possible? Then, to be able to burn wood or coal as expediency would demand? Would it be well to cast about in quest of a wood supply?

With best wishes,

I remain,
Very truly yours,
James McGuire O.M.S.

Replying to your letter of the 13th instant, regarding the present condition of the drainage system at the Kamloops Industrial School, I would say that I have placed this year, an item in the estimates to provide for the erection of a new Industrial school next year, which will include, of course, the installation of a complete new drainage system.

The extent of the work to be undertaken will, of course depend upon the appropriation voted by Parliament.

Deputy Superintendent General.

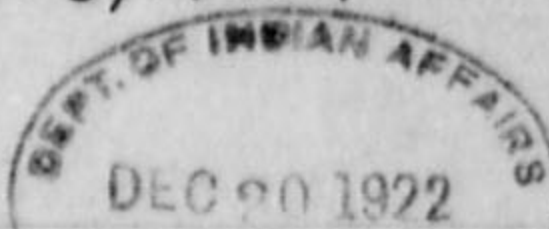

Rev. James McGuire, O. M. I.,

Re
Sanitary
System.

Industrial School,
Kamloops, Dec. 13, 1922.

576413

Dear Mr. Scott:

Might I request you to keep steadily in mind the sanitary system of kitchen and laundry when any opportunity of building offers? Any building at all capable of housing sisters and girls would relieve the situation. The kitchen and laundry would be part of it and connected with a good septic tank.

The boys would occupy the present parlor, dining room, kitchen and bakery, using the upstairs as dormitory dormitory. We would ourselves connect the present sanitary system in this part with the mains from the new building to the septic tank.

To keep the school open under the present sanitary system is a thrilling business. At the end of November we swarmed upon of a cesspool for both laundry and kitchen. Both gave out at once and both were in bad condition. As we were finishing, winter set in, the thermometer gradually descending until eighteen below zero was registered this morning! A blessing in disguise, as no evil effect can come from the overflowing of the cesspits; still, it is thrilling.

By keeping clearly in mind the prime necessity of constructing the septic tank first thing in spring you will remedy the situation - and the thrills.

Yours very truly,
James McGuire O.M.S.

Re
Sanitary
system.

Industrial School, 116659-5
Kamloops, Nov. 23, 1922.

575362

Dear Mr. Scott:

It is impossible to lay too much stress on the necessity here of a proper system of disposing of sewerage.

It is not my intention to enter into detail concerning the cesspools of the laundry and kitchen both failing at present to operate, both overflowing, the one outside, the other under the house, and both extremely dangerous for all of us.

The burden of these lines is simply once again to arrest your intention upon the necessity of erecting a portion of the main building, no matter how small a part, wherein the sisters and girls could be lodged, and especially of making proper arrangements for the disposal of sewerage. The Principal's office, the parlor, the boys' dining room and kitchen could be occupied by the boys for some time; this part was honestly constructed, the sewer pipes well laid and could in all probability be connected with the main of the new building, thus ensuring safety of health. The boys' house, now uninhabitable, would be abandoned and anxiety for the health of all relieved.

Might I request you to place the construction of a sanitary system for us foremost in your mind when thinking of building at Kamloops?

Yours very truly,

James McGuire O.M.S.

Industrial School,
Kamloops, Nov. 2, 1922.

Dear Mr. Sftt:

We are making request to the Department for an irrigation intake pipe and a few articles to aid us in making a few repairs.

Tile Pipe $1\frac{1}{2}$ ' in diameter - 125 feet long - to replace the wooden box of same length now serving as intake pipe for the irrigation pump: Cement - 6 sks.

Paint { Three gallons black to paint the pneumatic water tank.
Two " red " " wagons and implements.
Turpentine for mixing - Two gallons.

Wrenches { Two pipe wrenches. } For repairing water pipes
one monkey " } burst by frost during winter.

Nail Hammers - Two

Chisels - Two

Files - 1 doz.

Pliers - Two pairs.

Nails - Two kegs.

Lime - Two bbls. - Toilets.

} For the repair of floors,
doors and windows.

Owing to the fact of the intake pipe of the irrigation plant being laid in June, it was impossible on account of rising water to put it low enough; the following year the pipe on the pump was cut a foot shorter because sand and gravel were being sucked up from the bottom of the well. Later we cemented the well. Now we wish to sink the well and intake pipe four feet to enable us to pump earlier in

We propose to supply, crate where necessary, and deliver
F.O.B. Cars Kamloops, B. C.

Refrigeration Equipment ~~XXXX~~ on the "Linde System,"
consisting of the following principal parts :—

- One (1) Ammonia Compressor.
- One (1) " Condenser.
- One (1) Liquid Ammonia Receiver.
- One (1) Oil Trap.
- One (1) 5 H.P. Motor.
- One (1) Belt.
- One (1) Idler Pulley.
- One (1) Pipe Coils for Room.
- One (1) Congealing Tank for Room.
- Ammonia and Calcium.
- Mains, Valves, Gauges, Hangers.
- Cork Covering for exposed Cold Mains.
- Delivery Cars Kamloops, B.C.

All in accordance with detailed Specifications given hereinafter.

AMMONIA COMPRESSOR. (Vertical Enclosed Linde Type)

To be supplied of our vertical enclosed self-oiling type having 2 single acting cylinders.

Cooling Power—The compressor when working in connection with condenser and refrigerator of equal capacity has a cooling power equal to the melting of 1 tons of ice per day when working continuously for 24 hours per day at 90 revolutions per minute.

Construction—Of this compressor is such that the connecting rods as well as the main bearings are enclosed in the hollow base of the compressor, but easy of access by removing the front cover of the base. The cylinders being cast separate are securely and accurately bolted to the compressor base, therefore can be easily removed and replaced.

Cylinders—To be water-jacketed, each cylinder to have a diameter of $4\frac{1}{2}$ inches and a stroke of $4\frac{1}{2}$ inches.

Safety Heads—Each cylinder to be supplied with a safety head so that in case any foreign matter, or a rush of liquid should enter the cylinders, the safety heads will lift, thereby preventing as far as possible any damage.

Valves (patents pending)—Are so constructed that they can be readily withdrawn and examined by removing the cylinder covers. The valves are guaranteed to work mechanically silent.

Pistons—To be supplied of our double trunk construction, accurately turned and fitted with metallic rings.

Connecting Rods—To be supplied of steel with anti-friction metal bearings. The construction to be such that both bearings can be easily adjusted after removing the compressor base cover.

Crankshaft—To be made of steel and to pass through a stuffing box on the compressor base.

Flywheel—To be supplied turned and faced suitable for belt drive and to be 30 inches in diameter by 6 inches face, and to weigh about 300 pounds.

Lubrication—The compressor base is made hollow and filled with a special nonfreezing oil so that the main bearings and connecting rods are running in oil. The base cover is fitted with an oil gauge.

Oil Trap—One to be supplied by us.

Scale Trap—One to be supplied by us.

Relief Valve—One to be supplied of the automatic safety type to prevent damage in case of excessive pressure due to failure of water supply, etc.

AMMONIA COMPRESSOR

AMMONIA CONDENSER.

(Double Pipe)

To be of our latest Double Pipe Type, and to consist of **1** section. ^{his} each section to contain **6** double pipes about **7** feet long over all.

Construction—The construction of this double pipe condenser is that a $1\frac{1}{4}$ inch water pipe is placed inside of a special 2 inch lapwelded ammonia pipe. The water for condensing purposes passes upwards through the $1\frac{1}{4}$ inch pipe and the ammonia gas to be condensed passes downward between the outside surface of the $1\frac{1}{4}$ inch and the inside of the 2 inch pipes. On account of the gas and the cooling water travelling in opposite direction and on account of the small space between the two pipes, the ammonia gas is cooled and liquified quickly.

The 2 inch ammonia pipes are fitted with special ammonia flanges screwed and soldered thereon and bolted at each end to special semi-steel flanged return headers and fitted with lead gaskets, thereby securing a tight joint. The $1\frac{1}{4}$ inch water pipes are fitted at each end with unions and connected to return bends.

Where more than one section of condenser is supplied the different sections will be connected at top and bottom by special headers and each section to have a valve on the inlet and outlet, so that each section can be shut off and disconnected from the main system either for inspection or repairs without interfering with the working of the remaining sections.

Stands—Of heavy construction are supplied by us.

Liquid Ammonia Receiver—One to be supplied about **6** feet long by **6** inches in diameter and to be of suitable construction. The receiver to be supplied with inlet, outlet, and drain valves, and to have suitable stands on which to rest.

Bearings—Bearings are fitted with the best quality lubricant and are of ample proportions to insure cool running, are dust proof, self-aligning, and self-lubricating. Large oil reservoirs are provided, fitted with oil gauges, and arranged so that oil may be readily withdrawn.

Bearings are carried in the end frame castings which are bolted to the stator frame in such a manner as to permit of easy removal.

Base—All motors for belt connection are provided with sliding base to permit of tightening the belt while the machine is in operation and to insure constant alignment.

Starter—One to be supplied.

(Double Pipe)
AMMONIUM CONDENSER

MOTORS

The following induction motors to be supplied.

Number	H. P. Capacity	Cycles	Phase	Volts	Speed
1	5	60	3	220	900

The above motors will comply with the following specifications :

General—All castings to be of first quality iron or steel and free from blow holes, scabs, etc. All unfinished surfaces will be filled and rubbed down to an even finish with two coats of lead paint. All joints will be carefully machined and fitted.

Temperature—After 24 hours run at full rated load voltage and frequency the temperature rise will not exceed 40° C with accepted correction of the American Institute of Electrical Engineers for room temperature ; and will not exceed 55° C rise after 2 hours operation at 25% over load.

Stator—Ample provision is made for ventilation and cool operation of the laminated core and windings. Only the best sheet steel is used in the core laminations insulated to eliminate eddy currents.

The coils are insulated to withstand several times the rated voltage of the motor and are laid in slots and secured by wedges. The ends of the windings are protected from mechanical injury. All coils are interchangeable and coils and slots are designed to facilitate quick repairs.

The frame is of rigid construction and no distortions are possible.

Bearings—Bearings are lined with the best quality babbitt and are of ample proportions to insure cool running, are dust proof, self aligning and self oiling. Large oil reservoirs are provided, fitted with oil gauges, and arranged so that oil may be readily withdrawn.

Bearings are carried in the end frame castings which are bolted to the stator frame in such a manner as to permit of easy removal.

Base—All motors for belt connection are provided with sliding base or rails to permit of tightening the belt while the machine is in operation and to ensure constant alignment.

Starter.— One to be supplied.

EXPANSION PIPES

All expansion pipes necessary for keeping the following rooms at the specified temperatures, including all necessary flanges, return bends, valves, hangers, bolts and joints to be supplied by us.

DESCRIPTION OF ROOMS	DIMENSIONS OF ROOMS	Temperature to be Maintained
1- Freezing Room,	9' x 12' x 8' high	20°

For the above specified rooms about **235** feet run of **1½"** expansion pipes and mains to be supplied by us.

Arrangement—To be such that each room will have a separate liquid and gas valve, so that any room can be shut off from the main system without disturbing or interfering with the operation of the other rooms.

Pipes—To be of special lapwelded ammonia pipe thoroughly tested before delivery.

Flanges—To be of the square pattern of dropped forged steel or malleable iron, accurately faced and screwed and provided with male and female joints.

Return Bends—To be of semi-steel or hairpin bends.

Valves—To be of best charcoal iron or semi-steel.

EXPANSION PIPES

Congealing Tank.

We will supply one (1) Congealing Tank about
3' x 10' x 6" for Freezing Room.

This to be of 16 gauge galvanized iron.

We will supply necessary cork covering for
Cold Mains outside of rooms and Cork Sleeves for
points where Mains go through walls.

We will supply one (1) Idler Pulley for
Compressor Drive.

Ammonia Connections—Sufficient ammonia connections to be supplied to connect the various parts of the plant. It is understood that the plant is to be arranged with the various parts adjacent to each other.

These connections to consist of Pipe Mains, Valves, Flanges, Bolts, Nuts and Gaskets, also necessary Bends and Tees. Where possible all mains will be cut and flanged in our shops to facilitate erection. All ammonia pipes under ~~xxxx~~ inches diameter to be extra heavy.

1" Gauges—Consisting of **one** high and **one** low pressure gauges to be supplied by us.

Spanners—To suit each size of nut on the machine to be supplied by us.

Belting—For driving the various parts of the machinery in connection with this plant to be supplied by **us**.

Ammonia and Calcium—The first charge necessary for the testing and starting of the plant to be supplied by **us**. If the ammonia is supplied by us the cylinders remain our property and to be returned to us immediately after plant is erected, otherwise must be paid for by the purchaser within 30 days after the erection is completed.

Drawings—Showing the general arrangement of the plant and of the pipe connections between the various parts to be provided free of charge. Sufficient details are to be given in the drawings to enable the work to be erected. Instructions for starting and working the plant to be supplied by us.

Testing—All parts of the plant will be thoroughly tested by hydraulic or air pressure in our shops before delivery, and if the plant is erected by us, same will be tested after erection by air pressure to assure that all joints are tight and properly made before charging with ammonia.

Delivery—The plant will be delivered F. O. B. our Works freight paid to **Kamloops, B.C.** in **two** weeks from date of order, unless delayed by causes over which we have no control such as Fires, Acts of God, Riots, Strikes, Carriers delay or similar commotions of any kind.

Fire Insurance.—As soon as the whole or any portion of the above plant is delivered on your premises, you to insure same (with loss payable to us) against loss or damage by fire, in a first class Insurance Company, for the total amount as per contract price, and to keep it fully insured until the full amount for the plant has been paid to us in cash. The receipts for the premium as well as the policy to be delivered to us.

It is understood that all damage or destruction occasioned directly or indirectly by fires, etc., to the plant or any portion of it, on your premises shall be borne by you whether the plant be wholly or only partly erected or be lying unerected and notwithstanding any arrangements as regards terms of payment, and that the value of the plant or such portion of it as may be so damaged or destroyed shall be paid by you to us within thirty days from the happening of such damage or destruction.

Property Rights.—It is specially understood and agreed that the title, ownership and right of possession in the said machinery and plant shall not pass from us, notwithstanding its delivery to you, until the whole price thereof shall have been paid to us in cash; and it is further agreed that we shall have the right, in case of default by you in any of the payments as stipulated herein, or any note or notes given by you in connection herewith to take possession of the machinery and plant, and to retain all sums which may have been paid by you to us on account thereof, as a rental charge therefor without prejudice to any rights under this contract or by way of damages. It is furthermore understood and agreed that in case of a judgment obtained against the purchaser that the judgment does not merge or interfere with any of our rights under our lien or property rights.

Guarantee.—We guarantee you against all suits at law for infringements of patents.

We undertake to replace free on your premises, any part of our machinery that may fail within twelve months from date of delivery, owing to original defects in the material or workmanship.

We guarantee that the plant when erected according to the drawings supplied by us, and operated in exact conformity with our instructions, shall be capable of doing the following work :

Equal the melting of one ton of ice per twenty-four hours, and keep cool one Refrigerator as specified.

Under the following conditions:—That sufficient dry steam, electric current of specified characteristics, or other driving power is supplied by you to run our machinery the necessary hours per day at the specified speed. That sufficient cooling water is supplied to the Condenser at initial temperature of 60° Fahr. That the various rooms and all the cold pipes exposed to the atmosphere are thoroughly and efficiently insulated. That the doors of the cold rooms are not kept open unnecessarily.

Page 8.

ARCHIVES PUBLIQUES
CANADA**

POOR COPY

CONTRACT

If, under these conditions, you are unable to obtain the guaranteed results, we agree (if called upon to do so within 60 days after completion of the erection of the plant) to have our engineer, or engineers, make tests, and should he or they not succeed in demonstrating the full guarantee of the plant, we agree to supply a larger plant (which will do the guaranteed work) without additional cost to you. It is, however, distinctly understood and agreed upon, that our entire liability is limited to the enlarging of our plant.

If our engineer, or engineers, should show that the plant is capable of accomplishing the above guaranteed work under the conditions as stated above, then you agree to pay to us, his or their salary and expenses in connection with such tests.

Taxation—All local or provincial taxes liable to be levied on outside Companies or their employees to be paid by the purchaser.

Verbal Understanding—It is distinctly understood and agreed that outside of what is stated in this Proposal and Specifications there is no verbal understanding of any kind. Any changes or alteration must be in writing and signed by both parties.

All proposals, specifications and prices submitted are for immediate acceptance and subject to change without notice and also subject to the approval of the Head Office of The Linde Canadian Refrigeration Co. Limited, at Montreal.

Exclusions—This offer is exclusive of all masons', bricklayers', excavators' and carpenters' work other than specified. Cutting away and making good to walls, ceilings, doors or partitions through which our pipes have to pass, of any foundations, of any water or drain connections, ^{in excess of 10 ft. from our work} of any insulation to the various rooms, ~~or cold pipes outside the rooms~~, of any transformers or wiring to the motors.

CONTRACT

The price of the machinery and apparatus according to the detailed specification attached hereto, and enumerated on pages one to **nine** inclusive, is \$**2,070.00**. **Two thousand and seventy dollars.**

This price does not include the Government Sales Tax, which according to law must be paid by the Purchaser.

PAYABLE AS FOLLOWS:

10% Cash after contract is accepted.

70% ~~70%~~ Cash on shipment of principal parts.

~~30% Cash when plant is erected ready to charge, but not later than 60 days after second payment is due.~~

20% Cash thirty days after ~~2nd~~ payment is due.
2nd

Respectfully submitted,

Erection—We to supply one engineer to erect our machinery and plant according to our specification and drawings and we will supply all labour necessary for the assistance of our engineer.

After the erection is completed and the plant started, our engineer will instruct your engineer how to operate the plant.

It is advisable that your engineer or employee who is to run the plant, should assist our engineer in the erection of our machinery so that he becomes thoroughly acquainted with the construction and arrangement of the whole plant.

It is Understood—and agreed that you are to furnish light for our men to work by, to supply necessary timber and scaffolding needed for the erection, and also provide our engineer with suitable places wherein to work and keep the machinery, tools and fittings free from damage.

Responsibility—Our engineers are supplied by us for the erection of our machinery and plant only; if our engineers do other work than specified herein, either on the Purchaser's request or otherwise, it is distinctly understood and agreed that we are not responsible or liable for such work.

Delays—After our engineers have started with the erection and they are delayed by the Purchaser in not having completed the work he has to supply under this contract, it is understood and agreed that for any such delay the Purchaser has to pay us the engineer's wages and all expenses we are put to thereby.

Damages—If while our engineers are erecting our machinery, some part or parts get broken, or if after same has been erected either by ourselves or by the purchaser, and during testing or running any part or parts of our plant are found defective, we shall use our utmost endeavour to replace such part or parts as quickly as possible. It is, however, distinctly understood and agreed that we are not liable for any damage whatsoever resulting from such broken or defective part or parts beyond replacing same free of cost to you.

Our price for the foregoing is two hundred and ten dollars, (\$210.00.)

Respectfully submitted,

Linde Canadian Refrigeration Co., Ltd.
Vancouver Office.

Dear Mr. Scott:

We are asking permission to
buy some lumber for repairs:

I. Flooring for Boys' Recreation, Girls' Recreation and Kitchen,
about Two Thousand Five Hundred Feet.

II. Rough Lumber - Four Thousand for flume repairing:
One Thousand " colony chicken house.

These repairs we were unable to undertake
last fall owing to trouble we had with the cesspools
late in the season. All this repair work we prefer
to do ourselves, as it serves as excellent material
for teaching the boys.

With best wishes,

I remain,
Very truly yours,
James McGuire O.M.S.

P.S.

The Northern Construction is the only Company
here carrying these supplies.

Kamloops, B.C.^u

Prepared for the -

Department of Indian Affairs

by- E. H. Tredcroft,
Division Engineer.

Dominion Water Power Branch -
Kamloops, B. C.
March 31st, 1923.

INTRODUCTION

Sir:-

I have the honor to inform you that at the request of the Department of Indian Affairs and in accordance with instructions received from your office on November 4th, 1922, a refrigerating plant, having a capacity of 1 ton refrigeration per 24 hours, was installed at the Kamloops Industrial School.

This plant which was constructed under the supervision of this office, was duly completed, placed in operation, and handed over to the Reverend Father McQuire on March 7th, 1923.

BUILDING

The building which is situated immediately in rear of the site chosen for the proposed new school, consists of 2 compartments as follows: 1 Engine Room 12' x 5' x 6'6" high: 1 Storage Room 12' x 10' x 8' high, and is of reinforced concrete construction, the walls and floor being 8" thick, reinforced both horizontally and vertically for temperature stresses, and the roof being of reinforced slab design, 5" in thickness, carried on 1 - 8" I beam as shown on the accompanying plan.

The floor of the building is situated at an elevation of 4 feet below the surface of the ground, and the building is covered by a wooden shade roof of double thickness having a

Indian Affairs. (RG 10, Volume 6447, file 882-5, part 2)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR-COPY

1" air space between the inside and outside layers, designed to protect the concrete walls and roof from the direct rays of the sun; ventilation between the two structures is provided for by means of lattice work on both front and rear gables.

PLANT

The plant which has a capacity of 1 ton refrigeration per 24 hours is of the Ammonia Compression Direct Expansion Type, electrically operated, and consists of 1 ammonia compressor, 1 ammonia receiver, 1 condenser, 1 oil trap, 1 scale trap, 1 - 3 HP, 220 volt motor together with all valves, gauges, mains, coils, fittings etc necessary for its proper operation.

The plant is situated in the smaller compartment of the main building, and was supplied and erected by the Canadian Ice Machine Company, under the supervision of the Dominion Water Power Branch.

INSULATION

Insulation of the Storage Room is obtained by means of a specially constructed compartment situated inside the concrete building (see accompanying plan) and consists of the following:-

Walls

All walls are 12" in thickness constructed of 4 layers of V joint with insulating paper between them, and so arranged that there is a 6" space between the two inside layers, this space is filled with slag-wool which is a mineral product and one of the very best heat insulators obtainable. In addition to this slag-wool insulation, the two inside layers of V joint are separated by means of 2" studding so that a 2" air space is formed, lined on the inside with 1 layer of insulating paper.

Roof

Construction of the roof is practically the same

as that of the walls with the exception that 3 layers of V joint were used in place of 4, and so arranged that there is a 6" space filled with slag-wool immediately between the two air spaces. (See accompanying plan)

Floor

Insulation of the floor is obtained by means of 1 layer of cork 2" in thickness laid in hot asphalt on the main concrete floor and covered by a surface of cement 2" in thickness.

Door

The door is of the swinging type 18" in thickness specially constructed by means of alternate layers of V joint insulating paper, and slag-wool, it is carried by two hinges and is supported at its free end by a tie rod attached to a swivel placed in the wall immediately above the hinges.

Piping

Refrigeration of the Storage Room is obtained by means of ammonia pipes situated on the walls and for this purpose approximately 400 lin. ft. of 1 1/4" dia. special ammonia pipe were installed; this piping is so arranged that by opening or closing 3 by-pass valves a section of the piping can be cut in or out of the system at the will of the operator, thus raising or lowering the temperature of the storage room without altering the speed of the machine.

In addition to the above piping a calcium congealing tank having a capacity of approximately 20 cu. ft. was installed which renders it unnecessary to maintain the compressor in constant operation throughout the full 24 hours per day, and will permit of the plant being closed down at any time, if necessary, without damage occurring to any of the food-stuffs which may be stored therein.

Ventilation

Ventilation of the storage room is obtained

Indian Affairs. (RG 10, Volume 6447, file 882-5, part 2)

**PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA**

POOR-COPY

by an electric fan which is connected with the outside air by means of a closed air pipe 3" in dia. The pipe can be opened when necessary and foul air exhausted from the room by the fan, fresh air being admitted in its place through the 1" dia. air-vent situated beside the door. (See accompanying plan)

Fittings

Both compartments are provided with electric light, and drains for the removal of waste water, while the storage room has been fitted on 3 sides with 6" x 6" timbers for the suspension of frozen meat etc. (See plan) These timbers are supported by 4 - $\frac{1}{2}$ " dia. bolts which pass completely through the roof and are securely attached to 2 - 8" x 8" timbers placed transversely across the building and supported on the main walls, this precaution obviates any strain being placed on the concrete roof, which might otherwise cause it to crack unduly.

SERVICE CONNECTIONS

Power

Power for the operation of both the compressor and electric fan is 220 volt - 3 phase - 60 cycle alternating current and is obtained from the City of Kamloops by means of connections made to the transformer situated in the vicinity of the school buildings. The erection of 200 feet of pole-line was necessary for its transmission.

Water

Water for the operation of the compressor is obtained from the present domestic water-supply pumping-plant, and is delivered to the engine room through 200 feet of $\frac{1}{2}$ " dia. water main at a pressure of approximately 40 lbs. per sq. in.

Light

Current for the illumination of the building is

obtained from the same source as that for power purposes, 250 volt lamps being used in place of the usual 110 volt.

CONSTRUCTION

The construction of the building for the above plant was under the supervision of the Dominion Water Power Branch, and was carried out by day labor during the months of December, January and February, the temperature during this period often fell to 15 degrees below zero and seldom exceeded 32° F. for more than a few hours at a time. This low temperature made the work of construction exceedingly difficult, and necessitated extreme precautions being taken to prevent damage by freezing.

Owing to the above considerations the cost of constructing this plant was approximately 5% greater than it would have been under ordinary conditions.

COST

The total cost of the above plant including cost and erection of the machinery, the construction of the buildings, insulation, fittings, water and power connections, etc. amounted to \$4,262.54. (See appendix "A")

REMARKS

The plant which is designed and installed to operate at a condenser pressure of 150 lbs. per sq. in. and a back pressure of approximately 20 lbs. per sq. in. will when operating continuously with all by-pass valves open, maintain the storage room at a temperature of 200 F. when the air outside the refrigerator is in the vicinity of 900 F. This temperature is sufficient to store meat in a frozen state for long periods.

As stated above the dimensions of the storage room are 12' x 10' x 8' and ~~and~~ after deducting for pipes, congealing tank, fan, etc., there remains a

Dear Mr. Scott:

No; I did not notice the press despatches concerning the appropriation to your Department; so word that building operations were soon to begin here was news indeed! If the appropriation is a record one, so also is the pace you are setting.

We wish to congratulate you on this good fortune. It is the result of many years of faithful service to a good cause. Your goodwill, which was never wanting, will find expression now in many places besides ours. This, together with the popular goodwill of the Canadian people, which I see voiced in the Commons, will, I hope, prove a source of personal consolation for you.

You can easily understand how glad we all are that our turn has come at last.

With best wishes,

I remain,

Very truly yours,

James McGuire O.M.I.

Dear Father McGuire,-

Replying to your letter of the 7th instant, with reference to the new proposed residential school at Kamloops, funds are provided for the building of the centre unit which includes the kitchen and boiler-room as shown on the sketch sent you.

Sketch plans were sent you some time ago for your information and criticism, and these have not yet been returned. Please, therefore, forward them to the department as soon as possible in order that the finished plans may be prepared and tenders invited for the work.

Yours very truly,

TENDERS WANTED.

SEALED TENDERS addressed to the undersigned and endorsed on the envelope "TENDER FOR INDIAN RESIDENTIAL SCHOOL AT KAMLOOPS, B. C.", will be received up to noon of the fourth day of August 1923.

Plans and specifications may be seen at the office of Inspector R. H. Cairns at Vancouver, B.C. ; the office of William Dallin, Acting Indian Agent at Kamloops; at the office of the Reverend Principal of Kamloops Indian Boarding School ; at the office of W. E. Ditchburn, Chief Inspector of Indian Agencies, at Victoria, B. C., also at the Department of Indian Affairs at Ottawa, ~~ONTARIO~~ 10.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for 10% of the amount of the tender, payable to the order of the undersigned (War Bonds of the Dominion will also be accepted as security, or War Bonds and cheque if required to make up an odd amount) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The building shall be fully completed and ready for occupation within ten months after the signing of the contract.

The lowest or any tender not necessarily accepted.

DUNCAN C. SCOTT,

Deputy Superintendent General

of Indian Affairs,

Department of Indian Affairs,
Ottawa, July 3, 1923.

Dear Sir,

I beg to enclose herewith an advertisement inviting tenders for the erection of a proposed Indian Residential School at Kamloops, B. C., and would ask you to kindly have it inserted in the following papers:

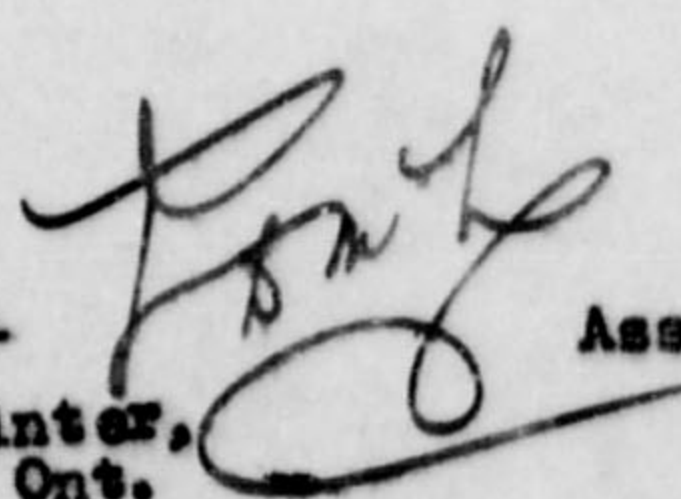

The Sun,.....	Vancouver,	(D)
The World,.....	Vancouver,	(D)
The Telegraph,.....	Kamloops,	(W)

It is thought that two insertions on alternate days in the daily papers and one insertion in the weekly paper, will be sufficient for the purpose.

Your obedient servant,

Encl. 1.

EX-100-100

Dear Mr. McLean:

We are asking you to take into consideration our request for material not to exceed One Hundred and Fifty Dollars for the erection of another silo. For both milk and range cattle our present silo is not sufficient. The present crop is progressing rapidly, and as we begin cutting about the 1st of September you can realize how pleased we would be to have an early answer.

We would ourselves of course do both the cement and carpenter work.

Thanking you in advance for your attention,
I remain,
Very truly yours,
James McGuire O.M.S.

Ottawa, July 9, 1923.

OK
MEMORANDUM.

MR. SCOTT.

A letter has been received from Reverend Father McGuire, Principal of the Kamloops Indian Residential School, asking the Department to provide him with the necessary materials to build an additional silo which is required in connection with their farming operations at the school. He states that the present crop is progressing rapidly, and that he will be pleased to have an early decision.

The Reverend Principal has offered to do all of the work required, providing the Department will furnish him with the materials, the cost of which will not exceed \$150.00, and in view of the school offering to do the work, I would recommend that the Reverend Principal be authorized to purchase the cement and lumber required.

ENDERBY BRICK COMPANY, Limited

Manufacturers Best Red Brick in British Columbia

Enderby, B. C. July 16 th 1923

Duncan C. Scott

Deputy Superintendent ~~Genl~~ General

Indian Affairs Ottawa.

Dear Sir .

536596

We wish to inform you that we can supply you with a splendid red brick for the school building at Kamloops. Our plant is in operation and 500,000 brick in stock we will make another half million providing a market is in sight.

We can supply you with this brick at a price as low as hollow tile could be supplied.

70. to 80 % of our kiln run brick would be good red facing brick.

We would like to hear from you if this material will be used on this work. This material has been used for large school and

public building in this FORTUNE SCHOOL, ENDERBY territory for the 20 years and is made from the very best of red brick clay free from lime or ~~alkali~~ Alkali.

We are close to the school site at Kamloops and freight charges would be light.

We Remain Yours Sincerely .

Sir:-

re Indian Residential School at Kamloops, B.C.

We are compiling our tender as sub-contractors on the Plumbing, Heating, Metal and Sewerage work on the above building and as the time for tendering is somewhat limited it might be that some general contractors would not be visiting the site here and consequently we would not get in touch or be acquainted with them.

We would appreciate it very much if you could acquaint any such contractors in the East, who may be tendering, that our figure on the above work is available.

We have one of the largest equipments in the West for handling this work and would like very much to get our tender in to all parties.

Thanking you in anticipation for any courtesy you can extend us in the matter,

We are,

Yours very truly,

FRONT VIEW STEAM BOILER
Showing section thru left water leg

WHY BIRCHFIELD BOILERS EXCEL

Simplicity of construction.

Electric arc welded.

Absolute free circulation of water.

No lap joints or rivet heads to burn off, leak or corrode.

No cracks or joints around the fire box to putty.

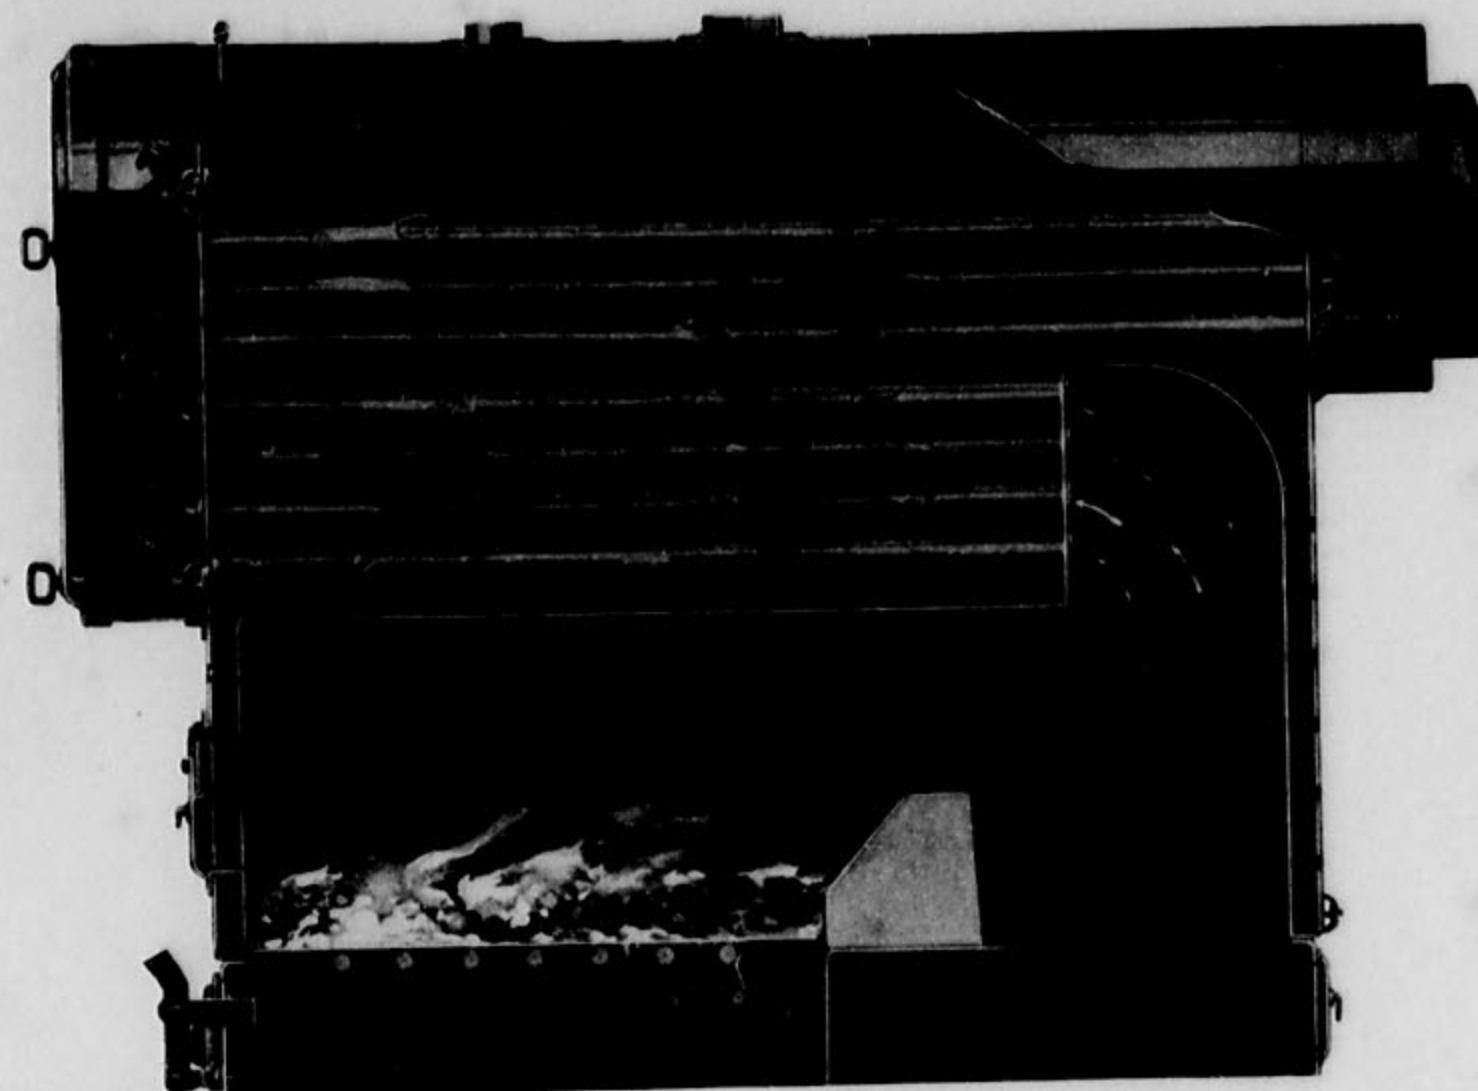

No gaskets or small parts that require renewing.

Hot gases come in contact with nothing but effective heating surface.

The boiler is well balanced.

Arrangement of tubes and water legs provides perfect steam liberation and rapidity of circulation, insuring maximum heat absorption and preventing collection of scale and sediment.

The construction permits of no air leakage. The height and length of the fire box, combined with a large combustion chamber, provides ample room for the air and heat producing gases to mix and burn, thereby reducing fuel consumption.

SECTIONAL VIEW STEAM BOILER
Showing construction and heat travel

The boiler proper is a single unit constructed of six plates of steel, fire door ring, and stay bolts joined by electric welding.

Tubes expanded and beaded.

No holes are punched through inside plates.

Smoke boxes, front and rear, are detachable.

Smoke connection is horizontal at rear of boiler.

Grates are self supporting, of the rocking and dumping type, are heavy, strong and durable, with fifty to fifty-five per cent air space.

Base is detachable.

This boiler is distinctly an advance in boiler construction. Actual tests prove that with ordinary care our boiler will save from fifteen to sixty-five per cent of the fuel required to operate any other type of boiler.

EASY TO CLEAN. EASY TO FIRE. NO REPAIRS.

BIRCHFIELD STEAM BOILERS

PATENTED OCT. 18, 1921

Birchfield Boilers will carry all the radiation shown by their capacity.
All boilers are tested to one hundred pounds cold water pressure at the factory.
Working pressure fifteen pounds per square inch.

Steam trimmings (extra, see list): Gauge and Syphon, Water Column with Gauge,
Metal Diaphragm Draft Regulator, and Safety Valve Complete.
Fire Tools: Poker, Slice Bar and Flue Scraper furnished with all boilers.

BIRCHFIELD HOT WATER BOILERS

PATENTED OCT. 18, 1921

Birchfield Boilers will carry all the radiation shown by their capacity.

All boilers are tested to one hundred pounds cold water pressure at the factory.
Firing Tools: Poker, Slice Bar and Flue Scraper furnished with all boilers.

OR-COPY

HAVE YOU A HEATING PROBLEM?

Birchfield Boilers greatly reduce fuel costs, and produce healthy, quick and adequate heat. Manufactured in different capacities suitable for buildings of all types and sizes. Built of steel, they are rugged and strong and are not subject to cracking or breaking. The design is simple, and scientifically proportioned so as to produce the most heat from the fuel used, and what is equally important to absorb a maximum amount of the heat. Birchfield Steel Boilers are easy to clean, easy to fire, efficient with wood, coal or oil, and materially reduce fuel and labor costs.

What these users say of Birchfield Steel Boilers are typical of results obtained.

"We are extremely gratified." "Fuel Oil cut in two as compared with old cast iron boiler." "Every claim more than fulfilled."

REX ARMS APARTMENTS, LOS ANGELES, CAL.

"Entirely satisfied." "Believe it is the best boiler we could have bought."
THOMAS TEBB, TEBB APARTMENTS, ABERDEEN, WASH.

"Performance leads me to believe it is without doubt the most efficient heating boiler on the American market." "I am glad to give it the highest possible recommendation."

PETERS CONSTRUCTION CO., PORTLAND, ORE.

(Mr. Peters has placed an order for his second Birchfield Steel Boiler.)

"Is giving absolute satisfaction." "House thoroughly heated with one third of the fuel used in old boiler."

L. A. WING, 1021 No. Prospect, Tacoma, Wash.

"We find the boiler most satisfactory in every way."
(installed in home, 44 Orchard Road, Prospect Hill.)

H. N. TINKER, PRESIDENT,

PUGET SOUND BANK & TRUST COMPANY

Leading architects and heating engineers of the Northwest are specifying Birchfield Steel Boilers, because they want their clients to have the best.

The phenomenal increase of Birchfield Steel Boiler users can only be accounted for by the fact that they are unequalled.

The following list of boilers installed or on order while incomplete, indicates the class of buildings for which Birchfield Steel Boilers have been selected.

Birchfield Steel Heating Boilers

Extracts from letters received indicate results obtained:

"We are extremely gratified. Fuel oil cut in two as compared with old cast iron boiler. Every claim more than fulfilled."

REX ARMS APARTMENTS,
Los Angeles.

"Entirely satisfied. Believe it is the best boiler we could have bought."

THOMAS TEBB, TEBB APTS.,
Aberdeen, Wash.

"Performance leads me to believe it is without doubt the most efficient heating boiler on the American market. I am glad to give it the highest possible recommendation."

PETER'S CONSTRUCTION CO.
Portland, Ore.

(Mr. Peters has placed an order for his second Birchfield Steel Boiler.)

"Is giving absolute satisfaction. House thoroughly heated with one-third of the fuel used in old boiler."

L. A. WING,
1021 North Prospect, Tacoma.

Birchfield Steel Heating Boilers

"We find the boiler most satisfactory in every way." (Installed in home, 44 Orchard Road, Prospect Hill.)

H. N. TINKER,
President.

Puget Sound National Bank, Tacoma.

"So far it has done everything you claim for it. Thanking you for selling me one of your boilers."

EPPS' APARTMENTS,
Chas. L. Epps, Owner.

Tacoma, Wash.

"I can only say that the most gratifying part of my home is the heating plant."

M. W. BRACHVOGEL, M. D.,
Aberdeen, Wash.

Why not use a proven superior product, which meets requirements of highest boiler authorities.

Birchfield Steel Heating Boilers

Front View Steam Boiler
Showing Section of Left Water Leg.

The Birchfield Steel Heating Boiler is Electric Arc Welded, of a simple, patented, improved design.

It is the only boiler of this type with free interior circulation.

It has two way heat travel through the flues.

The smoke boxes and base are detachable.

The grates are self supported.

Birchfield Steel Heating Boilers

There are no couplings or connections that retard circulation and cause leaks and repair expense.

All the heating surface is effective.

Made of steel, it is rugged and strong and is not subject to crackage or breakage.

It is economical to install, as costly assembling expense is eliminated.

The design is scientifically correct, enabling the boiler to produce and absorb a maximum amount of heat.

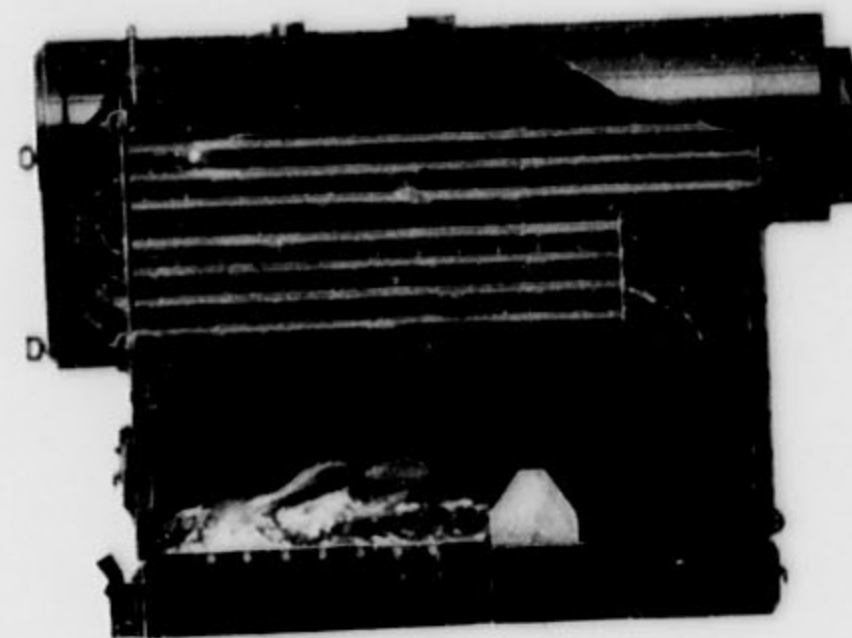

Are you using an ox team, or an automobile?

Are you using antiquated heating boilers, or Birchfield Steel Boilers?

Satisfied customers build business.

Birchfield Steel Boilers satisfy.

Birchfield Steel Heating Boilers

Sectional View Steam Boiler
Showing Construction and Heat Travel.

Many leading Architects and Engineers were quick to recognize the advantages of the Birchfield Steel Boiler, with the result that hundreds of boilers have been installed in buildings of various types and have established an enviable reputation for efficiency and fuel economy.

TENDERS WANTED

SEALD TENDERS addressed to the undersigned and endorsed on the envelope. "Tender for Indian Residential School at Kamloops, B.C.," will be received up to noon of the Fourth day of August 1923.

Plans and specifications may be seen at the office of Inspector R. H. Cairns at Vancouver, B.C.; the office of William Dallin, Acting Indian Agent at Kamloops; at the office of the Reverend Principal of Kamloops Indian Boarding School; at the office of W. E. Ditchburn, Chief Inspector of Indian Agencies, at Victoria, B.C., also at the Department of Indian Affairs at Ottawa, Ontario.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for 10% of the amount of the tender, payable to the order of the undersigned (War Bonds of the Dominion will also be accepted as security, or War Bonds and cheque if required to make up an odd amount) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The building shall be fully completed and ready for occupation within ten months after the signing of the contract.

The lowest or any tender not necessarily accepted.

DUNCAN C. SCOTT,
Deputy Superintendent General
of Indian Affairs.

Dear Sirs:

Re. Indian Boarding School, Kamloops, B.C. I notice by Trade Report that you are calling for tenders for new Indian Boarding School to be erected on Indian Reserve near Kamloops, and trust you will be using Hardwood Flooring in this building.

I may explain that I am carrying a stock of "BEAVER BRAND" Hardwood Flooring in Edmonton to take care of requirements in Alberta and Eastern British Columbia. These stocks are kept in a Heated Warehouse and in first class condition and if shipped direct from here to the job when ready should give entire satisfaction to the customer. In a building such as mentioned above however, which would likely require at least a car load, the flooring would be shipped direct from the Factory at Meaford.

At any time that this office can give you any information on Hardwood Flooring which might be required for any of your building operations in Alberta and British Columbia, I will be only too glad to hear from you.

Yours very truly

Fred M. Beatty

July 19--23.

Mr. Duncan C. Scott,
Deputy Supt. General of Indian Affairs,
Ottawa, Ont.

Dear Sir:-

RE:- Indian School for Kamloops, B. C.

We note that your specifications call for two boilers equal in every respect to Kewanee No. 416, which has 778 sq. ft. of Heating Surface for 8000 sq. ft. of Radiation.

From the enclosed Birchfield circular No. 5 you will find that Boiler No. 63I has 783 sq. ft. of heating surface for 8400 sq. ft. of radiation.

We are building these Birchfield boilers in Vancouver for Alberta and British Columbia to pass Inspection for 15 lbs. W. P. and tested to 60 lbs. Birchfield boilers are superior to the Kewanee or any other type of steel boiler in that they require less fuel, are practically smokeless and do not require brick settings. The parent Company in Tacoma have built 650 of these boilers (for steam and hot water) within the last 26 months. They have been adopted by the Seattle School Board and you will note from the enclosed photographs two boilers No. 63I which were installed in their new Columbia School.

We are manufacturing four of these boilers for new buildings and Schools in Vancouver and Victoria, in addition to which we have already installed two large steam boilers in the new Coughlan and Dollar blocks, Vancouver.

Local Heating Engineers and Contractors are submitting tenders to you based on both Kewanee and Birchfield boilers and we hope that you will give our product your favorable consideration. Our representative interviewed your Mr. R. G. Orr some time ago so that he is familiar with its many advantages.

Yours faithfully,

Vulcan Iron Works, Limited,

Dear Sir;-

*Indicate
all direct*
I have just received the plans and specifications for the Kamloops School and unless there is to be an extension of time for the tenders to be in I will not have time to get my tender ready, please advise me by wire if there will be any extension given. It took eight days for them to get here and if it takes the same time for my tender to reach you it will leave me only three days to get it out which is not enough for a building like that. Kindly give this your consideration and oblige.

I am Yours Truly
M.A.C.
M.A.C. Clark.

P.S.

As soon as the plans are ready for the school here I would like very much to have them.

TENDER FORM

DEPARTMENT OF INDIAN AFFAIRS OTTAWA, CANADA

Building Indian Residential School
Location Kamloops B.C.

I, (we) Thomas Carson Vancouver B.C.
the undersigned, hereby offer to the Deputy Superintendent General of Indian Affairs, to furnish all the necessary tools, implements, materials and labour, and to execute and complete in a satisfactory and workmanlike manner, all the works required in completing the aforesaid building, according to drawings, specifications and form of contract exhibited to me (us), and prepared under instructions of the Deputy Superintendent General of Indian Affairs, for the sum named as under.

Tender for the whole of the work as shown on drawings and described in the specifications (Amount of tender to be written) Eighty eight thousand nine hundred and eighty seven dollars
(\$88,987.00)

I, (we), herewith agree to complete the work within a period of eight months from the date of notification of acceptance of tender, and hold myself (ourselves) ready to enter into a contract for the due execution of the work.

(a) I, (we) herewith enclose an accepted cheque for \$ 8,900.00, on a chartered bank, payable to the order of the Deputy Superintendent General of Indian Affairs, equal to ten (10) per cent of the amount of the tender, as per terms of the advertisement, and specifications for this work.

(b) Attached hereto is a letter from the Manager of the Bank of _____, certifying that War Bonds to the value of _____, have been deposited in the Bank of _____ subject to the order of the Deputy Superintendent General, Department of Indian Affairs at Ottawa, Ont.

War Loan Bonds of the Dominion will be accepted as security, or War Bonds and cheque, if required to make up an odd amount.

Envelopes containing this tender are to be endorsed "TENDER FOR Indian Residential School Kamloops B.C." and addressed to the Deputy Superintendent General of Indian Affairs at Ottawa, Ont.

"TENDER MUST BE IN HANDS OF DEPUTY SUPERINTENDENT GENERAL BY 12 O'CLOCK NOON OF DATE FIXED FOR THEIR RECEPTION. CARE SHOULD THEREFORE BE TAKEN TO MAIL SAME IN PROPER TIME."

The signatures of persons tendering must be in their respective handwritings.

In the case of firms, the signature, post office address and occupation of each member of the firm must be given.

SIGNATURES, OCCUPATIONS AND POST OFFICE ADDRESS OF PERSONS TENDERING:

Thos Carson 970 8th Ave. W. Vancouver
Dated at Vancouver this 30th day of July 1923. B.C.

NOTE.—The security cheque or War Bonds will be forfeited if the person or persons tendering refuse to enter into a contract when called upon to do so or fail to complete the work contracted for. The Department does not bind itself to accept the lowest or any tender. No conditional tender which is not in accordance with the above will be considered.

NOTE.—Amount of deposit security should be indicated in space provided above.

Dear Sir;

Re- proposed new Indian School, Kamloops, B.C.
Your File #116659-5B

We have your favor of the 20th instant, also plans from you for above school.

Owing to the short time for figuring it will be necessary to wire tender to you, and we are therefore sending you enclosed letter from the Manager of the Bank of Nova Scotia at Regina certifying that War Bonds to the value of eighteen thousand dollars (\$18000) have been deposited in the Bank of Nova Scotia here subject to your order. This amount we have estimated roughly, and I feel quite sure generously.

299,985.00

The writer is going to British Columbia to complete our tender there, and will wire you same from either Kamloops or Vancouver not later than the night of August 3rd. Will mail at the same time confirmation on the form which you have prepared for the purpose.

Yours very truly,

Poole Construction Company Limited

Duncan C. Scott, Esq.,
Deputy Superintendent of Indian Affairs,
Ottawa, Canada.

Dear Sir:- Re - Indian School, Kamloops.

We enclose herewith confirmation of our telegraphed tender.

There is one feature about our tender which we wish to bring to your notice. It is with respect to granite Cut Stone. We tried from two sources to get a figure on this work from Vancouver, but all we were able to obtain was a price for the quarried material F.O.B. Vancouver. With this as a basis, we had one of the best Cut Stone men in Winnipeg prepare us an estimate. This resulted in a price of Cut Stone in Granite at \$8,700.00 F.O.B. Kamloops.

If we can buy the stone at a less figure we are prepared to give the Department a credit. We thought possibly a proper tender for it might be in the mail this morning and we could have wired you any change it made in the figures.

If we are unable to purchase granite at the price named we have based our figure on supplying Tyndall Lime Stone and giving the Department a credit of \$2,300.00 for this substitution.

Regarding the Deposit Cheque, we intended arranging this by telegram as on previous occasions, but we were unable to ascertain the amount required in time to give the necessary advice to our Bank last evening. We discovered this morning that the difference in time between Ottawa and Winnipeg made it impossible to have the cheque delivered to you before noon, so we trust the course suggested by our telegram may be followed with satisfaction.

Yours very truly,

CLAYDON COMPANY LIMITED.

Ottawa, August 7, 1923.

His Excellency

The Governor General in Council.

The undersigned begs to report that the same being necessary, plans and specifications were prepared for the first part of the new Kamloops Indian Residential School, in the province of British Columbia. Tenders were invited for the erection of this building and the following have been received,-

Thomas Carson	Vancouver	\$88,987.00
Peole Construction Co. ...	Regina	99,985.00 ✓
Claydon Company, Ltd.	Winnipeg	101,389.00
Robert Moncrieff	Vancouver	102,231.00 ✓
J. McDiarmid Co. Ltd.	Winnipeg	112,915.00 ✓
Johnston Co. Ltd.	Kamloops	113,000.00 ✓
H.A. Clark	Penticton	113,997.00 ✓
Smith Bros. & Wilson	Vancouver	121,520.00 ✓

The undersigned would recommend, pursuant to the requirements of Sub-section 2 of Section 36 of the Public Works Act that the contract be awarded to the lowest tenderer, Thomas Carson, for the amount of his tender as above cited, namely, \$88,987.00, the same being reported by the Architect of the Department as fair and reasonable, and money being available from the Vote for Indian Education.

Actg. Superintendent General
of Indian Affairs.

Ottawa, August 7, 1923.

MEMORANDUM.

Acting Deputy Superintendent General.

Plans and specifications were prepared for the first unit of the new Kamloops Indian Residential School. Tenders were invited for this building, and the following have been received :-

* THOMAS CARSON.....VANCOUVER.....\$88,987.00

Poole Construction Co.	REGINA.....	99,985.00
Claydon Company Ltd.	WINNIPEG.....	101,389.00
Robert Moncrieff.	VANCOUVER.....	102,231.00
J. McDiarmid Co. Ltd.	WINNIPEG.....	112,915.00
Johnston Co. Ltd.	KAMLOOPS.....	113,000.00
M. A. CLARK.	PENTICTON.....	113,997.00
Smith Bros. & Wilson.	VANCOUVER.....	121,520.00

All of the above firms have either submitted or arranged for the required deposit security.

As the tender of Thomas Carson of Vancouver is the lowest and a fair and reasonable price for the work, I beg to recommend that it be accepted.

Funds were provided in this year's vote for Indian Education for this building.

DENISON INTERLOCKING TILE

MORE THAN FIREPROOF

It is hard burned clay tile, protecting the builder—not against fire alone—but against the far more common troubles of winter cold, summer heat, storms, dampness and decay.

STRONG WALLS

The tile interlock and bond together so thoroughly that they will stand more sidewise pressure by actual test than a solid brick wall. When laid in the wall, the partitions or webs come directly over each other. Interlocking Tile may be used in the same manner as common brick in ordinary construction.

WARM IN WINTER COOL IN SUMMER

The many air spaces in the wall prevent heat from passing through the wall readily, therefore, the summer sun does not heat up the inside of the building. In winter the building can be heated with a smaller heating plant and with less expense for fuel.

ECONOMICAL

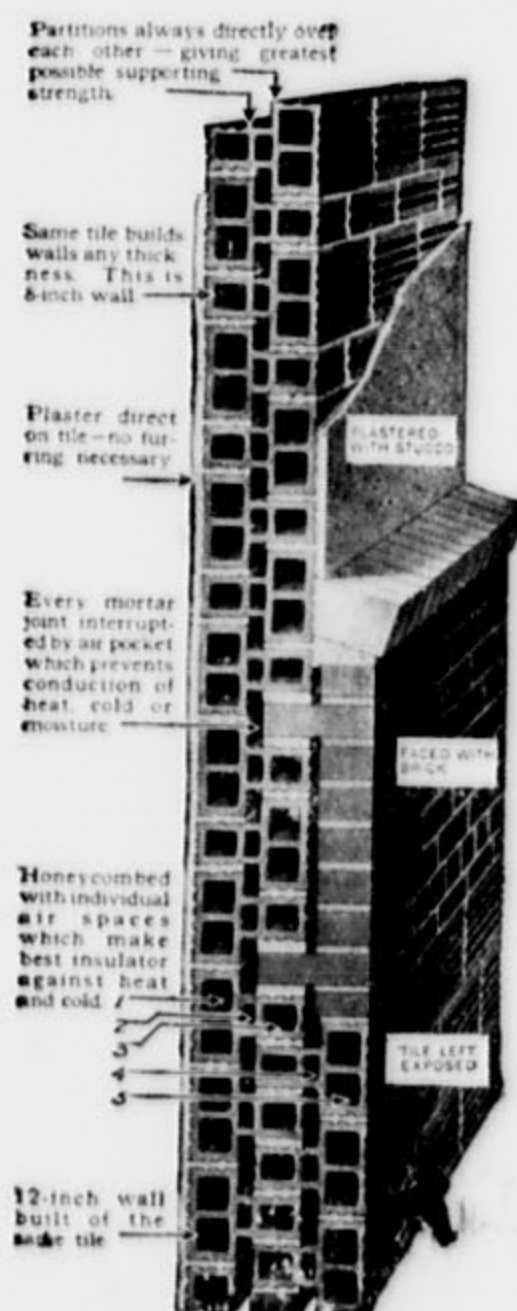

Denison Interlocking Tile requires less than one-half as much mortar as brick. It also requires much less steel to support it when used in curtain walls.

EASILY AND RAPIDLY LAID

The mason handles the tile in one hand without laying down the trowel. No other tile of equal size can be handled in this way. The mortar bed is 4 inches wide, giving a full, free spread of mortar and thorough bedding between courses. Can be laid in less time than any other form of masonry wall.

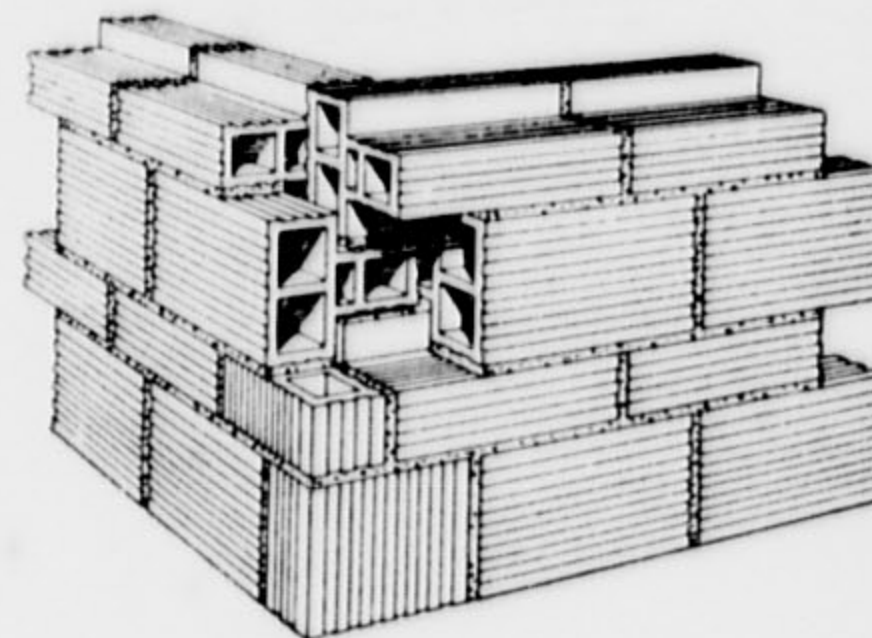

Interlocking Tile is specially adapted to construction of Factories, Warehouses, Dry Kilns, Garages, Stores, Schools, Churches, Residences.

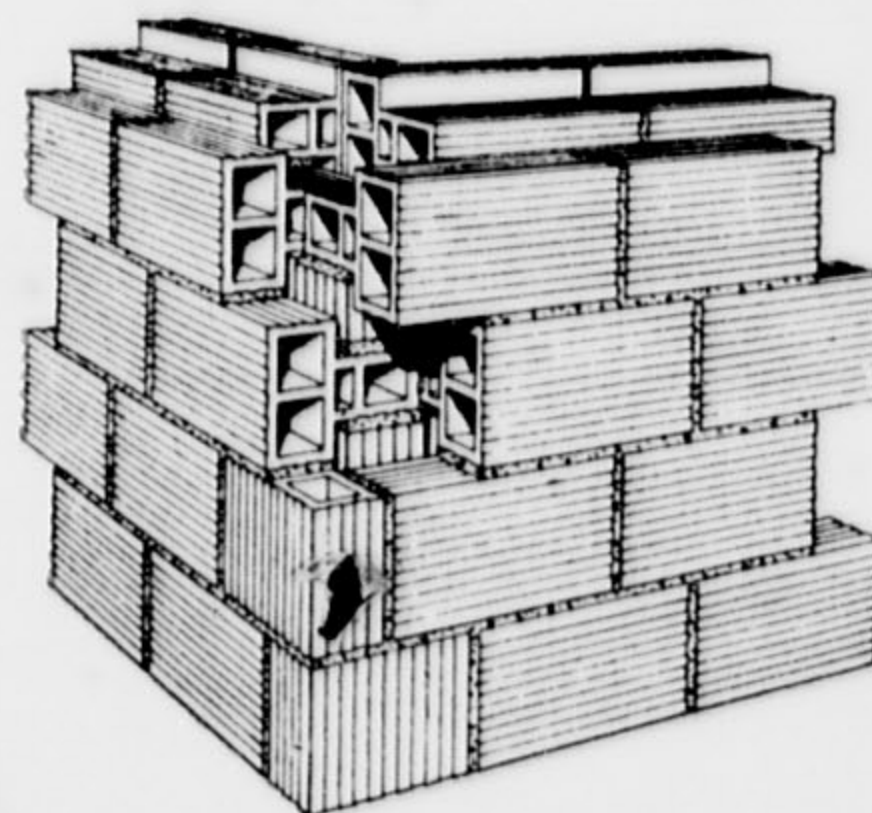

Weight of wall, inclusive of mortar, 60 lbs. per cubic foot.

SHOWING METHOD OF LAYING UP CORNERS WITH SPECIAL CORNER TILE

Dear Sir:-

We thank you for your letter of 26th inst., with reference to the proposed new Indian Residential School to be erected at Kamloops and we would appreciate very much a wire from you advising us the name and address of the successful tenderers for this building immediately it is let.

We are enclosing \$1.25 to cover the cost of telegram.

Thanking you for this information.

Yours very truly,

Mr. Duncan C. Scott,
Deputy Supt. Genl. of Indian Affairs,
Ottawa, Canada.

Dear Sir:-

We understand a large school will be erected at Kamloops and we desire to call your attention to the merits of Interlocking Hollow Tile for the walls of your building.

Interlocking Tile are manufactured of specially prepared clay under our own specifications and are thoroly hard burned and weather resisting. They are approved by Insurance Underwriters as fireproof construction. Ample strength and rigidity are provided in the web over web arrangement of the tile and the interlocking mortar joints. The small horizontal dead air spaces within the wall furnish insulation against heat, cold and moisture. The use of Interlocking Tile will make your building easy to heat in winter and cool in summer, while the saving in freight, labor and mortar in the use of the tile makes the walls less expensive than other forms of fireproof construction and they can be erected in much less time.

Interlocking Tile were used in the construction of the Prince of Wales School, Lynn Valley School and Point Grey School, Vancouver, B.C.; Oak Bay School, Victoria; Training School for Boys, Essondale, School at Armstrong, B.C., etc.

Interlocking Tile are manufactured for us in British Columbia by the Port Haney Brick Co. and sold by Evans, Coleman & Evans of Vancouver, who will be very glad to furnish you quotations.

Yours very truly,

DENISON INTERLOCKING TILE CORP.,

Dear Sir:-

I understand The Department is calling for tenders for a New Indian School, at Kamloops, B. C. I would consider it a favor to receive the appointment of inspector for this job.

It is my desire to retain my connection with the Department if possible and as I understand there is considerable work in progress and anticipation, would accept a similar position anywhere.

Thanking you for past favors, I am,

Yours faithfully,

Arthur R. Tebb,

TENDERS WANTED

SEALED TENDERS addressed to the undersigned and endorsed on the envelope "Tenders for Indian Residential School at Kamloops, B. C." will be received up to noon of the fourth day of August, 1923.

Plans and specifications may be seen at the office of Inspector R. H. Cairns at Vancouver, B. C.; the office of William Dallin, Acting Indian Agent at Kamloops; at the office of the Reverend Principal of Kamloops Indian Boarding School; at the office of W. E. Ditchburn, Chief Inspector of Indian Agencies, at Victoria, B.C.; also at the Department of Indian Affairs at Ottawa, Ontario.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for 10% of the amount, payable to the order of the undersigned (War Bonds of the Dominion will also be accepted as security, or War Bonds and cheque is required to make up an odd amount) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The building shall be fully completed and ready for occupation within ten months after the signing of the contract.

The lowest or any tender not necessarily accepted.

DUNCAN C. SCOTT,
Deputy Superintendent General
of Indian Affairs,
Department of Indian Affairs,
Ottawa, July 3, 1923.

Ottawa, August 21, 1923.

Dear Sir,-

As advised by telegram of the 16th inst., your tender of \$88,987.00 is accepted for the building of the first unit of the new Kamloops Indian Residential School.

I am sending you herewith Contract Forms in duplicate and would ask you to kindly sign same and return them to the Department; when signed by the Deputy Superintendent General, a copy will be sent you.

Three copies of the plans and specifications were sent you a few days ago. If more are required they will be sent on application.

Mr. W. H. Macaulay, Architect of Kamloops, will act as Inspector of Construction on this work, and when payments are to be made on your contract, application should be made to him.

Your obedient servant,

A. F. Mackenzie

Dear Sir:-

Re Indian School Kamloops.

Received your wire today advising that our tender was not lowest on this work.

We have figured on a lot of work for you and are very anxious to do some work for your Department, would you be good enough to send us list of tenders which you received on this work to show us how our figuring on this work compare with other contractors. This will be of material assistance to us when figuring on next work for your Department.

Yours very truly,

P.C. 1610

116659-5

The following is a true copy of a Minute of a Meeting of the
Committee of the Privy Council, approved by his Excel-
lency the Governor General on the 17TH AUGUST 1923

587955

The Committee of the Privy Council have had
before them a Report, dated 7th August, 1923, from the
Superintendent General of Indian Affairs, stating that
the same being necessary, plans and specifications were
prepared for the first part of the new Kamloops Indian
Residential School, in the province of British Columbia.
Tenders were invited for the erection of this building
and the following have been received,-

Thomas Carson.....	Vancouver.....	\$ 88,987.00
Peole Construction Co....	Regina.....	99,985.00
Claydon Company, Ltd.....	Winnipeg.....	101,389.00
Robert Monerleff.....	Vancouver.....	102,231.00
J. McDiarmid Co.Ltd.,....	Winnipeg.....	112,915.00
Johnston Co. Ltd.,.....	Kamloops.....	113,000.00
M.A. Clark.....	Penticton.....	113,997.00
Smith Bros. & Wilson.....	Vancouver.....	121,520.00

The Minister therefore recommends, pursuant
to the requirements of Sub-section 2 of Section 36 of
the Public Works Act that the contract be awarded to
the lowest tenderer, Thomas Carson, for the amount of
his tender as above cited, namely, \$88,987.00, the same
being reported by the Architect of the Department as
fair and reasonable, and money being available from the
Vote for Indian Education.

The Committee concur in the foregoing recom-
mendation and submit the same for approval.

E. J. [Signature]
Clerk of the Privy Council.

The Honourable
The Superintendent General of Indian Affairs.

Kaulap. B. C.

28th Aug. 1923

To: Mr. J. Mackenzie
Acting Asst. Secretary
Department of Indian Affairs
Ottawa

Dear Sir: "Re Kaulap. New School"

"Report by Mr. Thomas C. Carson of Vancouver whose
tender of \$88,987.00 was accepted by the Department"
Mr. Carson states as follows:-

"Plans and Specifications were received on 24th Aug. 1923
and after checking up the Estimate submitted by me I discovered
that I had altogether omitted the item of External Bricks,
consequently my tender was lower than intended,
I desire to postpone signing contract until
this matter has been considered and decided by the Department,
I should be glad if you will submit the details
to the Department and request a decision"

Mr. Carson's explanation is as follows:-

The clause under Brickwork, Page 21 of Specifications
was not considered quite clear, he was unable to decide
whether pressed bricks, or common bricks, were intended
for the face of external walling, and left the item pending
further information; eventually this item was overlooked.

Mr. Carson now wishes the Department to definitely
decide what class of brick will be accepted, in order
that he may decide the cash value of the work omitted

- | | |
|--|------------|
| ① If Common bricks are acceptable the value would be approximately | \$2,798.00 |
| ② If 2 nd quality Pressed bricks do do | \$3,595.00 |
| ③ If 1 st class Pressed bricks do do | \$7,000.00 |
- Mr. Carson strongly inclines to the view that Common

Indian Affairs (RG 10 Volume 6448, file 882-5, part 3)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

(2)

brick complies with the requirements of the ~~Department~~ ^{Superintendent}
and quotes, in support of his contention, the schools recently
ordered by the Department at Sechart and Grease Lake.
In particular Mr Carson requests decisions on the following
points

① Is the Department prepared to make any allowance
for the mistake made by him?

② The quality of brick to be invested upon.

③ Failing an allowance, will the Department permit
him to withdraw his tender; this would involve
the return of his Deposit Cheque for \$8,900.00

Mr Carson expresses regret at the mistake made
and states that he desires the favourable consideration
of the Department, failing this, however, he is
prepared to sign the contract and accept the
resultant loss.

Mr Carson is in Kamloops preparing for
an immediate start on the work, the exact location
of the Building cannot be determined until the
return of the Reverend Principal of the School, from
Vancouver, on Thursday 30th inst.

May I request that the decision of the
Department be forwarded direct to Mr Carson, and
a copy sent to me, if possible, for personal
guidance and information.

Yours obedient servant
W. H. Macaulay

September 8, 1923.

MEMORANDUM.

Honourable Charles Stewart.

A contract was awarded recently to Mr. Thomas Carson of Vancouver, at his tendered price of \$88,987.00 for the building of the first unit of the proposed new Indian Residential School at Kamloops. Mr. Carson submitted the lowest tender. The next lowest tender received was that of the Poole Construction Co. of Regina, for \$99,985.00.

A letter has now been received from Mr. W. H. MacAulay, Architect of Kamloops who was appointed Inspector of Construction for this building, advising that Mr. Carson omitted the item of external brickwork from his tender, and asking if the Department is prepared to make an allowance for the mistake made by him; also, if the Department cannot allow him for the brick, would they permit him to withdraw his tender and return his deposit security. Mr. Carson also states that he expresses regret at the mistake made, and that he desires the favourable consideration of the Department, failing this, however, he is prepared to sign the contract and accept the resultant loss.

The cost of brickwork omitted is \$2,798.00. The addition of this amount to his original tender still makes his price considerably lower than the next lowest tender, and it appears that an error was made by him in totalling up his tender. Our Architect is of the opinion that unless the contractor is allowed the item for the brickwork, that he will probably lose money on his contract. Will you please instruct me if favourable consideration can be given to Mr. Carson's request.

Mr. J. W.

Mr. J.

Industrial School Kamloops
Your letter of the 14th of this morning reading as follows:
"What progress is being made with Contract Kamloops School. Question
of following Contractor for Brick work omit is under consideration
this reply"

My reply was as follows: "Contractor has not commenced
work here. Contractor believe assigned. Have reported to
Department. Letter follows."

My mid monthly report for September gives particulars
of this question generally; in particular I would add that, as
stated in my letter of 29th August Mr. Carson, the Contractor
desired to delay the signing of the formal Contract until
the question of brick work had been decided.

In my last interview with Mr. Carson he expressed
his intention of proceeding at once with the preliminary work,
He however, without explanation, returned to Vancouver on
31st August.

September 6th, I received the following telegram from
Vancouver, "Forward telegram, if any at Island Hotel, with
our gas when word comes from Ottawa.

Thomas Carson,

In the absence of Departmental instructions I
presumed that the question of signing Contract, and
any adjustments considered necessary, was being taken up
by the Department direct with Mr. Carson.

Until the Contract is signed, I can do little
or nothing towards pushing this work ahead, without
definite instructions from the Department.

Yours obedient servant

A. J. MacKenzie

Dear Mr. Dallin,

Following our conversation this morning on the occasion of your visit, I am requesting you to secure from the Department some Flooring and some Ripping.

The Flooring, as you observed, - about six hundred feet, - is needed to finish the boys' recreation hall.

No water was ever connected with the new barn. To do so we require about three hundred and twenty five feet of three-quarter inch pipe.

Thanking you in advance,

I remain,
Very truly yours,

The Hon. Charles Stewart,
The Minister of the Interior,
Ottawa, Canada.

Department of Indian Affairs-Kamloops School.

Dear Sir:

Mr. Thos. Carson the general contractor for the new Indian School at Kamloops B. C. has awarded us the contract for the cut stone work in the said building. Owing to friction between the Granite Cutters Union and the Sandstone Cutters Union the Granite Cutters have refused to cut our granite work unless that they are allowed to cut our soft stone which means that the Sandstone cutters will walk out and leave us with a considerable amount of work unfinished on our hands.

The specifications call for a considerable amount of Rockfaced granite. We are willing to dress all stone in the said building if we could use Newcastle Island Stone a very hard fireproof sandstone. The dressing of this stone will barely offset the rockfaced and dressed work on the granite.

See under
We are now finishing the bank of Montreal Building at Victoria B. C. with the same stone. It has been specified in the new C. P. R. Building at Victoria and the new Memorial Hall at Victoria. The Assay Office (Dominion) and several leading banks are of Newcastle Island Stone. We might add that the San Francisco Mint was one of the few buildings that stood the earthquake and fire there in 1906 which proves it one of the best stones on the continent.

This change would enable us to carry on our contract without waiting for a settlement with the labour Union of the Granite Cutters and causing the general contractor any delay besides giving the Department a superior class of finished work on their building.

We are submitting a sample of Newcastle Island Stone from a new and better quarry which we are operating.

We remain,
Your very Sincerely,

J. A. & C. H. McDonald,

CHM/M.

Mr. Duncan C. Scott,
Deputy Superintendent General,
Department of Indian Affairs,
O T T A W A.

Dear Mr. Scott:-

I spent yesterday with Mr. McBride going into the question of the brick and stone to be used in the new Kamloops school. I showed Mr. McBride the copy of the letter addressed to the Minister, regarding the substituting of sand-stone for the granite. Mr. McBride is still of the opinion, however, that granite should be used for this school, and I fully agree with him.

While in Kamloops I examined buildings in which sand-stone had been used and found the effect of the weather on the stone resulted in cracks forming in many places. This is due to the mild weather in the day time and the freezing at night, which is experienced at Kamloops.

With reference to the brick we examined samples of all brick available in the Province and decided on using the red pressed brick manufactured at Clayburn. This is a high-grade brick and will give full satisfaction.

A good start has been made on the school and the site chosen for the building is an excellent one.

With reference to the letter from the Rev. Mother Superior regarding the changes the Sisters desire in the plans, I spent an afternoon with the Sisters at the School, going over and explaining to them the plans for the building. They did not quite understand the lay-out and after explaining the proposed building to them and making a few minor changes they stated that they were entirely satisfied with the lay-out.

Yours very truly,

Refrigerator

Industrial School,
Kamloops, Oct. 30, 1923.

Dear Doctor:

During the heat of the summer or the soft spells of winter we rarely had meat come upon the table in prime condition. It was of poor quality in the shops, or thawed out too long, or tainted in transit, or deteriorated in keeping here. Even the beef slaughtered here at School suffered in much the same way; we were continually in trouble when there was question of placing good meat on the children's table in sufficient quantity.

Nor had our ideas of a remedy reached that point of clearness where they were free from all doubt and could be stated with precision. Far from it: indeed after consulting Agent, butchers, engineers and packers we saw every avenue filled with traps and pitfalls. Even when you telegraphed that you hesitated in authorizing the outlay, I must confess that I said and answered nothing for the same reason that a monkey does not talk: I had nothing to say!

But you decided on a refrigerator and it was built. And heretofore we have said nothing of it: Would it answer the purpose? Would the cost of operating prove too great?

Let me hasten to say that so far it has more than fulfilled our expectations in both respects. We killed all our own meat during

summer and every day and every meal it comes on to the table to the satisfaction of everybody.

The machine required care of course; all machines do. But the result is worth while. We hope the Department will be pleased to have this gratifying information. We are more than satisfied.

It is only by realizing our extremes and changes of heat and cold both summer and winter, the efforts we had made to meet them, how we had been beaten and disappointed, what a gap there always remained unfilled and how effectually the refrigerator had met all these and what a boon good meat is to little children that you can realize how thankful we are to you, Doctor, for your decision.

Yours very truly,

James McGuire O.M.I.

Progress Report No 4

From 15th October to 31st Oct 1923

From 15th Oct to 22nd Oct. work was chiefly confined to Excavation and erection of Forms for concrete. From 22nd inst to Present date work has been principally in running concrete footings, these are nearing completion.

The first load of hollow tile for walling arrived today

The weather has been particularly favourable with the exception of the past few nights during which we have had light frost

All concrete work has been covered at 5 ft with tarpaper, boards, and packing, and with the exception of two very minor portions of concrete, which were slightly nipped, no injury has been sustained; the portions referred to have been cut out.

Generally the work is proceeding satisfactorily

St. Ann's Academy
VICTORIA, B. C.
October 12, 1923

My dear Sir:-

I am in receipt of a letter from the Sister Superior of Kamloops where the Department is undertaking the building of the central portion of the new school.

She points out to me that the plan as now construed would place the laundry, the kitchen. It would seem that these two units would hardly be combined, and she considers it to better advantage to have the laundry leading into the Girls' recreation room. As the clothes come from the laundry, they could be easily be folded and cared for by the girls,- thus eliminating constant traffic through the kitchen.

She tells me that she talked over the matter with Mr. McCauley, who quite agrees with her, and who is willing to draw a little sketch making the proposed change, and submit it to the Department. Although I have not seen the plans, I quite agree with her as regards the proximity of the laundry to the recreation room.

The Sisters also hope that the proposed wing for the girls will not be considerably delayed, as they cannot utilize the central portion as living quarters without seriously deteriorating the apartments which will be used as offices later on. I think they prefer remaining where they are until such time as the whole is completed.

We have in view, as you already know, only one object,-- and that is to economize space, time, and to better the conditions all around. When all is told, the labor has to be done by the Sisters in the house, and they best know what is necessary.

I already know that you will take this into consideration, and I sincerely trust that the change will not interfere with your plans, or increase the building expenditures.

With the assurance of my hearty co-operation in the work here,

I am, dear Mr. Scott,

Yours very cordially,

Sister Mary Gabriel

Provincial Superior.

Birchfield Steel Heating Boilers

Front View Steam Boiler
Showing Section of Left Water Leg.

The Birchfield Steel Heating Boiler is Electric Arc Welded, of a simple, patented, improved design.

It is the only boiler of this type with free interior circulation.

It has two way heat travel through the flues.

The smoke boxes and base are detachable.

The grates are self supported.

Birchfield Steel Heating Boilers

There are no couplings or connections that retard circulation and cause leaks and repair expense.

All the heating surface is effective.

Made of steel, it is rugged and strong and is not subject to crackage or breakage.

It is economical to install, as costly assembling expense is eliminated.

The design is scientifically correct, enabling the boiler to produce and absorb a maximum amount of heat.

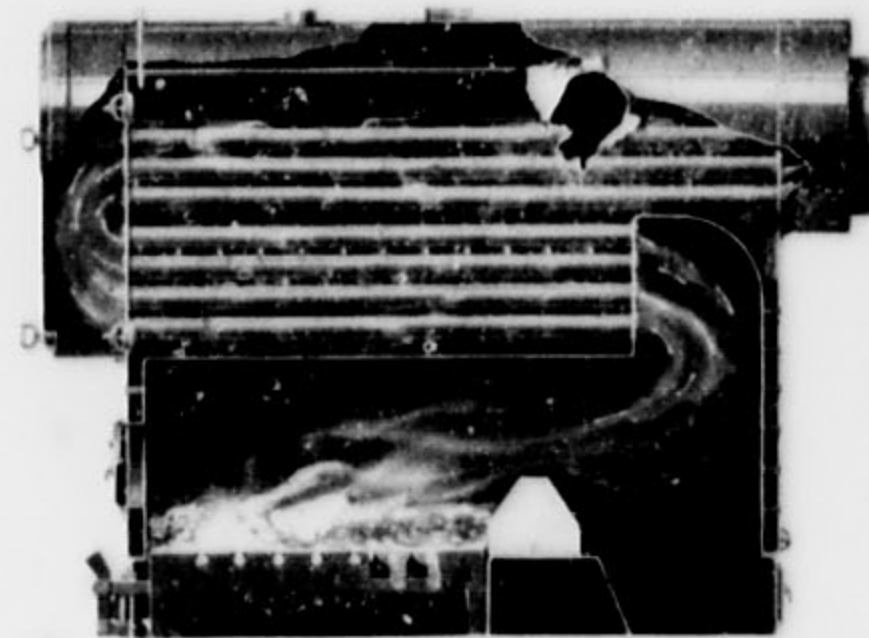

Are you using an ox team, or an automobile?

Are you using antiquated heating boilers, or Birchfield Steel Boilers?

Satisfied customers build business.

Birchfield Steel Boilers satisfy.

Birchfield Steel Heating Boilers

Sectional View Steam Boiler
Showing Construction and Heat Travel.

Many leading Architects and Engineers were quick to recognize the advantages of the Birchfield Steel Boiler, with the result that hundreds of boilers have been installed in buildings of various types and have established an enviable reputation for efficiency and fuel economy.

TO DATE OF THIS LETTER

R

Sir,—

I beg to inform you that a letter was delivered by the Postman at this office this morning for information. The letter was addressed by the Department of Indian Affairs to "W.H. Macaulay, Inspector of Construction, 10025-113th St. Vancouver, B.C." No such address could be found by the letter guides and upon examination of the telephone book no such person of this name could be located. I took the liberty of opening the letter, with a view of finding its correct destination, upon reading which I phoned to the residence of Mr. Carson, whose wife replied that her husband was away, that was the Contractor who was expecting to receive a contract to build a school at Kamloops, and that Mr. Macaulay's address was Box 271, Kamloops, B.C.

I have forwarded this letter in the care of the Officer in Charge of the Indian Office at Kamloops, requesting him to see that the letter reaches its destination, and advising him that should this not be possible to return the letter to the Department.

Your obedient servant,

C.C. Perry,
INDIAN AGENT.

R

Sir, Architect

"New Residential School. Kamloops B.C."

Hereto attached please find copy of letter from the Rev Father McGuire, in reference to which I beg to report as follows:— The Rev. McGuire and the Sister Superior object very strongly to the location of Laundry, the small amount of storeroom accommodation and the omission of a Dining

I have clearly explained that I have no authority whatever to deviate from the existing Plans in any particular, but would be willing to examine any suggestions and submit same to the Department, strictly providing they appeared essential and in the best interests of the Building.

Further, I have pointed out that the Architect to the Department, Mr. P. L. Murray Orr, will be in Kamloops on or about Nov. 1st, when any outstanding difficulties could be taken up with him personally.

I am however, requested to formally present this matter to the Department direct, to obviate delay and unnecessary work; the details to be taken up with Mr. Orr on his arrival here.

I have informed the Contractor, Mr. Carson, that in view of a possible change in the location of the Laundry it would be advisable to delay operations on this particular portion of the work.

If an expression of opinion by me, is in order, I would state that the objections raised are reasonable, and the suggested changes both good and practical; further are capable of being put into effect without materially affecting the cost of the Building as a whole, or unduly interfering with the general design or layout.

POOR-COPY

(2)

Laundry The existing levels, or grade, of the Site are particularly favorable to the placing of Laundry under the Senior Girls Recreation Room.

The general facilities for convenient operation and supervision are considered satisfactory in every way.

Store The two small stores adjacent to Kitchen each 12'0" x 6'6" are considered quite inadequate, and this space could be utilized to better advantage as a pantry.

A fairly large store adjacent to the Kitchen is urgently required to accommodate the large stock of eggs, butter, tomatoes, fruits etc which are preserved annually, for winter and spring consumption; in addition fairly large storage room is required for groceries including flour, rice, beans, bacon etc.

Dairy The supply and care of milk is of primary importance in this establishment, first from its food value, and secondly from an educational point of view.

It is considered that most of the girl inmates are destined for an agricultural life, consequently a certain amount of instruction in general dairy work under proper sanitary conditions is considered essential.

Location A portion of the space at present occupied by the Laundry could, with advantage, be utilized for both Store and Dairy, they would be excellently placed, access to the former being obtained directly from Kitchen and to the latter from the Entry adjacent thereto.

For the Store a fairly long but narrow room having shelves on both sides, together with metal bins for flour, rice, oatmeal etc is considered desirable.

Your obedient servant
W. H. Barclay
Inspector of Construction.

Dear Mr Macaulay

Following our recent conversation
Concerning the position of the Laundry, Dining & Store room
I wish to say that you would oblige me greatly by
referring the matter to the Department as soon as
possible

We wish the Laundry removed from the Kitchen
to a position near or under the Girls Recreation
Hall whence the girls generally come to do their work;
this arrangement would leave the Kitchen work and
Laundry work separated, as they are in fact.

Thanking you in advance

I remain

Very truly yours

Signed. James McGuire S. M. S.

Kamloops, B.C.
15th October.

A. J. Mackenzie Esq.
Asst. Deputy Secretary
Department of Indian Affairs
Ottawa

Architect

"New Residential School. Kamloops B.C."

I beg to report as follows:-

Building operations were actually commenced on the 2nd October and the work has been progressing favourably to present date.

The Building has been sited in accordance with the requirements of the Specification viz to the approval of the Rev. Father McGinnis; it faces practically due South and is, I believe, quite satisfactory.

Most of the work has been, and is, in the nature of excavation, the central portion under Chapel etc is complete, the Easterly portion, under Laundry, practically so and the Westerly portion, under Parlor Room, being proceeded with.

It was found necessary to disconnect the House Drain and dig new temporary cesspit, this matter has duly reported to the Department, and confirmation of the action taken was requested.

The Contractor requests Detail Drawings. I presume these will be forwarded at an early date; details of granite work are urgently required, a section thro the Basement window sills, showing treatment of granite grade course etc is particularly urgent; also detail of Basement window frames.

Obedient Servant

Rev. Father McGuire relating to Septic Tank.

From information to hand, I understand, that it is proposed
to build the Septic tank in the near future, consequently I
presume that the exact location has been decided by the
Department.

Other than that the tank will be constructed somewhere
South of the New Building, I am unable to obtain information
here, on this subject.

The tank location has a very decided bearing on
the Drainage Scheme for the New Building, particularly as to
the connecting up points.

The question raised by the Rev. Father McGuire
relative to the connecting up of present, or existing,
Drainage Scheme, is particularly urgent, the cess pits in
use overflow occasionally, and the present Building operations
necessitated disconnection of main house drain.

May I request information as to the exact
location of the proposed Septic Tank, together with the
probable date on which construction of this work will
be commenced.

Receipt of this information, at an early date, if
convenient, will enable me to make the necessary arrangements
for connecting up the New Building at convenient points,
together with such temporary arrangements as may be
found necessary.

Yours faithfully
N. J. Macdonald
Inspector of Construction

Mr. Macanlay.

Following our recent conversation about the Septic Tank I beg to say that I would be very pleased if you could take up with the Department the details of its position and installation.

If these matters were settled we might then see about connecting part of our present system with the new septic tank.

Thanking you in advance

Very truly yours

Signed. James McQuinn O.M.S.

Dear Sir:

RE - Brick for Kamloops.

In connection with the brick for the Kamloops Indian School, Mr. T. G. McBride, M. P., has requested us to write you and forward samples for your inspection. We are instructing our Principals, the Redcliff Brick & Coal Co. to ship you two samples each of their Common Brick and two samples of the No. 1 Star pressed face brick.

The prices on which are as follows;

Redcliff Common Brick \$22.50 per M.
No. 1 Star Pressed Face Brick \$34.35 per M.

The above prices are f. o. b. cars Kamloops and include Sales Tax. Immediate shipment can be made from the Plant at Redcliff, Alta.

Trusting to be successful in securing this business which will receive our best attention, we are,

Yours very truly,

R

Sir,

New. Industrial School Kamloops B.C.

I forwarded night letter even date reading as follows:-

"J. G. MacBride District Member visited School. He particularly requests your delay decision relating Brick pending receipt his letter, stop. His opinion local brick now unfavourable."

Mr MacBride called at the School this morning about 10.30 am and after receiving general information re general layout of School asked whose brick was being, or about to be, used.

I explained that two firms had submitted samples, a local firm, Messrs Johnston & Co and The Enderby Brick Co; that samples had been forwarded to Ottawa and we were awaiting decision.

Mr MacBride stated that he was strongly in favour of the brick supplied by Messrs Johnston & Co but admitted that he had not examined the bricks manufactured by them since the war.

At my suggestion Mr MacBride consented to examine samples also to visit Johnston & Co's yard.

After inspecting the bricks in J & Co's yard Mr MacBride strongly expressed his disapproval, describing them as altogether unsuitable for the purpose intended.

Mr MacBride afterwards examined the Enderby Brick and described it as a much better brick, he however desired to see the 2nd quality Calgary brick; consequently we visited the New Catholic Church built of these bricks, two years ago; He was very favourably impressed by the Calgary bricks and would, I think, like to see them used on the New School.

Mr MacBride requested me to forward the above mentioned telegram and stated his intention of writing to you immediately.

May I suggest, for your information, that a good effect can be obtained from the Calgary bricks; failing this, I believe that a pleasing effect can be obtained by using Calgary bricks as headers and Enderby brick as stretchers, at less cost.

Yours obedient servant

Reference No 116659-513 dated 26th Sept. 1923.

I beg to acknowledge receipt of your letter above referred to, and to state that:-

Mr Carson has been informed that the Department allows an extra of \$2,798.00 for external brick work.

I have informed Mr Carson that the Department expects an immediate commencement and the work pushed ahead without delay.

Mr Carson is now delivering materials on the Site. Samples of the common brick I am forwarding today, together with a separate report.

The sample of building tile as required by the Specification will be forwarded immediately I can obtain same from the Contractor.

Mr Carson has promised that he will sign the Contract tomorrow, he is now in Kamloops and has spent most of today with me on the Site.

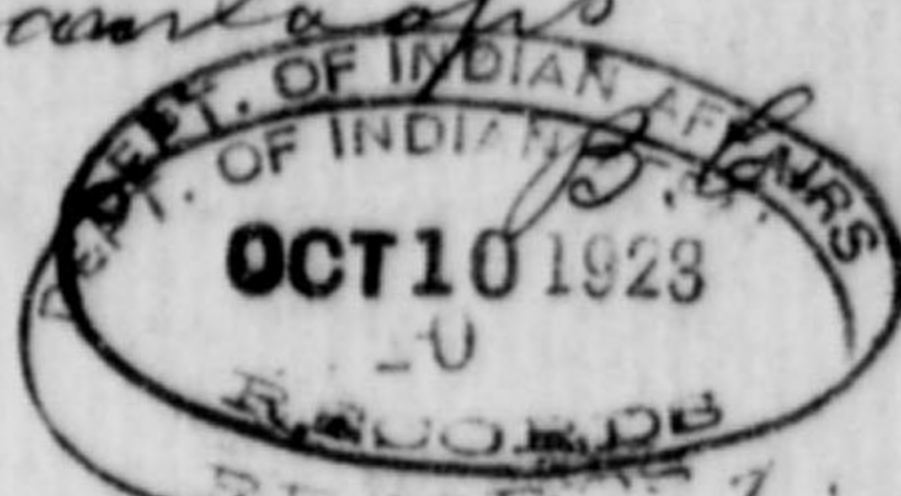

The question of a temporary Cor. pit is dealt with on a separate sheet.

A. I. MacKenzie Esq
Acting Asst Deputy and Secretary
Department of Indian Affairs
Ottawa

R

Sir.

"New Industrial School Kamloops B.C."

"Report on Samples of Common Brick submitted."

Two samples each consisting of three bricks
viz (1) the best (2) medium (3) the worst; are submitted from
A. Messrs Johnston & Co Kamloops brickyard
B. The Enderby Brick Co. Enderby.

A. The sample marked "A" or the local brick, shows a hard
well burnt brick, with good ring, but uneven in shape
shape and colour. The ends in particular are bad and
would give a very unsatisfactory appearance when
used as headers, in heading (every fourth or fifth) courses,
window and door openings, piers etc.

It is very questionable if these bricks, laid up
with the recessed joint as specified, would give the
desired appearance.

The Rev. Father McQuinn is particularly
dissatisfied with these bricks, and considers their
non-descript appearance altogether out of keeping
with the design in general and the granite features
in particular.

I have inspected the bricks in the yard and doubt
that the samples submitted could be liked up to.

Messrs Johnston & Co, however, assure me that
they are now burning, or about to burn, bricks which
will, in every way, be superior to the bricks in stock,
particularly with the ends of bricks show improvement.

On this point however I am unable to express an
opinion.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 3)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

(2)
"B" The sample marked "B" or the Buderby brick is not too well burnt: and has only a moderately good ring, the ends too are poor and have the same objection as sample A. when used as headers.

Otherwise these bricks are good, and as they tend towards a deeper or darker red, with exposure, the colour is all that could be desired.

Opinions differ as to the weathering quality of this brick, the majority being favourable.

Laid up with a recessed joint they look fairly well, strictly providing the face bricks are selected and the softer bricks say the light coloured ones, are used for internal walling where no very great strength is required.

A very favourable appearance has been obtained by using these bricks as stretchers and a No 2 quality of Calgary bricks as headers.

Comparative Cost. Both Messrs Johnston & Co and The Buderby Brick Co are anxious to supply the bricks for this Building and the price quoted for delivery on the site, as I believe, the same in each case i.e. \$22.00 per thousand.

Will you please let me have a decision as soon as possible, in order to allow advantage being taken of remaining good weather.

Yours obedient servant
H. H. Macaulay
Inspector of Construction.

Sir "New Industrial School Kamloops B.C."

Received telegram at 2 pm reading as follows:-

"Mess^{re} immediately to night letter 28th ultimo"
to which I replied by telegram that the said message
had not been received by me and that I would trace same
at this end.

This telegram has been traced, having been received
and signed for by the caretaker at my Office. As I was
and am at the school site during the day, 2 1/2 miles away
the caretaker was unable to deliver same, and unfortunately
forgot all about it. Consequently I was considerably surprised
at today's telegram, and express regrets at delay.

I beg to confirm telegram (night letter) forwarded in reply
to telegram 28th ultimo

"Night letter 28th ultimo traced here stop. Local brick
manufactured by Johnston and Coy Kamloops submitted
but not approved by me stop. Quality hard, well burnt
good ring stop colour and shape most unsuitable
Report and samples forwarded Department stop
Rev. McGuire strongly protests their acceptance"

My report, together with the samples forwarded, will
I trust, furnish you with the information you desire.

Workaroon will not be ready to lay bricks ^{before}
the 22nd of October, an early decision however will be
much appreciated

Yours obedient servant

Report No 1 (Progress)
Re New Industrial School
Kamloops B.C.

R

To: A. J. MacKenzie Esq.
Acting Asst. Deputy Secretary
Department of Indian Affairs
Ottawa

Sir. I have the honor to report as follows:-

Your letter of instruction dated 21st August (154-0.5x)
received. 26th August

August 27th visited the Reserve with a view to laying out
Centre lines of Building for Contractor. Rev. McQuinn
with whom the decision lies (per Specification) was
away in Vancouver, therefore was unable to do more than
lay up the situation.

August 28th 29th. The Contractor, Mr. Thor Carson deemed to take
up certain details of construction particularly the
question of bricks. The latter item was fully covered by
my report dated the 29th August.

Sept 4th 5th Fully covered question of site with Rev. Father McQuinn
also space for storage of materials etc

Mr. Thor Carson returned to Vancouver Aug 30th to await
the decision of the Department re brick. Consequently,
with the exception of Preliminary arrangements,
no work has been done, and no materials delivered
delivered on site, in connection with this
contract.

Yours obedient servant

A. J. MacKenzie Esq.
 Acting Asst. Deputy Secretary
 Department of Indian Affairs
 Ottawa

Sir. "Re Industrial School, Kamloops, B.C."

I beg to acknowledge receipt of Telegram reading as follows:
 "Department will allow Curson extra for Brickwork as
 mentioned in your letter twenty eighth ultimo"

I immediately informed, by letter, the Contractor Mr. Curson
 of the above mentioned decision and requested information
 as to date on which he was prepared to commence building
 operations, also referred to delay in making a start, and
 asked if Contract was signed

This morning I received a telegram from Mr. Curson
 in which he expresses his intention to make a start
 Tuesday latest i.e. 2nd October.

On Mr. Curson's arrival here I will immediately
 take up the question of signing and forwarding of the
 signed Contract Document. In the absence of instructions
 to the contrary have presumed you desire me to do this.

Will you please inform me as to whether the
 Department desires the allowance made to Contractor
 for Brickwork treated as an Extra to the Contract
 amount, or added to the amount of Tender and included
 in the Contract amount

Probably instructions forwarded in confirmation
 of your Telegram will contain necessary details
 and information on this matter.

Your obedient servant

CONDITIONS.—Approved by Board of Railway Commissioners for Canada, under Order 162, dated March 30, 1916.
It is agreed between the sender of the message on the face of this form and this Company, that said Company shall not be liable for damages arising from failure to transmit or deliver, or for any error in the transmission or delivery of any unrepeatable telegram, whether happening from negligence of its servants or otherwise, or for delays from interruptions in the working of its lines, for errors in cypher or obscure messages, or for errors from illegible writing, beyond the amount received for sending the same.
To guard against errors, the Company will repeat back any telegram for an extra payment of one-half the regular rate; and, in that case, the Company shall be liable for damages suffered by the sender to an extent not exceeding \$200.00; due to the negligence of the Company in the transmission or delivery of the telegram.
Correctness in the transmission and delivery of messages can be insured by contract in writing, stating agreed amount of risk, and payment of premium thereon at the following rates, in addition to the usual charge for repeated messages, viz: one per cent. for any distance not exceeding one thousand miles, and two per cent. for any greater distance.
This Company shall not be liable for the actor omission of any other Company, but will endeavor to forward the telegram by any other Telegraph Company necessary to reaching its destination, but only as the agent of the sender and without liability therefor. The Company shall not be responsible for messages until the same are presented and accepted at one of its transmitting offices; if a message is sent to such office by one of the Company's messengers, he acts for that purpose as the sender's agent; if by telephone, the person receiving the message acts therein as agent of the sender, being authorized to assent to these conditions for the sender. This Company shall not be liable in any case for damages, unless the same be claimed, in writing, within sixty days after receipt of the telegram for transmission.
No employee of the Company shall vary the foregoing.

The following is a true copy of a Minute of a Meeting of the
Committee of the Privy Council, approved by his Excel-
lency the Governor General on the 22ND SEPTEMBER 1923

Architect

R

W. B. M.

The Committee of the Privy Council have had before them a report, dated 17th September, 1923, from the Superintendent General of Indian Affairs, referring to the Order in Council of the 17th August, 1923 (P.C.1610) approving of the awarding of contract to Mr. Thomas Carson of Vancouver, for the construction of the first part of the new Kamloops Indian Residential School, for the amount of his tender, namely, \$88,987, the same being the lowest received by the Department.

The Minister observes that since the passage of the above mentioned Order in Council the Department of Indian Affairs has been advised by the architect at Kamloops, who was appointed inspector of construction for this building, that in figuring on the tender Mr. Carson overlooked an item of \$2,798 for external brick work which, when added to the amount of his tender as submitted, makes a total of \$91,785.

In view of the fact that Mr. Carson's tender of \$91,785 is still considerably lower than the next higher tender (which amounts to \$99,985) and as it is stated by the architect of construction and by the architect of the Department that the said additional item of \$2,789 for external brick work, which was omitted from his tender, is a fair

Dear Sir,-

As advised by wire of even date, the Department is prepared to allow Mr. Carson an extra of \$2,798.00 for external brickwork omitted from his tender.

As I understand that no work has yet been done on this contract, I would ask you to kindly consult with Mr. Carson and advise him that the Department expects him to make an immediate commencement on this work and to carry same through without delay.

Please forward me a sample of the common brick which is proposed to use.

CONDITIONS.—Approved by Board of Railway Commissioners for Canada, under Order 162, dated March 30, 1916.
It is agreed between the sender of the message on the face of this form and this Company, that said Company shall not be liable for damages arising from failure to transmit or deliver, or for any error in the transmission or delivery of any unrepeatable telegram, whether happening from negligence of its servants or otherwise, or for delays from interruptions in the working of its lines, for errors in cypher or obscure messages, or for errors from illegible writing, beyond the amount received for sending the same.
To guard against errors, the Company will repeat back any telegram for an extra payment of one-half the regular rate; and, in that case, the Company shall be liable for damages suffered by the sender to an extent not exceeding \$200.00, due to the negligence of the Company in the transmission or delivery of the telegram.
Correctness in the transmission and delivery of messages can be insured by contract in writing, stating agreed amount of risk, and payment of premium thereon at the following rates, in addition to the usual charge for repeated messages, viz: one per cent. for any distance not exceeding one thousand miles, and two per cent. for any greater distance.
This Company shall not be liable for the act or omission of any other Company, but will endeavor to forward the telegram by any other Telegraph Company necessary to reaching its destination, but only as the agent of the sender and without liability therefor. The Company shall not be responsible for messages until the same are presented and accepted at one of its transmitting offices; if a message is sent to such office by one of the Company's messengers, he acts for that purpose as the sender's agent; if by telephone, the person receiving the message acts therein as agent of the sender, being authorized to assent to these conditions for the sender. Department of Indian Affairs
Ottawa.

R

Sir,

Relative to the above School I beg to report as follows:-

During the present month work has proceeded smoothly and uninterruptedly and the progress made satisfactory.

All excavations and concrete footings have been satisfactorily accomplished and the Boiler Room concrete walling carried up to a height of 4'-0"

Two car load of hollow tile have been stacked on site but none placed in walling.

Mr. Orr, Architect to the Department paid a visit of inspection on the 4th 5th & 6th and gave decisions on outstanding questions and difficulties. He has decided in favour of a "Glazburn" pressed Red Bricks for external walling and a local brick as supplied by Weston Johnston & Co. for interior walling.

A Certificate for first progress payment was issued on the 12th inst in favour of the Contractor Mr. J. Curran.

The weather has been particularly favourable for concrete work during the present month, and the Building is now ready at all points for brick & tile construction.

Yours obedient servant

J. D. Maclean

New Residential Indian School
Kamloops, B.C.

Department of Indian Affairs

To: The Secretary,
Department of Indian Affairs
Ottawa

Ottawa,

R

Kamloops Jan 31 1924

Sir, I have the honor to submit report for the month of January

As stated in last report work was suspended Dec. 26th/23
owing to unfavorable weather.

During the past month it has been found quite
impossible to carry on owing to the severity of the
wintry weather.

The Contractor has personally executed a few
odd jobs and the Sub-Contractor for Heating and
Plumbing has attended to a few minor details in the
Boiler Room.

One Car of Plumbing & Heating materials have
been delivered also another Car of pressed brick.

Other than above no work has been carried out and
I have not considered it necessary to do more than
pay a couple of casual visits to the Site.

In accordance with instructions from Rev. McQuinn
I have worked out and submitted suggestions covering
his ideas and submitted same to the Department
and am now preparing suggestions covering his requirements
for the new wings.

A decided break has occurred in the weather and
it is quite possible that work will be resumed in
the course of a few days.

Dear Sir

I understand that a decision was arrived at in regard to the use of our product on the Indian school at Kamloops that this material was not suitable for this work.

I would like to know the reason for this. If the product is not good enough then it is useless.

for us to carry on if we cannot get the business in our own territory because the product is not good enough.

Kindly let me hear from you & if there is any objection to the product that can be remedied by us we will do so.

Yours sincerely,

E. B. P. A. T. L. P. & Co.

To The Secretary

Department of Indian Affairs

Ottawa,

31st Dec 1923

Sir. Herewith I beg to Report as follows:-

"New Indian Residential School Kaulapah P.B."
Progress Report for period 15th Dec to 31st Dec. 1923

The weather conditions were favourable up to the 25th Dec. unfortunately however progress was retarded by non arrival of granite plinth, individual blocks, chiefly window sills for Chapel, had arrived but it was not until the 17th that any attempt could be made at laying finished brickwork, further supplies of granite arrived on the 26th & 27th

A certain amount of finished brickwork has been laid (Chapel portion) and the naked out joint shows up the bricks to advantage.

Owing to a fairly heavy fall of snow on the 25th and subsequent severe frosts, all work was closed down on the 26th excepting only such covering up as was necessary to materials etc on the site

Yours obedient servant

W. H. McCauley

Ottawa, January 5th, 1924.

Sir:

I have to acknowledge receipt of your letter of the 29th ultimo, enclosing a requisition from the Principal of the Kamloops Residential School for cement and rough lumber to repair the stable.

In reply I beg to say that the Department will approve of the supplying of this material, and you should arrange for the purchase and delivery of 16 sacks of cement and approximately 1600' of rough lumber. It will be necessary to obtain competitive prices, and the purchase should be made from the firm quoting the lowest price. Properly certified vouchers, in duplicate, should be forwarded covering the expenditure incurred, to which you should attach an abstract showing the names of the firms asked to quote and the prices quoted.

It is understood that the labour in making the repairs to the stable will be performed by the school authorities without cost to the Department.

Your obedient servant,

J. D. McLEAN

J. D. McLean,

Dear Mr. Dallin:-

Following our conversation here recently,
I beg to say that we are requesting you to obtain for
us, authority to purchase:

- (1) 16 sacks of cement to give the horse stable floor
the proper slope;
- (2) about 1100 feet of rough lumber to renew the floor
planking and hay chutes;
- (3) About 500 feet for a chute for the new silo.

With best wishes for the new season, I remain,

Very truly yours,

(Sgd) James McGuire, O.M.I.

Under 4,00
Mr. W.C. Dallin,
Indian Agent,
CITY

P.S. It goes without saying that we do this work
ourselves, the lumber and cement serving as material
for instruction.

Ottawa, Jan. 2, 1924.

Sir:-

The Department is now erecting an Industrial School at Kamloops, B.C. and owing to the location of the building it is necessary that a reliable sewage disposal system should be installed.

924
I have been advised that an ordinary septic tank with an underground disposal field would be sufficient to dispose of the sewage from this new building. Would it be possible that one of your engineers furnish me with a plan and specification and approximate estimate of the cost of a sewerage system which would meet the requirements of this institution, in order that competitive prices may be obtained and the work completed in due time.

Your obedient servant,

J. D. McLean.
Assistant Deputy & Secretary.

Department of Indian Affairs

Ottawa,

P.O. Box 453, Kamskapot, B.C.

Ottawa, 15th Dec. 1923

and
See.

Progress Report. 1st to 15th December 1923

New Indian Residential School Kamskapot B.C.

They to report as follows:—

R

Very little progress has been made on this work during the past fifteen days.

As stated in my last report dated 30 Nov the brick & tile walls were brought up to finished grade but ready to receive the granite plinth.

Unfortunately the first shipment of granite did not arrive until the 10th Dec. and then only included sills and other detached portions for the Chapel: these are now being placed in the wall.

Every thing possible has been done to push delivery of granite and another shipment is due this week.

Meanwhile all walls have been waterproofed and filled in, practically up to grade line and everything is in shape for pushing work ahead, inasmuch as the remainder of the granite plinth arrives.

The weather has been good with the exception of small amount of snow and sleet.

Brick and common brick, steelwork, and window frames etc are coming forward satisfactorily.

Yours obedient servant

W. H. Macaulay

J. D. McLean Esq.
Asst. Deputy and Secretary
Department of Indian Affairs
Ottawa
P.O. Box 453
Kamloops B.C.
30th Nov. 1923

Architect
Sir
New Residential (Indian) School Kamloops B.C.
They to Submit Report covering period from
Nov. 15th to Nov. 30th 1923

Work has been carried on uninterruptedly excepting the
late afternoon of the 28th inst when work was stopped by snow & sleet.
Weather conditions have been extremely favourable and satisfactory
progress has been made.

All concrete footings are in place and the concrete walls of
Barker Room are now complete, and stripping of forms proceeding
Brick, and tile, walling has been carried up to 3' 6" above
footings all round the Building, consequently in place now up to
the finished grade line and ready for the granite plinth.

The concrete walling of Barker Room has not stripped
as well as could be desired.

The Building tile and brick are not handling as well as
expected, and some difficulty is being experienced in this matter,
generally the tile vary in size as much as 3/8" and do not lay up
in even courses with the brickwork; endeavours are being made
to overcome the difficulties encountered and portions requiring
extra strength have been brought up in solid brickwork.

The granite plinth is now urgently required and the Stone Masons
are being pushed for early delivery.

Mrs. J. Mc Bride, the local M.P. visited the Site on Saturday
the 17th inst and with him an inspection of a recently burned brick
was made at the Brickyard of Messrs Johnston & Co. Kamloops B.C. It
was decided to accept these bricks with the provision that
selected bricks be used for Chimney etc.

At Contractor's request the steel I Beams in Dining Hall were
reduced, with Mr Orr's approval, by 2.061 lbs. Contractor's proposed
allowance is \$62.00; this amount however is inadequate and cannot
be accepted by me without Departmental instructions to the contrary.

Will you please inform me as to the price arranged for the facing bricks
selected, (a) on the Site (b) in the wall. Information necessary for Certificate.

Yours obedient servant
H. H. Macaulay, Inspector of Construction

Ottawa, 27th Feb. 1924.

J. McLean Esq
Architect
Department of Indian Affairs
Ottawa

"Re Kamloops Indian Residential School"

I beg to acknowledge receipt of your telegram reading as follows:- "Send me Details of Material & Labour included in Certificate No. 3."

Herewith I enclose detail Statement as directed. This will probably give the information you desire, should however, you desire further information on any particular item I shall be pleased to forward same to you.

You will note that items 1 to 11 inclusive are for Materials ^{only} actually delivered on the Site, and items 12, 13 and 14 refer to labour & materials expended in actual construction.

The payment of items Nos 1 to 11 inclusive is strictly in accordance with the arrangements made by Mr Orr during his visit to Kamloops.

The next Certificate "No 4" will be issued about the 10th March and will be near the \$10,000.00 mark as it will include and cover the two Boilers (approx \$5,600) glazed brick etc expected here in the course of a day or so.

Reference Item 13. Pending receipt of a decision by the Department to my enquiry as to the amount to be allowed for the laying of

Ottawa, February 26th, 1924.

Sir:

I have to acknowledge receipt of your two letters of the 19th instant, enclosing requisitions from the Principal of the Kamloops Indian Residential School to be supplied with a power saw to cut the wood required for the use of the school, also for 10 spools of barb wire and a keg of staples to fence a small portion of the Indian Reserve at Adams Lake for pasturage purposes.

In reply I beg to say that, when forwarding requisitions of this nature, you should have stated the approximate cost involved, and, at the same time, given your recommendation, favourable or otherwise, regarding the request. Regarding the power saw, please state what power equipment the Principal intends to use in running the saw. Please obtain prices from a number of dealers for the supplying of the saw and the power equipment necessary to run the same, if the latter is required. You should submit the prices, together with any recommendation you care to make, for the consideration of the Department.

Regarding the fencing of a portion of the Indian Reserve, kindly state whether, if this were done, the Indians of the Band would approve of the same being cut off from their Reserve and used for the purpose for which it is desired by the Principal. We note that the Chief, in a letter to the Principal, appears to be in favour of the fencing, but we wish to be assured before authorizing the work that the majority of the Indians will also give their consent. Please state approximately the cost of the 10 spools of barb wire and the keg of staples asked for.

As soon as we have the above information we will be in a position to decide as to whether the expenditure required can be granted or not.

Wm. C. Dallin, Esq.,
Indian Agent,
Kamloops, B.C.

Your obedient servant,

J. D. McLEAN

Industrial School,
Kamloops, Feb. 16, 1924.

Dear Mr. Dallin:-

We are asking you to request permission from the Department to purchase for us a Wee McGregor, Ottawa or Wade Saw.

You know our position: we have no wood on our property. The price of wood, seven dollars a cord, is for us prohibitive. So far, the Northern Construction gave us yearly some sixty cords of slab wood for our burners or heaters. That mill is now gone, so that we must seek elsewhere. The Provincial Government accorded us a free use grant of forty acres on the North Thompson at the Twenty-five Mile House. Last week the foreman and some six or seven boys put about three hundred logs on the skidway. It is for the cutting of this wood into stove lengths that we ask the power saw, as it must be cut before we load it on the train, and we prefer the men to cut it rather than the boys who at that distance from home would lose more class than we care to permit.

Yours very truly,

(Sgd.) James McGuire, O.M.I.

Industrial School,
Kamloops, B.C., Feb. 9, 1924.

Re Pasture.

Dear Mr. Dallin:-

The pasture on the School land is hardly sufficient for the dairy cows. For our beef cattle, no provision has ever been made. It is to the interest of both school and Indians that a somewhat permanent provision be made.

For the last three years we have been using as you know, the Indian Reserve at Adams Lake which belongs to the Chase Band. It is forty five miles from here and the Range is not fenced. There are serious disadvantages, but it has the great advantage of being a good range and of being isolated.

It is not necessary to fence the entire reserve, but the Chief, Etienne, the Indians and I, as you can glean from the enclosed letter from the Chief, request you to ask the Department for about ten spools of barb wire and a keg of staples to fence a small portion of Adams River and Cold Creek to prevent the cattle from going down on Squilax Reserve, and a small portion of the Reserve to protect two or three Indian holdings.

The Indians, the Chief and I have had much trouble over this difficulty, but we have all recognized that it was a difficulty which could easily be removed, hence our request.

Might I ask the Agent to insist through the Chief, upon the exclusion from the Range of all but purebred sires.

With best wishes, I remain,

Very truly yours,

(Sgd) James McGuire, O.M.I.

Rev. Father James McGuire,
Industrial School,
Kamloops, B.C.

Dear Father:-

I received your letter of the 28th of January. Well, I was thinking that it would take about ten balls of barb wire to fence that place. You know that fence from Cold Creek. I think we will move this fence from the River fencing it above the road. We will fence in Mrs. Anthony's place and then lead on to, till we come to Gusta William's place, then we follow Gusta William's fence into the Lake, and Joe's place will be place the same, but they will have to watch their own gates. We will have our fence gates at Goosta's place.

That's all. 10 lbs. Staples.

Yours truly,

(Sgd) Etienne Narcisse,
Chief.

P.S. I'll tell you when to start fencing up there.
I kind of think it's too early in March.

15 lbs. Staples.

Ottawa, Feb. 22, 1924.

Dear Mr. Macaulay:-

I have your letter of the 14th instant, also your sketches for the boys' and girls' wings.

As far as the general lay out, as shown on your sketches, I am of the opinion that it should meet the requirements very well. There is one point, however, and that is the arrangement of the plumbing fixtures in the basement of the girls' wing. I may say that I am confining myself to the girls' wing at present, as if money is provided at the coming session of Parliament it will be for the girls' wing only this year. I think it would be very much better if it were possible to keep the wash basins away from the wall as the continual splashing of water, when these basins are in use, tends to keep the wall in a damp condition. If the Sisters require as many basins as shown on your sketch, it will certainly be impossible for the Department to provide individual lavatory basins, and we will have to follow the style used in some of the other schools, that is of providing a long table, covered with zinc with a water trough in the centre. On this table the pupils will use individual wash basins. A certain number of taps for hot and cold water will be installed at different places along the table.

As for the baths there are a great many more baths shown on your sketch than we generally provide. I am returning the sketches, under separate cover, and would ask you to please consult with Rev. Father McGuire, and see if it is not possible to rearrange the plumbing fixtures in the basement.

I would also ask you to please let me have a rough section showing the location of the proposed laundry under the girls' recreation rooms. I would like to have this information as soon as possible in order that the plans can be prepared, and if money is provided for the work, there will be no delay in inviting tenders.

Please.....P

Please advise me the total number of girls that accommodation should be provided for. In figuring the dormitories accommodation of five hundred cubic feet is required for each pupil, and the ceilings will be eleven feet high.

You have not sent a sketch showing the top floor of the wing, in which I have shown, on the sketches submitted to Reverend Father McGuire, the dormitory accommodation.

Yours very truly,

R. GURNEY ORR.
Architect for the Department.

Department of Indian Affairs

R. Sweeney Esq
Architect
Ottawa

Ottawa, Kanabap 14th Feb. 1924

New Residential Indian School Kanabap

Sir,

Under a separate cover I am forwarding, as arranged, Sketch Plans of the wings of above building.

The said plans represent as far as it is possible for me to ascertain the requirements of the Rev. Father McGuire and the Sister Superior; they may perhaps be regarded as the essential features of the accommodation they deem necessary.

Some difficulty has been experienced, in arriving at sketches submitted, in an endeavour to confine the expressed requirements, within the bounds of a practical solution, the Sister demands in some instances being somewhat abnormal; hence the delay.

A Sister with considerable experience, ^{in buildings generally} arrived from Victoria on Monday last; in response to a telegraphic message from Rev. McGuire, and with her assistance all outstanding difficulties have quickly overcome.

The Sisters are now satisfied that, with the exception of certain minor requirements in the way of fittings, the sketches submitted adequately represent their requirements.

The Rev. Father McGuire is I believe perfectly satisfied with the arrangement of the wings being, subject only to details in the way of fittings etc.

In reference to the number of wash basins shown, I would point out the opinion is general, and the point insistently contended, that 50 basins ^{per laboratory} is an inadmissible minimum, consequently believing that the cost of same

(2)
H. P. Kearney Esq. Cmtd

Department of Indian Affairs

Ottawa,

192.....

In regard to fittings would you succeed the amount the Department is prepared to allow I have advised the adoption of the Old Country Farm Sink idea with ordinary white enamelled basins. This idea has been readily accepted by Father McGee and the Sisters. Generally they desire, Sinks built of white glazed bricks, window board to project far enough to form a shelf for hair brushes combs etc. Brass rail under shelf to serve as towel rail. Wall between window board and Sink to have fixed mirrored plate glass approx 14" deep. The latter will obviate the supply of the usual mirror.

The question of drinking fountains was raised, but not decided. As I thought it better to keep this matter in abeyance until you had considered the suggested layout; the question of floor or wall type could then be decided together with them. In connection, the prevailing idea here, is that Sinks should be provided for each floor.

The sketches will I believe convey a fairly accurate idea as to what the Principal and Sisters desire; it would perhaps be advisable to postpone discussion of details until you have examined the scheme submitted and decided to what extent it is acceptable.

If you will notify me as to decision I will prepare and forward rough sketches of the various details in the way of fittings etc it is desired to have incorporated.

Hoping the information supplied will be of assistance. Such has been somewhat difficult to compile but has the merit of being a correct interpretation of the requirements outlined by the persons interested.

Yours faithfully
H. P. Kearney

R

Sir.

Re. New Residential Indian School Kamloops B.C.

In reference to the above Building I beg to report as follows:-

Since my last report for the period ending January the weather has been favourable and building operations were resumed on 1st February. Certain portions have been and still are tied up owing to non arrival of portions of granite & cement but where possible the brick walling is being pushed as much as possible.

The brickwork, ^{has come} some apparently and fault finding but is improving and the Contractor appears anxious to obtain the best possible results.

The Chapel portion will be ready for Ground Floor Joists, and single story portion including Kitchen Store and Dining (old Laundry portion) ready for roof in the course of a few days.

All materials except granite are arriving on the site satisfactorily and Girders for Meeting Chamber are expected in the course of a few days.

The sketches for New wings showing local requirements have been completed, approved, and forwarded to the Department under separate cover.

I have the honour to be

ARCHITECT.

Dear Sir:

Re Kamloops Indian Industrial School

In connection with the contract let last fall to Mr. Thomas Carson of this City for the erection of the building referred to, especially to the specifications covering the roofing, in as much as some associates and ourselves contemplate opening up a slate quarry on this Coast for the production of roofing material, it has occurred to us that your Department might be disposed to reconsider these specifications and substitute slate in place of No. 1 Perfection shingles from the points of safety and eventual economy.

Relative to the production from the quarry under consideration, we might point out that the British Columbia Legislative Buildings at Victoria were roofed with this slate and that from the day when laid to this date, nothing has since been required in the way of repairs. Again from samples submitted to them from all over the United States, the product from this quarry was accepted against all others for the roofing of the Navy Yard Buildings at Mare Island, California.

At present writing, we regret we are not yet prepared to quote you a figure on the supply of the material necessary for the roofing of the above mentioned building, but if the suggested substitution should meet with the approval of your Department, we shall be pleased to do so in the course of a few weeks.

We shall appreciate the favour of your reply in due course and beg to thank you in anticipation.

D. TODD LEES & CO.

Ottawa, March 27, 1924.

Sir:

I have to acknowledge receipt of your letter of the 18th instant, with reference to the request of the principal of the Kamloops Indian Residential School for a quantity of wire fencing and staples to fence a portion of the Sahhalkum Reserve, which is to be used as a pasture for the stock belonging to the school.

In reply I beg to say it is noted that the Indians of the Band are agreeable to a portion of their reserve being fenced for the purpose. The Department will therefore approve of the expenditure required in the purchase of about ten spools of barbed wire and a keg of staples. The quotation which you enclosed has been noted. If possible, prices should be obtained from a number of other dealers and you may arrange for the purchase and delivery of the quantity of wire and staples required. The work of erecting the fence is to be performed without expense to this Department. Properly certified vouchers in duplicate should be forwarded covering the cost of the material.

Your obedient servant,

J. D. McLEAN

J. D. McLean,

ALSO

TO DATE OF THIS LETTER

Sir,—

Referring to Department letter under date of the 26th ulto., file 154-0-5, I beg to state that I attended a meeting of the Adams Lake Band on the Sakhalikum Reserve on the 12th inst., at which the Chief and Councillors and a large majority of the male members of the Band were present.

469
OK
The matter of fencing a portion of the Reserve to be used as a pasture for the stock belonging to the Kamloops Indian Residential School was unanimously agreed to by the above mentioned Band. I therefore beg to enclose price of staples and wire as requested, and of which the Principal of the School has requisitioned for ten spools. As there is no pasture in connection with the School, and the Adams Lake Reserve is the most suitable land to be converted to such use, the Indians of the Band being agreeable to this arrangement, I trust the Department will give its earnest consideration to the requisition made by the Principal.

Your obedient servant,

Wm. C. Dallin

Amended
The Secretary
Department of Indian Affairs
Ottawa

Sir. I beg to submit Report covering period of from
1st March to 15th March 1924 inclusive:-

The weather has been exceptionally favourable for Building
Operations.

As referred to in my last report considerable annoyance
and inconvenience is being experienced owing to the
non arrival of granite shipments from Vancouver.

All Mason and Bricklaying were suspended at
the end of February but were enabled to make another
start on the 10th inst. by the arrival of a small car
of granite on the 9th inst. This work will be again suspended
unless the supply of granite is considerably freshed,
the Contractor is now in Vancouver re this matter.

Carpenter work has been maintained and freshed ahead
as far as possible.

A certain amount of work in connection with the
Roofing and Heating has been accomplished including the
delivery and erection of the two Boilers for the
Heating Plant.

Generally the work has proceeded fairly satisfactorily
during the 15 days. The glazed bricks have arrived
or rather the first consignment has arrived but are
not at present opened up. Respectfully Submitted

Yours faithfully
W. Macaulay

Sir,

Re: Kamloops Industrial School.

Encl.

In further reference to your letter of January 2, I enclose a report on a proposed sewage disposal plant for the Kamloops Industrial School at Kamloops, B.C., prepared in accordance with your instructions. This report gives a detailed estimate of cost with a specification, proposal for contract and plans. The estimated cost of the work is \$3700.

Mr. Swan in his letter of transmittal states that this system has been designed in accordance with suggestions made by Mr. Orr, Architect for the Department of Indian Affairs.

Your obedient servant,

J. B. Challies
for M. F. C.

J. B. Challies,

Sir.

"Reference Sketches & Mr Orr's letter of 22nd Feb.
Herewith under separate cover I am forwarding sketches
for consideration revised as far as possible in accordance
with Mr Orr's request.

Girls Second floor Plan. This is submitted, as requested.

The arrangement calls for no particular explanation
Girls First floor Plan. No change on this floor.

Girls Ground floor Plan. Do Do.

Girls Basement Plan. The Plumbing arrangements
have been modified to some extent, and with the
following explanation, are submitted for consideration:-
Girls Baths. The sketch shows the twelve Baths shown,
if the number is considered excessive, cut out the
necessary Baths but please leave the Bath Rooms.
The baths on South side of Corridor may with advantage
be 4'-6" only, remainder to be 5'-0"

Wash Basins. The number of basins has been reduced to 36
and the fixtures removed from the wall. The Rev. Father
McSwiney and Sister are content with the individual
wash basins and the general idea of the table, down
Centre of room; they however consider that a fine round
wood table, as suggested, quite unavoidable; whilst
the usual expensive plumbing fixtures are not considered
essential or even advisable, it is considered that the
importance of this fixture amply justifies expenditure

necessitated by the provision of a really good
substantial picture of the "good proof type"

The Rev. Father McGuire is particularly anxious
for Mr Orr to reconsider this matter, he contends that
the importance of the washing facilities, in an Indian
Residential School, cannot be overestimated.

Girls Laundry Plan A rough suggestion is submitted
also transverse section showing the natural grade
and an idea of the proposed new Grade. It should
be noted that the natural grade falls very rapidly
from the point (D) in an easterly direction towards
the River.

Total Number of Girls The Rev. Father McGuire,
after consideration & enquiry has considered that accommodation
for one hundred and twentyfive (125) girls should
be provided.

The information etc herewith supplied has been
considerably delayed owing to the absence of the
Sister Superior and Assistant Sister, who have been
attending Retreat at Victoria.

Trusting the above gives the necessary information

IN YOUR REPLY REFER TO
No. 137
ALSO
TO DATE OF THIS LETTER

Sir, 2

R

I beg to acknowledge the receipt of Department letter of the 26th ulto., file 154-0-5, and in reply enclose quotations of prices of power saw, for which the Principal of the Kamloops Industrial School has made requisition.

The "Wade" and "Wee MacGregor" saws are constructed with gasoline tank and motor from which it derives its operating power.

I am advised by the Principal of the Kamloops Industrial School that he has obtained a permit from the Provincial Forestry Department to cut timber for firewood at a point some miles distant from the School. The cutting of this timber on ground into the required lengths for fire by one of the above mentioned saws would be of great assistance and would be the means of saving a number of pupils having to proceed to the point in question to cut the wood by hand.

As there are not a sufficient number of pupils old enough or big enough to be entrusted with the dangerous task of hauling the logs to the school grounds, I would recommend that the Department give the requisition made by the Principal of the Kamloops Industrial School, for the purchase of one of the above mentioned saws, its favourable consideration.

Your obedient servant,
Wm. C. Dallin

THE MODEL "B" WADE DRAG SAW WITH DISC CLUTCH

We have always said that when a better drag saw was built WADE would build it. Our Model B WADE is a better drag saw and we are proud to have built it. We could have put a clutch on our drag saw long ago, but it would have been just like all the rest and WADE only builds drag saws that ARE better.

All of the many practical features which have made the 1921 Model WADE famous such as the V-shaped narrow wheel barrow frame and broad tired wheel, automatic lubricating system, positive dogging arrangement, single lever control, quick detachable saw holder, non-freeze water drain, priming spark plug, high-tension ignition system, etc., have been incorporated in the Model B WADE with the addition of our multiple disc clutch.

"Motor Idles"

With a Model B WADE it is possible to run your motor independently of the saw blade. When the lever is in a forward position the motor operates but the saw blade remains stationary. Motor can be run for hours without stopping. Pulling the lever back towards the operator sets the saw blade to work again, making the saw dust fly just as if it had met with no interruption. This is what makes the WADE clutch drag saw so popular with timber cutters throughout the United States. No more tie-ups while disengaging saw blade from a tight place in log. It makes an easier operated, better controlled and more efficient woodcutting unit. The clutch feature also appeals strongly to farmers on account of their being able to use their drag saw motor for running a feed grinder, cream separator, or pump, etc., after their winter's wood supply is cut.

A Multiple Disc Clutch Built for Service

Four steel discs do the work on the Model B WADE and are so designed and constructed that they will last the life of the drag saw itself. No wear on the discs except when the motor is idling. It has no friction bands or linings to wear and give trouble. The discs require no attention whatsoever, not even oil. Keeping cams well lubricated assures an easy running, steady, reliable clutch.

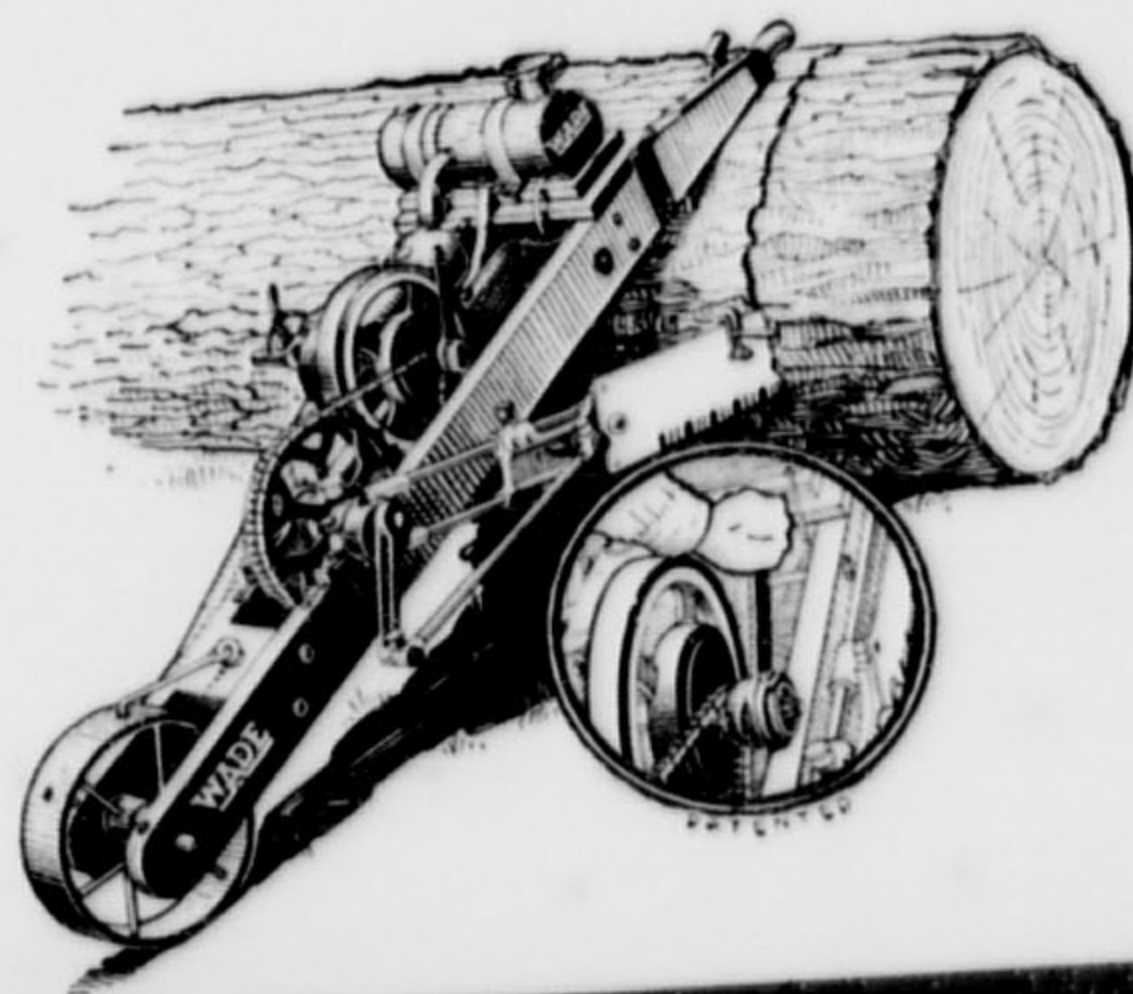

SIMPLE—PRACTICAL—EFFICIENT. Built to last.

Never Slips—Trouble Proof

The WADE Disc Clutch can never slip nor stick for the reason that proper adjustment is provided for the purpose of taking up possible wear. Simply tightening or loosening lock nut on the end of the shaft prevents clutch from slipping or sticking should the occasion arise. Specially patented release automatically throws out clutch without damaging machine should saw blade become pinched in log.

Wade Service Only Begins When You Buy Your Wade Saw

PERHAPS one of the reasons for the success of the WADE SAW all over the world is the interest that this old established house takes in its customers. R. M. Wade & Company, as well as all WADE dealers, stand squarely back of the WADE SAW. YOU must be satisfied—that is the first consideration. THE WADE must live up to its reputation, by giving you the same perfect service that it is giving to thousands of other satisfied users.

LOOK at its lubrication system, for instance. The action of the motor keeps a constant oil vapor bath on all inside working parts under nine pounds pressure. All outside working parts are lubricated by large grease cups. The thorough and correct system of lubrication means long life for the WADE.

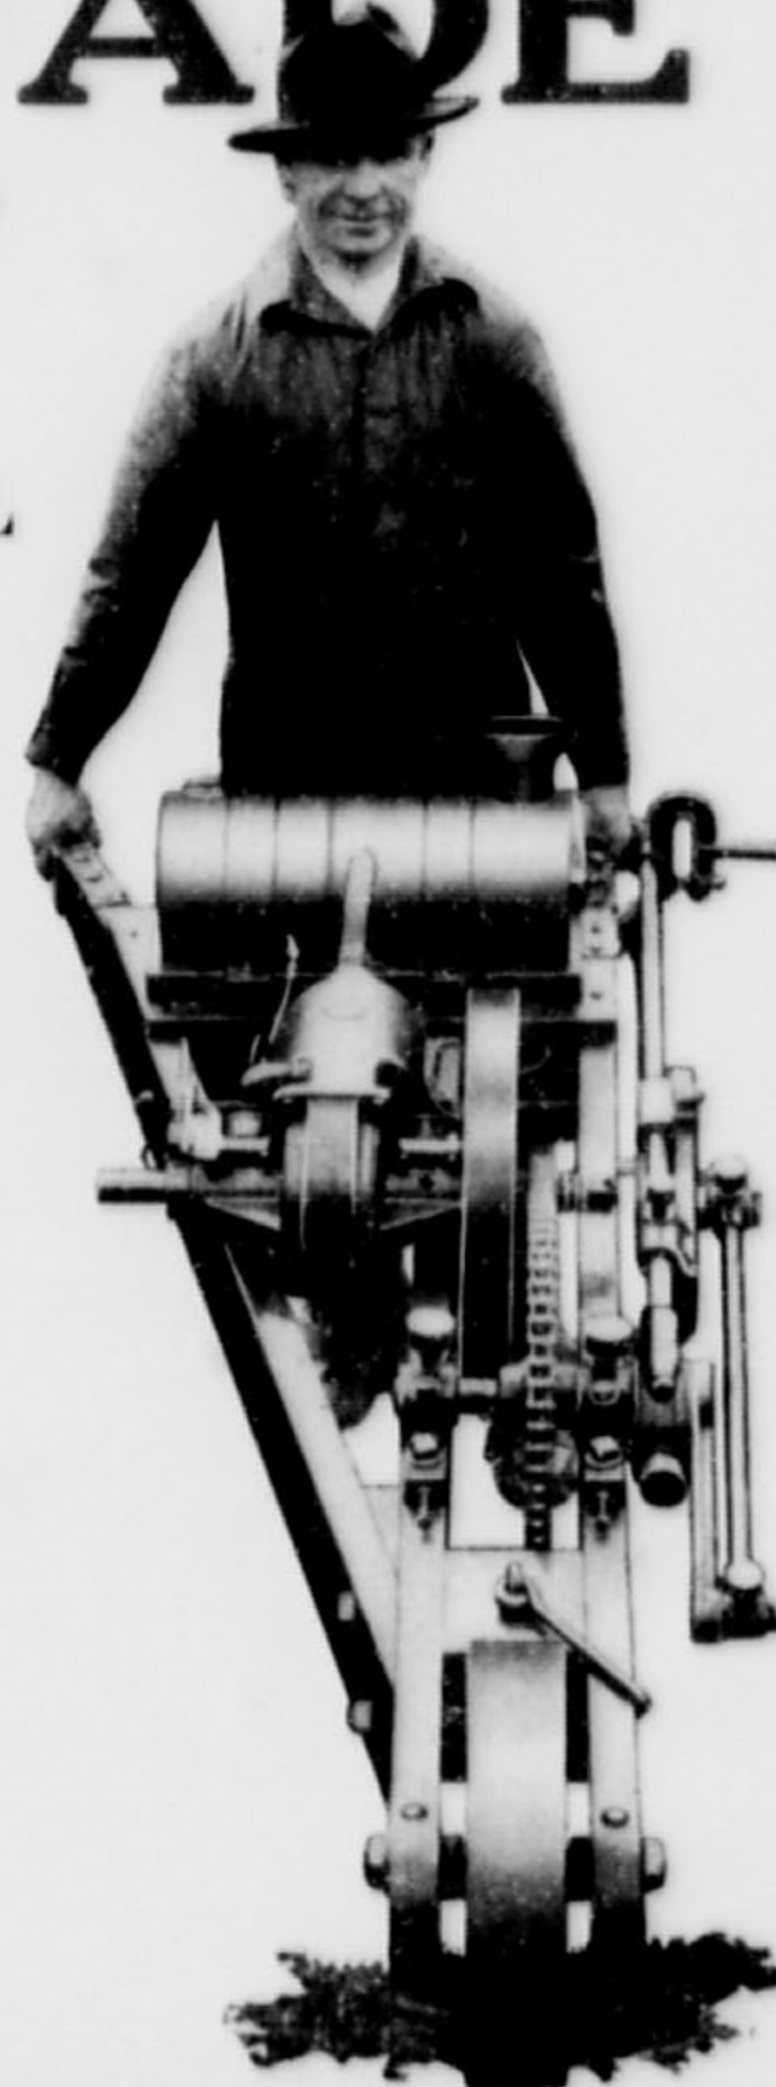

Three-point support—two points on the log and a locking wheel, rigid on the ground. Saw automatically lines up with log, regardless of ground conditions. As easy to move as a wheel barrow. As solid and firm in operation as a rock!

THE WADE is EASY STARTING. A high-grade Champion automobile PRIMING SPARK PLUG is regular equipment. The famous WADE Columbia Hot-Shot Waterproof Battery furnishes the spark. No single dry cells used. Starts easily and surely in hot or cold weather.

A Power Pulley can be furnished for a slight additional cost. Its powerful, valveless motor will supply adequate power for all light farm work.

BEAVER

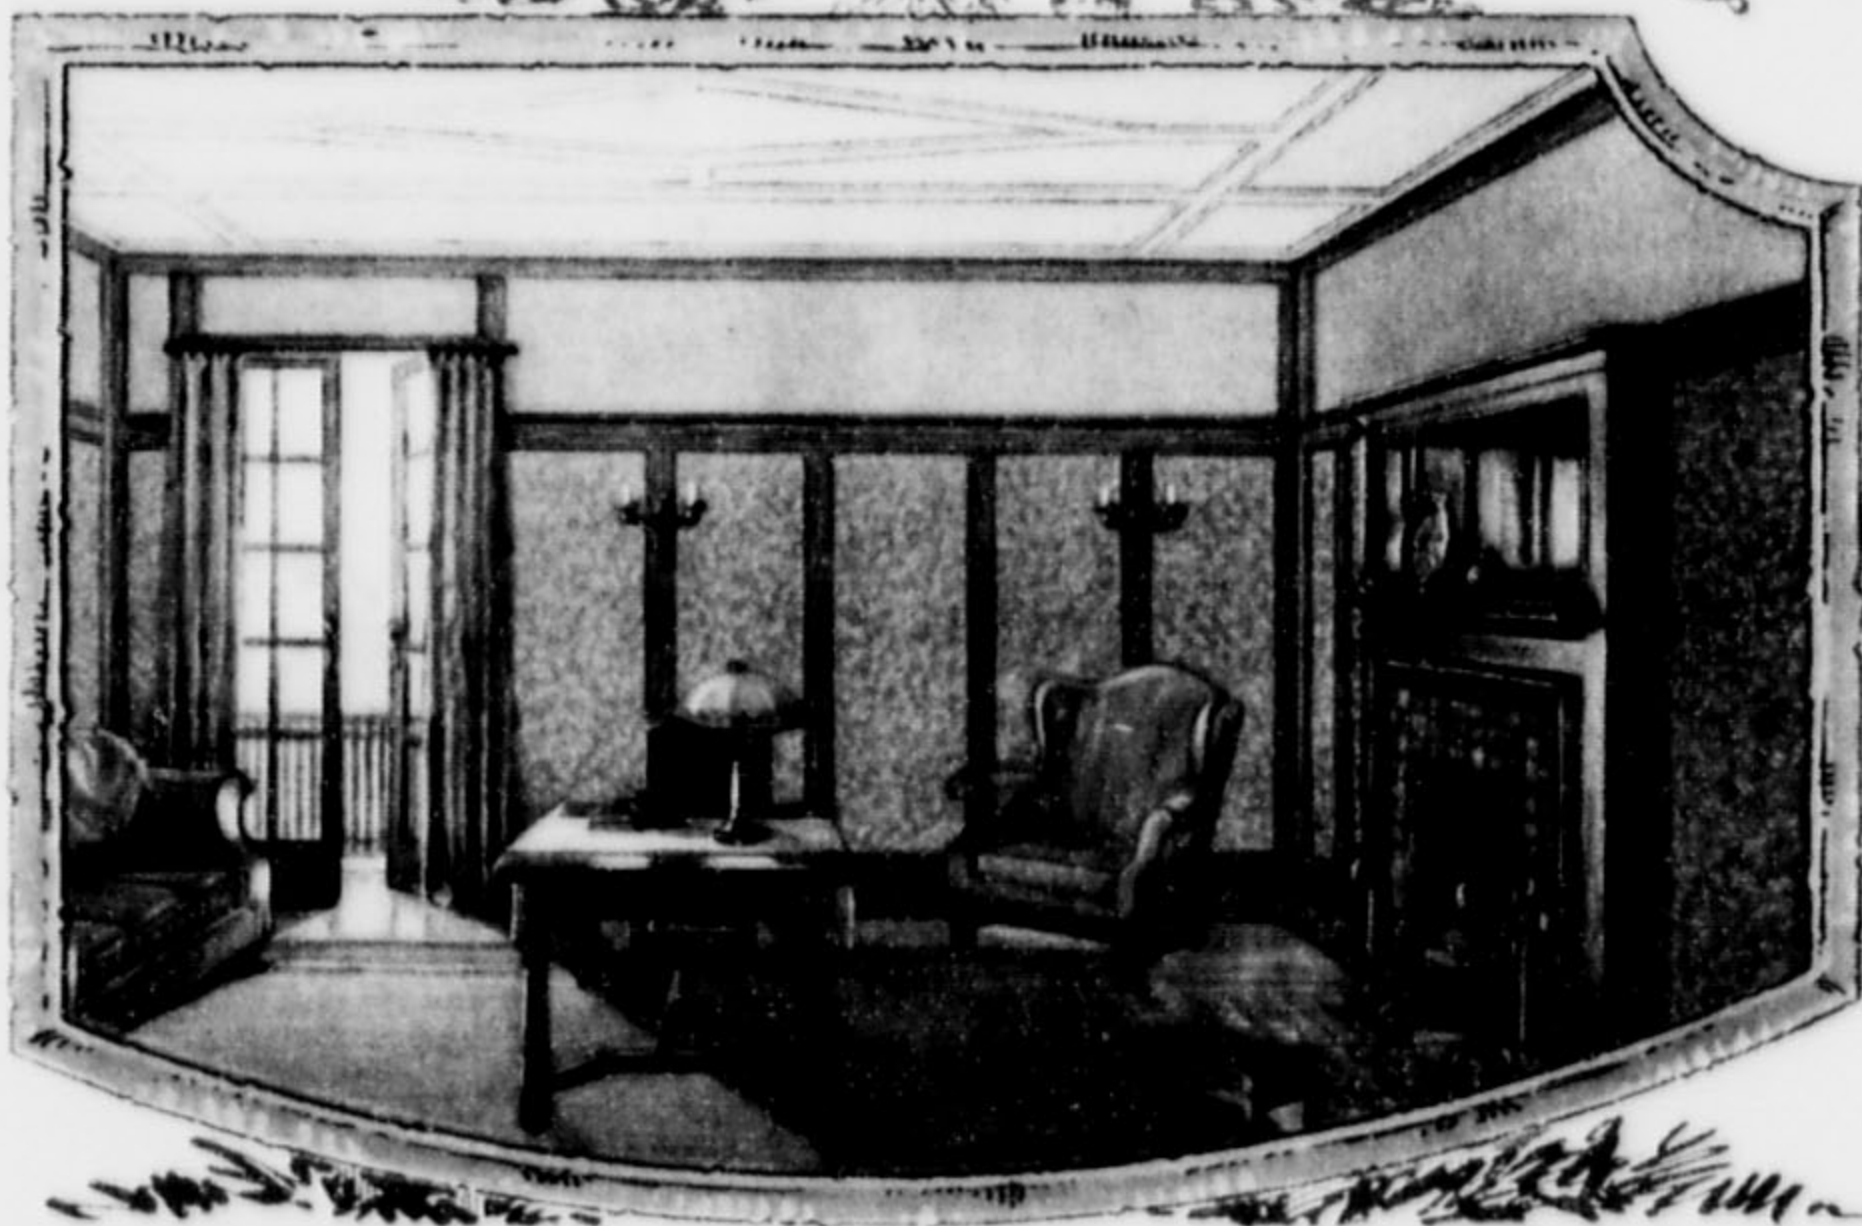

FOR BETTER WALLS

BEAVER BOARD is a ready helper when you build new rooms or rebuild the old ones. By Beaver Boarding your rooms you give them additional stability as well as a more attractive appearance.

With Beaver Board the result obtained is surpassingly pleasing and artistic. The paneling may be subdued or prominent. The paint decoration may be elaborate or modest. In any event, the finished effect will convey a distinct impression of originality and good taste.

Beaver Board transforms the walls and ceilings of a room from blank but necessary nonentities into decorative factors which add character and distinction to the entire surroundings—and this is true of the office, store or other business building as well as the home.

Yet Beaver Board is not merely artistic—it is also the most practical of all wall and ceiling materials since it is crack-proof, jar-proof, and permanently fall-proof. It is always repair-free, clean and sanitary, and adds genuine comfort to the home as it alike repels the severe coldness of winter and the scorching heat of summer.

BEAVER BOARD
PURE WOOD

You can't expect Beaver Board unless this Trade-mark of the board is on the wall.

COPYRIGHT 1919 BY THE BEAVER CO.

BEAVER CO. LTD.

BEAVER BOARD

WALLS & CEILINGS

What Beaver Board Is.

Beaver Board is manufactured from spruce forests of Northern Canada are ground into pure wood fibres which are built up by compressed layers or "plies" into the large knotless and crackless boards. These boards are $\frac{1}{8}$ of an inch in thickness and made in widths of 32 and 48 inches and lengths of 6, 7, 8, 9, 10, 12, 14 and 16 feet.

The boards are seasoned by a process equivalent to kiln drying and then both the front and back of the board receive the patented "Seal-tite" sizing process. This treatment gives a double coating to the back so that when the board is applied, and the front is painted, both sides are equally covered. Thus the board is protected against those seasonal or climatic changes in moisture or humidity which might otherwise cause warping or bulging.

For Old or New Walls.

The quick, orderly, clean way in which Beaver Board is applied is in marked contrast to the dirt and delay of a lathed and plastered room. And this is just as true when repairing, altering or remodeling as in new construction. In new work the boards are nailed direct to studding and

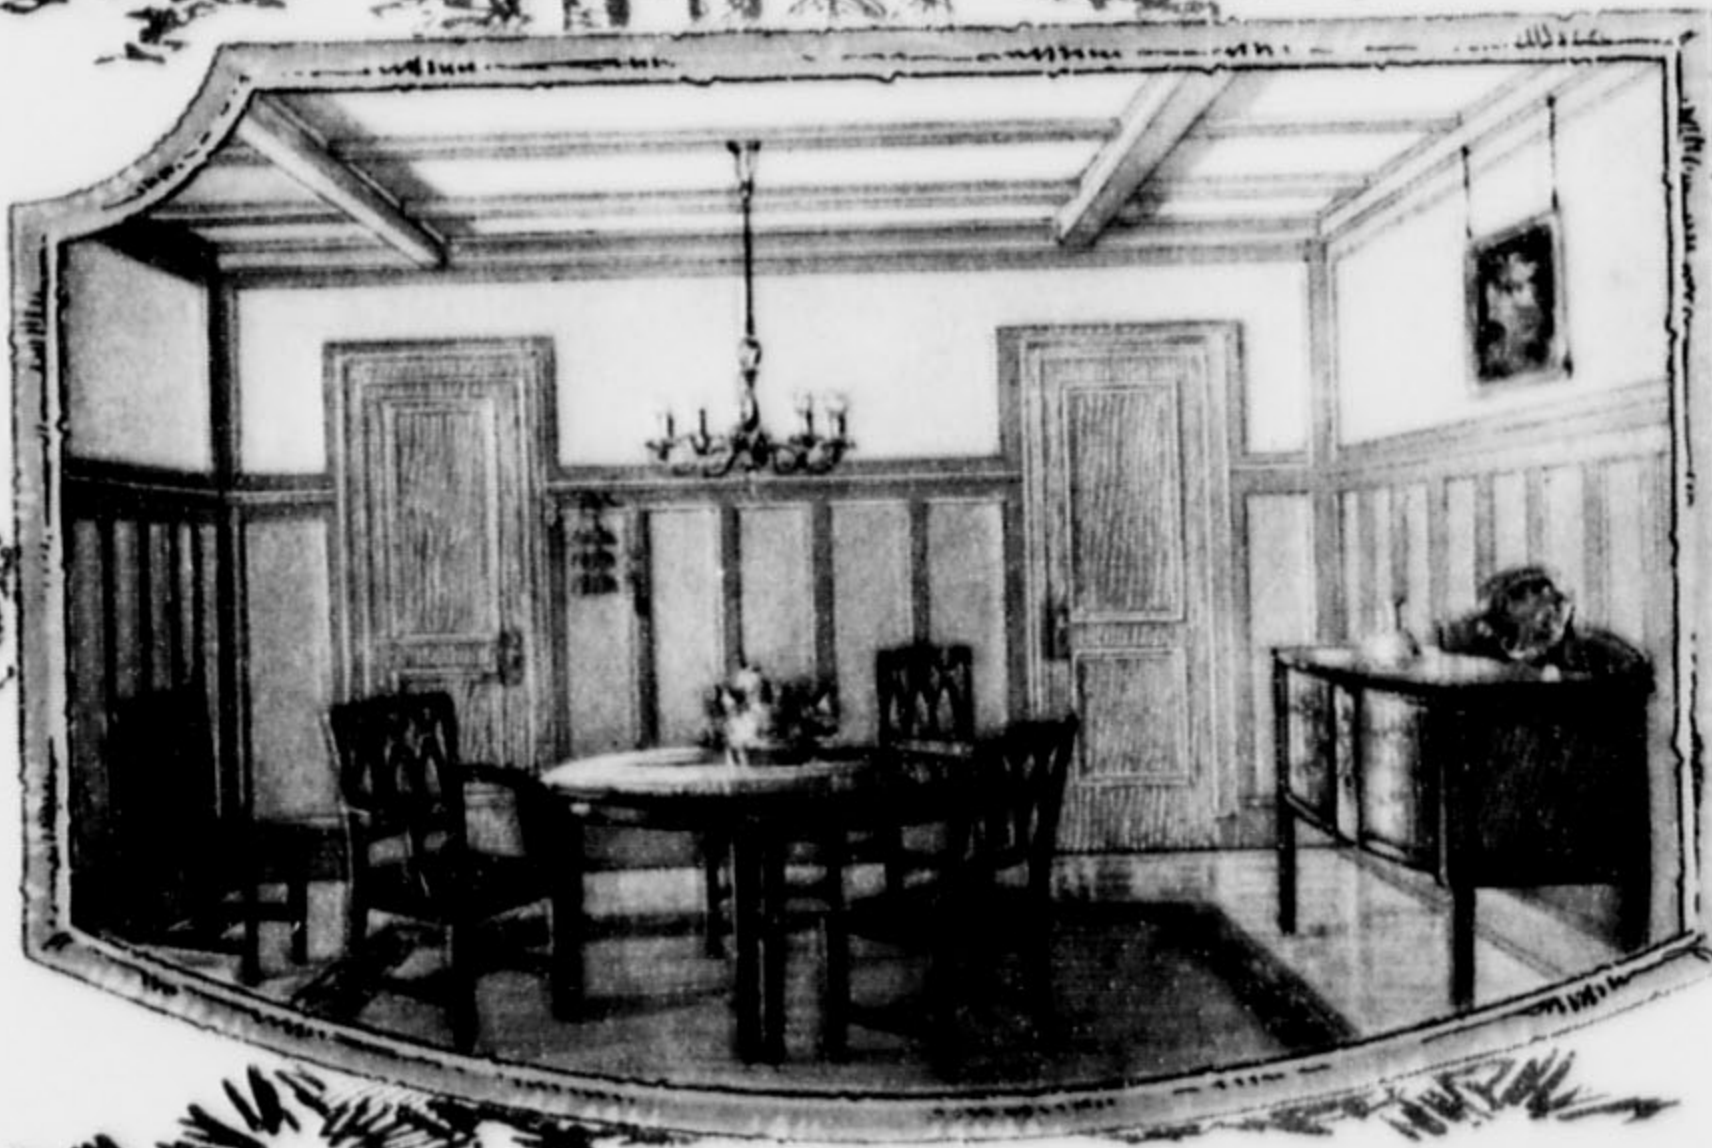

joists. In remodeling the boards are placed right over the present walls whether plaster, concrete, brick or wood.

Immediately after they are nailed in place, the boards are painted with any good flat or oil paint or kalsomine. Then the decorative effect is completed and the room made ready for instant occupancy by applying decorative wood trim over the panel intersections.

Your Use for Beaver Board.

You will find it worth while to know what Beaver Board will do for you in whatever work you have on hand—building or repairing; making additions to home or business buildings; or the utilization of waste space in attic, basement or other unused rooms.

Tell us about your plans and we will arrange to have the Beaver Board Department of Design and Decoration prepare, without charge, a special panel design for your individual rooms and furnish a detailed estimate of the necessary material. By taking advantage of this service you can see what Beaver Board will do for you before you go ahead with the work.

Don't expect Beaver Board results until this Trade-mark is on the back of the board you buy.

1st March

1924

R

Sir,

New Indian Residential School Kamloops B.C.

In accordance with instructions from Mr. Orr per letter to the Rev. Father McGinnis the following detailed estimate has been obtained from the contractor Mr. John Carson.

Should the Department decide to authorize the work or any portion thereof, a formal quotation covering the particular work required will be forwarded to the Department.

"Re Chapel"

- (1) For changes to Roof the additional charge would be
No. 11 Brackets to Collar Beam \$220.00
22 sqs. Metal Ceiling 330.00 Complete. \$550.00
- (2) Provision of Sanctuary, Sacristy, Confessionals etc
Extra for raised floor \$30.00
" Bull nosed steps 50.00
" external window 20.00
" internal windows etc 40.00
" to Plaster arches etc 50.00
" Partitions complete 267.00 \$457.00
- (3) " Graveling 7-6 high
instead of stone & strips specified \$300.00
- (4) " For leaded lights instead of plain glass
to ~~the~~ chapel windows \$201.60

In reference to above items, may I request an early decision if circumstances & convenience permit

Please forward to
Mr. Orr.Yours faithfully

Report covering Period 15th Feb. to 24th Feb. 1924

Department of Indian Affairs

To The Secretary
Department of Indian Affairs
Ottawa

Kaulcop New Indian Residential School
Ottawa, 1st March 1924

R

DEPT. OF INDIAN AFFAIRS
MAR 8 1924

Architect

I have the honour to report as follows:-

From the 15th Feb. to 24th Feb. the weather was exceptionally favourable and all branches of work were pushed forward satisfactorily.

Some difficulty has been experienced in obtaining the grants on time; error of judgment at the Grand Vancouver, in getting out the capings before the blizzard for instance, may account for most of the trouble. The result is that all bricklayers & masons were suspended on Friday pending the arrival of grants.

At present the whole building excepting only the main entrance features etc is now at approx the Chapel floor level, the rough floor is laid and the roof to kitchen and adjacent stores in course of construction.

The brickwork is improving but not what I consider satisfactory.

The lumber delivered on the site is not as good as it might or should be, consequently I have directed the Contractor, verbally and by letter, to take such steps as will ensure improvement.

I am satisfied that the Contractor is trying to give the Department a good job, small towns however produce many handicaps.

The Plumbing & Heating Contractor is making satisfactory progress.

Yours faithfully
W. H. Macaulay
Inspector of Construction.

Re: Building.

154-0-5 Industrial School,
Kamloops, July 19, 1924

Dear Doctor:

Building has been going on for about nine months.

There has been practically no difficulty. We ourselves were slow in sending a criticism of the first plans. It was plain ignorance on our part of how to do it properly. When Mr. Macaulay, who is himself an architect, was appointed, the difficulty melted. His presence has obviated a thousand difficulties. I hope you may see fit to retain his services.

The Contractor deserves much credit. He observes the eleventh commandment: he minds his own business. You know how we appreciate this. The children never go near the men: they never come near us, though they are working under our noses. By the way, both he and the subcontractors often compliment us on the good conduct of our children.

The building has a good appearance. This fact removed much miserable comment. All public men point to it with pride. It improved the community; it created a good spirit. Here, where so many visitors congregate, adverse criticism would do much damage; the present structure redounds to the credit of our Department. It is easy to feel the interest it created in the City.

Yours very truly,

James McGuire O.M.I.

The Secretary

Department of Indian Affairs

Ottawa

Sir, "Mid Monthly Report from 1st to 15th July, 1924"

During the above period the progress has been steady and fairly satisfactory; in the administrative portion of the Building the plastering is complete, windows and doors fixed, hardware & pictures mold in place, the built up stairs is fixed, and the painting, staining and varnishing is well advanced externally and internally.

Grants In reference to the Grants complained of, I would state that a stone mason from Vancouver was here all last week making an effort to rectify defects, further than this no apparent effort has been made to by the Sub-Contractor, to make good the defects complained of.

Glazed Brick in Kitchens. This is still unsatisfactory, though somewhat improved since my last report.

Plastering This is in many places defective, please see copy of letter to Contractor.

Capola This is not, according to my interpretation of the Drawing, in accordance with the Design, in any case it is in no way pleasing, the graphite paint on gal iron emphasizes the defects, will again report on this matter in the course of a day or so.

Colours I consulted the Rev. Father McNamee as instructed, who in turn consulted the Sisters, owing to consequent delay there was insufficient time to forward suggestions as per your instructions and I was obliged to give decisions on the information to hand; this course well I trust be satisfactory; generally owing to

Kanabos New Indian Residential School
Continuation of Report 15th July 1924
Department of Indian Affairs

Ottawa,.....192.....

To The large amount of red brickwork, it was practically necessary to adopt the complementary colour, green, consequently a dark green is being used for all external windowframes, the sash a faint ivory, (white will not stand the sun^{here}) the remainder of the external woodwork in keeping therewith.

Internal The Infirmary is being finished in a pale ivory, also the four rooms on the ground floor comprising the Parlour, Office etc.

The Scullery or Larder it is intended to keep as light as possible

The remainder of the internal woodwork has been stained a weathered oak

Rec. Power Line The City Utilities Department were requested to proceed with the installation of Power & Light Lines all as per your instructions, this work is now in course of construction.

Dumb waiter Owing to the work having proceeded too rapidly, or rather being so far advanced, when the Contractor gave me information as to the price, I decided that the cost of installation would be excessive and informed the Rev. McGuire accordingly, he, whilst regretting the lack of the dumb waiter, was not persistent, as formerly, consequently I decided to let the matter drop subject to your approval.

Heating etc The Subcontractor has been at Vancouver during the past few weeks, he is however expected here on the 17th inst

Dear Sir. "New Indian Residential School"

In reference to the defective Glazing in many parts of the Building I beg to advise you that all defective Glazing will have to be put out, as such cannot possibly be accepted.

Reference the Capola, this is not in accordance with the Contract Drawing; your suggestion that same is as near as one could get without a large scale working detail, will be submitted to the Department; meanwhile further work in the way of painting etc is inadvisable, in view of almost certain changes.

Yours faithfully
H. H. Macanley

Report June 30th 1924

Department of Indian Affairs

Kamloops B.C. 1st July
Ottawa,

The Secretary
Department of Indian Affairs
Ottawa

R

*are under
a good
under.*

From the 15th to the 30th June steady progress has been maintained, several heavy rains have provided quite a good test for the roofing.

No brick work during this period except on the glazed bricks in kitchen, this work was suspended owing to lack of bull nosed bricks; some of the defects complained of in connection with this work have been rectified, it is still however unsatisfactory.

The brickwork complained of is still as reported, the sub-contractors for this work apparently have made no effort to replace the defective work or materials, Mr. Carson, the contractor, has I believe, strongly urged the necessity of this work being replaced as soon as possible.

The gravel roofs etc also all shingle roofs are practically complete, this includes flashing, consequently the building is now weatherproof.

The plastering is a fair job only, the two upper floors are complete and the basement well advanced.

The carpenters are framing trim, ^{work} this work is proceeding satisfactorily.

The painters are working on the primary coat.

Yours faithfully
H. H. Macaulay

21st June 1922

The Secretary
Department of Indian Affairs
Ottawa

Sir. I beg to acknowledge receipt of your letter No 154-0-5 dated June 14th 1922 for which I thank you.

It is pleasing to note that the Department approves of the action taken re granite etc.

May I suggest that the instructions to inform the Contractor that "No future payments will be considered on his contract" until the quality of granite is approved, are certainly severe and would probably create a doubtful if not an untenable position. Consequently for the present I am withholding this instruction, and hope you approve.

Thank you for reply to my lettergram of the 14th inst which duly arrived on the morning of the 20th inst.

In reference to this telegram I would point out that in view of the fact that I am endeavouring to compel the Contractor to live up to the Specification it is rather important that the Department affords him no opportunity for complaint, real or imaginary, it therefore appeared advisable to send the lettergram referred to.

On another sheet, herewith enclosed, I am asking for interpretations etc of certain items in the Specification and should be glad if Mr Orr would forward me with the necessary information as soon as convenient.

Yours faithfully

H. H. Macaulay

Enclosure No 1 Forwarded with letter dated, 21st June 1924 192.....
Ottawa,

Interpretation of Specifications

Page 37 Clause 33

"A neat milled casing - - with milled back hand"
The finishing lumber has arrived from Vancouver this week and
is now being fixed in place. The casings to be used are
perfectly plain excepting only the usual bull nose;
in other words the casing and back hand are bull nosed
only, and the Contractor contends that the bull nose
constitutes a molding and is usually accepted as such,
and therefore samples with the specifications

This view I do not accept and should be glad to receive
a decision from the Department as to the true intent and
meaning of this particular clause.

Page 46 Tile work. The first paragraph reads as follows:-

"The floors of all Bath Rooms on Ground and first
floors shall be finished with 1" hexagonal white
glazed vitrified tile"

The tile setter arrived from Vancouver on Thursday
and commenced to lay floor on Friday. The materials came
with him.

The wall ~~finish~~ finish is in tile. The floor however
is as the sample herewith, but under separate cover,
submitted.

The sample laid looks good but the material
comes rather under the heading of "Pavane mosaic"
than glazed tile. I have taken up this matter with
the Contractor and, if possible, should be pleased to
receive a sample ^{of the desired} tile from the Department.

R

Sir,

Report of to 15th June 1924

During the past fifteen days weather conditions have been favourable and fair progress has been made with the Building.

All Masonry Brickwork etc is now complete excepting the condemned granite work and a portion of the enamelled brick work in kitchen, the latter is held up owing to a shortage in hollowed bricks.

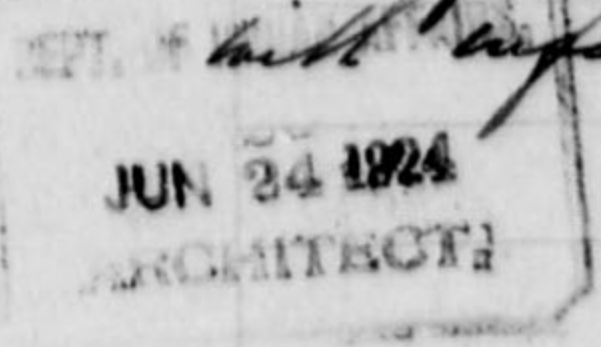

The plastering is well under way, the upper or uppermost floor is nearly complete and the brown coat on north of the ground floor.

The shingled portion of the Roof are practically complete, and Roofers are preparing to lay the tar and gravel.

Carpenter work is making steady progress. Sash etc is now being fitted.

The ceilings are ready for the metal finish. The Cupola is practically finished but is at present unsatisfactory. Changes will be made.

If convenient I should be pleased to receive the information requested in my last report, together with information now requested under separate heading.

Yours faithfully

P.O. Box 453

Ottawa, Kamloops B.C. 192-
16th June 1924

The Secretary
Department of Indian Affairs
Ottawa

Sir,

✓ Metal ceilings Will you please let me have, as soon as possible, the "no" and particulars of the Particular designs required, this information is urgently requested to avert delay. The Contractor informs me that this information was requested several weeks ago.

✓ Service Lift or Dumb waiter

The Rev. Father MacGuire is particularly insistent on a Dumb waiter from the Kitchen to the Infirmary Floor.

It is quite possible to install this, should the Department so desire; and whilst reluctant to inflict the Department with personal views, would suggest that a Dumb waiter is particularly desirable.

Yours faithfully
W. Macdonald

Ottawa, June 19, 1924

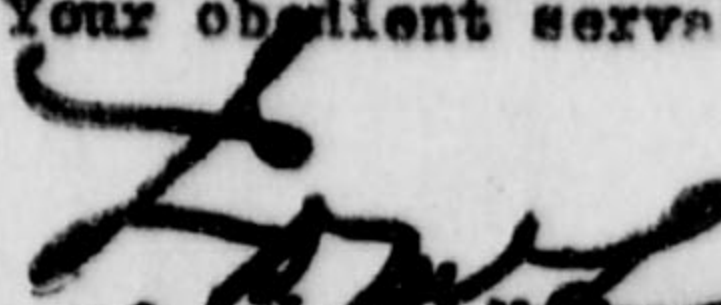

Sir:-

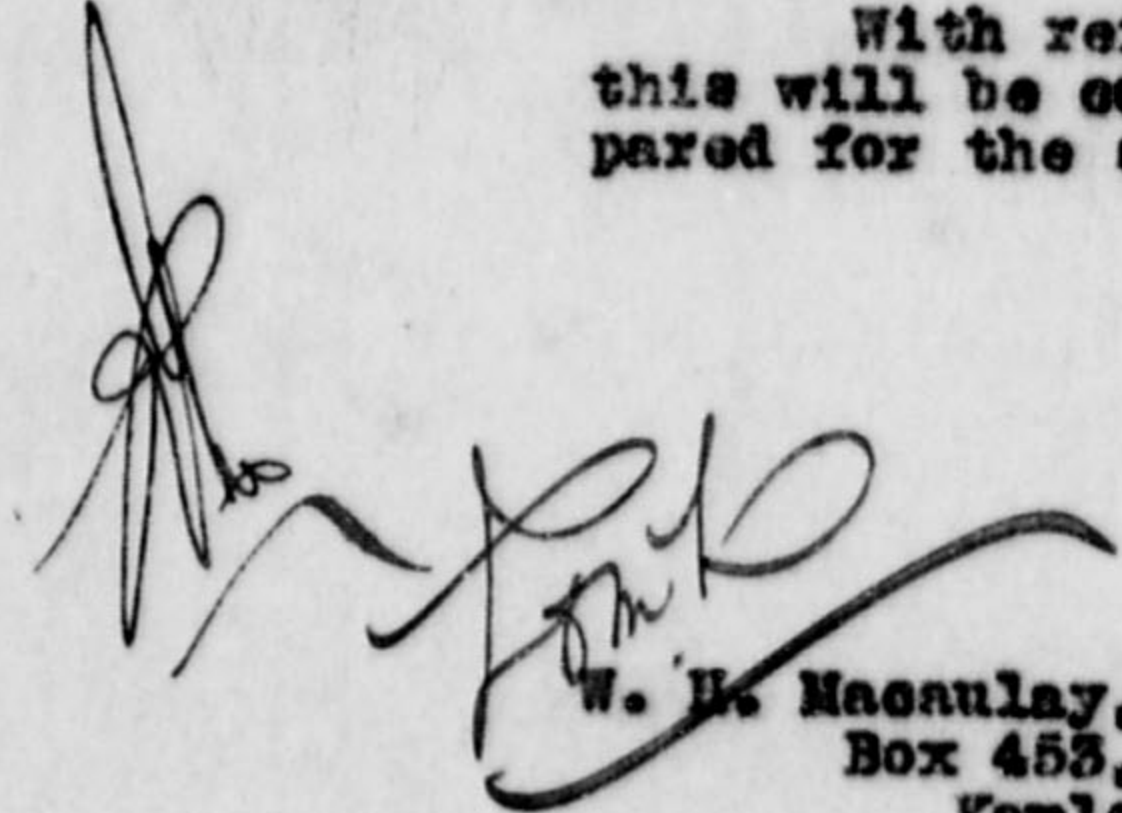

With further reference to your letter of the 4th instant regarding the installing of a bell in the cupola of the new Kamloops School, I beg to say that the Department approves of the installation of a 24" bell, as outlined in your letter and it is noted that the cost will be \$115.00.

With reference to the repairs and replacing required to the electric light line from the city of Kamloops to the Kamloops School, I beg to say that you are authorized to have the repairs made as outlined in the letter of April 26th from the Public Utilities Department of the City of Kamloops. It is noted in your letter that they are willing to undertake this work at the actual cost, and that the amount will be approximately \$865.00.

With reference to the shingle stain for the roof this will be covered in the specifications now being prepared for the second unit of the new Kamloops School.

Your obedient servant,

Assistant Deputy & Secretary.

W. H. Macaulay, Esq.,

DEPARTMENT OF INDIAN AFFAIRS
CANADA

Ottawa, June 14, 1924.

Approved
Self
MEMORANDUM:

Mr. Scott.

A letter has been received from Mr. Macaulay advising that the electric line connecting the Kamloops School buildings with the city system, which is a distance of about 1-1/2 miles in length, is in a dangerous condition. The local municipal lighting company have condemned the line and will not permit their employees to work thereon.

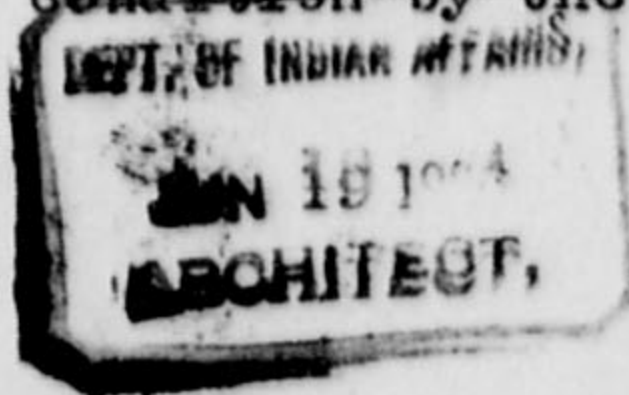

This line was built some years ago, the Department supplying the material and the labour was performed by the staff of the school. The defects are as follows:

Certain poles principally on the river crossing require replacing, and the construction of the cross arms is defective.

The wires are of soft drawn copper instead of hard drawn copper, consequently sagging is general.

The spacing of wires is incorrect, and fails to comply with the Government Regulations.

Mr. Macaulay has taken the question of repairs up with the Public Utilities Department of the City of Kamloops and they are prepared to put this power line from the city to the School in a good condition, and will charge only the actual cost of the work. The cost of the work will be approximately \$865.00, and I beg to recommend that Mr. Macaulay be authorized to have the power line put in good condition by the Utility Department of the city of Kamloops.

Ottawa, June 14, 1924.

Memorandum:

Approved
Del Mr. Scott.

Reverend Father McGuire is very anxious to have an outside bell installed in connection with the new Kamloops School.

Space can be found for this bell in the belfry built on the roof, and the cost will be approximately \$100.00.

I would recommend that the contractors be authorized to install the bell, as I believe it would be of great assistance to Reverend Father McGuire in regulating the hours at the School.

Sir:-

Replying to your letter of the 4th instant, with reference to the work on the new Kamloops School, I beg to say that I have noted your remarks with reference to the quality of the granite being furnished by the contractor. The Department approves of the action you have taken and you should inform the contractor that no future payment will be considered on his contract until the quality of the granite has been brought up to meet with your approval. I also approve of your action in not accepting the glazed brick work in the kitchen.

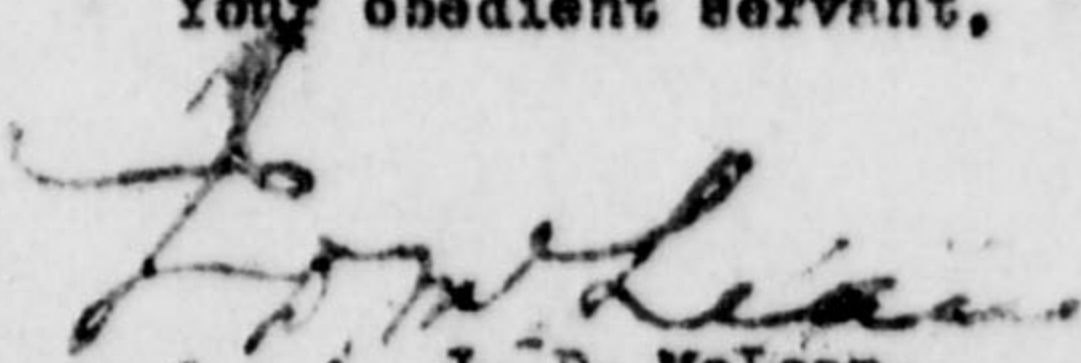

With reference to the colour for the finishing of the wood work external and internal, I would be glad to have your recommendations after consulting with Reverend Father McGuire.

With reference to the window in the front of gable, I approve of your action in having a window placed here to allow light and air in the attic.

With reference to the installing of a bell I will advise you in the course of a day or so regarding this item.

Your obedient servant,

J. D. McLean.
Assistant Deputy and Secretary.

RECEIVED
JUN 11 1924
DEPT. OF INDIAN AFFAIRS

Sir,

As stated in my report covering the latter half of May I have the honour to submit report dealing with items on which information is urgently requested, as follows:-

Granite:- From the copy of my letter to the Contractor, forwarded with my monthly report it is obvious that I am far from satisfied with the granite supplied. The quality is decidedly inferior and the workmanship defective, the granite is badly stained contains a large proportion of knots, arrives chipped & broken several blocks have been patched probably with shales and granite dust, and generally the composition is such as to strongly indicate cutting from boulders. In addition some of the blocks set are anything but satisfactory.

It has been necessary to complain to the Contractor about the quality of the granite supplied many times during the past three months as referred to in some of my reports to the Department.

The last shipment of granite was such that I was forced to refuse acceptance of same, and informed the Contractor that no certificate would be issued by me in connection with same.

In the last certificate issued by me, No 5, forwarded to the Department on the 2nd of June I made a deduction of approx \$2.500 on account of the defective granite complained of.

The Contractor, I believe, realises that the action taken by me is reasonable.

I should be pleased to learn exactly what view the Department is likely to take of the matter.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 3)

Department of Indian Affairs

Ottawa, 192.....

And regret if possible an expression of approval, or otherwise, of the action taken.

Enamelled Brick work in Kitchen The letter enclosed with my last report gives the necessary information

Expanded Metal Lath My letter is fairly clear, it is perhaps necessary to state that a mistake occurred and by adhering strictly to the Specification it was expected to delay the completion at least one month.

Salvaged iron guttering Some little difference of opinion as to the exact requirements of the Specification has occurred, I hope however to get this matter satisfactorily adjusted in the course of a day or so.

Ventilator to Chapel Roof I have instructed the Contractor to trim ceiling 2'-0" x 2'-0" for Ventilators, two in number. This will allow fixing of Ventilators of desired.

Shiplap for framing Metal Gutters This item was probably overlooked, as no mention of same can be found in the Specification, in any case, a No 2 quality has been fixed on the assumption that it might reasonably be interpreted as necessary for good construction.

Shingles to Roof Nothing is specified, is it the intention of the Department to omit; may I suggest that this matter be considered.

Colors for finishing woodwork external & internal

Will you please advise me as to the various colours desired.

Chair This has been arranged in accordance with Mr. Orr's telegram, viz The Office door retained on the Landing.

Window in Front Gable I have had the brickwork to the blind window in Gable left out, this is the

Department of Indian Affairs

Ottawa,

192.....

only opportunity for getting light and air into the Altar,
should it not be better to put in a window or
small mesh wire screen.

Bells Electric the bell only is specified, I have
made provision for two, one from each Staff
Dining Room; these are of course in addition
to Bells from Front & Side Entrance Doors.

Bell As per request from Rev. Father McGuire I have
obtained an estimate for the installation of a Bell
in the Cupola, the Contractor's price for this work
is \$115.00. The bell is 24" and costs \$54.00 F.O.B.
Vancouver, leaving \$61.00 for materials & fixing and
freight. Will you please advise me as to acceptance.

The Cupola offered more facilities than a
bell for over Chapel; have included provision for
Rope being brought down into Dervery through
Candair, which, with very slow hands, will I think
be quite satisfactory.

Yours faithfully,
H. H. Macaulay

Sir.
"Kamloops New Indian Residential School
References the above I beg to report as follows:-
From the 15th May the weather has been favourable
for building operations and satisfactory progress
has been made during that period.

The quality of the work executed and
materials supplied have in cases proved
unsatisfactory. a special report dealing
with these items will be forwarded tomorrow.
herewith I enclose three copies of letters forwarded
by me to the Contractor.

Practically all brickwork is complete and
most of the granite, all metal lath is fixed.

The rough concrete floors are finished and
ready for the mastic finish.

All shingles to roofs is complete and
the central portion gabled shingled.

The trim work has commenced and
gutter to main roof are complete.

The Electrical Pendant work is complete as
far as building will permit.

No Heating or Plumbing work during this period.
Photos. will be forwarded not later than
the 4th inst.

Excepting only the items above referred to the
work is proceeding satisfactorily.

Yours faithfully
H. W. Canley

Ottawa,.....

Mr. John Cannon
Contractor
Kamloops B.C.

Dear Sir. "New Indian Residential School Kamloops B.C.
"Repairs and Grants"

As you are fully aware it has been necessary to complain,
as to the quality of granite supplied on the above mentioned
Building, many times during the past three months. The
expected improvement has not materialized, in fact
the standard has deteriorated, the last shipment is
most decidedly inferior and defective.

Consequently in confirmation of my verbal
instructions, the settling of this or any defective granite
is entirely at your own risk, as it is quite impossible
for me to accept same.

As pointed out the granite has obviously been
cut from boulders and includes most of the faults
associated with defective granite; in addition to which
the cutting on many of the stones is decidedly faulty.

It certainly should not be necessary to use
3/4" joints for the class of work specified.

The laps to Chapel butters, as pointed out,
are improperly set and will have to be rectified.

I am reporting this matter to the Department
and shall advise that no further payment is made
in respect of the granite work complained of.

Yours faithfully
Signed *W. H. McCauley*

Mr Theo Carson
Contractor
Kamloops B.C.

Dear Sir,

"New Indian Residential School Kamloops B.C."
"Reference Slayed Brickwork in Kitchen"

As I verbally informed you on the 23rd and the 26th inst, the slayed brickwork in the kitchen is not satisfactory and cannot be accepted until the defects complained of are rectified.

The sills are out of line and in spite of the angle blocks being used, a much better job was possible, and will be required.

The horizontal joints are out of line, in certain spots they are actually wavy, the piers are not plumb, and the work generally will not stand the application of a straight-edge.

The Specification requires a first class job and I must request you to take such steps as will ensure same.

Yours faithfully
J. H. McLaughlin

Dis.
Orig.

I beg to report as follows:-

During the past two weeks the weather has been favourable but owing to delay in arrival of the granite copings etc no work in the way of masonry has been accomplished.

A load of granite arrived at the Depot today a resumption of this work is expected early next week.

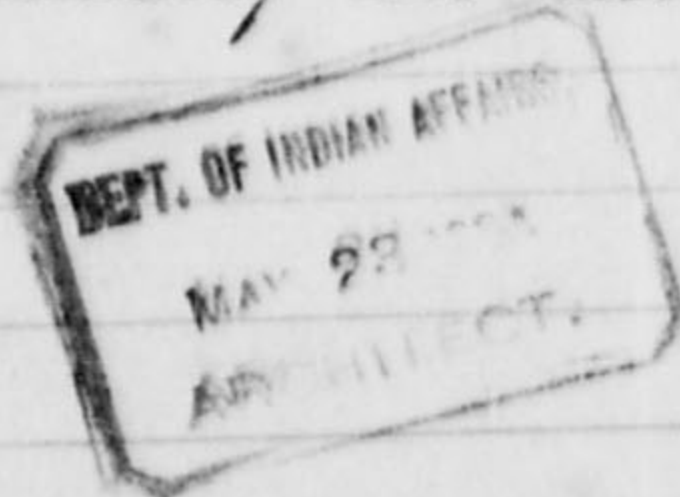

The remainder of the white enamel bricks arrived on the 13th & 14th and the lining of kitchen walls has commenced.

The concrete steps to Boiler Room have been completed this week and the steps to Porches are now in course of construction.

Carpenters have been occupied chiefly on the Main Roof, Cupola and Shiplap to Ceilings.

The Electrician has during the past few days been working chiefly on conduit work to upper floors.

Generally all work is proceeding favourably.

Yours faithfully
H. H. Macaulay
Inspector of Construction.

Ottawa

Sir.

Rev. Kamloops New Indian
Residential School

Herein I enclose letter received from
The Principal, Rev. Father McGuire

The change requested in the above
letter would I believe be advisable, as, if
the doors are placed on the corner side of
the room referred to, we shall be able to
obtain a somewhat easier stair, together
with additional space for landings, points
which I am sure Mr. Orr will appreciate.

May I urgently request a decision
by Telegram at your earliest convenience

Yours faithfully

W. H. Macaulay

Inspector of Construction

Indian Affairs (RG 10 Volume 6448, file 882-5, part 3)

ARCHIVES PUBLIQUES
CANADA

Industrial School,
Kamloops, May 8, 1924.

Dear Mr. Macaulley:

I notice that the office and parlor doors open on the landing. To obviate collisions and probably accidents there, would it not be as well to have these doors open on the corridor just around the corner? I presume this would not necessitate any extra cost and that probably Mr. Orr would approve of it.

Yours very truly,
James McQuire O.M.S.

Mr. W. H. Macaulley,

Sir:-

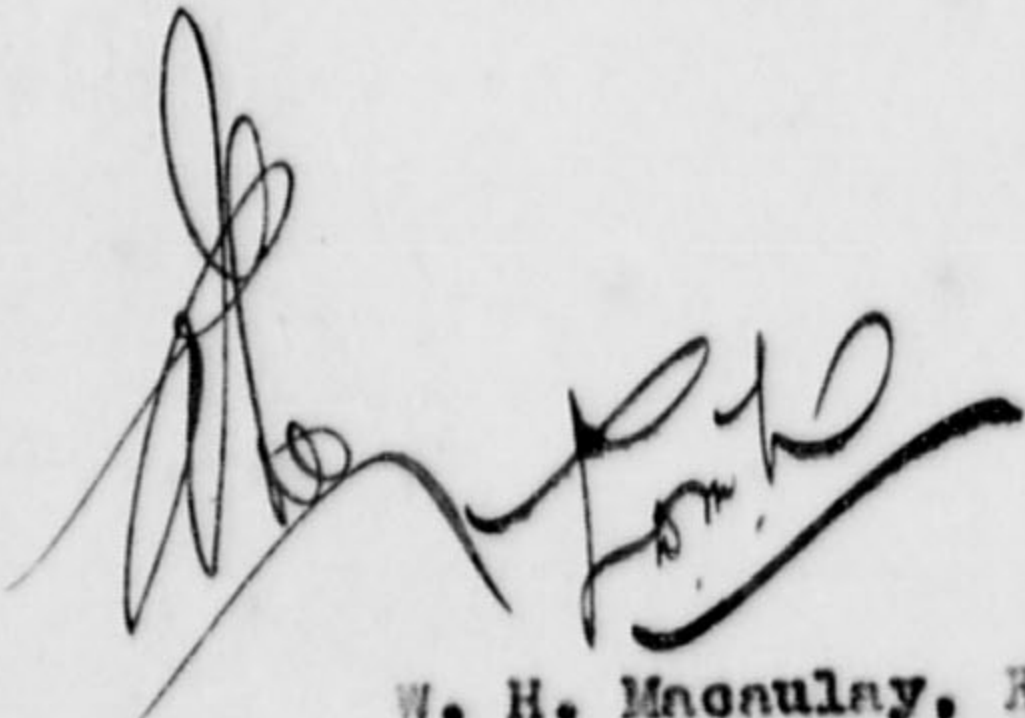

Referring to your letter of the 1st instant with reference to the electric installation at the Kamloops School, I beg to say that the Department will allow an extra for the installing of mains for connection to the two wings.

The question of installing service lines to the school is under consideration and you will be advised regarding this matter at an early date.

Your obedient servant,

J.D. McLean.
Assistant Deputy and Secretary.

Report for month end. April 30th 1924
New Indian Residential School Kamloops B.C.

Department of Indian Affairs

The Secretary
and Department of Indian Affairs
Ottawa

P.O. Box 453
Kamloops B.C. 1924
May 1st

I beg to report as follows:-

Very good progress is now being made with the building generally. The weather has been favourable and excepting minor delays in Granite, work has proceeded without interruption.

With the exception of Chimneys and gables to Chapel all brickwork of constructional importance is complete. The Granite is proving a constant source of worry. The quality is not too good and I have been compelled to refuse permission for the Caps to Chapel to be used.

The Carpenter work is well advanced, the new roof is ready for shingles and the flat roofs for tar & gravel. The concrete floors in Basement are ready for asphaltic mastic.

The Heating Main and roughing in for Plumbing are well up to date.

Whilst admitting the necessity for sundry complaints I think the Contractors and Subcontractors are doing their best to give a satisfactory building. The great difficulty is rather the lack of really skilled labour or rather the lack of the large towns prove too attractive.

The difficulty in connection with the Electric lighting installation I am dealing with in a separate letter.

The District desires further alterations, for which however I assumed the responsibility to refuse.

Photos were forwarded, which I trust will satisfactorily show progress made, others will be forwarded in the course of a few days.

Yours faithfully
H. Macdonald

"Electric Installation"

Reference Mr. Orr's letter 154-0-5B dated April 9, 1924

Enclosed herewith I am submitting for your consideration a letter from The Manager, Public Utilities Department of Kamloops giving estimated costs of making good the raw supply line.

I note approval of the various suggestions made in my letter of 2nd April, but would point out that these changes cannot be effected without incurring extra expenditure, I do not anticipate more than a nominal additional cost, some however cannot be avoided. The Specification and Drawings make no provision for connecting up the two wings and this work can be executed now with a minimum expenditure and also obviate cutting and patching of the present Building. The Subcontractor for Electric Installation is expected in Kamloops in the near future, I will interview him as soon as possible and report further on this subject.

Sincerely,
H. H. Macaulay

Inspector of Construction.

P.S. The local Public Utilities Department cannot make any contribution towards service line, further than a promise to execute the work at actual cost price and without overhead charges or profit of any kind.

W. H. Macaulay, Esq.,
Architect,
Kamloops.

Dear Mr. Macaulay,

am sorry to have missed you when you called and as I am leaving early Monday morning for Barriere am mailing this preliminary estimate so as to avoid any undue delay.

"2200 volt line to replace present line to Indian School?"
In my opinion the most satisfactory solution of this job is to rebuild the line completely from the contact with the city system up to the transformer pole at the school buildings.
As the apparent average life of pole butts in this district is about 12 years, we use 45' poles; this enables us to resett these poles twice and is thus a big factor in economy.
The approximate cost of this work would be \$865.00.

The present insulators -both power and telephone would be used on the new line; also the present power line cross arms would be used on the new pole line for the telephone wires. The existing telephone wire would also be used on the new line. #6 copper wire would be substituted for the old wire and the whole line built up to the requirements of the

Indian Affairs (RG 10 Volume 6448, file 882-5, part 3)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

Provincial authorities.

The present line could be remodeled by rebuilding the river crossing, replacing the old cross-arms with new ones of the proper spacing, and substituting #6 copper wire, for about \$ 643.00.

This estimate however does not include the cost of any new poles which may be required along the line.

If this is not all quite clear to you I will be in the office Tuesday morning and will be very glad to go further into the subject if necessary.

Yours very truly,

A. S. Frew.

Dear Mr. Scott:

R

There are times when a comparatively small service assumed the proportions of a very great service. Such was the case in regard to the alteration in the chapel roof. Compared to the entire building it is small; but while thanking you for it, I wish you to know, that owing to circumstances, it was appreciated much beyond its intrinsic value.

With best wishes and many thanks,

I remain,

Very truly yours,

James McQuire, O.M.I.

RECORDED

Department of Indian Affairs

Kamloops B.C. P. O. Box 453
Okanagan, 23rd April 1924

To The Secretary
Department of Indian Affairs
Ottawa

Sir,

Reference Mr. Carr's letter of the 14th inst
The Contractor has been in Vancouver for some time
delay in reply

Mr. Carr, the Contractor considers that the
Building operations, covered by his contract, will
be completed by the 1st August.

Providing no unforeseen delay occurs I believe
that the above date is approximately correct.

Herewith I enclose snap shots of the Building
as instructed; unfortunately I have not been
and my experience in taking photos is somewhat
limited, still I think the results are fairly satisfactory
and will carry an idea as to the progress made.

The Brickwork is in spots somewhat soiled
and discoloured, this appearance will disappear
when finally cleaned down.

I should have liked to send photos of the Boiler
in position but the light was insufficient.

Mr. Grant, Manager of Kamloops Electric has been
away at Spokane, have had several interviews with
him and expect to receive estimates of cost relative
to Main Supply line for Electric lighting this week end,
will then report in detail on this matter.

Yours faithfully
H. H. Macaulay

Sir:-

A letter was received recently from Reverend Father McGuire, with further reference to the closing in of the ceiling of the Chapel in the new Kamloops Indian Residential School.

In reply to this letter a telegram was sent, in which he was authorized to have a metal ceiling installed in the chapel, providing the cost could be kept to within an amount of \$400.00. It is noted that in the estimate submitted by you some time ago for this work, the cost of the changes in the roof, and the providing of metal ceiling would be approximately \$550, but by amending your sketch it would be possible to reduce the cost to the above mentioned amount.

Your obedient servant,

A. F. McKenzie.
Acting Asst. Deputy & Secretary.

Dear Doctor:

I am unalterably opposed to the open roof of the chapel: I do not want it.

The Department is opposed to extra expense.

These two views, Doctor, are not irreconcilable. I wish the Architect to change the style of roof. He can do so easily and not incur more expense.

I would ask him to omit everything concerning sacristy, sanctuary, altar, railing and burlap. After all we must put in these things together with the pews when the Contractor is finished. And we are content to do so. Is it such a huge undertaking while doing these things to put on something in place of the burlap or add something to the ceiling?

You would give me much relief if you could give me an affirmative reply by wire and have Mr. Orr sent instructions at his convenience to Mr. Macaulay.

Thanking you in advance,

I remain,
Very truly yours,
James McGuire O.M.I.

Rev. J. McGuire
Hampden Indian Residential School

Sir,

"Revised Changes to Chapel"

In reply to your enquiry of 11th inst. I beg to state as follows:-

As the Department refuses to authorize additional expenditure in connection with this work I can only suggest that the items comprising the Sanctuary and Sacristy together with the Quire be cancelled and the money saved expended in the provision of a ceiling.

The roof as shown on Drawings does not lend itself to economical heating and I doubt that the acoustic properties will be satisfactory, still as before mentioned, whilst at all times willing to assist in obtaining a Building satisfactory in every way, my duties do not include changes in design or plan arrangements. Rightly or wrongly I shall continue to draw the attention of the Department to anything considered by me defective or unsuitable further than this however I am not prepared to go.

Any alterations or amendments must at all times be made by the Architect to the Department together with the necessary constructional details.

Yours faithfully
H. Macaulay.

Ottawa, April 9, 1924.

Dear Mr. Macaulay:

Replying to your letter of the 2nd instant with reference to the electric lighting for the new Kamloops School, I beg to say regarding the main supply line, from information on file it would appear that this line was built by the staff of the school in 1912, the Department furnishing the material and the school supplying the necessary labour. I note your remarks with reference to its present condition, and would ask you to please report to the Department the approximate cost of putting this line in a condition satisfactory to the local lighting company. Also advise me if the local company are prepared to contribute anything towards the overhauling of the line.

With reference to the wiring of the interior of the building, in specifying the three wire system consideration was given to the use of motors, etc., but in view of your suggestion that all motors be connected on a separate line, I am quite agreeable to having the wiring done on the two wire system. I also approve of using a sub-divided main system as suggested in your letter.

With reference to the clause in the specifications governing the number of watts per circuit, I would say that this is in accordance with the Rules and Regulations covering such work in this province and in other provinces in the Dominion, but it will be satisfactory to me, however, if the circuits are arranged in accordance with the Rules and Regulations covering this work in the Province of British Columbia, and with the approval of the local electric lighting company and inspectors.

In approving of these changes in the wiring it is of course understood that no extra cost will be entailed.

.....With

Ottawa, April 8, 1924.

Memorandum: Mr. Scott.

Reverend Father McGuire, Principal of the Kamloops School has asked for certain changes in the plans of the Chapel in the new school now being erected. They are as follows with the estimate of the cost:

1. To change the roof by closing in same with a metal ceiling - cost \$550.
2. To rearrange the Sanctuary to provide for confessionals, etc. - cost \$457.
3. To panel the walls in wood to a height of 7'6" - cost \$300.
4. To provide leaded glass in place of plain glass in all windows - cost \$201.

With reference to these changes asked for, I am prepared to recommend for your considerations Numbers 1 and 2, but I think with reference to Numbers 3 and 4 that it is not necessary to panel the walls or provide leaded glass for the windows.

I have today received a telegram from Reverend Father McGuire stating that the work is well advanced on the Chapel, and as ~~an immediate~~ decision is, therefore, necessary with reference to the changes asked for.

R

Sir. "Reference Installation of Electric Lighting etc."

Some difficulty is experienced in connection with the installation. I should be glad therefore, if you will please let me have a decision, and the necessary instructions, on the following items submitted for your consideration.

Main Supply Line This line connects the School installation with the City System, is about 1 1/2 miles in length and carries Light, Power and Telephone wires. This line was evidently run by unskilled labour and is considered both defective and unsafe. The Local Municipal Authorities have condemned this line and will not permit their Employees to work thereon.

Generally the defects are as follows:-

- ① Certain poles, particularly at the River Crossing require replacing and the construction of cross arms etc is defective.
- ② The wires are of soft drawn copper, instead of hard drawn copper, consequently sagging is general.
- ③ The spacing of wires is incorrect and fails to comply with the Government Regulations.

Mr. Graser, Manager of the Local Municipal Utilities may be depended upon to give any possible assistance and will, no doubt, co-operate with the Department in the adjustment of this matter.

System of Wiring The Specification calls for a three wire system and whilst admitting certain advantages conferred to this system, I beg to point out that same is regarded by the Local Municipal Authorities with considerable

Indian Affairs (RG 10 Volume 6448, file 882-5, part 3)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR-COPY

(2)
Mr. Orr. Chd.

Department of Indian Affairs

Ottawa,

192.....

Considerable Disadvantages. A two wire system is in vogue here consequently the connecting up of a three wire system is considered unnecessarily inconvenient.

Power Lines for Motors. The existing Power line supplies current for the motors in use at Refrigerator Plant, Pumping plant and Barn. It is self contained with separate Meters etc. Consequently I would suggest that all Motors installed in the New Building be connected up with this existing Power Line and maintained as a separate installation. This system would obviate the necessity of bringing to the Building Main Switch Board current for purposes other than the Lighting System.

Specification of Electric Wiring. I am somewhat in doubt as to exactly what method of installation you desire, the Specification is somewhat general in character, and though wide in scope, its application, to the type of building in question, is rather indefinite. As before mentioned, the three wire system is not favourably regarded by the local Municipal Authorities, and under the circumstances, it would, I believe, be wise to revert to the two wire system.

Assuming that your decision will be in favour of the two wire system do you desire (1) The tree or single main system or (2) The subdivided main system.

The three wire system specified could of course have been applied on lines somewhat analogous to the two wire systems above mentioned.

The Specification under "Clause 9. Arrangement of Feeders" calls for "The wiring on each floor must start from one central point of distribution" From this one naturally infers that the general distribution is by "Floors" In this case it would be necessary

Mr Orr, Cmtd

Department of Indian Affairs

Ottawa,

192

Necessary to include at each floor level. Provision for extending the wiring to both the Boys and the Girls wings. The Specification makes no provision for this work neither does the general layout of the Building lend itself to such an arrangement.

May I suggest that the general system of Distribution be by "Blocks" instead of "Floors" and that the Subdivided Main System be adopted.

The Small Store Room to the right of Corridor, leading to Chapel, could be rearranged somewhat, and a portion thereof utilized as a lock up room for Electrical Services, affording a convenient Centre of distribution, and a safe workable space for the installation of Substant Main Switch Distribution Board etc.

The Service Main to be brought to the Main Switch Board and subdivided as follows:— Feeders of the necessary capacity to be carried in Conduit to both the Boys and Girls wings on this (Ground) floor level and connected up with a Subsidiary distribution Board at some convenient point to be arranged. So far this arrangement has provided a Main Distributing Board in the Centre or Administration Block and a Subsidiary Distributing Board in each wing.

From these three Principal Centres of distribution wiring to be carried to minor distribution Boards conveniently located on each floor (as required by present Specification)

(4)
Mr. Orr (Contd.)

Department of Indian Affairs

This system would ^{Ottawa} give a very satisfactory ¹⁹² installation and afford excellent facilities for testing purposes, faults would be easy to localize and the cost of repairs consequently reduced.

The feeders to the wings would of course be a matter for later consideration, the necessary conduit, of adequate size, should however be included and placed in position under this contract. See Specification Page 66 Clause 6. CAPACITY.

I believe the old time regulation confining any set of lamps to 660 watts has been definitely abolished, may I delete this clause from the Specification.

Mr. Muirhead, the Provincial Authority, has requested that an electrical fire alarm system be installed, details of this and any other requirements he may submit will be forwarded for your consideration in due course, at present exact details are not available.

May I request that you favour me with the necessary instructions as quickly as possible, as the Building is now being pushed ahead.

Yours faithfully

M. H. Macaulay

1st April 1924

DEPT. OF INDIAN AFFAIRS
APR 7 1924

Arch. Dept.
Sir, The weather during the past fifteen days has been favorable for building operations and the work has, on far or possible, been pushed ahead. Delay in arrival of granite caused a lay off for masons on the 24th, 25th, 26th and 27th.

The South Elevation has been carried up to an average height of 14'-0" from the finished grade line, the Dining & Store are ready for roofing whilst the Chapel Block is held up, at Chapel floor level, owing to non arrival of granite.

All Carpenter work is well in advance of the Brick work.

The Plumbing & Heating is progressing as rapidly as the Building will permit, the work under this heading is very satisfactory indeed.
Electric. The Sub-Contractor worked, with Assistant, from 27th to 29th. His work is held up pending decision and instructions. Please see letter herewith enclosed addressed to Mr. Orr.

The Sub-Concrete floors are being laid in the Basement, including completed floor ready for Mastic in Dining, Store & Part Dining Room.

The quality of lumber has improved but the quality of Brick work is still more or less unsatisfactory.

During present month I will arrange for a number of Photos. These will perhaps more readily convey an idea as to the general progress.

A Certificate in favour of the Contractor was forwarded to the Department 25th March.

Yours faithfully

W. H. MacLennan, Inspector to Contractor

Sir:

gty
With reference to a report, plan and specification prepared by your district engineer at Kamloops last March, for the proposed Sewage Disposal plant at the new Kamloops Industrial school, will you please advise me whether your local officer at Kamloops would be prepared to undertake the direction of this work, such as obtaining of competitive prices and superintending the work. This system will be required to be put into operation within the course of two months.

I should be obliged if you would give my request your earliest consideration.

Kamloops New Indian Residential School
Month End Report.

Department of Indian Affairs

P. O. Box 453

Kamloops B.C.

Attna, 1st August 1924.

The Secretary
Department of Indian Affairs
Ottawa

Sir,

I beg to report as follows:—

During the past fifteen days work has proceeded fairly satisfactory and the Building is rapidly nearing completion.

Plaster The Plasterwork is, in a way, complete but as I intimated in previous reports this work is not satisfactory; many patches have been put out and replastered and the finish is not as good as it should be; I informed the Contractor today and propose following this up with a formal request to strip and replaster certain portions of walling.

Carpenter This work is proceeding satisfactorily, all trim is in place and the hardwood floors are being put down.

Plumbing & Heating This work too, is satisfactory, the Plumbing fixtures are in place and practically all piping, supply and return, is in position, together with most of the Radiators. The Boilers with most of the fittings are connected up and the Pump is now being placed in position.

Electrician This work is now ready for running the wires on the various circuits. Contractor is very anxious to receive the fixtures these (Please see page 69 Spec.) are supplied by the Department but fixed by the Contractor, I have previously referred to this, and should be glad to receive information as to when these fixtures may be expected.

Power & Light Line This work is being satisfactorily carried out, and without incurring extra expenditures, have arranged for (with Mr Fraser) a general clearing out of the forest

Ottawa,192.....

Power & Light Lines etc.

of poles at present encumbering the yard. The new pole line now finishes at a new pole immediately adjacent to and North of the Refrigerator, the line passing between the New and Old Buildings.

The pole at the Refrigerator now becomes the main distributing point and will receive the Meters, Transformers etc.

From this pole a wire will be carried to the Switch Board in the New Building for lighting purposes, a second wire will be run direct to the Barber Room for Power, other power lines will be run to the Pump House and Barn etc.

Generally the new layout in addition to being safe and serviceable, will convey the impression of being in accordance with up to date practice and systems.

Plumbing This Trade is causing some little worry both to myself and the Contractor. A local Firm, The Kamloops Heating and Plumbing Co. are the Subcontractors, and to me they undoubtedly convey the impression of a very strong tendency to beat the Specification.

On Thursday morning it was necessary for me to complain about the metal ceilings being erected in the Infirmary floor. This work, ^{in appearance} both as regards the workmanship, the type of cornice, and the absence of margin necessitating the mutilation of the design on two of the four sides of each room; generally the effect produced from these defects is unsightly.

Further, in reference to the Skylight & Ventilator over Kitchen, I gave a decision, as communicated to the Department, for Mr. Orr, refusing deviation from the Specifications in favour of the locally made but decidedly inferior skylight.

The result is that this Firm discontinued work at Noon, on Thursday, and I learn, indirectly, that

ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

Kamloops New Indian Residential School

Report. Page 3.

Department of Indian Affairs

Ottawa,.....192.....

General

They propose taking up the matter with Mr. Mc Bride
At present I am awaiting developments and, failing
Departmental orders to the contrary, propose strict
adherence to the line of action taken, as it is both
tenable and in the best interests of the Building.

Grants

Nothing has been done, as far as I am aware, about the
condemned grants, apparently the contractor is awaiting
a move by the sub-contractors, the man sent up from
Vancouver, by the latter, spent ten days, or so, in trying
to fix up matter, but eventually admitted that the
task was beyond him, and returned to Vancouver.

Printing

This work is satisfactory and well advanced, in
a few days this work will have to be suspended owing to
the delay in fixing metal ceilings.

Fittings

During Mr. Orr's visit to Kamloops last year, a somewhat
revised layout was authorized; this layout included
the provision of a screen or partition in the Dining
Room, also Cupboards Bins and shelving etc in the
New Store. I should be pleased to receive instructions
referring to these matters as early as possible please.

The Principal, Rev. Father McGuire also the District
Superior approached me relative to the provision of
temporary washing arrangements for the girls, in the
room allotted for an additional Receiving. I requested
Rev. Father McGuire to communicate with the Department
As my authority did not cover this matter.

Generally

The Building will I believe look well, and judging by
the coolness in most of the rooms during the late spell of
hot weather, will be both cool in summer and warm in
winter. All local comments are favourable.

Yours faithfully

H. H. Macaulay, Inspector of Buildings

Kamloops B.C.
Ottawa, 8th August 1924

Mr. James Carson
Contractor
Kamloops B.C.

Dear Sir:

In reference to the plastering on the above Building, I have to state that the present mode of proceeding by putting out small portions of defective plaster, and patching, is not in any way satisfactory and cannot be accepted.

The plastering as a whole cannot be termed a good job of plastering, and the very least that can be expected or required is that all defective walling, such as I have pointed out, be entirely stripped and replastered.

The difficulties of rectifying the work complained of are increasing daily as the work proceeds.

The Specification calls for a first class job this is expected and required, consequently an early realization of this fact will prove beneficial to all concerned.

Your early attention to this matter is requested.

Yours faithfully
H. H. Macaulay

Mr Thomas Carson
Contractor
Kamloops B.C.

Dear Sir. In reference to the above mentioned Building I have to point out that the Contract date of Completion is 31st July 1924; there will be certain extensions allowed on account of extra work but otherwise the Department will require the due fulfillment of this Contract.

As the Department anticipates an early occupation of this Building it is essential that all work should be completed at the earliest possible date.

In reference to the difficulty experienced with the Kamloops Plumbing and Heating Co. Subcontractors for the Insulation work, I have to point out that no apparent effort is being made by this firm to discharge their obligations, consequently the Department will expect and insist upon you making such arrangements as will ensure all Insulation work etc being forthwith proceeded with and completed at an early date.

Yours faithfully

Ottawa, Aug. 26, 1924.

MEMORANDUM

Mr. Scott.

Plans and specifications have been prepared for the construction of a sewage disposal system for the Kamloops Indian Residential School.

According to a communication just received from Mr. Swan, the resident engineer would be willing to undertake the supervision of the work, including calling for tenders, etc.

I would recommend that this officer be requested to obtain competitive prices from the contractor for the building, and also from any other local contractor in this line of work.

The estimated cost of the work will amount to approximately \$4,000.

16th August 1924
Ottawa,.....

The Secretary
Department of Indian Affairs
Ottawa

R

His. Work on the above School has, during the past fifteen days, proceeded fairly satisfactory.

Carpenter. The wood floors are practically complete and very little work under this trade is now incomplete.

Plasterer. The plasterers have during the past week removed most of the defective plaster and are now replastering.

Granite. Two new granite saps, angle, for Chapel buttresses arrived and have been placed in position, a little ^{putting} has been done to the coping, otherwise no apparent effort has been made to rectify the work complained of.

Heating & Plumbing. This work is fully up to date and is now suspended awaiting finish by other trades.

Painting. This work is nearing completion but is held up by the absence of metal ceilings.

Mosaic Floors. This work was commenced today the Subcontractor being Messrs. The Canadian John Macville Co. Ltd.

Plumbers. This work is still held up, the Subcontractor called at the Building on the 8th inst when his questions of defective work and sky light were fully discussed. This Contractor, as before intimated, expects to disregard Specifications and everything else but his own sweet way, and apparently had an idea that, by holding up the work that he could force acceptance of his own particular views.

I explained in an unmistakable manner, that all Plumbers work would have to conform to the Specifications and that the Department would expect and insist upon a first class job.

Kamloops New Indian Residential School

Report Card

Department of Indian Affairs

General The Contractor Mr Carson, dated 14th August, 192... will be understood as applying more or less directly to this matter. The copy of letter to Mr Carson dated 8th August will explain itself, since that date the Subcontractor has and is making a reasonably good effort to adjust matters.

Visit On Sunday the 3rd Aug. both Mr Ditchburn and Mr McBride went over the Building, as I was out of town for the day I was not present so am more or less unaware of their conclusions.

On Monday 4th Aug. Mr Ditchburn again paid a visit and I had an opportunity of showing him, somewhat hurriedly, over the Building. I pointed out the defects under the various Traders and he approved of the action taken by me. You probably have received Mr Ditchburn report.

Mr Ditchburn thought the cast iron columns on the uppermost floor should be raised in, and sundry shelving requested by the Sisters proceeded with, consequently I have directed Contractor to cast in columns and erect a few shelves, otherwise I am awaiting definite instructions from the Department re the various fittings required in Kitchen Store Dining etc together with the gas-trains in the Dining Room

Electric Light. Trunks, boiler etc. These fixtures or fittings are urgently required, the water supply should also be connected up to allow Heating Plant to be tested and cleaned out.

Yours faithfully

H Macaulay

Sir:-

I am enclosing herewith a copy of an advertisement inviting tenders for the girls' wing of the Kamloops School and would ask you to have it inserted in the Vancouver Sun and the Telegram of Kamloops.

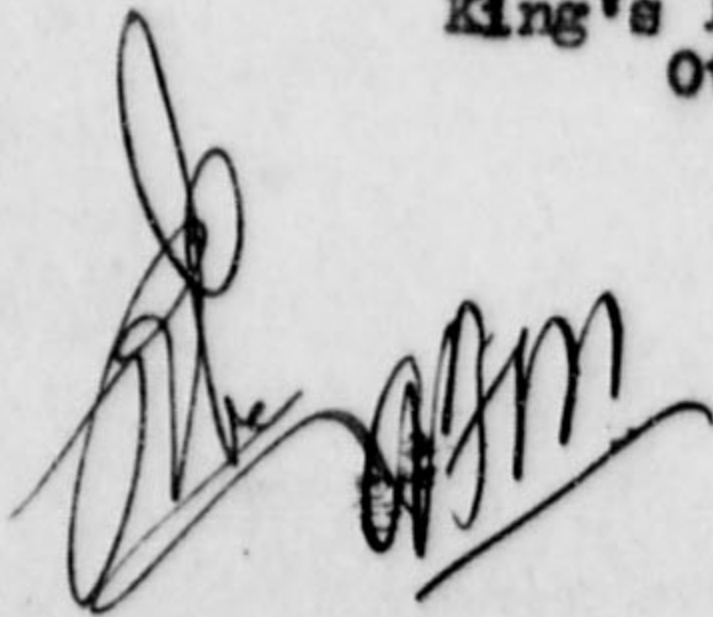

It is thought that three insertions on alternate days will be sufficient for the purpose.

Your obedient servant,

A. F. MacKensie.
Acting Asst. Deputy & Secretary.

Ottawa, September 10, 1924.

His Excellency

The Governor General in Council.

The undersigned begs to report that, the same being necessary, tenders were called for the construction of a sewage disposal system for the Kamloops Indian Residential School in the province of British Columbia, and the following were received,-

T. Garson, Contractor for the school building	\$3,500.00
Kamloops Plumbing & Heating Co., Kamloops	3,051.00

rel

The undersigned would recommend, pursuant to the requirements of Sub-section 2 of Section 36 of the Public Works Act, that the contract be awarded to the lowest tenderers, the Kamloops Plumbing & Heating Company, for the amount of their tender as above cited, namely, \$3,051.00, funds for this purpose being available from Parliamentary appropriation for the current fiscal year. This work will be performed under the supervision of the District Engineer of the Dominion Water Powers Branch of the Department of the Interior.

(Sgd) Chas Stewart
Superintendent General
of Indian Affairs.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

Ottawa, Sept. 10, 1924.

MEMORANDUM:

Approved
Mr. Scott.

Tenders have been invited by the District Engineer of the Dominion Water Power Branch for the construction of a sewage disposal system for the Kamloops Indian Residential School.

Two tenders have been received as follows:

T. Carson, contractor for the school building, - \$3,500.00
Kamloops Plumbing & Heating Co., Kamloops, - \$3,051.00

I beg to concur with Mr. C. E. Webb that the lowest tender be accepted, and also that this firm be advised to proceed with the work at once, on account of the advanced season.

The necessary Order-in-Council can be obtained in the meantime.

Estimated cost \$4,000.00

J. D. Levesque
DEPARTMENTAL ENGINEER.

Progress Report September

Department of Indian Affairs

P.O. Box 453

Ottawa,

Kamloops B.C.

The Secretary
Department of Indian Affairs
Ottawa

Sir,

I beg to report as follows:- Work has proceeded fairly satisfactorily during the past two weeks and excepting for the finish work the Building is nearly complete.

Masonry No attempt has been made to replace the defective granite work. No attempt has been made to rectify the defective glazed brick walling in kitchen.

Finish work Apparently no attempt is being made to obtain a skylight equal to specification.

No work has been done on the Metal Ceilings, no finishers have been on the Building during the past month. This work being suspended very naturally prevents the finisher from completing his work and entails for him a considerable loss.

Instructions I should be pleased to receive instructions from the Department in reference to the above trades.

Carpenter All work practically complete.

Heating Practically complete but cannot be tested until water is laid on.

Painting Practically complete, except the Metal Ceilings above referred to.

Electrician Practically complete except for running the wires and fixing fittings. These fittings or fixtures are supplied by the Department, I should be pleased to learn when these may be expected.

New Electric Supply Line This is practically complete and as referred to in a former report the line has been

2)
brought to the Refrigerator Plant and a general
Distributing Plant established there. This Plant
is about 100 yds further East than the old Transformer
pole to which the line was to have been brought, but
its advantages were so obvious and outstanding
that I gave the necessary instructions for this work
to be done, and have the assurance of Mr. Fraser that no
charge other than that covered by their Quotation will
be made. New poles have been supplied all along the
line and the system is now in first class condition.
Extra In connection with the installation of this new
work Electric power and light line I have given instructions
for additional work to the value of \$125.00. There
was no time for advising the Department in connection
with this work as the law office of \$125.00 was dependent
on this work being done whilst the Municipal Employees
were engaged on this work.

The work referred to consisted in tearing out
the whole of the old system of poles and wires from
the old Transformer pole etc and connecting up the
Bureau Buildings, Garage, Pump house etc with the
new distribution Centre.

A very important point in connection with
this work, in fact what necessitated this work being
ordered without the necessary authority from the Department
was the absolute necessity of promptly bringing to an
end the illegal practice of lighting and of the Buildings
and the Refrigerator from the Power supply instead
of the Light supply. This condition has existed for
more than a year and of course is quite illegal.

Trail and New Indian Residential School
Progress Report 1st September
Department of Indian Affairs

Canda

(3)

Ottawa, 192.....

The Manager of the City Utilities Department brought this matter formally to my notice and after a somewhat lengthy discussion the matter was satisfactorily settled by me giving an order for this additional work.

You will note that the work covered by the quotation given by the Municipal Utilities Department furnished at the Transformer Pole, consequently this work ordered by me is entirely in addition thereto.

The result is that a new pole line has been run from the new Distribution Centre to the Barn, and the Pump House and other Buildings connected up thereto; no work has been done which was not required under the permanent scheme.

The Manager of the City Utilities Department whilst admitting that the unfortunate circumstances ^{and} were more to ignorance than design, clearly intimated that such conditions could not be tolerated and with a view of placing the whole system of light & power supply on a permanent and satisfactory basis consented to carry out this work for the sum stated, such sum not being strictly the cost of labour and material.

I trust that the action taken will meet with the Department's approval and shall be glad to receive the necessary confirmation.

This matter I may state has not been mentioned to the Rev. McQuinn.

Good Position Will you please advise me as to your requirements in
+
Furniture. Connection therewith.

Machine floor see separate report.

Yours faithfully

H. Macaulay

August 31st

The Secretary
Department of Indian Affairs
Ottawa

Sir,

Reference Marble Floors

As stated in my report of the 15th August the Subcontractors had arrived on that date and have pushed ahead with the work in a satisfactory manner. The Poor finish caused them quite a little difficulty and the result is perhaps not without some little fault.

Some confusion and perplexity was experienced for a time owing to the fact that the Subcontractors had not included the Dining Room floor in their calculations, and as this was represented approximately \$1,100.00 I was anticipating some difficulty.

This matter was eventually satisfactorily settled and the work proceeded with.

All floors excepting Lane are now finished.

Yours faithfully
W. Macaulay

I try to report as follows:-

During the past fifteen days work has proceeded slowly, the Building generally being held back by the absence of metal skylight and general trimwork.

Two Carpenters have been employed in generally finishing up work under this trade.

The Painter has been finishing up work under this trade, but is held back pending erection of metal ceilings.

The Plumber is awaiting arrival of steam trap

fixtures applied for by me from the Department. The Heating & Plumbing Contractor recommenced work on the 11th and ran steam through the system on Sunday partly as a preliminary test and partly to clean out system.

This system will be perfectly satisfactory in operation. The Builders work very well indeed and believe prove a big success. The Contractor is now finishing up is covering Barrels and piping.

The Masonic floor is complete but I regret that same is not as satisfactory as we could desire, apart from the appearance, which is decidedly poor. The flooring is somewhat rough and the concrete work generally is far from pleasing.

The Skylight for Kitchen has not arrived and

Dear Sir:-

We attach hereto our tender for the "Girls Building"
at the Indian Residential School, Kamloops, B. C.

In connection with this tender, kindly note that we
desire to have any telegram containing a revision of the
figures quoted herein, to govern and be the deciding figure
of our tender if received at your Department before noon on
Monday, September 29th.

Pages 63 and 64 of the specification call for steel
stairs to Chapel. As the plans do not show anything for
these, we take it that they are something already erected
on the existing building and have therefore made no allowance
in our price for them.

Yours very truly,

INDIAN AFFAIRS:

The Board had under consideration the following
report from the Honourable the Superintendent General of
Indian Affairs:

copied

The undersigned begs to report that, the same
being necessary, tenders were called for the con-
struction of a sewage disposal system for the Kam-
loops Indian Residential School in the province of
British Columbia, and the following were received.-

T. Carson, Contractor for the	
School building,	\$3,500
Kamloops Plumbing & Heating Co.,	
Kamloops,	3,051

The undersigned would recommend, pursuant to
the requirements of Sub-section 2 of Section 36 of the
Public Works Act, that the contract be awarded to the
lowest tenderers, the Kamloops Plumbing & Heating
Company, for the amount of their tender as above
cited, namely, \$3,051, funds for this purpose being
available from Parliamentary appropriation for the
current fiscal year. This work will be performed
under the supervision of the District Engineer of
the Dominion Water Powers Branch of the Department
of the Interior.

The Board concur in the above report and recom-
mendation, and submit the same for favourable consideration.

G. E. Keizer

Asst Clerk of the Privy Council.

The Honourable

The Superintendent General of Indian Affairs.

Mr. Duncan C. Scott, Deputy Supt.-Gen. of Indian Affairs,
Dept. of Indian Affairs,
Ottawa, Ont.

Dear Sir,

We would greatly appreciate it if you would let us know to whom the contract has been awarded for the erection of the girls' wing of Kamloops Indian Residential School, Kamloops, B. C.

If you could also let us know the total amount of the contract, the unit prices bid, and the names and addresses of all bidders, we would be much obliged to you.

Do not bother to write us a letter. Just make a memo on the margin or reverse side of this letter and mail in the enclosed return envelope.

Trusting that you will be kind enough to co-operate with us by letting us have this information as promptly as possible, so that we in turn can pass it on to engineers, contractors and manufacturers throughout Canada, we remain,

Yours truly,

I. B. Buckle

Kamloops, B.C., September 25, 1924.

R

Sir:-

I am just in receipt of your 154-0-5 of the 25th ulto., re tenders for Girls' wing of the Kamloops Industrial School.

I have been away for nearly a month up north, but I understand from Mr. Helmsing that during my absence, the blueprints of plans and specifications were given to the different contractors for examination.

As soon after the 29th of September as possible, I will return the two copies of the plans as requested, and keep the third.

Yours truly,

(Geo. S. Pragnell)
Inspector of Indian Agencies.

Ottawa, September 30, 1924.

His Excellency

The Governor General in Council.

The undersigned begs to report that, it having been decided to construct a girl's wing in connection with the Kamloops Indian Residential School in the province of British Columbia, tenders were called for, receivable up to noon of the 29th September, 1924, and the following were received,-

W.A. Foote & G.W. BarkerKamloops \$96,203.52
✓ Kamloops Construction Co. ...Kamloops 85,470.00
The Poole Construction Co. ..Vancouver ... 84,598.00
Smith Bros. & Wilson Ltd. ...Vancouver ... 81,490.00
✓ Thomas CarsonVancouver ... 79,970.00
✓ Claydon Co., Ltd.Winnipeg 76,200.00

The undersigned would recommend pursuant to the requirements of Sub-section 2 of Section 36 of the Public Works Act, that the contract be awarded to the lowest tenderers, Claydon Co., Ltd., for the amount of their tender as above cited, namely, \$76,200.00, the same being reported by the Architect of the Department as a fair and reasonable price for the work; money for the purpose being available from the Vote for Indian Education No. 286.

J. MacInnes
Memo to Council
MEMORANDUM:

Del
MR. SCOTT.

Plans and specifications were prepared for the girl's wing required in connection with the Kamloops Residential School, and tenders were invited by advertising in the necessary papers in Vancouver and Kamloops. The tenders closed at noon to-day and in response the following have been received:

W. A. Foote & G. W. Barker	Kamloops...	\$96,203.52
Kamloops Construction Co....	Kamloops.....	\$85,470.00
The Poole Construction Co. Ltd.,		
	Vancouver.....	\$84,598.00
Smith Bros. & Wilson, Ltd...	Vancouver.....	\$81,490.00
Thomas Carson.....	Vancouver.....	\$79,970.00
Claydon Co. Ltd.....	Winnipeg.....	\$76,200.00

As the tender of the Claydon Co. Ltd. of Winnipeg is the lowest and is a fair and reasonable price for the work, I beg to recommend that it be accepted. Funds are provided for this work from the Vote for Indian education.

ATTENTION MR. ORR

Dear Sirs:-

Will you be kind enough to advise if the Indian Girls' School, Kamloops, B.C. and the Coqualeetza Industrail School at Sardis will be equipped with mechanical refrigerating plants.

You will no doubt recall, a year or so ago we furnished a small plant for your department at Kamloops, and we have done government work such as the Cold Storage at Brighton, Reformatory at Guelph, Parliment Buildings, Winnipeg, Government House Edmonton, and others.

We have a representative who visits Ottawa periodically and if there is anything in our line required at the above schools, we shall be only too glad to call on you to give you any information or prices we can.

Assuring you, we shall be glad to give you our best attention, we beg to remain,

Yours very truly,

Dear Sirs:-

RE GIRLS BUILDING - INDIAN SCHOOL - KAMLOOPS, B.C.

With further reference to our letter attached to our tender on the above building, we have this morning, wired you as follows.

"Please deduct two thousand, one hundred and twelve dollars from our written tender on Kamloops School"

It is necessary for us to adopt this method of revising our tender before closing time, as Kamloops being so far away, we were unable to obtain all the information required to make up an exact figure which could be mailed from Winnipeg so as to reach Ottawa before the time set for closing the tenders.

In sending you our revision by telegraph, it was despatched on the assumption that standard time was the basis of closing time and our wire would therefore reach you within the time limit.

Thanking you for the opportunity of figuring this work, we are,

Yours very truly,

P.C.1772.

Certified copy of a Minute of a Meeting of the Committee
of the Privy Council, approved by His Excellency the
Governor General on the 8 TH OCTOBER 1924

R

copied

The Committee of the Privy Council have had before them a report, dated 30th September, 1924, from the Acting Superintendent General of Indian Affairs, submitting that, it having been decided to construct a girl's wing in connection with the Kamloops Indian Residential School in the Province of British Columbia, tenders were called for, receivable up to noon of the 29th September, 1924, and the following were received,-

W.A. Foote and G.W. Barker.....	Kamloops.....	\$96,203.52
Kamloops Construction Co.....	Kamloops.....	85,470.00
The Poole Construction Co.....	Vancouver.....	84,598.00
Smith Bros. & Wilson Ltd.....	Vancouver.....	81,490.00
Thomas Carson.....	Vancouver.....	79,970.00
Claydon Co., Ltd.....	Winnipeg.....	76,200.00

The Minister recommends pursuant to the requirements of Sub-section 2 of Section 36 of the Public Works Act, that the contract be awarded to the lowest tenderers, Claydon Co., Ltd., for the amount of their tender as above cited, namely, \$76,200.00, the same being reported by the Architect of the Department as a fair and reasonable price for the work; money for the purpose being available from the Vote for Indian Education No. 286.

The Committee concur in the foregoing recommendation and submit the same for approval.

E. J. L. L. L.
Clerk of the Privy Council.

The Honourable
the Superintendent General of Indian Affairs.

TENDERS WANTED

SEALED TENDERS addressed to the undersigned and endorsed on the envelope "Tender for Indian Residential School at Kamloops, B.C.," will be received up to noon of the 29th day of September, 1924, for the erection of the girls' wing of Kamloops School.

Plans and specifications may be seen at the office of R. H. Cairns, Indian School Inspector, at Vancouver, at the office of the Inspector of Indian Agencies, at Kamloops, B.C., at the office of Indian Commissioner, at Victoria, B.C., and at the Department of Indian Affairs, Ottawa, Ont.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada, for ten per cent. of the amount of the tender, payable to the order of the undersigned. (War Bonds of the Dominion or Canadian National Railway Bonds will also be accepted as security, or Bonds and Cheque if required to make up an odd amount) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The lowest or any tender not necessarily accepted.

Department of Indian Affairs

P.O. Box 453
Kamloops B.C.
30th October 1924
The Secretary
Department of Indian Affairs
Ottawa

Very to acknowledge receipt of your letter 154-0-5 dated
Ottawa 22nd Oct. 1924

Reference Transportation Allowances

This matter is somewhat difficult to decide with fairness
to the Department and myself.

The distance is approximately 7 miles for the return trip.
I have no car, and excepting for the supervision of this Building,
absolutely no use for one.

- (a) The local taxi costs \$1.50 per trip very \$3.00 per day.
- (b) A car can be hired here at \$50.00 per month.
- (c) The Government has, I understand, reduced rates on Ford cars,
the purchase price being \$550.00, five hundred & fifty dollars.
- (d) To complete this School will probably take 18 months during
which time, either for myself or successors, transportation will be
necessary.

Therefore I would suggest that the cheapest and most satisfactory method
would be for the Department to purchase a Ford car, and
on completion of this Building return same to the Ford Agency here.

I should be pleased to buy a car except for the fact
that, during the latter part of December January & February
I shall be receiving no remuneration from this Building as
it will be closed down owing to climatic conditions.

I would also point out that the remuneration allowed
me by the Department is \$6.00 per day, this amount after
allowing for transportation has proved quite inadequate.
If the Department is opposed to the purchase of a car I
would suggest that an allowance of \$1.50 per day is
not unreasonable.

Yours faithfully,
H. H. Macaulay

Dear Sir:- YOUR REFERENCE 154 - 0 - 5

We thank you for your letter of October 14th and in reply to same, we enclose executed contracts and would be glad to have a copy returned to us as soon as executed by the Department.

The peculiar situation with respect to the Kamloops work makes it necessary that we have more plans. We need them at three points, Vancouver, Kamloops and Winnipeg. If the work were concentrated in one locality, we could move the plans to and fro among the sub-contractors, but as it is, we need to have them on file at each point. Will you therefore, kindly send further copies of the blue prints and specifications. One set to Mr. D. G. Brison, Branch Manager, Trussed Concrete Steel Co. Ltd., Vancouver, one set to us at Kamloops and one set to us at Winnipeg.

We wish to thank the Department for this contract and trust we may be able to bring it to a satisfactory mutual conclusion.

Yours very truly,

Sir:-

Replying to your letter of the 15th instant with reference to the girls' wing of the Kamloops School no doubt you have received my letter of the 13th instant advising that the Department wishes you to continue your services as Inspector of Construction for this work.

With reference to the last paragraph of your letter I would ask you to please advise me what the cost of transportation from Kamloops to the School will amount to each month. When this is received consideration will be given to this matter.

I note your remarks under a separate letter with reference to sub-contract for the plumbing and heating. At the present time I do not wish to interfere with Mr. Claydon and his subcontractors, but as soon as the heating work is commenced if this firm do not carry out their work in a satisfactory manner, I would ask you to please report same to the Department.

With reference to the electric lighting fixtures I beg to say that you may purchase the fixtures as outlined in your letter at a cost of \$569.16. When these fixtures have been delivered to the school to your satisfaction kindly forward accounts in duplicate, certified to by yourself to the effect that the goods have been received and are satisfactory.

Your obedient servant,

W. H. Macaulay, Esq.,
P.O. Box 453,
Kamloops, B.C.

A. F. Mackenzie,

RECORDS 1924

The Secretary
Department of Indian Affairs
Ottawa

Sir.

"Refuse New Wing for Girls"

May I ask if it is your desire for me to
Carry on as Inspector of Construction of this
New Wing

In certain quarters there appears to be
considerable objection to me being employed on this
work, consequently it is essential that the
Department make it quite clear as to whether
my work is considered sufficiently satisfactory
to justify the confidence of the Department.

Personally I am prepared, even anxious, to
meet the wishes of the Department in every respect
and should a change be considered, in any way,
advisable I would suggest that my work
terminate on the 15th day of November my 2
Month from the present date.

Should the Department desire me to carry
on with this work it will be necessary for me
to request an allowance for transportation as,
owing to injuries sustained during the late war
the necessary walking, is at times, almost impossible.

May I request an early reply.

Yours faithfully

W. H. Barclay

Ottawa

15th October

1924

The Secretary
Department of Indian Affairs
Ottawa

Sir,

Mr. Claydon, the Contractor for the Girls Wing arrived in Kamloops this morning and left for Vancouver during the evening, his foreman arrived on Friday the 15th and is now proceeding with the excavation.

I very much regret that the Heating and Plumbing work will probably be sublet to The Kamloops Heating and Plumbing Co., Mr. Claydon informs me that their price is \$600.00 below the price submitted to him by Mr. Carl Beck the Subcontractor for the installation of the Heating & Plumbing for the Centre portion.

In the best interests of the Building I would very strongly advise that the Department give this matter very serious consideration; as an Employee of the Department I take the liberty of suggesting that a strong effort be made to secure the services of Mr. Beck for the installation of the Plumbing and Heating required for the Girls Wing.

Mr. Beck's work has been perfectly satisfactory in every way and the Department would obtain from him an installation entailing the minimum expenditure in upkeep or maintenance.

Yours faithfully
W. H. Macmillan

Ottawa, 15th October 1924

The Secretary
Department of Indian Affairs
Ottawa

Sir,

"Progress Report from 1st to 15th October 1924"

I beg to report that little or no material progress has been made during the past fifteen days.

On the 1st, 2nd and 4th two men were fixing metal ceilings and on the 8th, 10th & 11th two men were making good plaster defects.

Mr. Carson & one carpenter were on the job, on the 12th and 15th.

The delay may be attributed, almost entirely to the failure of the Kamloops Plumbing and Heating Co. and Sub Contractors for the Plaster work etc to complete their work. For instance (a) The metal stairs to Chapel have been on the job for more than a month, but no attempt has been made to fix them in position (b) The skylight for kitchen has not been delivered on the site. (c) With the exception of the G. F. Corridor, staff rooms, and the smaller stores and Bath Rooms not a metal ceiling is complete. (d) The necessary materials are not even on the site. (e) Some of the ceilings put up are out of square and will have to be replaced. The delay in this trade naturally prevents any attempt at finishing the Plaster work. Generally the situation during the past two weeks has been most unsatisfactory.

Yours faithfully

W. Macdonald

"Electric Lighting Pictures"

In compliance with your instructions as per Telegram dated Sept. The question of Electric Lighting Pictures was duly brought before the Rev. Father McSwine and selections were made from the Catalogue of Messrs Shapiro & Brownson.

Some delay was experienced in obtaining Estimate as the Contractor Mr Carson was away, in Vancouver. On his return however the list was forwarded to his Sub-Contractor (of Vancouver) and an Estimate was received for Telegram.

This telegram is herewith attached, the amount being Seven hundred and fifty five dollars \$755.00

I considered this Estimate unduly high, in fact excessive, and consequently obtained another Estimate through a local Electrician.

This latter Estimate, I enclose herewith. Same is in detail and the number (Catalogue) of pictures is also given.

This estimate amounts to Five hundred and sixty nine dollars and sixteen cents \$569.16.

By visiting the factory at Vancouver I believe that I could secure the necessary pictures at a lower rate but without permission from Department did not consider this plan advisable.

Yours faithfully

Sir:

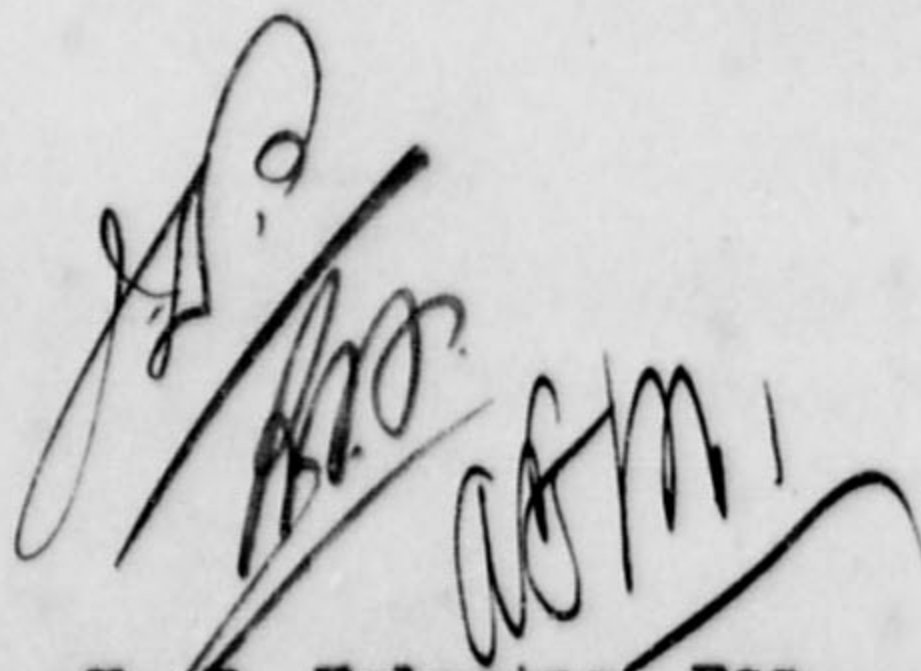

I have your letter of the 8th instant, enclosing copy of a communication which you received from the Principal of the Kamloops Indian Residential School requesting that the paint required be supplied for the painting of the school barn.

In reply I beg to say that the Department will approve of an expenditure not exceeding \$100 in the purchase of the paint required. You should arrange for the purchase of same. Competitive prices should be obtained and the purchase made from the firm quoting the lowest price. Properly certified vouchers, in duplicate, should be forwarded covering the cost, to which should be attached an abstract of tender form giving the names of the firms asked to quote and the prices quoted. It is to be understood that the school authorities will be responsible for the labour in performing the painting.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy and Secretary.

Sir:-

I beg to attach herewith copy of a letter received from Rev. Father James McGuire, O.M.I., of the Kamloops Industrial School, with reference to the painting of the school barn.

I might say that the building in question is very much in need of paint, and I most respectfully submit that the request of the Rev. Father be given favourable consideration, and that the Department supply him with the paint, the same to be purchased locally, the Rev. Father supplying the labour as suggested in his letter,

Yours truly,

(H.F. Helmsing)
Indian Agent.

Dear Mr Scott

I understand the Dept are calling for tenders for work at Kamloops and Fraser Lake. Should ^{you} require an Inspector at either places I should be very grateful for the position. Thanking you in anticipation.

You will be sorry to hear my daughter (of whom I spoke to you when in Victoria last year) is still very ill - in fact worse. The doctor gives little hopes. - she has not left her bed for over 10 months.

Yours faithfully,
Myles Morley.

1
As stated in my last report dated 15th September
very slow progress is being made towards the completion
of the Building.

The Heating & Plumbing Contractor has practically
completed his work and left for Vancouver on the
evening of the 27th Sept.

The Painter also returned to Vancouver on
the 27th owing to the difficulty and delay in erection
of Metallic Ceilings.

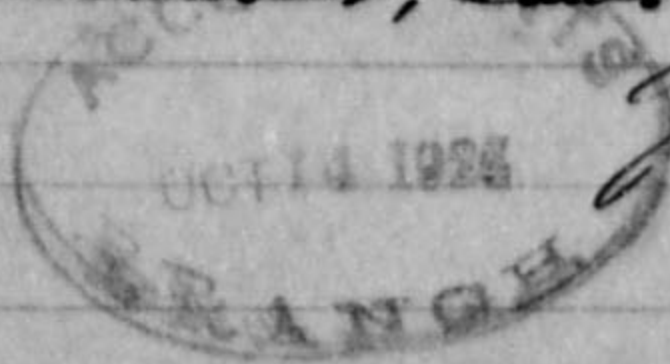

From the 17th Sept to 30th the Smiths have
had two men erecting metal ceilings but seemed
work owing to shortage of materials at end of month.

The Skylight to Kitchen has not arrived
the metal stairs to Chapel have arrived in the
city but are not fixed.

No further attempt to replace condemned work
has been made.

Delay in obtaining Quotation re Electric
Light fixtures was ascribed owing to Contractor
being in Vancouver, Quots will be forwarded as soon as
possible

Yours faithfully
W. Macaulay

R

Sir,

Contract for Centre Portion
Contractor McCarson

I regret to report that during the past fifteen (15) days that, with the exception of Friday 31st inst., no work of any description has been done on this contract.

The completion of this Building is being delayed by the failure of the Kamloops Plumbing & Heating Co. Contractors for the Plumb work to complete their work comprising Metal Ceilings, Skylight to Kitchen, Iron Stairs to Chapel etc. This naturally prevents Painter & Electrician from completing their work. On Friday last one Plumb & helper arrived on the job.

Contract for Girls Wing Contractor Blayden & Co.

Work on this Building was commenced on the 15th Oct. and the excavation is now nearly completed. A portion of the concrete footings were run out Friday 31st Oct. Storage Sheds for materials have been erected and a Car of cement delivered on site. Generally this work is proceeding favourably.

Electric Light Fixtures The contract for the supply of these fixtures etc has been given to Messrs Meller and Meller Electricians of this City, the price was \$569.16 all as per instructions contained in Departmental letter dated Oct. 22nd.

Yours faithfully

The Uniform Sub-Contract

FORM OF SUB-CONTRACT

ADOPTED AND RECOMMENDED FOR
GENERAL USE BY THE MEMBERS OF THE

Winnipeg Builders Exchange

This Agreement, made in duplicate this.....day of

.....A.D. 191.....
BETWEEN

.....
(herein called the "Contractor").
of the first part;

And

.....
(herein called the "Sub-Contractor"),
Of the Second Part;

Whereas under and by virtue of a contract bearing date the.....
day of.....A.D.and made between.....

.....as Owners, and the
Contractor as Contractor, the Contractor has agreed to provide certain materials and perform certain
work referred to therein and in the specifications and drawings therein referred to and in accordance
therewith, and the parties hereto have agreed that the Sub-Contractor shall provide that portion of the
said materials and perform that portion of the said works therein referred to, described as follows:

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

Now Therefore this Agreement Witnesseth that the Contractor and the Sub-Contractor, in con-
sideration of the fulfilment of the agreements herein respectively made by the other, agree with each

other as follows: ~~The sub-contractor shall be responsible to the Owner, Contractor~~
~~and Architect, for all work and materials supplied. He shall be responsible for~~
~~any loss or damage caused by failure to comply with any of the provisions of this~~
~~sub-contract, plans, specifications and general conditions of contract and shall~~
~~enter into all liabilities of the general conditions and specifications with respect~~
~~to this sub-contract. He shall without advice from the Contractor, arrange for and~~
~~procure from the Contractor or other proper sources, all necessary details and arrange~~
~~arrange for and deliver the various items of his work as it may be required.~~

ARTICLE I. The Sub-Contractor will, under the direction of and to the satisfaction of the Archi-
tects in said contract referred to and of the Contractor, provide the said materials and perform the said
work comprehended in this agreement in strict accordance with the said contract, drawings and specifica-
tions.

ARTICLE II. The Contractor shall furnish the Sub-Contractor with such further detailed draw-
ings or explanations as may be required from time to time and necessary to detail and illustrate the
works to be done, and the Sub-Contractor shall conform to the same as part of this agreement so far as
may be consistent with the said original drawings and specifications, and any corrections made therein by
the Architects referred to in the said original contract shall be permitted without increase in contract
price only where the Sub-Contractor has not been misled, by the error or omission, in making his tender
on the said works.

ARTICLE III. No alteration shall be made in the works shown or described by the drawings and
specifications, and this agreement except upon written order of the said Architects or Contractor, and
when so made the value of the work added or omitted shall be computed by the said Architects at latest
within two days after they are requested in writing by either party so to do and the amount so ascertained
shall be added or deducted from the contract price herein. In case of dissent from such computation by
either party hereto or of failure of the Architects to make such computation, the valuation of the work
added or omitted shall be referred to arbitration as hereinafter mentioned.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 3)

POOR-COPY

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

ARTICLE IV. The Sub-Contractor shall provide sufficient, safe and proper facilities at all times for the inspection of the works comprehended in this agreement by the said Architects and the Contractor or their respective authorized representative. He shall within twenty-four hours after receiving written notice from the said Architects or Contractor to that effect, proceed to remove from the grounds or buildings all material condemned by the said Architects, whether worked or unworked and to take down all portions of the work which the said Architects or Contractor shall by like written notice condemn as in any way failing to conform to the drawings and specifications and this agreement. No materials brought on the ground shall be removed without the consent in writing of the Contractor. The whole of the works comprehended in this agreement are to be executed in the most substantial, workmanlike and perfect manner, unless otherwise provided for in said specifications. The Sub-Contractor shall be responsible for all loss or damage to the works comprehended in this agreement or to the rest of the works or adjoining property caused by the works comprehended in this agreement, or their execution that may occur during the progress of the works comprehended in this agreement until such time as the works comprehended in this agreement are completed, unless due to fire or tempest or to the instructions or negligence or lack of judgment of the said Architects or Contractor or to defective or incomplete plans or specifications or caused by other trades, provided that the Sub-Contractor shall be responsible for reasonable wear and tear to the works comprehended in this agreement even if caused by other trades, and the Sub-Contractor shall make good any damage he is liable for, as aforesaid, with as little delay as possible, delivering the whole work comprehended in this agreement clean, complete and perfect in every respect in accordance herewith and with the plans and specifications and said contract.

ARTICLE V. Should the Sub-Contractor at any time refuse or neglect to supply a sufficiency of properly skilled workmen, or of materials of the proper quality, or fail in any respect to prosecute the work comprehended in this agreement with promptness and diligence, or fail in the performance of any of the agreements herein contained, such refusal, neglect or failure being certified by the said Architects, the Contractor shall be at liberty (after three days' written notice to the Sub-Contractor) to provide any such labor or materials, and to deduct the cost thereof from any money then due or thereafter to become due to the Sub-Contractor under this contract, and if the said Architects shall certify that such refusal, neglect or failure is sufficient ground for such action under the terms of this agreement the Contractor shall also be at liberty to terminate the employment of the Sub-Contractor for the said works comprehended in this agreement and to enter upon the premises and take possession, for the purpose of completing the works comprehended in this agreement, of all materials, tools and appliances thereon and to employ any other person or persons to finish the works and provide materials therefor; and in case of such discontinuance of the employment of the Sub-Contractor the Sub-Contractor shall not be entitled to receive any further payment under this agreement until the works comprehended in this agreement shall be wholly finished, at which time if the unpaid balance of the amount to be paid under this agreement shall not exceed the expense incurred by the Contractor in finishing the work comprehended in this agreement, such excess shall be paid by the Contractor to the Sub-Contractor, but if such expense shall exceed such unpaid balance, the Sub-Contractor shall pay the difference to the Contractor. The expense incurred by the Contractor as herein provided, either for furnishing materials or finishing the works comprehended in this agreement and any damage incurred through such default, shall be audited and certified by the said Architects but appeal from their decision may be made to arbitration, as herein provided.

ARTICLE VI. The Sub-Contractor shall complete the whole of the works comprehended in this agreement by the day of Time where herein mentioned to be strictly of the essence of this agreement. The Sub-Contractor acknowledges that in agreeing to complete the works comprehended in this agreement within the time herein stipulated he has in contemplation the Contractor's obligations to complete the entire works mentioned in the said hereinbefore in part recited contract within the time therein stipulated and the necessity of his performing this agreement in order to enable the Contractor to perform the said in part recited contract.

ARTICLE VII. Should the Sub-Contractor be obstructed or delayed in the prosecution or completion of the works comprehended in this agreement by reason of the act, neglect, delay, or default of the Contractor, Owners or Architects, or of any other Contractor or person employed by the Owners upon the works, or of the workmen of such other Contractor, or by reason of extra work being required to be done, or by reason of inclemency of the weather, or by reason of delays not due to the Sub-Contractor's own default or neglect, including delays in obtaining materials caused by strike through no default or negligence of the Sub-Contractor and delays in transit or by reason of any damage which may happen by flood, fire, lightning, earthquake or cyclone then the time herein fixed for the completion of the works comprehended in this agreement shall be extended for a period equivalent to the time lost by reason of any or all of the causes aforesaid, but no such allowance shall be made if in consequence of the Sub-Contractor's omission to present a claim therefor to the said Architects within a reasonable time after the occurrence of said delay the said Architects or arbitrators are unable to make a fair estimate of the extension of time the Sub-Contractor should receive hereunder. The duration of such extension shall be certified to by the said Architects, subject to appeal to arbitration as hereinafter provided.

ARTICLE VIII. The Contractor agrees to provide all labor and materials not included in this contract and the further detailed drawings and explanations mentioned in Article II., in such manner as not to delay the material progress of the works comprehended in this agreement, and in the event of unreasonable failure so to do, thereby causing loss to the Sub-Contractor, agrees that the Contractor will reimburse the Sub-Contractor for such loss; and the Sub-Contractor agrees that if he shall unreasonably delay the material progress of the work so as to cause any damage for which the Contractor shall become liable, then he shall make good to the Contractor any such damage. The amount of loss or damage to either party hereto shall in every case be fixed and determined by the said Architects, subject to arbitration as hereinafter provided.

ARTICLE IX. It is hereby mutually agreed between the parties hereto that the sum to be paid by the Contractor to the Sub-Contractor for the said work and materials mentioned in Article I. shall be.....

.....Dollars (\$), subject to additions and deductions as hereinbefore provided, and that such sum shall be paid in current funds by the Contractor to the Sub-Contractor in fortnightly instalments as the works progress, such instalments to represent.....per cent. of the amount of the work done and materials supplied on the ground, subject to the Architects issuing progress estimates therefor.

The final payment shall be made within twenty eight days after the Sub-Contractor has substantially fulfilled this contract, if the Sub-Contractor shall have given satisfactory evidence that no mechanics' lien other than his own or liens of which he holds discharges exist in respect of the said works. All payments shall be made only upon the written certificates of the Architects to the effect that such payments are due. PROVIDED that if the Owner shall abandon the completion of the works referred to in the hereinbefore in part recited contract or if otherwise said contract shall be terminated by either Owner or Contractor the Contractor shall be at liberty forthwith to terminate this agreement and the Sub-Contractor shall only be entitled to payment for the material supplied and the work done under this agreement to the date of such abandonment, estimated upon the basis of the contract price hereinbefore mentioned.

If at any time there shall be evidence of any lien or claim in respect of the works comprehended in this agreement, for which, if established, the Contractor might become liable, and which is chargeable to the Sub-Contractor, the Contractor shall have the right to retain out of any payment then due or thereafter to become due an amount reasonably sufficient to completely indemnify the Contractor against such lien or claim. Should there prove to be any such claim in respect of the works comprehended in this agreement after all payments are made, the Sub-Contractor shall refund to the Contractor all moneys that the latter may be compelled to pay in discharging such claim in consequence of the Sub-Contractor's default.

ARTICLE X. No certificate given or payment made under this agreement except the final certificate or final payment shall be conclusive evidence of the fulfilment of this agreement by the Sub-Contractor, either wholly or in part, and no payment shall be construed to be such an acceptance of defective work or improper materials as would entitle the Sub-Contractor to payment therefor.

ARTICLE XI. The Sub-Contractor must fully protect the Contractor against all claim for personal injury caused by the Sub-Contractor or his employees to any person engaged upon the works, or to the passing public, for which the Contractor might be liable, and for this purpose shall carry adequate casualty insurance in some company to be approved of by the Contractor and shall produce evidence, when called upon by the Contractor, that such insurance is in force, and the Contractor may at any time that he sees fit provide such casualty insurance at the expense of the Sub-Contractor and the Sub-Contractor shall pay the same and the same may be charged up by the Contractor against any moneys then or thereafter to become due from the Contractor to the Sub-Contractor.

ARTICLE XII. Any arbitration herein provided for shall be as follows. The Sub-Contractor and Contractor shall each appoint one arbitrator and such arbitrators shall appoint a third. The decision of any two of the three arbitrators shall be final and binding. Each of the parties hereto shall pay one-half of the expenses of such reference. A party who has not appointed an arbitrator after the other party has appointed one shall do so within two days after being notified in writing by such other party to do so. If the arbitrator of either party shall fail to proceed with the consideration of the matters within three days after being requested in writing by the other party's arbitrator so to do, such other party's arbitrator shall, if a third has not been appointed, be at liberty to act as sole arbitrator and his decision shall be final and binding, or the other two arbitrators, if a third has been appointed, may forthwith appoint an arbitrator in lieu of the one who has failed to proceed as aforesaid, and the decision of two of such three arbitrators shall be final and binding. If either party has done all in his power to comply with the provisions herein contained as to securing an arbitration, but by reason of the default of the other party or of the said Architects or of the arbitrator appointed by such other party or by reason of the Architects failing to certify in respect of any matter or thing upon which he should under the terms hereof, adjudicate or render a certificate or by reason of the arbitrators being unable to agree or if no award is made within a reasonable time, such party may take such action as would be permissible in the courts in the same way as if no reference of the matter in question either to the said Architects or to arbitration had been herein provided for and the other party shall not be at liberty to object that the adjudication of the Architects or a certificate from them is pre-requisite or that the remedy is only by arbitration or that arbitration is a pre-requisite to such action being taken or that the appeal to arbitration having proved abortive the decision of the said Architect is final and binding. An award under the provisions of this Article may be made a rule or judgment of the Court of King's Bench.

ARTICLE XIII. The covenants herein contained shall apply to and be binding on the parties hereto and their respective heirs, executors, administrators, successors and assigns, and each of them.

IN WITNESS WHEREOF the parties hereto have caused these presents to be executed.

~~KAMICOPS INDIAN RESIDENTIAL SCHOOL~~
noted & estimated

The work under the supervision of the above School is going on in a splendid manner and the building promises to be a real credit to the Department. Already one unit is completed. The second unit is being proceeded with.

I therefore request that an amount be included in the Estimates in view of completing the building by the construction of the third unit. Moreover, the furniture of the building is to be looked after and an amount to that effect must also be included in the list for Estimates.

Dear Mr. Orr:- RE KAMLOOPS SCHOOL

We are submitting the following sub-contractors
for your approval.

Cut Stone	- Keast & Allan, Vancouver, B. C.
Millwork	- Robertson & Hackett Co. Ltd. Vancouver, B. C.
Structural Steel	- Dominion Bridge Co., Winnipeg, Man.
Stairs and Miscel- laneous iron work-	Vulcan Iron Works, Winnipeg, Man.
Plumbing & Htg.	- Kamloops Plumbing & Heating Co., Kamloops, B. C. (Provisional only)

Enclosed herewith is blue print showing lay-out of
structural steel..We would be glad to have your comment on
same.

Regarding the plumbing and heating contract. While
we submitted the name of the Kamloops Plumbing & Heating
Co., it is only provisional as we are not yet satisfied as
to the wisdom of giving them this work. Their figure is the
lowest by \$600.00 and we used it in making up our tender,
but Mr. Macauley has registered such a strong objection to
us about employing them, that we are trying to find some way
of avoiding awarding contract to them. They are very anxious
to do the work and have promised the very best possible service.

DATE 30/10/24.

This firm did the Sheet Metal and Roofing for Mr. Carson's contract of last year. The roofing seems to be a first class job, but they seem to have taken some liberties with the sheet metal work. This may be due to a certain extent to their being no regular sub-contract form between them and the general sub-contractor Carson. If we gave them the contract, it will only be on our regular form of sub-contract which we think would amply protect us and give us full power to take the work out of their hands if they were not carrying it out satisfactorily.

We enclose copy of one of our regular sub-contract forms for your perusal and would like to have your opinion on this matter as a guide for our future action.

If any other sub-contract figure is obtainable at about the same price as the Kamloops Plumbing & Heating, we will award them sub-contract, but as we have taken the Kamloops School on such a narrow margin we are averse to paying an extra Six Hundred Dollars, (\$600.00) above the price figured on.

We have been very successful in finding a match to the Clayburn Brick. During the time we were figuring this job, I met Mr. Sellhorn of the Redcliffe Brick & Coal Co., in Medicine Hat, On Sept. 24th, to talk over the matter of supplying brick and tile and to arrange a price for it. Mr. Sellhorn was so confident that he could match clayburn brick, stating that he had already done so, that we took his word for it and figured accordingly, and it is now very gratifying to find that when four samples of clayburn brick are built into a sample wall in our office together with about twenty Medicine Hat and Redcliffe brick, the Clayburn brick cannot be identified by any brick man who is asked to pick them out.

The matching is made very easy by reason of their being several different shades in the Clayburn brick as they range from the medium light to the average dark of the Medicine Hat samples. We can send you a range of samples if you wish, though we can assure you we are covering the point you want exactly and we think possibly it would be best to have the samples in our office as we are placing our orders on a distinct guarantee that the range of color is lived up to.

Mr. Ernest Claydon is leaving for Kamloops in a few days and will complete the organization of the work on such a scale as to insure its being covered in before the severe weather strikes Kamloops.

Yours very truly,

CLAYDON COMPANY LIMITED

Sir:

I have to acknowledge receipt of the voucher which you submitted to the amount of \$15 for postage stamps supplied for the use of the pupils at the Kamloops Indian Residential School. A cheque in payment of this voucher will be sent the Principal.

I have to inform you that only three or four Indian residential schools have ever submitted accounts for postage, and, as the Department wishes to treat all institutions alike, favourable consideration cannot be given to the payment of accounts of this nature in future. The per capita grant should be responsible for this expenditure. Please inform the Reverend Principal accordingly.

CUT STONE CONTRACTORS

R

VANCOUVER, B. C.

12th November 1924.

Copy to file
The Deputy Superintendent General
Department of Indian Affairs,
Ottawa, Canada.

Indian Residential School - Kamloops B. C.

Dear Sir:

With reference to the Cut Stone Work for the Indian Residential School at Kamloops B. C. of which we had the sub-contract; we have had several communications with Mr. T. Carson the Contractor re the balance of money due us on this contract. He states that the Inspector at the building will not pass his last estimate for this work and he cannot forward us our balance until such time as this estimate is passed.

Mr. Carson instructed us that he had a letter from the Inspector stating that some of the stone work was defective this being some time after we had shipped the last car and being the only complaint during our contract. Since this letter we understand that all this material has been set in place in the building and we have not received our payment for the last car nor any of the money retained on the other shipments which amounts to over Three Thousand Dollars.

We have asked the contractor repeatedly to have this account settled and further we wrote to Mr. Macaulay the Inspector on the 21st August asking him when we could expect our final payment and to this date he has not replied to our letter.

Trusting that we may receive an early reply from your department stating when we may expect our final payment, through the contractor,

We remain,

Yours truly,

J. A. & C. H. McDonald,

CHM/M.

Kamloops New Indian Residential School
Reference Electric Installations of the
Department of Indian Affairs *Complete Building*

P.O. Box 453
Kamloops, B.C.
Ottawa, 27th November 1924

The Secretary
Department of Indian Affairs
Ottawa.

Arch. Sec. Act

In accordance with instructions from the Department the new Light and Power Line has been installed and is now complete. As per explanatory letter forwarded by me to the Department it was essential to rip out the forest of poles in the road and place this system on a satisfactory working basis, with a main distribution Centre adjacent to the Refrigerator (the most convenient point). Mr. Graser of the City Utilities promised to carry out this work on a time and material basis. The cost not to exceed \$120.00, as explained in my letter above referred to.

All this work is now complete and the total charge against the Department is slightly less than was anticipated. The Accounts certified by me will be forwarded to the Department within the next 10 days.

Cost of Pole Line as authorized by Department \$865.00
Cost of straightening out Pole system with
new Centre of distribution etc 80.00
Total cost \$945.00

I have not received these accounts but am assured by Mr. Graser of the correctness of same. The above also includes the Telephone Line from City. C. Power Supply to Buildings. The Motors in Boiler Room and also Laundry are arranged to be taken direct from the Transformer Poles to the Motors. A separate Meter has been arranged for all Power on Transformer Poles, thus obviating the necessity of carrying same to main light Switch Board in Centre Building.

Electric Light Authority for certain changes & certain additional expenditures in Mr. Orr. Letters No. 154-0-53 dated April 7th 1924 and 154-0-53 dated 12th May 1924.

Centre Portion
(Power) Unfortunately neither the Specifications

VERY

POOR COPY

Kamloops New Indian Residential School

(A) Department of Indian Affairs

Electric Light etc Continued, Ottawa, 192.....

(2) No Drawings, include Connecting up the Motors in the Boiler Room; a deduction on account of the omission to connect up the Motors in Laundry will however be made from Mr Carson's Contract which should take care of this particular item.

Consequently I have requested the City (Mr Fraser) to make the necessary connection between the Transformer Pole and the Boiler Room Motors, on a time and material basis, the cost being eventually deducted from Mr Carson's Contract.

Light In connection with the Lighting of the Centre Portion as suggested in my letter of the 2nd April and approved 9th April a Sub-Ordained Main System has been adopted, of which the following Particulars are submitted:—

The wiring for the Centre Portion calls for	12 Kilowatts
Do Cables being	14 "
Do Pops being (Estimate)	14 "
Total	40 "

Transformer The Peak load however will not be nearly this amount and can only be correctly ascertained by actual Experiment, consequently I have arranged through the City (Mr Fraser) for the loan of a Transformer, for an indefinite period, and a recording instrument; from the resultant records the Peak load can be established and the necessary Transformer obtained by the Department, as this has, so far, not been provided for.

Capacity of Main Service Lines

The maximum load being taken at 40 Kilowatts with a Voltage of 110; from the formula $P \times V = W$ we have 364 Amps, as this is however far and away from what the Peak load can possibly be, I have asked for the following:—

- ① Main Service Lines to be 2" 00" = 133.100 Circular Mils in area and also equal to 150 amperes, carried from the Transformer Poles to the entrance (N.E. Wall of Centre Building adjacent

Kamloops New Indian Residential School

Electric Light Continued Department of Indian Affairs

(3)

Ottawa,

192.....

adjacent to East Slope of Chapel Roof.) This distance will be approx 150 ft in length and is covered by Mr. Carson's Contract; to facilitate matters however, I have arranged for this connection to be made by the City, also on a time and material basis and the cost to be deducted from Mr. Carson's Contract. (In this City, Electricians are not allowed to execute wiring outside the Building line.)

(2) A Main Switch Board, roughly as marginal diagram,

(c) Containing a 200 Ampere Main Switch & fuses

(a) Three (3) Main Circuit Switches and fuses and

(b) Three (3) Distribution Switches & fuses.

(a) to be each 100 amperes (b) each to be 30 amps

→ 200 Ampere Main Switch & fuses

→ Centre Portion 100 Ampere Switches & fuses (as Main Circuit)

→ Girls wing

→ Boys wing etc. For Centre portion of Building, Sub-distributing Panels, Three Switches = one circuit to each floor, viz Three 30 Ampere Switches & fuses.

(3) The usual Distribution Panel, as called for, one for and on, each of the three floors.

(4) 1 1/2" Conduit from this Switch Board to the extreme East wall of Centre Building for Girls wing and the same to the West wall for Boys wing!

I consider that items 2 and 3 are covered by Mr. Carson's Contract and 4 is covered by the extra authorized;

as I have not, so far, been able to obtain a definite settlement with Mr. Carson's Electrician (the Vancouverian) it is just possible that he may contend that his Contract does not make provision for the two 100 amp switches required on the Main Switch Board for the two wings. In any case there do not exist there a very serious item.

Girls Wing The copy of letter, to Messrs. Clayton Company, herewith enclosed.

Ottawa, Nov. 29th 1924

Messrs. Claydon & Co.
Contractors

Kamloops Indian Residential School

Dear Sir "Re Electric Installation Girls Wing"

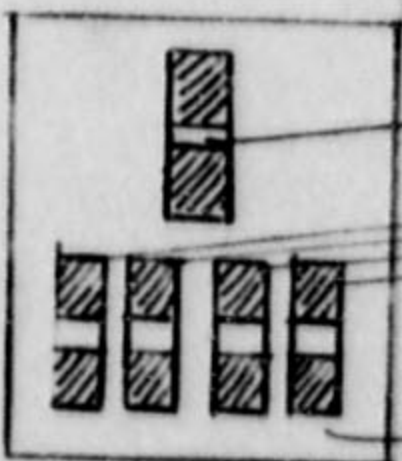

I have examined the bills & plans submitted by your Electrician Mr. Main, and regret that I am unable to advise acceptance of same by the Department, without the inclusion of the following:

- ① The Provision of a Switch Board, in the Closet on Ground floor, in addition to the Panel Board denoted by Mr. Main's drawing.
- ② No. 4 (two) wires from the Switch Rooms of Centre Building to the Switch Board referred to under No. 1.

Reference No. ① This Switch Board will require slats back etc. together with a 100 ampere Switch & fuses, and four 30 ampere Circuit Breakers; from this Board distribution will be made to the four panel boxes as denoted on Mr. Main's drawings.

Reference No. ② It is possible that the Department may sanction a reduction in the current required for this wing which would allow of No. 6 wires being used, this point however cannot be accepted as authority for including lighter wires than called for under the Specification and Drawings; should any change be authorized an adjustment can be arranged later.

Reference Mr. Main notes no Switch to Girls Bath. I would point out the omission of this Switch is noted, same will be included in the adjustment above referred to.

- 100 Amp Switch & fuses
- 30 Amps Circuit Breakers & fuses (one to each floor)
- Slats back etc

Yours faithfully
Reginald H. Maclean

The Secretary
Department of Indian Affairs
Ottawa

Sir, Re: Proposed disposal of water from Baths and
Girls Wash table.

In view of the great amount of water used per
week for about (the same will also apply to the Boys Wing)
May I suggest that this water be carried in a
separate pipe or sewer, but in the same trench as
far as possible as the Sewage. Instead of being
conveyed into the Septhia Park same could be
connected up with the pipe line carrying the
effluent to the disposal trenches, at a point
very close to the outlet of Septhia Park.

This would of course necessitate a small
additional expenditure, the advantages would I think
be more than sufficient to justify such a course.

Inspection Chamber. This is approx 85 ft from the Centre Building
and I anticipate considerable difficulty in cleaning
the main drain from Dining, Kitchen & Hallway.

It is true we have grease traps, but these are not
absolute proof against the greasy water from 250 plates
three times per day.

We also have a mosaic floor which cannot be
disturbed.

I suggested to Mr. Meadcroft of the Water Power
Branch that it would be advisable to put an
inspection chamber on this drain immediately
adjacent to the Building; the connection has been
made and the trench filled up however without
any provision for this emergency. I simply offer this
suggestion for consideration.

Yours faithfully
H. H. Macdonald

Sir,

"Concrete Footings"

Please refer to Drawing Sheet 2, Left Side Elevation.
The section clearly shows the concrete footings under
the weight carrying stud partitions (forming corridors)
as 3'-0" x 1'-6" in depth.

Mr. Cleason has strongly objected to putting in
these footings. Contending that

- (a) No footings were mentioned in specification under
wood partitions
- (b) That, according to specification all footings should
only be 12" under than the surface under walling,
- (c) That the signs shown on the section above referred
to were the result of a draughtsmans error.

I was unable to accept this contention and insisted
that the footings should be 3'-0" wide & 1'-6" in depth
as shown on section.

Further I have given instructions that the weight
carrying partitions forming the West and North sides
of the Junior Girls Recreation Room, Sheet No 3,
shall also be 3'-0" x 1'-6" for the following reasons:-

- (a) I believe this section to be the true intent and
meaning of Drawings & Specification
- (b) The excavation was such that the foundation
for these walls is certainly little more than equal
to "made ground". The material was what is known
as sea gravel ^{in layers} sloping towards the river at an
angle of about 20 degrees, it was found quite

Kamloops New Indian Residential School
Girls wing

Department of Indian Affairs

Concrete footings Continued (2)

192.....

Quite impossible to prevent the banks or sides of the excavation for Landry (on the South and West sides) from caving in, and they now rest (and very uncertain at that) at an angle of repose of nearly 45 degrees.

Consequently the footings should be spread as much as possible and I most certainly consider and suggest that 3'-0" x 1'-6" is in no way excessive.

I have informed Mr. Baydon (who is getting in these footings under protest) that I would refer this matter to the Department and in the event of the decision being in his favour that an allowance would be made for the extra concrete entailed.

May I request that you will favour me with a decision on this matter as soon as convenient.

Yours faithfully
W. H. Macaulay

Dear Mrs. McDonald,-

I have your letter of the 18th regarding the granite supplied for the Kamloops School, and I may say that I have already directed a letter to the Inspector of Construction on the work, asking him for a full report, and I hope that we will be able to come to some settlement without delay.

You state in your letter that the boys want to know if the stone was not all right why the Inspector allowed it to be put into the building, and after a lapse of six months refused to pass the estimate. With reference to this I would say that Mr. Macaulay, Inspector of the Work wrote to Mr. Carson, the contractor, on the 26th of May with reference to the granite, and notified him that the granite being delivered was decidedly inferior and defective, and if any of the granite was set it was entirely at his own risk, as it was impossible for him to accept same.

As I said before I will receive shortly a full report from the Inspector, and I will keep your communication in mind and see if a settlement can be arrived at without delay.

Yours very truly,

James A. Smith
Deputy Superintendent General.

DEPARTMENT OF INDIAN AFFAIRS

CANADA

Ottawa, Nov. 25, 1924.

per
MEMORANDUM:

Mr. Scott.

With reference to the granite specified for the new Kamloops School you will remember that this was discussed with Mr. McBride, and he advised us that the sandstone would not stand up under the weather conditions of Kamloops, due to the great difference in temperature between the day and night during the winter months. While I was in Kamloops I personally inspected several buildings where sandstone had been used, and found that it was not proving satisfactory. Mr Macaulay who has practised Architecture in that district for some time was also of the opinion that the granite was far superior to the sandstone when used in buildings in Kamloops. From Mr. Macaulay's reports it is evident that he has had some difficulty in getting the contractors to furnish the granite of a satisfactory quality, and I beg to quote hereunder from his reports.

Report May 1. "The granite is proving a constant source of worry. The quality is not too good and I have been compelled to refuse permission for the caps to the chapel buttresses to be used."

The following is an extract from a letter which Mr. Macaulay wrote to Mr. Carson, the contractor on the 26th May. "Reference granite. As you are fully aware it has been necessary to complain as to the quality of granite supplied to the above mentioned building many times during the past three months. The expected improvement has not materialised. In fact the standard has deteriorated, the last shipment is most decidedly inferior and defective. Consequently in confirmation of my verbal instructions, the setting of this or any defective granite is entirely at your own risk as it is impossible for me to accept same."

Indian Affairs (RG 10 Volume 6448, file 882-5, part 3)

-3-

Letter of August 16, as follows: " Two new granite caps for chapel buttress arrived and have been placed in position. A little painting has been done to the coping, otherwise no apparent effort has been made to rectify the work complained of."

On the twelfth of this month a letter was received from J. A. and C. H. MacDonald, Cut stone contractors of Vancouver, complaining that they have not been paid for the granite supplied to the Kamloops School, and on the 24th instant I enclosed a copy of their letter to Mr. Macaulay asking him to submit a full report on the granite supplied to the school at the earliest possible date.

From the above you will see that the contractor has had a lot of trouble with the sub-contractors, supplying the granite for the building.

Mr. W. Scott,

Deputy Minister

Dear Sir,

Indian Affairs,

My sons have asked me
to write to you in connection with
their cont. contract of the stone work
on the Indian School in Kamloops.

It has been completed about six
months ago, but the Inspectors will
not pass the work, nor will he tell
them what is wrong with it.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 3)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

I explained to you - when in Ottawa - the trouble between the two unions (Granite + sand stone cutters union)

The granite cutters refused to cut the granite unless they could be allowed to cut the sandstone too!

However the Inspector would not let the sandstone be used, and we had to have the granite cut by sandstone cutters.

When it came to near the finish of the work, they (the Granite cutters) refused to allow the granite quarry owners to supply us with the granite, otherwise they would go on strike on all the granite work being erected, and therefore we were forced to complete our contract with what granite we could secure.

What the boys want to know is if the stone was not all right why the Inspector allowed it to be put into the building, and after a lapse of six months he refuses to pass the estimate.

My sons dropped two thousand dollars of their original price to help the contractor - Mr. Caren - get this contract.

2-

Mr. Carey has not helped the boys to get this matter straightened out; there is about three thousand dollars due to them and they need the money to carry on.

I do wish that the architect could have used New Castle Island stone. — like the sample I left with you. It would have saved all this trouble.

By the way the Government is using this stone (New Castle Island) in the Federal Building (Post Office) at Kamloops now under construction.

Will you kindly help to straighten this matter as soon as possible.

The boys have written to you but I thought I had better write and explain this to you.

I thank you for your past courtesy. I do appreciate what you have done for us. I beg to remain

Sincerely yours

L. W. Donald.

(Mrs. W. S. Donald)

154-0-5.

Ottawa, November 28, 1924.

Sir:

I have your letter of the 19th instant, enclosing a copy of a communication of the Rev. Principal of the Kamloops Indian Residential School with reference to the advisability of erecting a slaughter house and an addition to the hen house.

In reply I have to inform you that the Department considers the school management should be responsible for the erection of a slaughter house, if one is urgently required.

I am pleased to authorize you to purchase, after securing competitive prices, the lumber, cement and finishing material listed in the Rev. Principal's letter for the purpose of building an addition to the hen house. The estimate of \$350 should not be exceeded and the school management should be responsible for the labour. When you are submitting properly certified accounts, in duplicate, in favour of the firms given the business, you should support them with a statement showing the firms asked to quote and the prices quoted.

Your obedient servant,

J. D. McLEAN

DEPARTMENT OF INDIAN AFFAIRS
CANADA

November 27, 1924.

Memorandum:

Dr. Scott.

The Rev. Principal of the Kamloops Indian Residential School has requested the Department to give grants of \$200 and \$350, respectively, for materials to be used in the construction of a slaughter house and a hen house. Mr. Indian Agent Helmsing recommends favourable consideration.

I believe the institution should be responsible for the slaughter house, if one is required, but that the Department should authorize an expenditure of \$350 for materials to be used in the erection of a hen house. Mr. Orr has examined the prices and states that they are satisfactory.

Sir, "Reference Buff Bricks for lining Laundry"
The Sister Superior and the other Sisters here, also
the Principal the Rev. Father McGuire are
not favourably disposed towards the buff brick treatment
of Laundry Interior

Without appearing in any way dissatisfied with
the present arrangement they have expressed a desire
for a white non absorbent surface, which they
consider would give a better diffusion of light,
in addition to the non absorption of vapours from
laundry operations

I have explained to them that white glazed bricks
were out of the question on account of cost, and
suggested that the substitution of common bricks
rendered with a good Portland cement plaster finished
with two coats of one of the recognized white water
proofing paints, for concrete or glass, would meet
their requirements.

On this they concurred and I was requested to ask
if you will favour them with the necessary permission
for this change.

As the Contractors are rapidly pushing ahead with
this portion of the work I should be pleased if you would
kindly telegraph your decision, as early as possible, as it
is desired to take the utmost advantage of the present
favourable weather conditions

Yours faithfully
W. H. Macaulay.

Indian School,
Kamloops, Nov. 17, 1924.

Dear Agent:-

We are asking you to present for us to the the Department a request for material to build a slaughter hall and also an addition to the hen house to serve as roosting quarters for our two hundred and fifty pullets.

We are enclosing prices for lumber from the Kamloops Lumber Co. only. There is no other in town.

For the slaughter hall we require:

3000 ft. of rough lumber; 5000 shingles and
15 sacks of cement @ 1.40 a sack and 1 winch @ \$50.00.

The entire cost would not exceed \$200.00

For the chicken house we require:

8000 ft. of rough lumber; 10,000 shingles
25 sks, cement @ 1.40; 6 windows \$30.00
2 doors \$10.00; 1 keg nails \$7.00.

The entire cost will not exceed \$350.00.

Yours very truly,

(Sgd) James McGuire, O.M.I.

Sir.

"Clement Building, Contractor Mr. Carson"

During the past fifteen days we have had a little more activity in this Building.

The Carpenters have worked steadily and satisfactorily and have displayed intentions of finishing off their work in an approved manner; most of the ceilings and metal work generally are now complete; there still remains the adjustment or making good, of the defective work complained of.

The Skylight for Kitchen has not, up to present time, put in any appearance, neither has any attempt been made to fix the metal stair to Chapel.

The Electrician has arrived and the Electrician Mr. Carson's Subcontractor is expected from Vancouver tomorrow.

Two Painters have arrived from Vancouver and are now pushing ahead with their work.

Yours faithfully
H. H. Macaulay

Ottawa, 17th November 1924

The Secretary
Department of Indian Affairs
Ottawa

Sir,

"Guthrie & Sons, Mason & Claydon Coy. Contractors"

This work has been pushed along in a very satisfactory manner, the excavation has been completed and the concrete footings are now in place.

Storage sheds have been erected and considerable material including bricks, lumber, steel work, and cement delivered on the site.

Bricks I regret that it was necessary to condemn the common bricks delivered; these were supplied by the Penderby Brick & Tile Coy. These bricks were badly burnt and far too soft for use. Mr. Claydon Jan. arrived in Kamloops on Friday 14th and immediately proceeded to Penderby in connection with this matter. I am now informed by him that arrangements have been made for a much better quality of bricks to be supplied by the same firm.

The Penderby Brick & Tile Coy. can, if they desire, supply a really good brick, and this they have promised to do.

General I am pleased to state that the method or style of carrying out this work has been quite pleasing. It will be necessary however for the weather to improve if the expected progress is maintained.

Yours faithfully
W. H. Macaulay

Sir:-

I beg to acknowledge the receipt of your letter of the 19th instant with reference to the work on the Girls' wing of the new Kamloops School. I am today sending you, under separate cover, a blue print copy of the plans and specifications as requested.

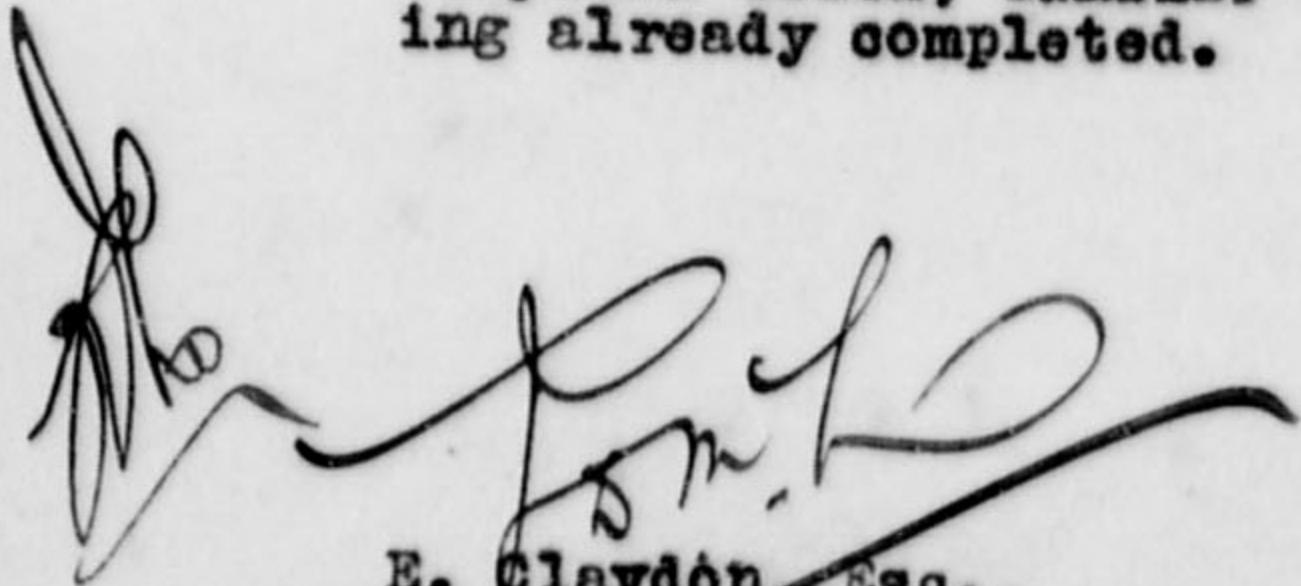

With reference to your letter of the 30th of October I have noted the names of the sub-contractors. With regard to the sub-contract for plumbing and heating, I note your remarks and from correspondence it would appear that Mr. Macaulay, Inspector of Construction has had difficulty with this firm in their work as sub-contractors for Mr. Carson, and in a letter directed to Mr. Macaulay some time ago it was requested that he advise the Department as soon as the work of the heating contractors commenced if the work was not being carried out to his satisfaction and in accordance with the plans and specifications.

With reference to your remarks regarding the brick for the Girls' wing, I would call your attention to Page 21 of the specifications where it is stated that all face brick for the exterior of building is to be No. 1 quality red pressed Clayburn brick, similar to that used in the portion of the building already completed.

Your obedient servant,

J. D. McLean.

Sirs:-

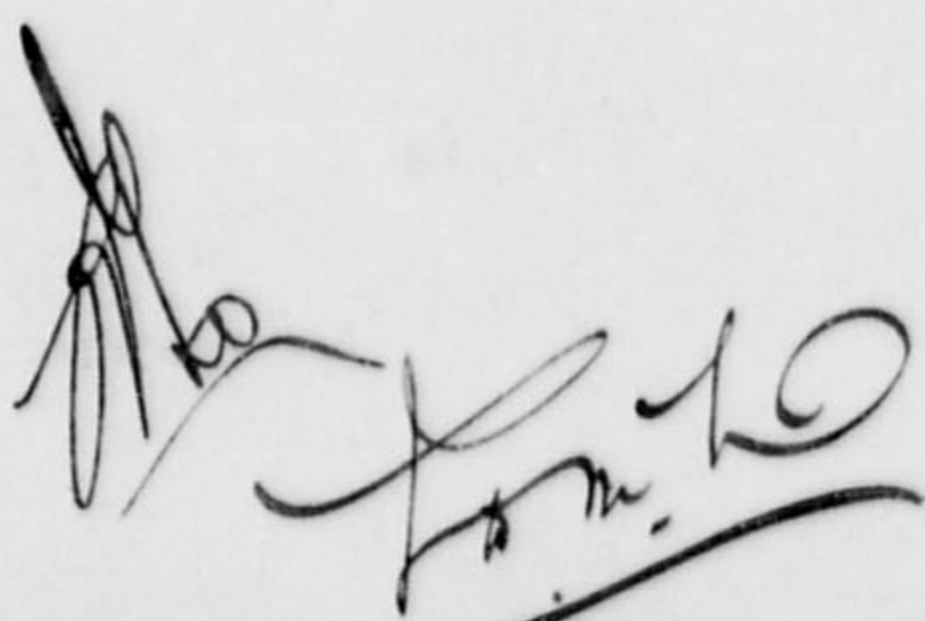

I beg to acknowledge the receipt of your letter of the 12th instant addressed to Deputy Superintendent General with reference to the supplying of stone to the new school at Kamloops, and in reply to say that I am today taking this matter up with the Inspector of Construction and asking him to submit a report on this subject.

When this is received you will be further advised.

Your obedient servant,

J. D. McLean.
Assistant Deputy & Secretary.

"Electric Lighting"

Herewith I enclose the Drawings referred to in my letter of the 27th inst, same were kept back to allow Mr. Main to reconsider matters, at Mr. Graydon's request.

I would point out that Mr. Main's Drawings denote a distribution known as the TREE SYSTEM and that in accordance therewith the Switch Board referred to in my letter is unnecessary.

This system is however undoubtedly defective, it is sometimes known as the Single Main System and is generally confined to small unimportant buildings.

Under this system it is practically impossible to adequately divide up the single mains for testing purposes which makes it very difficult to localize a fault.

The Specification clearly indicates that the system required shall be first class in every way, with special attention to arrangement for localizing faults, inferred.

The Centre Building has been installed in accordance with the SUBDIVIDED MAIN SYSTEM, as authorized by the Department, and is adopted, almost exclusively, on all works of any importance.

To make sure that my interpretation of the Drawings & Specifications was fair and reasonable I submitted the question matter to Mr. Fraser, Manager of the City Utilities, who entirely approves, and states that it fairly represents the minimum we should expect from the Drawings and Specifications.

The note in Mr. Main's Drawings referring

Dear Mr. Orr.

Please refer to Sheet No 7 Girls Thing Drawings.

Also please refer to Sheet No. 8. Centre, or Main Building
You will observe that our 2" and our 2 1/2" pipes cross the
Corridor at right angles. These pipes with covering amount to
Practically 5" dia, add to this, clearance from ceiling and
the necessary fall.

Draw will notice that the new 5" supply pipe to Gools wing will have to pass under the two existing pipes crossing the main corridor at right angles. The result being as follows:—

I have tried to locate an alternate route, without any degree of success; the carrying of this particular 5" supply pipe through the scullery and kitchen offers still greater difficulties.

P.S. Sheet No. 7. brals wing

Yours faithfully
H. A. Macaulay

Kamloops New Indian Residential School
Month End, Progress Report.

Department of Indian Affairs

Ottawa, ^{Don 453} Kamloops B6
2nd December 1921

The Secretary
Department of Indian Affairs
Ottawa

Sir.

Central Portion Fairly satisfactory progress has been made on this portion of the Building during the past fifteen days. We are still awaiting the skylight to kitchen otherwise all work is rapidly nearing completion.

The connection of water supply has not, up to time of writing, been made, the trench is now being dug, the necessary piping being on the ground.

Girls Wing Very good progress has been made with this portion of the Building in spite of several drawbacks in the way of unfavourable weather, delayed, and defective shipments of materials.

Certain difficulties have been encountered, these have been either satisfactorily overcome or submitted to the Department under separate reports.

Some slight difficulty has been experienced with the facing bricks, more particularly in reference to colour, the cars now arriving however are fairly satisfactory; the said bricks are being supplied by the Redcliffe Coy, an authorized

Clayburn Bricks Approximately 4,250 clayburn facing bricks left over from the Central Building are on the site consequently I have arranged with Weston Claydon Coy to take over these bricks at the same price as delivered on the site. I trust this arrangement is satisfactory to the Department.

The Lagoon bricks now arriving here quite satisfactory. The granite is satisfactory and is now in place.

Weather permitting the ground floor joists will be in position in the course of fifteen days.

Yours faithfully
H. H. MacKenlay.

NEW INDIAN RESIDENTIAL SCHOOL

Dear Sir:

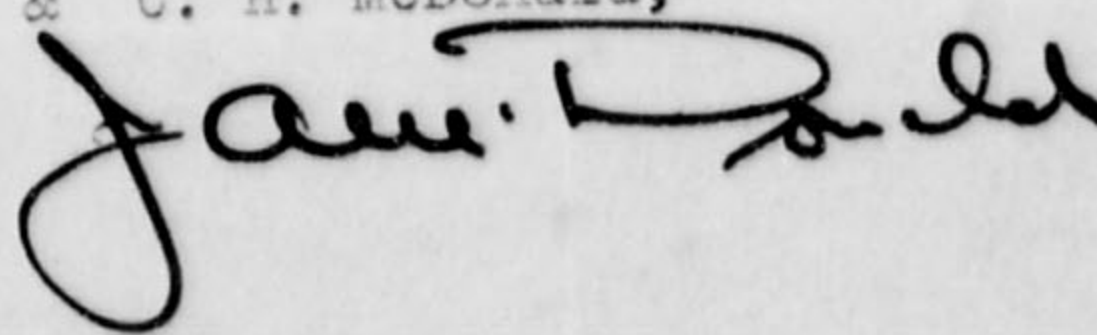

The manager of the Bank of Montreal here has asked us to write and ask you if you would please let us know when the Indian School is completed.

Mr. Carson still owes us in the neighborhood of \$4000.00 and we know perfectly well as soon as he is paid he will pay us but this will not satisfy the manager here. We have a credit with the Bank of Montreal and it is very difficult to convince him that we will get our money as soon as Mr. Carson does. One of Mr. Carson's men was in here this morning and told us the stone work is now awaiting the O. K. of Mr. Orr, I told the manager this but even that would not satisfy him, so if you will be kind enough to just drop a line which we can place before him we shall appreciate it very much.

Yours faithfully,

J. A. & C. H. McDonald,

The Secretary
Department of Indian Affairs
Ottawa

REPORT, RE
GRANITE

I am instructed in your letter 154-0-5 dated Nov. 24th 1924
herewith submit the following Report re Granite

The last shipment of granite comprising coping etc
was defective and I informed the Contractor Mr. H. H. H.
that it could not be accepted, and that the erecting
of same was entirely at his own risk.

I followed this up by a letter refusing acceptance,
and forwarded a copy of same to the Department.

The value of this defective consignment was approx
\$2,400.00 consequently I deducted this amount from
Certificate No 5, dated 2nd June 1924

The action taken was approved by Departmental
letter 154-0-5 dated 14th June 1924

An Employee of Messrs Mc Donald was sent up
to the School to fix up the defective granite, but
after working approx eight (8) days he informed me
that it was useless him staying in Kamloops as it
was impossible for him to bring the granite to an acceptable
condition; he openly stated that he was ashamed of the
granite sent, and that same should never have left
the yard. He admitted that same, but not all the
granite, had been cut from boulders. (That is the
last shipment)

This Employee repeated these remarks to the
Rev. Father Mc Carver whom I had requested to act
as witness; in the event of a Commission of Enquiry.

This Employee in the course of a day or so
returned to Vancouver and subsequently no

VERY

POOR COPY

Department of Indian Affairs

Ottawa

192

effort has been made to replace or rectify the
grants work complained of.

I have spoken to Mr. Benson, the General Contractor
on several occasions about this defective grants,
without however, any satisfactory results or information.

Practically the whole of this grants has been
placed in position.

From time to time I have referred to this grants in
my usual monthly & semi-monthly reports.

For more information I would add that.

The total cost of the grants to be

supplied in accordance with drawings

and specifications amounted to approx \$12,000.00

The amounts paid by the Department, in

respect of the various shipments made,

in accordance with the amounts included

in the various certificates is \$8,856.00

which being at the rate of 90% $\therefore$ equals \$9,840.00

I may add that Mr. Pitelburn, during his visit here, examined

this grants and agreed with the action taken by me.

His same remarks apply to Col. Fraquell Inspector of
Agencies.

In conclusion I would mention that the ^{grants} ~~grants~~ to
Chapel Buttriss which I referred to as being improperly
fixed, have not been rectified.

Yours faithfully,
R. H. Macaulay

Ottawa, 1st December

1924

The Secretary
Department of Indian Affairs
Ottawa.

Sir, I beg to acknowledge receipt of your letter 154.0-8 dated the 24th Nov. 1924 together with enclosed copy of letter from Messrs J. & C. H. McDonald.

Grants. The letter from Messrs McDonald to me dated 21st May, 1924, and referred to in the enclosed copy, mentioned above, is forwarded herewith for your information.

In reference thereto I would point out that under the circumstances I did not consider it wise to forward the letter asked for, as such would have, more or less, been construed into an acceptance of the grants complained of, and I was not prepared to commit the Department to that extent.

I explained matters to Mr. Carson however and asked him to explain matters to Messrs McDonald on his next visit to Vancouver, which took place shortly after the receipt of the letter.

In any case they, Messrs McDonald, were in a better position than I, to decide when the defective grants would be replaced, and this point most certainly determined the date on which a Certificate would be issued by me.

Subsequent events have clearly proved that Messrs McDonald had no intention of replacing the grants complained of.

My aim and object has been to protect the Department and this could only be accomplished by withholding the Certificate in question, until the materials supplied complied with the terms of the Specification.

Yours faithfully
W. H. Macaulay

Ottawa,

16th December

1924

The Secretary
Department of Indian Affairs
Ottawa

Sir, I beg to submit report covering period of 1st to 15th
as follows:-

Glaze Portion During the past two weeks the Kitchen Skylight
has been placed in position and the metal stairs to the
Chapel have been fixed.

Practically all painting except varnishing
to floor of Ground Floor and a little touching up is
now complete.

The water supply was connected up on the 10th inst.
Girls Wing Rapid progress has been made with this contract
and the walls are, approximately, 10ft above grade
all round.

The red bluffs facing bricks look fairly good
in the wall though perhaps a little inferior to the
Clapham; they cause some little inconvenience owing
to the variation in size.

On Monday the 9th inst work was impossible owing
to a heavy fall of snow, during the evening however a
Chinook rapidly cleared away same and enabled work
to be resumed on Tuesday.

The evening of the 14th brought on a gale and snow
followed by 15th being very weather, this has of course
entirely put a stop to all work on this contract; it
is doubtful when a resumption of work will be possible.

Yours faithfully
M. Macaulay

Ottawa, 6th December 1924

*The Superintendent
Department of Indian Affairs
Ottawa*

R

Sir,

Herewith I enclose certified accounts for the installation of the Electric Light & Power Line. I regret that, in my letter of the 27th November, the amount of this account was stated by me as \$945.00 instead of as rendered \$965.90.

This error was the result of a misunderstanding with Mr. Gross, Manager of City Utilities.

The \$965.90 is, as originally arranged, Mr. Gross however informed me, on I think the 25th Nov. that this account would not exceed \$945.00 he was not however certain until he could check up the various amounts charged against the account.

In any case I have absolutely no hesitation in stating that the Department has secured a thoroughly efficient and complete installation at an exceedingly low cost.

Yours faithfully

M. Macaulay

INDIAN AGENT'S OFFICE

Kamloops, B.C.

December 30, 1924.19

IN YOUR REPLY REFER TO
No.
ALSO
TO DATE OF THIS LETTER

Sir,—

It is with deep regret that I have to confirm my wire of the 24th inst., advising the Department that the girls' portion of the old school building, Kamloops Industrial School was completely destroyed by fire at one A.M. on the 24th inst., while the thermometer registered from twelve to fifteen below zero.

Owing to the fact that telephonic communication was destroyed, I was not advised of the fire until 8:45 A.M., when I immediately made efforts to ascertain the truth of the report, and finding the same to be true, I hired a car and drove over to the school to find out exact conditions.

Upon my arrival at the School I found that Rev. Father McGuire was in town, but I was met by the Rev. Sister Superior, who gave me the following information.

At 10:30 P.M. on the 23rd., after all had retired and she and Rev. Father McGuire, after ascertaining that all stoves in the building were safe, as far as they could see, themselves retired for the night. About one o'clock A.M. Sister Mary Ann D'Auray, being awakened by the smoke, aroused the inmates of the building. The children were all called and dressed as quickly as possible in what clothes they could gather and were removed from the building without any mishap. They were then taken over to a small building used as a laundry, which was not heated at the time, and several of the children had only escaped only with very meagre clothing, and some without even shoes and stockings.

In the meantime the alarm was raised and the City Fire Brigade volunteered to go from Kamloops to the School, some three miles distant, with a view to try and extinguish the blaze, but the fire had too much of a hold to do anything, and the only thing to do was to concentrate on saving the new school which stands only a few yards distant from the one destroyed.

Owing to the fact that the power lines were destroyed by the fire, the school pumping machinery, of course ceased operations, leaving them absolutely without water except what could be carried in buckets from the river, and in spite of the low temperature a bucket brigade was organized, and with the assistance of the City Fire Brigade, they kept men on the roof of the new school which is only covered with cedar shingles, and extinguished any sparks or chunks of burning timbers which might blow over

December 30, 1924.

over to the new school roof and endanger that building. Owing to the persistent and determined efforts of these workers, the new school was saved, but the girls' class room which stands in a separate building some twenty or thirty yards distant from the girls' residential quarters, caught fire and was completely destroyed.

Upon my arrival, the 38 girls and four sisters were all herded in the small building used as a laundry, with no heat and only the clothes they stood in. All their provisions had been destroyed, and their kitchen utensils and dishes, together with the shipment of new aluminium and enamel ware, dishes and utensils for dining room and kitchen use, which had only arrived at the school the night previous and had never been unpacked.

I immediately took steps to provide as an emergency measure, four dozen knives, forks, spoons, plates, cups and saucers, also a few pots and pans and kettle, to enable them to make some hot coffee and cook themselves a meal when provisions had been rushed out from Kamloops.

Later on, with the sanction of the Department, I purchased 75 Hudson's Bay blankets, and also sent to them 26 military overcoats, and 42 sweaters which we had on hand in the office for the relief of indigent Indians. These were only loaned until such time as the school has been re-established. I also purchased four dozen kitchen chairs and six Singer Sewing Machines, as the sisters were anxious to have these to enable them to start in making clothing for the girls as soon as they are able.

Through the kindness of the Rev. Sister Superior of St. Ann's Academy, (Sister M. Agatha), and owing to the fact that the Christmas holidays were in progress, 20 of the girls were removed from the laundry building, and housed for the night of the 24th, in the Convent in Kamloops, thus making conditions very much easier to contend with at the school until we were able to get the heat in the new building and set up beds and arrange matters before the whole staff could be transferred.

During the day of the 25th, I again transferred these 20 girls from the Convent to the new building, and they are at present comfortably housed in the new building pending the adjustment of their immediate needs.

Owing to the relief which the Department authorized me to give them, they are not suffering for the present, and are able to carry on for a short while, until I can manage to supply them with their regular cooking utensils and household furniture, but I most respectfully submit that no time be lost in having these matters attended to, in order that the school may proceed when the Christmas holidays are over, without interruption.

On the authority of Mr. Commissioner Ditchburn, I also ordered four large tables to be made for the dining room, in order that the children might be able to be served with their meals, as at the present time, there is not a table in the place. These tables, I expect, will be ready by Wednesday, the 31st inst.

The Secretary.

-3-

December 30, 1924.

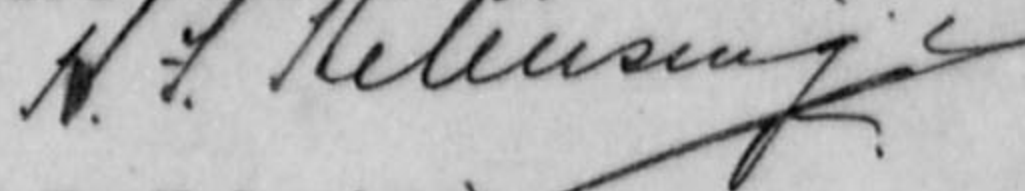

In my opinion, as well as in the opinion of Rev. Father McGuire and the Sister Superior, the fire must have originated from an overheated stove-pipe, which must have become overheated after they had retired and set fire to the ceiling above it. I can understand that this could be, as I understand there were some eleven or more stoves in the building to keep it heated, and the Department will readily see that there must have been considerable length of stovepipe feeding these stoves.

If anything further develops I will immediately communicate with you, and I trust that my actions throughout will meet with the approval of the Department.

I shall do nothing further in the way of purchasing furnishings until I hear further, and I might add that I have wired Mr. Commissioner Ditchburn stating this, and suggesting that if, convenient to him, it might be better if he could come in and see their actual wants and order the same, thus avoiding duplication.

All of which is most respectfully submitted.

Yours obediently,

(H.F. Helmsing)
Indian Agent.

DOMINION WATER POWER BRANCH

Box 429, Kamloops, B.C.

File No. 4854-K.

December 29th, 1924.

Sir:-

With reference to your letter of December 22nd. re account for installing new water main at the Kamloops Industrial School, I would state that a letter received by this Department from the Department of Indian Affairs at Ottawa dated August 30th. 1924 contained instructions for this office to call for tenders for the construction of the sewage disposal plant, and that the specifications for these tenders were to include connecting the new school building with the present water main. These instructions were carried out and tenders received from two forms, the contract being awarded to the lower, i.e. the Kamloops Plumbing and Heating Company, as follows:-

Constructing sewage disposal plant	\$2,976.00
Connecting new school with present water main	75.00
Total	<u>\$3,051.00</u>

After construction had been commenced it was found that the existing water main from the pump house to the old school, with which we intended to connect the new school building, was so badly rusted away that it was impossible to make a proper connection with it and that the whole main would have to be replaced in a short time. It was considered best, therefore, to request permission to install a complete new water main from the present pump house to the new school building instead of trying to connect with the old main. Authority to do so was received by wire from Ottawa. As the contract for constructing the sewage disposal plant and connecting the new school building with the old water main had already been entered into and work commenced, this alteration of the original plan had to be regarded as extra work covered under Sections 1 and 2, Page 3 of the original specifications submitted in my report dated March 7th, 1924.

The price (\$285.00) was fixed by this office and a deduction of \$75.00 will be made in the original contract price to offset the amount charged by the contractor in the original tender. Current prices charged for 2½" diameter W.I. galvanized water main and fittings were obtained both from Vancouver and Kamloops before the extra amount to be allowed for this work was decided by this office.

Your obedient servant,

(Sgd) E.H. Tredcroft
Division Engineer.

 1st January

The Secretary
 Department of Indian Affairs
 Ottawa

RECORDS
 JAN 8 1925

Sir.
 Bird's wing On the 14th & 15th December we had a severe snowstorm which, together with below zero weather) effectually closed down the work.

On the 19th the weather having taken a favourable turn operations were resumed only to be closed down again on the 22nd.

On the 24th I employed some of Gledhill's men no fire, this is however treated under separate letters.

On the 26th work was again resumed and has continued to present date, the weather is fairly favourable about 34°, but operations are hampered by the heavy falls of snow, approx 3-5".

All work in connection with this contract is proceeding smoothly, the Redcliffe trucks are however very disappointing as far as labour is concerned and I was obliged to refuse acceptance of a car load on 27th Dec.

Centos Porters The contractor together with Heating Oil contractor in compliance with my urgent telegram of the 24th Dec, arrived (from Vancouver) on the 26th Dec. The Heating Plant is working finely, and the stoves and have been fixed.

Fire Extraordinary work and expenditure necessitated by the fire are separately treated in another letter herewith enclosed.

Yours faithfully
 H. Macaulay

Kamloops New Indian Residential School

Report re Fire etc and Extraordinary work
necessitated thereby

Department of Indian Affairs

P. O. Box 453

Kamloops, B.C.

Ottawa,

1st January 1925

The Secretary
Department of Indian Affairs
Ottawa

Sir, The Indian Agent forwarded the Telegram etc Particulars
in General, of the Fire in the 24th Dec. Consequently I
have delayed my report until the air had cleared somewhat.

General
Information

The Fire was discovered about 12.15 am on the
Morning of the 24th Dec. it originated in the Kitchen, probably
from a defective stove or flue.

The flames spread with such rapidity that it was
possible to do ^{little} more than save the occupants, the Sisters
and Girls. Fortunately no lives were lost, but very little
clothing was saved. The Sisters & Girls were very scantily
clad indeed.

There was little or no panic, which probably accounts
for the absence of injury to the inmates.

The weather conditions were severe, 15° approx
below zero. Fortunately there was little or no wind.

The fire alarm was telephoned to the Local Fire
Brigade and seven men were rushed over, and took charge
of the fire fighting work.

Within approximately 40 minutes the roof and walling
collapsed.

Practically all work was devoted to saving the New
Buildings and the old Laundry.

Great credit is given to the Staff and Boys
(by the Local Fire Brigade) for the splendid manner in which
they behaved and worked.

The fire embraced the portion comprising the Girls
wing, including Dormitory, Dress Rooms and Recreation Rooms, the
Sisters Quarters, Father Mc Carver's Quarters including Parlour,
The Dining Room, the Kitchen, the Chapel, the Pantry, Store
Rooms, the Bakery and generally the entire main block.

A main line, electric light & power, also became

Report no 2

Continued

Department of Indian Affairs

Ottawa

192

ignited and the wiring destroyed, this was particularly unfortunate as resulting in the pump and water supply being put out of action, Every attempt was made to save this.

Bucket lines were run from the River to the Roofs of Main New Building and the detached Laundry and these Buildings were protected to such an extent that only minor injuries were sustained.

I received a message from Father McGuire shortly after 6 am (of the 24th Dec) and immediately took necessary action as follows:-

Extraordinary
work
and
Expenditure

The Contractor for the Centre or Administration Block together with the Sub Contractor for the Heating & Plumbing were at Vancouver, consequently I engaged the services of Messrs Carr and Son, (a local firm) as Sub Contractor for the Heating & Plumbing of both wings.

At 7-30 am, Mr Carr and two assistants were on their way to the School with instructions from me, to get the Heating Plant of New Building into operation.

I then telegraphed to Mr Carson and the Heating Engineer Mr Beck at Vancouver but did not get a reply until 7-30 pm & was ~~lost~~ (24th Dec)

I had asked for Mr Beck to come to Kamloops at once, the Telegrams from him, which I herewith enclose, will give you the necessary information as to general conditions.

At 9-30 am (24th Dec) thanks particularly to the splendid assistance from the Manager of Utilities Mr Moser, a Municipal Gang of wire men was dispatched to the School to renew the light and power wires, etc. By 3 pm the electric power was available, but heavy leaks thro. Pipes to Old Building kept the supply limited of water very low.

As the debris was still blowing furiously I put

Department of Indian Affairs

Ottawa, 192.....
 on three of Claydon & Coys. Men at 5 Pm, these men worked through the night keeping the flames under control as far as possible; practically no water was available so that their efforts were confined to shovelling on snow. I may add that all Father McGuire's men and boys were practically exhausted by the efforts during the night of the 23rd & 24th.

At 10 Pm 24th water was supplied to the Boilers and shortly before midnight Mr Carr had the Building comfortably warm, a gate valve proved defective and the Pump could not be started; this refers to Pump and Heating System. Mr Carr and his two helpers worked throughout the day and eventually handed over to Mr Beck on his arrival on the morning of the 26th inst.

The gate valve was replaced and the connection to the Pump changed, since then every thing has worked very satisfactorily indeed, the only complaint has been that the Building was too hot.

On the 26th I employed Mr Carr and his men to locate and lay up the water pipes to the old Main Building, the difficulty in this work was locating the pipes as the debris was still burning.

By 5 Pm 26th every thing including the water supply and Heating was in good condition.

A temporary ^{small} cooking stove was obtained on the evening of the 24th so that during the day it was possible to supply warm meals with the exception of the inconveniences arising from a total absence of furniture the inmates were quite happy and contented.

In conclusion I would add that the extraordinary expenditures for work authorized by me will comprise the following items:-

VERY

POOR-COPY

Continued.

Report on Fire

34

Department of Indian Affairs

Ottawa,

192.....

- (1) Mr. J. Carr and two men from 7am to near midnight on the 24th. all 3 men day and all the 26th.
- (2) The Municipal gang on the light & power lines on the 24th.
- (3) Messrs. Claydon & Co.³ men during the night of the 24th & 25th part 25th and part 26th.

I beg to advise that I received a Telegram from Messrs. Claydon & Co. on the 24th Dec. placing their entire organization at our disposal, I have acknowledged receipt together with an expression of appreciation.

The various amounts of the above items will be forwarded as soon as possible.

The Chief of the Local Fire Brigade, a purely volunteer organization, has requested me to suggest that an acknowledgement of their efforts by the Department, in the form of a subscription to the Brigade funds would be much appreciated. I would add that the School is practically 2 1/2 miles, by road, beyond the City limits, that the weather was so below zero, that it was necessary to hire motor cars to take the men over, as the roads ^{owing to snow} were quite impassable for fire engines and the usual fire fighting apparatus.

I would take the liberty of suggesting that a subscription of say \$50.00 would be much appreciated by the Brigade.

I would further suggest that, at least an expression of thanks from the Department be forwarded to Mr. Kelly the Foreman of the Municipal Gang, who in addition to valuable work during the day of the 24th rendered valuable

Department of Indian Affairs

Ottawa, 192.....

Assistance at the fire from 1 am to 3 am, and was
conspicuously prominent in the effort to save the light
and power line.

The Telephone has been temporarily installed in the
New Building, this item of expense would have been necessary
however, under normal conditions.

Whilst the fire is occasion for regret, it is also
a matter for congratulation, not only as far as pecuniary
considerations are concerned but in particular to the
absence of injury to the occupants of the Building.

Of something is learned from each disaster then
it is highly probable that the lesson learned from
this fire will be "The absolute necessity for the
storage of sufficient water and fire fighting
appliances such as cannot be interfered with on the
outbreak of fire."

The late supply of water was totally
inadequate. The fire fighting appliances, excepting the
small chemical fire extinguisher, were absolutely nil.

It would also seem desirable that in
the case of isolated schools, the boys should be
instructed in, and practice of, fire fighting methods.

Yours faithfully
H. Macaulay
Inspector of Construction.

Sir:

I have your letter of the 30th ultimo, being a general report on the fire which destroyed the girls' portion of the old building of the Kamloops Indian Residential School. I am pleased to note that you were able to be of much assistance, and your action throughout is approved by the Department. I have learned with satisfaction that the Reverend Sisters and the girls of the school are comfortably housed in the new building, pending an adjustment of their needs.

I note that you have telegraphed to Mr. Commissioner Ditchburn regarding the further furnishings that are required immediately, and the Department will await a communication from either his office or yourself before taking any action.

Your obedient servant,

J. D. McLEAN

J. D. McLean,

Indian School,

Kamloops, Dec. 29, 1924.

File
Dear Mr. Helmsing:-

R
To your other kindnesses after the fire could you add the extra one of requesting Miss Smith to send a copy of this letter to Inspector Pragnell, Commissioner Ditchburn, and Dr. Scott, our Deputy Superintendent General?

Fire is a good servant, but a very bad master. Everyone tried to prevent him from becoming master; but at times he comes; he comes without warning, orders people out and creates confusion. People in charge of schools must realize this fact and realize that when it comes they must put up with the trouble and inconvenience. We are no better than others: our turn has come and we must be patient under the circumstances.

The night was very cold, and the Sisters and girls escaped with very little clothing. Along you came with coats and sweaters! In the afternoon you were here to take the little girls to the Convent and to bring them back next day! In the evening there were seventy-five blankets and dishes and knives and forks and chairs; later sewing machines arrived and tables were ordered! When we see all our girls playing and singing and dancing in the new dining room without even a cold as an after effect, both the Indian people and ourselves know how to appreciate your timely action.

We do not know what other people would expect of the Agent, or his staff, or the Inspector, or Commissioner, or the Officers of the Department in such conditions, but for ourselves we are more than content, more than satisfied and we are seizing our first moment at a desk to convey to them our assurance of our contentment and satisfaction.

A fire is a time of confusion. Here the confusion is probably minimized by the fact of the Sisters and girls occupying the new administration building and continuing the school work as usual.

There is, however, a delicate position created for us at School, and we are much pleased that you saved that position by a bold stroke.- The new unit is complete but not furnished. Generally the Department furnishes a new house. But it surely ill becomes me, Agent, to rush at you at this moment and using the fire as a lever, shout: "We must have this, we cannot get along without that!" This is precisely the cry of every agent and merchant for miles around as he flaunts his wares in our face and pesters us for orders.

I would very probably be the very first to raise an outcry if anyone meddled in my business here at School. The building and furnishing of the school is not my business and I sedulously avoid offering any suggestions except when asked. Any other course just causes the Department endless trouble.

Mr. Helmsing,
Indian Agent,
CITY.

Your suggestion of calling a halt to all kinds of orders and requesting a visit from our Commissioner saves the situation beautifully! We are very thankful indeed to you for it. When he, or any other Officer, comes he will attend to his business of furnishing the school, or of saying what he will or will not purchase.- I consider this move of your excellent strategy!

We need a great many things at School, Agent, either before or after a fire. But what we need particularly just now is patience. And we intend to exercise it.

With renewed thanks to the different officers of the Department, I remain,

Very truly yours,

(Sgd) James McGuire, O.M.I.

Vancouver, B.C.

December 31, 1924.

A disastrous fire occurred on the South Thompson River, three miles from Kamloops, at 1-30 A.M. December the 24th. The old Residential school was entirely destroyed.

Only the presence and work of the Kamloops Fire Brigade which rushed to the scene of the fire, saved the new building that is partially erected.

The fire which was occasioned by an overheated stove. The power wires which connected the school with the City of Kamloops were seen burned out, and water had to be carried by hand. The Indian boys were a very big factor in saving the new Building.

There are enrolled in this school Seventy-five pupils. The fire occurred in the middle of the night when all the pupils would be sound asleep, it is a very great mercy that there were no lives lost.

This school was doing very efficient work. I hope some arrangement will be made at once so that the educational work will be carried on.

I strongly recommend the Department to consider very seriously the matter of putting Eastlake galvanized shingles on the entire roof of the new school as a preventive against fire and also protecting the electric power lines leading to the water pump as the water was lost during the recent fire owing to the power line being burnt out.

1st Jan. 1925

The Secretary
Department of Indian Affairs
Ottawa

Sir:

Transportation Allowance
Reference your letter 24th Nov. 1924 - 154-0-5

I beg to thank the Department for the allowance of \$25.00 per month covering transportation.

I have purchased a second hand Dodge car (two seater) for this work, \$550.00 being cost.

I mention this fact to explain the absence of receipts as required by your letter.

The hire of a car or taxi was far too costly. The minimum charge being \$1.25 per trip or \$2.50 per day.

My car was in use up to 13th Dec. subsequently owing to the deep snow rendering the roads impassable, except to a skillful driver, I have been compelled to hire a car.

The first of early morning of 24th necessitated 5 trips on that date, these together with two trips per day viz. taking me out in the morning & bringing me back in the evening has cost me an expenditure of \$23.50.

This amount however I regard as extraordinary and unforeseen expenditure and make no claim in connection therewith.

Yours faithfully
H. H. Macaulay

Dear Father McGuire,-

I have been looking forward to hearing from you from day to day, but I well knew how greatly you must be occupied in putting things to rights after the fire, and in getting the school on the rails again, so that I did not expect to hear from you immediately.

The Minister and I were discussing the situation the other day, and as our recollection of this building was fresh, we could appreciate what an escape you all had, and we felt very relieved to know that there had been no untoward accident or loss of life. I must congratulate you all upon the good will and kindness which overcame a difficult situation. I trust you will present to the Sisters of the convent my thanks for their temporary accommodation of the children, and I note with pleasure your statement regarding the confidence that the Indians have in yourself, the Agent and the Sisters. When you get a moment's time a little later on, I hope you will write and let me know what the arrangements are, where the children are housed, etc., etc.

Yours faithfully,

Drummond
Deputy Superintendent General.

Indian School,
Kamloops, Jan. 2, 1925.

Dear Doctor:

On Tuesday night or at one o'clock on Wednesday morning before Christmas the main building of our old house was completely destroyed by fire. It comprised the office, parlor, two dining rooms, kitchen, bakery, girls' recreation and the Sisters' community room and girls' class room on the lower floor; on the upper floor, the chapel, the Sisters' dormitory, the large and the small girls' dormitory and the washroom. The groceries, the provisions, the canned goods of tomatoes, corn and fruit, as well as the new dishes of kitchen and dining room for the new house disappeared in the flames.

The fire came as a terrible shock, which I do not care to revive by reciting too many details; in fact I have driven it as much as possible from my mind, but it did not come as a surprise. We had impressed it a thousand times on our own minds and those of the children. This proved of immense value. We worked: we did not need to think.

As I bounded from my bed and dashed for the dining room to go up and alarm the Sisters, such a bed of smoke met me that I closed at once the door again and dashed for the men and boys. They followed all at my heels and as we stood in formation to scale the gallery and bring out the Sisters and girls, we heard a key turn in the girls' recreation hall door and out stepped a large girl in her night dress followed

Indian Affairs (RG 10 Volume 6448, file 882-5, part 3)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

by all the little girls in rank and ^{with} large girls and sisters, and a cloud of smoke ^{following!} ~~with them~~. A sigh of relief went up as they assured us on their way to the class room that they were all there!

We rang in a fire alarm, emptied the office, and knowing the fire would cut our power line, recently installed between the old and the new house and stop our pump, we filled the laundry pails, some cutting a hole in the ice while others scaled the new chapel roof, and formed a bucket brigade to protect the roof and fight off, if necessary, the flames from a hundred and fifty cords of wood piled near the new building. As it was getting pretty hot for us, the heat stripping some paint and cracking some panes in the chapel windows, the City men streamed across the yard, encouraged us with strong hands and turned the dubious battle in our favor.

As the front wall caved in, the heat fell on the brick wall of the chapel and eliminated danger from the roof. Meanwhile the girls' class room was well under way of destruction, but as danger for the new building was past, we directed our attention to the laundry. Wet blankets were used, snow and water applied, and shortly after the roof of the class room fell in, a few strong hands pushed in the burning wall and held the fire in check.

How the fire started we do not know. You re-

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

member how I begged of you to build one unit. The idea was to have one building where the water would not freeze, and from that one supply warm water to the bays and laundry. The bugbear was not merely the work of thawing out pipes; it was the danger, especially in the kitchen and boys' house. If hot water were used, it fell on the ground or sawdust and freezing itself increased the difficulty next time; if a blow torch or paper was used there was danger of fire. I generally aided in the kitchen myself. I did so that morning. - The weather was very cold and in the evening the children had put a little too much fire in the bakery. Sister was sitting up watching it at nine when I went in to bring some wood for my own stove. I requested her to retire saying I would look at it after finishing my office. I did so about ten: the fire in the stove was practically out. - Now did the Trade Instructor and I start a fire in the wall and it remained hidden all day? Or was it a defective pipe or flue, or a spark from some stove or chimney? We do not know.

Permit me a remark or two for your own consumption. - Next day the Agent and I were looking at the chapel roof. "Say, it certainly cleared the snow off, didn't it?" "Yes, indeed, I was afraid it was going to clear the roof too!" "You're lucky; if it had been in dry weather, the whole thing might have gone. It may be a blessing that it went just at this time." I answered with a non-committal: "Well!" These

Indian Affairs (RG 10 Volume 6448, file 882-5, part 3)

**PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA**

VERY

POOR COPY

words of course are not exact: they may not even be fair. Probably the Agent used them only to cheer me. However, Doctor, had you been standing in my place and seen the snow disappear from the roof, and on that cold night beheld the steam rise in a cloud after the snow and water, and known the dryness of roofs in summer ^{here} as we know them; had you thought and said a dozen times to your staff as we have said: "If that old house takes fire, how in the world will we ever save our new house?" and had them shake their heads and answer: "Impossible, Father, as soon as you are out of it, tear it down", you would have felt the full force of Mr. Helmings' words. I have never said this, I am not saying it to others, but I do feel that you should know it.

A lesson of this kind emphasized the necessity of training children to stand in rank and to call for missing units before starting. The girls lined up immediately; the names of two very small girls were called out: they were picked out of bed by two big girls in a jiffy and the line started as quietly and orderly as usual!

There are schools here in B.C. with better buildings and better equipment than ours; they took just as much pains and taught just as well as we. But through no fault of theirs they lost a child through fire, flu or small pox..... Then their trouble with their school began with these poor people. - The day after the fire the

Indian Agent and Mr. Barber were along with sweaters and great coats helping the Sisters to bundle up the little girls in the laundry and pack them off to the Convent. We were busy trying to bring water into the new house. Several Indian people were standing around. I could hear them. "We'll ask the Father to take our girls home!" "Leave those people alone, don't you think they can take care of the children!" "That's right!" And comments on the fire followed. - They bothered none of us for their children: they mixed up laughing and talking with the Sisters and Agent and Mr. Barber and children. - Now, Doctor, this is worth something. It was plain to see then and since that their confidence in the Agent, the Sisters and Father is increased, not diminished. This is a great blessing. We noted with much pleasure that both you and Commissioner Ditchburn commented on the fact of us having lost no children.

Yours very truly,

James McGuire O.M.S.

Kamloops New Indian Residential School
Report Jan 1st to Jan 15th
Department of Indian Affairs
P. O. Box 453
Kamloops B.C.
Ottawa, 16th January 1925
The Secretary
Department of Indian Affairs
Ottawa

Sir. I beg to report as follows:—

Girls' Wing. Work was carried on from Jan 1st to 13th inst on which date work was suspended owing to unfavourable weather. Prior thereto, work was possible though difficult, the temperature was about 30° average but the unusually heavy falls of snow had made the roads almost impassable rendering transportation of materials impossible.

Bricks. We have had very considerable trouble with the Redcliffe facing bricks owing to the defective colour and I was obliged to condemn as unfit another car load on the 6th inst.

The Manager from Redcliffe arrived in Kamloops on the 12th inst and expressed regret at the inconvenience caused; He readily admitted that the bricks condemned were unsuitable and made arrangements for the disposal of same elsewhere. I have to express my satisfaction with the fairness and spirit of co-operation in which this gentleman treated this matter.

Today new samples have arrived, some are much more satisfactory.

Yours faithfully

Certificate of Completion of Construction
re
Sewage Disposal Plant
at
Kamloops Industrial School,
Kamloops, B. C.

January 22nd. 1925.

I, the undersigned do hereby certify that the supply of material for and work in connection with the installation of a sewage disposal plant for the Kamloops Industrial School has been carried out by the Kamloops Plumbing and Heating Company in accordance with plans and specifications accompanying my report dated March 7th. 1924; and that the Kamloops Plumbing and Heating Company has fulfilled its contract inasmuch as they have supplied all the material for and carried out all work in this connection with the following exceptions :

Work remaining to be done-

Installation of 24 lin.ft. 6" diameter
vitrified sewer pipe,
Construction of 2 concrete inspection
chambers 4' x 4' x 6';

and that this uncompleted portion of the work cannot be carried out until construction of the new school building is further advanced.

COMPLETED WORK

I hereby certify that all material supplied by the Kamloops Plumbing and Heating Company and used in the construction of the above sewage disposal plant was of good quality and conformed in all respects to the requirements laid down in the specifications accompanying my report dated March 7th. 1924; and that all work undertaken by them or carried out on their behalf was performed in a neat and workmanlike manner, for which they are, in my opinion, entitled to payment.

INDIAN OFFICE

Kamloops, B.C.,
At

R

January 30, 1925. 19.....

Sir:-

I have the honour to submit herewith voucher 43-25 in favour of Kamloops Plumbing & Heating Co., Kamloops, in the sum of \$2,885.00, to cover the value of material supplied and work carried out up to and including January 22, 1925, on the sewage disposal plant at the Kamloops Industrial School, as per plans and specifications prepared by the Dominion Water Power Branch, Kamloops, B.C.

In this regard, I beg to draw your attention to the fact that Mr. E.H. Tredcroft, Division Engineer of the Dominion Water Power Branch, Kamloops, called on me the other day, and drew my attention to the fact that the Kamloops Plumbing and Heating Co., had completed the work as far as they could go until the new school buildings are completed. As stated above, the amount due the Kamloops Plumbing and Heating Co., for material supplied and work carried out up to January 22nd., 1925, is \$2,885.00, as per attached statement, which has been certified correct by Mr. Tredcroft himself.

Mr. Tredcroft requests that the Department pay this amount, as it does not appear to be reasonable to expect the Kamloops Plumbing & Heating Co., to wait for so large an amount until the whole school is completed, as there only remains the amount of \$400.00 to complete the whole contract price, and it is possible that the buildings may not be completed for some eighteen months or more.

I would therefore respectfully submit that the Department honour this account in the sum mentioned.

Yours obediently,

(H.F. Helmsing)
Indian Agent.

R

Sir

Herewith I enclose two Accounts, certified by me as correct.

The labour and materials covered by these Accounts were necessitated by the recent fire, all as per my previous report.

The amount to Messrs. Claydon Company was for labour only, during the night of Dec. 24th and 25th and Xmas Day. The debris was still burning and almost continually bursting into flames, and as the supply of water was limited, it resolved itself into a question of shovelling on snow and keeping guard generally.

The amount due to Messrs. Carr & Son covers two items, 1st Work in Boiler Room and Heating Plant generally, necessary to operate the Heating System. This I have charged to the Heating Contractor (under Mr. Carson's Contract) who was at that time in Vancouver and from whom this amount of \$29.00 will be collected. He admits that this is a fair charge against him.

2nd Labour and Materials covering the reinstatement of the water supply systems both to the New and Old Buildings but chiefly the latter.

The time charged may at first appear excessive but when one considers that practically all this work was in the open, with a temperature well below zero the difficulty may be readily appreciated.

I do not think that any of this

Sir,-

File
I am in receipt of your letter of the 30th ultimo together with a statement of account for the construction of a sewage disposal plant at the Kamloops Industrial School, as carried out under the supervision of the Dominion Water Power Branch, Kamloops, B.C.

I note in this statement that there is an item mentioned amounting to \$412.50 for additional excavation in order to lower the sewer pipe to a depth of 4'6" instead of 18", as called for in the original specification. Before giving this statement any consideration, I would like to be advised upon whose authority this change was made also that of the concrete inspection chambers.

Your obedient servant,

J. D. McLean

R

Sir.

Report 31st January.

From the 15th to the 31st January work has been
pushed ahead as far as weather condition would permit,
the temperature has hung around 32°, the chief difficulty
being the excessive snow fall, making the question of
transportation extremely difficult.

Work has proceeded fairly satisfactory in
spite of great inconvenience and disappointment re
pressed bricks; during the past few days contractors
have switched over to Clayburn bricks with much
more satisfactory results.

Enclosed herewith are few snapshots taken
on the 15th Jan

At present the walls at Southern portion
are up to full height, roof plate level and, subject
to reasonably good weather all walls will be at
a similar height about the 7th inst.

Central Portion I have completed the question of additions
and deductions same will be embodied in a report
I expect to forward in the course of a few days.

Sirs I am enclosing, in letter tomorrow, two small
accounts, under the heading of Extraordinary Expenditure
such being necessitated by the late fire
Yours faithfully

The Secretary
Department of Indian Affairs
Ottawa

R

Very Dear Sir,
I enclose

- (a) Certificate No 8 in favour of Mr. John Carson
- (b) Statement of Expenditure & Deductions
- (c) General Statement for your information

In connection with this contract I beg to state that Mr. Carson requests that, in addition to the amount for which I enclose certificate, that the 10% deduction allowance, or the amount of his deposit be now paid to him.

Two points may be regarded as salient features viz. (a) The work covered by this contract is not complete (b) The Department, owing to the fire, has been compelled to take possession of the Building

Two other points emanate therefrom

(c) Most of the work required to complete will have to await favourable weather

(d) From the above points point of view it would be a very decided advantage to hold back the unfinished work on the Centre Building until the "Girls" can be transferred to their new Permanent Quarters in the Girls' Wing, which should be finished early in May next.

These points are suggested for your consideration & decision

Yours faithfully
H. Macaulay
Inspector of Construction.

Dear Sir:

We have been advised from Kamloops that a certificate entitling us to a payment of \$6,516.00 was mailed to the Department on the 18th inst.

We have special reasons for using this payment before the end of the month, may we ask your kind co-operation in having same wired to our credit as quickly as possible.

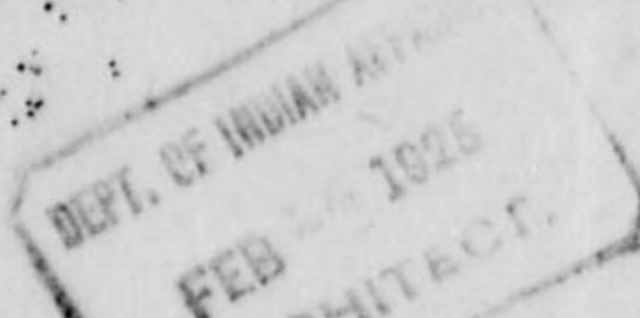

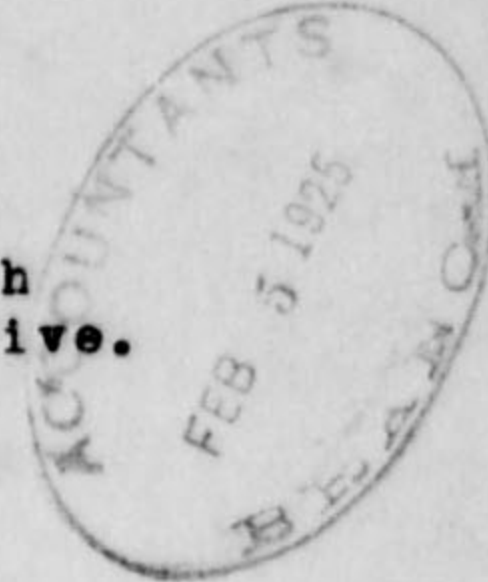

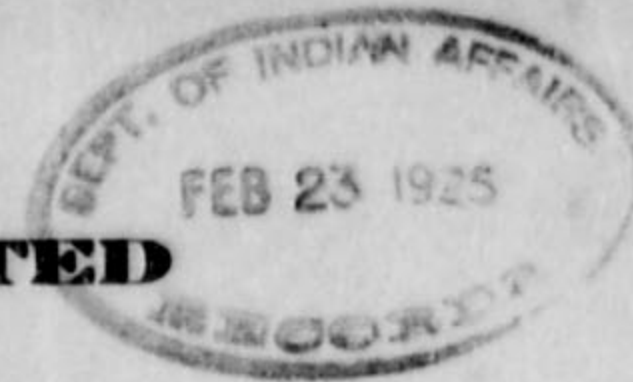

We have recently taken on other work and have now over \$25,000.00 deposited on contracts. We wished to conclude our fiscal year January 31st but circumstances and the objection of the Income Tax Department to the altering of our year from February 28th to January 31st prevented us doing so. So that our year will end February 28th instead of on January 31st as we had hoped.

We have been very gratified at the readiness of the Department to co-operate with us on similar occasions in the past, and trust your Department can meet our wishes without inconvenience.

Yours very truly,

E. Claydon

Ottawa, 17th February 1925

The Secretary
Department of Indian Affairs
Ottawa

Sir. For the period from Feb. 1st to the 15th
I beg to report as follows:-

Work on the above Building has been steadily
pushed forward in a fairly satisfactory manner;
the weather, whilst at times disagreeable, has not
been sufficiently severe to justify a suspension
of operations.

The main walls are now complete and the
roof is under operation; the next few days
will see the roof ready for shingles.

The Plumbing and Heating Contractor
commenced work on the 16th inst and is progressing
favorably.

In connection with this Trade several
little difficulties have cropped up, in reference
to these however I am communicating with
the Department under a separate letter.

Herewith I enclose certificates No. 4 in
favor of The Claydon Company Ltd. Contractors.

Yours faithfully
W. H. Macaulay

Ottawa, February 24th., 1925.

Dear Sirs,-

In reply to your letter of the 20th instant, respecting your security deposit, I beg to say that the Finance Department refuses to decrease the original deposit of \$8,000.00 to \$7620.00 unless the Department obtains an Order-in-Council, as it is contrary to regulations to do so, and the Department does not care to go to this length for such a small amount and it was thought that you would not insist when it was explained to you. I may say that this explanation was given the Manager of the Dominion Bank here and it was expected that he would have passed it on to you but seemingly did not.

As to the Interest on the Bond the Finance Department pointed out that it is not due until 1st May and therefore in the meantime cannot be regarded as part of the security deposit.

Yours truly,

F.H. Paget
Chief Accountant.

February twentieth
Nineteen-twenty-five.

Dear Sir:

Re Security Deposit on Kamloops contract.

The Dominion Bank inform us that you have given them a cheque for \$7500.00 in exchange for the Victory Bonds of equal value. Kindly accept our thanks for the prompt action.

Our letter of the 10th inst., explains that accrued interest to date on coupons amounted to about \$120.00 which added to Bonds would make security deposit fully 10% of our contract of \$76,200.00. In addition to accrued interest on Bonds the Department has the accrued interest on deposit cheque being 3% on \$8000.00 from say October 1st to January 31st \$80.00, so we think all conditions necessary to ensure the return to us of the \$8000.00 asked for in our letter of the 10th inst. have been filled.

If there are other reasons for retaining the exact amount required (\$7,620.00) in stead of depending on accrued interest will you kindly deduct a further \$120.00 from the \$500.00 you have on hand, and send us a cheque for \$380.00. Our deposit on the Kamloops contract will then be Bonds \$7500.00 cash \$120.00 Total \$7620.00 exactly 10% of our contract of \$76200.00.

Yours very truly,

E. Claydon

February 20, 1925.

Memorandum,-

Mr. Pratt.

Incls.

I beg to return herewith the letter of the 9th instant, from Mrs. W. S. McDonald, of Vancouver, regarding the balance due her sons, who were sub-contractors to Mr. Carson for the supplying and setting of the granite for the first unit of the Kamloops industrial school, and to say that I am inclosing herewith a copy of memorandum from the Architect of this Department, who was in British Columbia when this building was being erected; a copy of my letter to Mrs. McDonald, this being the one to which she refers in the communication herewith returned, and also a copy of the report of our Inspector of Construction, with reference to the granite supplied by Messrs. McDonald.

429
Under the circumstances, I think it better to send these papers, rather than to draft a letter for the Minister's signature.

It will be impossible for us to pay the balance due Messrs. McDonald Brothers until the defective granite has been replaced to the satisfaction of our Inspector of Construction.

ED
The use of granite in the trimmings of this building was specified at the special request of Mr. McBride, M.P.

Duncan Scott
3 Deputy Superintendent General.

R

Dear Sir:-

I enclose herewith \$7,500. Victory Bonds 1934 Maturity as follows:-

✓ T.B. 11641 - 1 at \$500.	\$500.
✓ B. 19721 - 1	
✓ 24969 - 70	
✓ 473370 7 at \$1,000.	7,000.
✓ 473372	
✓ 491925	
✓ 500357	
	<u>\$ 7,500.</u>

We would be obliged if you would give us a cheque for \$5,000. representing deposit of Claydon Co. Limited regarding contract for erection of Girls' Building at the Indian Residential School, Kamloops, B.C. The above bonds to replace the cheque you will give us. We understand the contract amounts to \$76,200. and 25% of this amount would accordingly be \$19,050. while the par value of the bonds are \$7,500. I would like to point out to you that the accrued interest on these bonds to date amounts to more than the difference.

Ottawa, March 6, 1925.

Sir,-

J.H.
I am in receipt of your letter of the 23rd ultimo with copy of letter from Mr. Frederoff, asking that authority be given him to carry out some minor changes in the installation of the sewage disposal system for the Kamloops School, without first referring the matter to this Department.

J.H.
In reply I beg to say that you may advise the divisional engineer that the Department has no objection to acceding to his request providing such changes will be of a minor character and inexpensive, otherwise it would be advisable that the matter be first referred to the Department for approval.

Your obedient servant,

A. F. McKenzie.
(Acting) Asst. Deputy & Secretary.

February 23, 1925. 19

Sir:-

Referring to Departmental letter, without file number, under date of February 10th, 1925, regarding the construction of the sewage disposal plant at the Kamloops Industrial School, I beg to attach herewith, copy of letter this day received from Mr. E.H. Tredcroft, Division Engineer, Dominion Water Power Branch, Kamloops, B.C., which is self explanatory.

With reference to the last paragraph of Mr. Tredcroft's letter, I most respectfully submit that the Water Power Branch might be given a little more freedom with reference to making minor alterations and changes as might become necessary when doing any work of this nature, without having to hold up the work while authority is obtained from the Department at Ottawa, as suggested by Mr. Tredcroft, and I will be glad to have your instructions in this matter.

Yours obediently,

(H.F. Helmsing)
Indian Agent.

DOMINION WATER POWER BRANCH

Box 429, Kamloops, B.C.

File No. 4854-K.

February 19th, 1925.

Sir:-

I am in receipt of your letter of February 16th, having reference to extra expenditures on the Kamloops Industrial School sewage disposal plant, and would state that the decision to install the 4" land tile at a depth of 4' instead of 1' 6" was made by this office after excavation of the ground had been commenced and the nature of the soil at various depths determined.

A letter re my intentions in this matter and requesting authority for same was forwarded on October 14th. by my head office at Vancouver to the Director of Water Power and Reclamation Services at Ottawa. The letter was duly acknowledged, authority from the Department of Indian Affairs for these changes, I presume, having been obtained.

With reference to the charge of \$160.00 for the installation of two concrete inspection chambers which were not included in the original plan, these have not yet been installed, and though their installation is not absolutely essential, they would, in my opinion, greatly minimize the danger of any stoppage occurring in the pipes. Their construction, however, cannot be undertaken until the school building is further advanced.

No requisition for authority re these inspection chambers has yet been made, but requisition re this matter stating the reasons that make their installation desirable will be forwarded in the course of a few days.

I would like to draw your attention to the fact that the new school building is being constructed in three sections, and although only one section is completed it is already occupied. This necessitated the sewage disposal plant being designed, constructed and made ready for use when the building was only one-third completed. Under these conditions, minor changes may be necessary from time to time in order to conform with the completed structure.

I think it would be a good thing in future if in work of this nature I were given authority to make such minor changes as might be necessary without referring the matter to Ottawa at the time, as it is often impossible to cease work and wait while this authority is being obtained, provided, of course, that these changes do not increase the cost of the project beyond the original estimate that has already been approved.

Your obedient servant,

(Sgd) E.H. Tredcroft,
Division Engineer.

CHW/MB.

Sir,-

Re Sewage Disposal Plant.
Kamloops Industrial School.

With reference to the construction of the Kamloops Industrial School sewage disposal plant, this work has now been completed in so far as it is possible, until the school building is further advanced. There remains yet to be installed two outside lines of sewer pipe, having a total length of 240 feet, to connect the two wings with the present inspection chamber.

Each of these outside sewer lines will be 120 feet in length and buried beneath the surface of the ground in front of the building at a depth of approximately 10 feet.

It is recommended that an extra inspection chamber be placed on each of these sewer lines close to the buildings, as shown by the accompanying plan (in duplicate). This will permit the cleaning out of the pipes should anything happen to cause a stoppage in either one of them. The two inner ones are not so long and do not require any additional provision for cleaning. The cost of the inspection chambers will amount to \$90.00 each, or a total of \$180.00.

The total expenditure on this plant, including the above mentioned additions, will be \$3,285, whereas the original estimate was for \$3,700.

Your obedient servant,

C.E. Webb

MEMO.

Dear Doctor:

Water for the old house as well as for the present unit of the new house has been supplied by an electric motor pumping into a pneumatic tank of fifteen hundred gallons capacity. This pump of course gives very little pressure for fire protection, but otherwise it has been very satisfactory indeed.

It would be well for us to bear in mind, however, that it would prove quite inadequate for the present unit and the new wing, which, according to present indications, will be ready for occupation about June. This wing will call for a much greater supply as it contains ^{both} the laundry and girls' lavatories.

Yours very truly,

Doctor D. C. Scott,

James McGuire O.M.S.

Sir,

Re: Sewage Disposal Plant -
Kamloops Industrial School.

Encl.

I enclose herewith copy of a letter which has been received from our Acting District Chief Engineer at Vancouver, with reference to the work which has been done in connection with the construction of the sewage disposal plant at Kamloops Industrial School.

You will note that recommendation is made that an extra inspection chamber be placed on each of the outside sewer lines close to the buildings, as shown by the blue print which accompanies this letter. I shall be glad to have your authority for the construction of these inspection chambers in accordance with Mr. Webb's recommendation.

Sir. "Girls Wing"

From the 15th to the 20th February I have to report all work has been conducted in a satisfactory manner, the weather has been somewhat erratic and unsatisfactory but not sufficiently so to cause a cessation of Building Operations.

The Roof is now ready for the Shingles consequently he shall soon be protected from weather changes. The Heating & Plumbing Contractor is pushing ahead with his work all roughing in being well in hand. The Electrician is making satisfactory progress in his trade, the conduit for the main circuits etc ~~are~~ is being satisfactorily installed.

There are a few points which will form a separate report, generally however the Building is proceeding in a fairly satisfactory manner

Yours faithfully
R. Macaulay

Kamloops B.
22nd Jan 1925

R. Isherby Esq
Architect
Department of Indian Affairs
Ottawa

Dear Mr. Orr.

"Kamloops New Indian Residential School"

I very much regret that we are having a great deal of trouble with the eaves gutters on both the main Roof and Chapel and I thought it would be advisable to communicate with you personally. Main Roof This box gutter filled up with solid ice and burst the seams, the downpipes became frozen, solid, the result of intermittent frost and thaw; consequently the water poured down the face of the external walling and quickly formed a coating of ice on face of brickwork, in places 3" thick; in addition to this a very considerable amount of water came through the wall at the plate level and damaged the plaster, the two worst places being top floor (west wall) and top floor N.E. part wall.

The defect is, however, general on all four sides of the Building, the two positions mentioned above having suffered most, as far as the interior of the Building is concerned.

I discussed, in a general way, this question during your visit to Kamloops and would now very strongly urge that the Detail be changed as far as the Girls wing is concerned, without doubt this, the present, method can only produce most unfortunate results leading to vexatious complaints every winter.

From 15 years local experience I have found it absolutely necessary to discard both eaves gutters and downpipes, that the most satisfactory job is to bring the eaves at least 2'-0" beyond the face of the Brickwork (or shingled wall as the case may be,) and let them drip; a layer of roofing felt along the lower edge of roofing, immediately under shingles or gal iron, usually affords sufficient protection against backing up of water during winter.

In this, the dry belt, the rains during Spring and Summer and Autumn are quite negligible.

The enclosed sketch is a suggestion, for your consideration, and shows a treatment which will, I think, give satisfactory results without interference with the appearance of the general design. This method does away with both box gutter and downpipes, consequently is very much cheaper.

I am some what at a loss as to a permanent remedy for the existing Box gutters and should be pleased to learn what you would have me do, I am getting them made good as far as possible but whilst

Indian Affairs (RG 10 Volume 6448, file 882-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

They will be OK during the Spring & Summer, the winter next year will undoubtedly cause us a repetition of the troubles.

Chapel Roof In this case the downpipes and gutters filled with solid ice and burst every joint, in places even forced the gutter away from the fascia.

Fortunately very little water found its way into the Building and this all at plate level; it may be necessary to make good to plaster at this level.

The East and West walls were however externally a mass of solid ice, in places of considerable thickness, I employed three of Messrs. Claydon's men for the greater part of three days in clearing gutters and snow off the roof. The extent of the damage to these walls is of course difficult to see but must be considerable.

In the Empress Theatre here we have a roof treated in a similar manner to the Chapel Roof and every winter we get the same result, external walls a mass of ice and men employed keeping the roof clear of snow.

In this case of the Chapel I would strongly urge an immediate change and give this roof a projection of 2'-0". This can very readily be done by removing the Buttress caps and carrying up the Buttrusses to the level of present bottom of gutter (about eight courses) the eaves can then be treated somewhat as at present with the fascia being approximately fixed on face of Buttrusses, discard the gutter and fix corresponding wood moulds: this mould would be at the same level as existing gutter and the roofing iron at eaves would be curved slightly from the shingles downward, a treatment similar to that suggested on sketch for the roof of Girls' wing, but rather more curve to the iron.

There is little doubt that the fire on the 21st Dec. very materially aggravated matters on the West wall, where some minor repairs have been necessitated thereby.

As mentioned in my reports "regrettable" the granite caps to Buttrusses are improperly set and will have to come off, and whilst the change I suggest will give a treatment somewhat different to the existing appearance, it will look fairly good (I treated the Catholic Church here in the same way three years ago and it gives absolutely no trouble).

The cost of this alteration need not be very considerable, but at the same time I am aware that owing to the extra re-bricks and other changes this Building will cost more than was anticipated; with this fact in mind I am sending you a copy

of the final statement showing ~~exactly~~ how matters stand from a financial point of view, one or two matters are still under discussion but I do not expect any addition, but rather a slight deduction, the formal statement will be forwarded to the Department in the course of a few days.

On the other hand if you decide to make the suggested change on the Girls wing gutting, the saving thereby should be sufficient, or nearly so, to make the necessary change to Chapel Roof.

We shall be up at roof level on Girls wing in about ten days (weather permitting) consequently I should be glad to receive your decision as to Girls Wing Cases as soon as possible, per telegram preferred.

Mr Jennings the Foreman in charge for Messrs Clayton (he was also at Cardston) is pushing the Girls wing at a good rate, and with the exception of our difficulty with the pressed bricks, everything is going smoothly; he is I may say very anxious for a change of detail for the cases treatment.

I expect to send you a few photos in the course of the next few days.

Under separate letter I am writing to you re the Dining Room Partition etc. I have taken the liberty of holding back this work for reasons I will explain in my letter.

The weather continues fairly mild, from 30° to 36° during the day to 26° to 30° at night, transportation is however greatly hampered by the excessive amount of snow still on the ground.

With kind regards and good wishes for the New Year,

Yours faithfully
W. Macaulay.

P.S. Please advise me as soon
as possible. W.M.

Kamloops, B.C.
At

March 9, 1925

Sir:-

I beg to submit the following report most respectfully,
for your approval.

While visiting the Kamloops Indian Residential School on the Kamloops Indian Reserve recently, Rev. James McGuire, O.P.M.I. drew to my attention the fact that the front door of the School is exposed to the sun from early morning until late in the afternoon the year round. He is afraid that once summer is here, the heat from the sun, which in this district is very severe for at least two months in the summer, will completely destroy the front door of the school, and made a request that I approach the Department with regard to having an awning placed to protect the door from the rays of the sun.

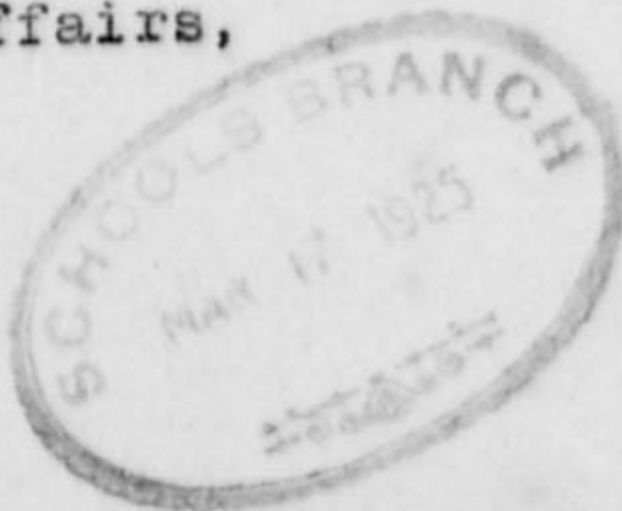

I strongly recommend action along these lines being taken, and if I may be permitted, I would suggest that the Department approach Mr. MacAulay, the Building Inspector in charge of the erection of the school, with regard to having an awning placed before the heat of the sun has destroyed the door in question.

Yours obediently,

(H.F. Helmsing)
Indian Agent.

DOMINION WATER POWER AND RECLAMATION SERVICE

PLEASE REFER TO ONE SUBJECT IN A
LETTER, AND IN YOUR REPLY QUOTE

OTTAWA, ONT. March 30, 1925.

Sir,

Re: Kamloops Indian Residential School.

I have received your letter of the 26th instant with reference to the necessity for an increase of water supply to serve the addition now being made to the Kamloops Indian Residential School at Kamloops, B.C., and have asked our Acting District Chief Engineer at Vancouver to have a report prepared as to the work which will be required to provide an adequate water supply system for the new wing, with an alternative report on the system which would provide reliable fire protection for the existing building as well as for the new wing.

If you will refer to the report prepared by Mr. Tredcroft on the existing water supply system, which is dated March 7, 1921, the danger from an outbreak of fire is emphasized and the recommendation is made that four hydrants should be installed for fire protection, so it is advisable that the report which you now asked to have prepared should consider the question of fire protection for the old structure.

Your obedient servant,

J. T. Johnston,
Acting Director,
Water Power and Reclamation.

March 24th. 1925.

Dear Mr. McBride,

R

I have your letter of yesterday's date with enclosure from Rev. James McGuire with reference to the erection of a boys' wing in connection with the Kamloops industrial school.

I am sorry that funds are not available to carry out this work during the coming season.

We very much regret the fire and the temporary inconvenience to which the Management has been put, but our allotment of funds was made before this untoward event.

Yours very truly,

Duncan Campbell
Deputy Superintendent General.

OTTAWA.

Dear Mr. Scott:-

You will please find enclosed a communication I received from the Rev. James McGuire, who is in charge of the Indian School at Kamloops. This communication speaks for itself.

Would you please let me know if it is the intention of your Department to proceed with the third wing of the building during the coming summer.

Yours truly,

W. A. G. B. B. B.

Indian School,
Kamloops, B.C.

Mr. T.G. McBride, M.P.
House of Commons,
OTTAWA.

Dear Mr. McBride:-

The centre unit of our new school is practically complete. We have been occupying it since the fire. It is the Administration Building. It contained the office and parlors, and has besides the kitchen, diningroom, chapel and infirmaries.

At the present rate of speed the girls' wing will be finished by June. Naturally we are wondering whether or not the boys' wing will go up this year, and this the more because the main building of our old house being burned, we are unable to use it for the boys as we intended.

If you could let me know what to expect I would be much obliged indeed.

Yours very truly,

James McGuire. O.M.I.

S. H. McLean

Sir. I beg to report that the construction of the above mentioned Building has proceeded satisfactorily during the period of from 1st to 15th March.

The weather has been dull but favourable. Consequently all trades, except Masons, have been actively employed; the Masonry is practically complete excepting of course the concrete floors.

The Carpenter work is proceeding satisfactorily and most of shingles to roof are fixed, the gables etc are being fixed.

The Heating & Plumbing is proceeding satisfactorily and both trades are up to date.

The Electrical work is proceeding satisfactorily. Most of the conduit is now in position.

We had a visit on Thursday last from Mr. McIsaac, the Provincial Electrician who inspected the layout etc. He was satisfied with everything except the lack of provision for a fire alarm system. He promised to submit particulars of requirements, on receipt of same I will forward for your consideration.

Yours faithfully
S. H. McLean

Kamloops.

Dear Sir:

Re New INDIAN RESIDENTIAL SCHOOL, (GIRLS' Wing).

"A"
With regard to Cove Base in Basement under Wood Base, we cannot find any mention of such Cove in rooms where Terrazzo or Cement Floor is specified, and this item was not taken into consideration in our sub-contractors' tender.

"B"
This is also the case in regard to Mastic Floors, as there is no mention of such in Mastic Floor specifications.

In our opinion it would be proper to have this work considered as an extra.

Faithfully yours,

CLAYDON COMPANY, LIMITED,

a jennings

Sir.

R

Herewith I enclose a letter received from the Contractors for this wing of Building.

In reference to item "A" I cannot see where this Cove finish can be insisted upon, at the same time I think it would be advisable to have a Tile Cove to Terrazzo floors.

Referring to "B," this Cove is clearly covered by Clause 32 Page 37 and Clause 5 Page 4 and the instruction on Page 1. to visit the Site and fully inform themselves as to all existing conditions.

Personally I should like to see the Mastic Cove idea scrapped, and ordinary tile Cove, not necessarily white, substituted therefor.

Will you please favour me with a decision at your convenience.

Yours faithfully
H. H. Macaulay

"Progress Report" Midway

Department of Indian Affairs

P. O. Box 453

Ottawa

Hampden, N.S.

15th April

1925

The Secretary
Department of Indian Affairs
Ottawa

Sir,

I beg to report that progress during the past two weeks has been good and the work is being pushed ahead smoothly and satisfactorily.

Plastering It is pleasing to report that the plastering is being handled in a workmanlike manner and I have every hope of being able to eventually report a really good job - quite exceptional in this District. The two upper floors have received brown coat and the putty coat to attic will be commenced tomorrow.

Carpenters The majority of the carpenters have been temporarily laid off pending completion of plastering.

Heating & Plumbing The work under these trades is proceeding satisfactorily.

Finishing Work under this trade is good, the metal ceilings are being fixed in a workmanlike manner and I feel sure that the result will be a very satisfactory one.

Carpeting The carpeting floors with the exception of Laundry are now complete.

Laundry The machinery has been set out and will be set in position in the course of a day or so.

Painting This work is proceeding satisfactorily. Cleaning Room is being attended to, when same is complete I propose forwarding photos to the Department.

Yours faithfully

W. C. Macaulay

Sir. For the period of fifteen days from 15th to 31st March I beg to report that the building operations have been in every way favourable.

Masonry. The internal concrete floors are now being laid in the Basement floor and the Landry is being prepared for the Laundry Machinery which recently arrived.

Carpenter This trade is well advanced the roof trussing is complete and ready for staining, gables etc are nearing completion for Plasterer and Ship-lap Ceilings ready for metal ceilings.

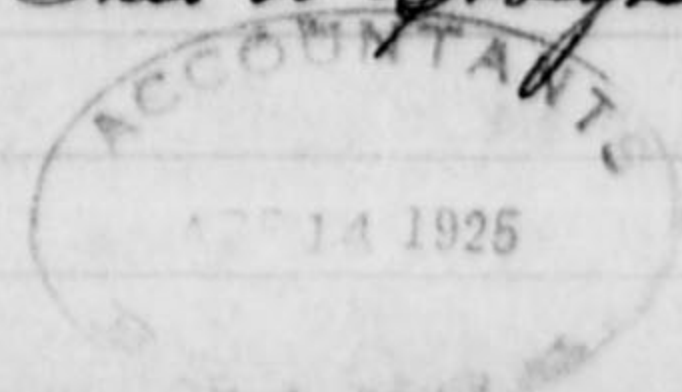

Electrician. All this work is well advanced and practically all the conduit is now in place.

Heating & Plumbing This work is also well advanced and the roughing in is practically complete.

Plasterer The Subcontractor arrived on the 1st April and is now busy preparing for plastering, the metal lath is in place and I am hoping that this work will be completed whilst the weather is so very favourable.

Painting This is progressing favourably.

Yours faithfully

Recd

May 5, 1925.

Dear Mr. Macaulay,-

With reference to the contract for the first unit of the Kamloops School, I wish to make the final payment on this contract as soon as possible. This payment is being held up owing to the unsatisfactory condition of some of the granite furnished under this contract.

With a view to coming to some agreement I would ask you to arrange for a meeting at the building between yourself, Mr. Carson, the contractor and the representative of the firm who furnished the granite, and endeavour to reach a settlement. I am prepared to accept the granite that has been built into the building providing you can come to a reasonable settlement as to its value. If this can be done and the balance of the work has been satisfactorily completed, kindly forward at the earliest possible date a final certificate for the payment of Mr. Carson's contract. If, however, you cannot reach a settlement you should issue a certificate for all of the money due to Mr. Carson, holding back an amount to cover the defective granite, and furnish me with a report of the meeting. I am extremely anxious that if at all possible you will arrange a satisfactory settlement.

Kindly give this matter your immediate attention.

Yours very truly,

D. C. Brown
Deputy Superintendent General.

MEMO.

Mr. Dear Doctor:

Apparently we cannot have the boys' wing this year. Let us at least put our present house in order. We have tried to be patient and not to annoy you after the fire. Could we ask you to aid us during May in the following manner?

- I For the present unit could you request the Architect, Mr. Orr, to have Mr. Macaulay put in the partition in the dining room, the shelving and bins in the provision room and the shelving in the scullery or servery as well as the sink and boards for washing dishes in the scullery? It would be most desirable if the last coat of varnish on the first floor could be applied also before June.
- II. For the girls' wing could you oblige us by furnishing the beds, blankets, desks, washbasins and furniture for the staff room?

CLAYDON COMPANY, LIMITED

GENERAL CONTRACTORS AND BUILDERS

IMPERIAL BANK BUILDING

WINNIPEG, MAN.

April 14th 1925.

TELEGRAMS:
CLAYDON, WINNIPEG
TELEPHONE A 3509

Dear Mr. Orr:-

Your undated letter in reply to ours of the 20th ultimo was received here several days ago.

Since receiving your letter we have given further study to the problems involved and correspondence, and have taken matters up with our sub-contractors to see if there is any way we could prevail on them to accept any responsibility regarding base.

We have had to admit, however, on a full discussion of specifications and drawings, and after laying the matter before competent authority in Winnipeg, that we have absolutely no ground for demanding that base, either asphalt, terrazzo or cement, be supplied.

In addition to the above we were actuated in trying to do all we reasonably could to relieve the situation, but a further review of this feature of it brings us to the conclusion that we have already gone the other mile.

The Kamloops work has been full of difficulties. The weather was so exceptionally severe, being, according to all local reports, one of the worst winters known since settlement begun in the district, and had it not been for the fire we would have closed the work down until later. We feel sure you will understand we have made a heavy contribution by keeping the building operations going continuously.

With regard to the base question, we submit the following prices for base in lieu of the wood specified:-

Asphalt base to go with asphalt floor - \$96.00
To go with Terrazzo floor - 174.00
Cement base to go with Terrazzo floor - 140.00
Terrazzo base to go with Terrazzo floors 320.00
Red quarry base to go with asphalt floor 230.00
Red quarry base to go with terrazzo " 460.00

The above are all net prices and we have not charged any commission for them.

We trust from these figures that if you care for an additional base to that specified, you will be able to make a selection.

VERY

POOR-COPY

With regard to the wood shingles, we note the reference in your letter is to "Perfection" shingles. If the reference in specification had been in like manner, we would have concluded when tendering on the work that something more than quality was denoted. It is quite true, as you suggest, that we were not acquainted with the term, and we regret very much that our introduction to it, through the way it has been set forth in your specification, has cost us \$175.00, and as your building has received the benefit of this \$175.00, we trust that you will be able to remember this in our favour at some future time.

Regarding the remarks about septic tank in our letter of the 26th ultimo, we note with pleasure that Mr. Macauley had nothing whatever to do with the awarding of the contract for this piece of work.

With reference to ambiguity in plans and specifications, we trust you will agree with us that this is a very difficult and often delicate situation to handle. They crop up on almost every job. Some architects and engineers expect them, and being prepared to meet them in a fair way, look with disfavour on a contractor who raises them immediately after receiving the contract. Our experience along this line had led us to meet matters of this kind as we come to them, especially where we think we are in fair hands. That is how we regard the work for your Department, and up to now feel that the experience has justified such an appraisal of it, and we trust the pleasant relations thus established will continue.

Yours very truly,

CLAYDON COMPANY LIMITED.

1st May

1923

The Secretary

Department of Indian Affairs
Ottawa

Architect

Sir. I beg to report that, for the period between the 15th April and the 1st May, work on the above Building has been carried on smoothly and satisfactorily.

Heating & Plumbing This work is well advanced and with the exception of return main all pipe lines and roughing in are complete.

Plastering This trade is particularly satisfactory, the attic and first floor are now complete.

Carpentry This trade is satisfactory trim and finishing generally commenced.

Painting This work is proceeding satisfactorily roofs are stained and picture molds & baseboards in attic being stained.

Windows This trade has caused some difficulty owing to defective materials, a representative of the supply house paid us a visit and all outstanding difficulties adjusted, matters are now proceeding fairly satisfactorily.

Laundry Machinery This is now in place and works out very well excepting the Laundry tub which were rather unfortunately sited, there I have taken the liberty of changing with satisfactory results.

Electric Lighting This work has proceeded smoothly and is quite up to date.

Photos I enclose two photos taken three weeks ago, I had intended sending a series; cleaning down the brickwork however has been delayed owing to local shortage of muriatic acid, immediately this work is completed I will forward as promised.

Yours faithfully
C. W. King

Kamloops New Indian Residential School
Centre Building

Department of Indian Affairs

J. O. Ross 453
Kamloops B.C.

Ottawa,

1st May

1925

The Secretary
Department of Indian Affairs
Ottawa

Sir I beg to report that nothing has been done on the
Centre Portion since my last report.

Waste Floor I took up the question of floor finish with
Messrs John Macville Coy. who laid same, eventually
on Sunday 12th April their Representative called and I took
him over to inspect the floor. The result was a promise
to send men early this month to iron out the rough spots.

The Sisters complain that it is impossible to get a
clean appearance from this floor and would like it given
a coat of shellac and painted - a suggestion from Messrs
John Macville Coy.

Dining Room Partition Tenders were asked and submitted.
Mr Carson is at the coast and I have been unable to get in
touch with him, he prefers handling only one job at a time
Lundestad and is busy with a job for the Prov. Govt.

Messrs Blayden & Co submitted a tender, herewith enclosed
which I considered too high for the work entailed, con-
sequently I requested their reconsideration of the matter
the result being tender marked No 1 herewith submitted
I also obtained a tender from another local contractor
Mr Davis, his tender is herewith submitted.

The Partition called for is very like the detail of cupboards
on Sheet No 4 of Levels, Plans & Drawings, upper panels glazed
in other words same as treatment of Dining Room Doors also
the same thick new wood 7-6 in height approx.

This price could be reduced by using 1 1/2"
stuff instead of 2". This I would advise and await
a decision.

Stove & Dining Fittings I have not asked for prices for this
work for the following reasons. The Sisters would I think be
quite satisfied with a row of glass & brass bins, with shelving
above, in the Stove, and shelving in the Dining. The Rev
Father McQuinn however desires quite extensive works.

Department of Indian Affairs

Ottawa,

192

In the Dairy, first he desires a partition dividing the Dairy into Dairy and Vegetable Store, Fittings for the Dairy and Store, including an electric motor for the churn and and electric washers for the dishes; another sink in the desired vegetable room with necessary plumbing and water, the latter to be carried into a soak away at some distance from the Building, the latter also to be constructed.

Under the circumstances I have thought it advisable to submit this matter to the Department for instructions as to what is likely to be approved.

Further the Rev. Father McGuire expressed a wish that any work on the Centre Building be executed during May when he proposes to grant the Sisters and Nuns a vacation.

Another point in connection with the Building is that the pressure of the water supply is at times barely sufficient to flush the toilets on the upper floors and has at times caused inconvenience in carrying out Building operations on the Girls Wing.

Yours faithfully

Ottawa, May 6, 1925.

Sir,-

Mr. L. H. Sprange called at the office today on the receipt of a telegram from you with regard to the terrazzo flooring in the Kamloops School. The Architect of the Department discussed this matter with him, and I have advised him that it will be satisfactory to the Department to install in the rooms where the terrazzo flooring is being used a 14 inch border of cement, and also an 8 inch cement base.

With reference to the asphalt mastic flooring from the true intent and meaning of the plans and specifications it is clear that it was the intention that an asphalt mastic base was to be provided, and the Department will expect you to make provision for this without extra cost.

I am sending a copy of this letter to our Inspector, Mr. Macaulay.

Your obedient servant,

J. D. McLean.
Assistant Deputy and Secretary.

Ottawa

16 May

1925

The Secretary
Department of Indian Affairs
Ottawa

"Mr Carson Contract"

In compliance with your instructions dated May 5th
and received here May 11th I have arranged a
settlement of the outstanding granite question

Mr Carson came up from Vancouver and
the question was discussed from the different points
of view. Finally we reached an agreement subject
to confirmation, first from the Department, second
from the Sub-Contractor who supplied the granite.

By this agreement the Department will accept
the granite supplied, so "defective granite"; in
consideration of which, the Contractor Mr Carson
will allow the sum of One thousand dollars say \$1,000.00
to be deducted from his contract amount.

I say I have received your telegram stating
that the above agreement will be satisfactory to
the Department, in reply to my wire of the 14th inst.

On Thursday last the 14th inst I received a
letter confirming the arrangement from Mr Carson
I am forwarding herewith the original for your
information and records, the duplicate I am retaining
for filing.

With the settlement of the "granite question"
the outlook is much clearer and I have good
prospects of getting this contract completed in
the near future.

I fully discussed all outstanding
matters in the way of incomplete and defective

Kanabago New Indian Residential School
"Centre Portion"

Continuation, 3. Department of Indian Affairs

works with Mr. Carson and he has promised to ^{October} 192... complete or rectify same in the near future; these items comprise: - Portions of defective plastering, glazed brick work in kitchen, Iron Railing etc to chapel external stair, Metal ceilings in General Rooms, the Master's floor, Varnishing to Corridor floor and certain external doors, making good or replacing the main entrance door which have checked badly and generally cleaning down of concrete steps etc.

These items are chiefly the concern of the Sub-contractors and could more conveniently be carried out during the vacation the Rev. Father McGuire proposes, consequently I am trying to arrange matters with due regard to the convenience of all concerned.

In any case I feel that it is most necessary to retain the \$1000.00 shown on the enclosed statement until these several matters have been adjusted.

With this exception I think it now in order to issue a certificate for the 10% viz \$9,178.60 and will forward this tomorrow. (See Statement)

The 10% deposited with the Department is not usually covered by a certificate, should however the Department desire me to take any action in the matter please advise me,

Yours faithfully
H. H. Macaulay
Inspector of Construction.

The Secretary

Department of Indian Affairs

Ottawa

Sir. I beg to report that satisfactory progress has been maintained during the past fifteen days. Plastering This work was completed this morning and I have pleasure in stating that this work is quite satisfactory; a little touching up may be required to minor damage caused by other trades otherwise the job is complete and quite good. Carpenter This trade is also satisfactory. Doors, including the attic, floors are now laid and a large proportion of the crew is in place. Lumber The Vancouver mill supplying the doors and finishing lumber generally was burnt to the ground on Wednesday last, it is therefore expected that some delay may occur on this account, the final shipment of doors etc was expected this week end.

Heating Plumbing & Insulation This work is proceeding satisfactorily most of the radiators are temporarily fixed, most of the metal ceilings are complete and the greater portion of plumbing features. Painting This work is proceeding satisfactorily.

Yours faithfully

H. W. Macaulay

CLAYDON, WINNIPEG
TELEPHONE A 3509

Dear Sir:-

We duly received your letter of May 6th.

Mr. L. H. Sprange mentioned therein called at our office yesterday and gave us further particulars with respect to his interview with Mr. Orr regarding terrazzo flooring. We will arrange to put in a 14" border and an 8" base as suggested in your letter.

With reference to the mastic asphalt flooring, we cannot agree that was the true intent and meaning of the drawings and specifications - that asphalt base be provided. If we had had no other dealings with the Department of Indian Affairs, excepting our experience at Kamloops, we would on no account compromise from our stand that this work if put in should be paid for as extra.

We based our tender on Kamloops on the treatment accorded us by the Department with respect to Edmonton and Cardston schools, and if you will look over your records you will find that on the closing date of the Kamloops tender a reduction in price of nearly \$3,000.00 was wired to Mr. Scott. This was done after the writer had visited Cardston, and was based on our experience there, although when the correct costs at Cardston were ascertained we found we were too sanguine in making this reduction.

Our experience at Kamloops has not been nearly as satisfactory as at Edmonton or Cardston. We will, however, install the mastic base as outlined in your letter, and trust it may be remembered in our favour at some future time.

Yours very truly,

CLAYDON COMPANY LIMITED.

INDIAN OFFICE

R

At Kamloops, B.C.

May 21, 1925. 19

Ans. H. F. Helmsing

Sir:-

Referring to my letter under date of March 9th, 1925, regarding awning to protect the front entrance to the Kamloops Residential School from the rays of the hot sun during the summer months, I beg to advise you that Mr. Building Inspector MacAulay has as yet received no word as to whether the awning may be placed, and I would ask you to advise me as early as possible whether or not we may hang the awning, as I fear the entrance is going to be considerably damaged, as it faces the direct rays of the sun during the hottest time of the day.

Yours obediently,

H. F. Helmsing

INDIAN OFFICE

At Kamloops, B.C.,

May 28, 1925.....19

R

Sir:-

I beg to draw your attention to the fact that the Manager of the Kamloops Lumber Co., Ltd., has notified this office that he has not yet received cheque covering payment of account for lumber supplied to the Kamloops Industrial School, for a chicken house.

Voucher No. 146-25, in the sum of \$332.51, covering this expenditure was forwarded the Department in the early part of April last, and the matter has probably been overlooked.

I would be much obliged if you would see that this cheque is forwarded to the Kamloops Lumber Co., Ltd., without further delay as it has now been outstanding for some time.

Yours obediently,

(H.F. Helmsing)
Indian Agent.

Mr. Scott

Dear Mr. Scott:-

This morning on opening our mail, we found there was no remittance from the Department as suggested by your night letter of the 26th inst. We therefore wired you and enclose confirmation of the message. The registered mail this afternoon, brought us the return of the deposits amounting in all to \$13,500.00, so had we waited a few hours, we need not have sent the telegram.

We were very surprised that our tender on the Blood School at Cardston, was not the lowest. We left our plant on the reserve last fall in the hopes that it would be of use to us there this summer. The fact that our tender is not the lowest cannot be on account of not trying hard to secure the contract, for we gave the tender for the proposed school, the benefit of all we had learned from our previous work for the Department. We trust at some future time we may have the pleasure of securing other contracts on work under your charge.

It is hoped that you will soon have funds available which will permit the payment of the Kamloops certificates. At the time of writing, there is lodged with the Department, unpaid certificates No. 8 & 9, amounting in all to about \$14,000.00. The latest advice from Kamloops informs us that approximately another \$4000.00 has been earned. As it is only by special arrangement with our bank that we were able to put up deposit on the Blood School while waiting for payment on Kamloops, we are sure you will realize that we will be very pleased indeed, to receive payment of these outstanding amounts. Will you kindly wire us as soon as funds are available. We are asking this so that we will be able to arrange our finances in case we have tender cheques to lodge with other work we may be figuring and it is sometimes hard

Sir. I beg to report that work on the above Building for the period from the 15th to the 31st May, has proceeded satisfactorily. Enclosed are photos taken showing views from the South, South East and North. Masonry This with the exception of Retaining wall now being constructed is practically complete. Carpenter This Trade is busy with the Trim, generally the two upper floors are complete. Painting This work is well advanced most of the Staining and varnishing to upper floors including painting to the Metal ceilings, is complete. Heating & Plumbing This work is also well advanced, the Plumbing fixtures on upper floors are in position and the Heating was tested out. Mastic Floors These are all complete and much more satisfactory than the Centre Building. Terrazzo Floors These floors are now being laid and will probably be finished within the next ten days. Electric Lighting This work is well advanced, the various panel boards are in position and the Switch Board is expected within a few days. Electric Fixtures These are provided by the Department and fixed by the Contractor, will you please favour me with information as to when these fixtures may be expected. Yours faithfully

Sir:

I have your letter of the 4th instant, enclosing copy of a communication from the Rev. Principal of the Kamloops Indian Residential School. I note that the list of tools required for the institution will be forwarded in due course. You are authorized to purchase, after securing competitive prices, materials for painting the outbuildings at the school. The sum of \$200 should not be exceeded. The school management should be responsible for all labour required.

I regret that there are no funds available for the purpose of assisting with the purchase of a truck for the use of the school. It has been the practice of the Department to ask principals to finance this type of equipment from the per capita or other earnings. Please inform the Rev. Principal.

Your obedient servant,

INDIAN OFFICE

At Kamloops, B.C.,

R June 4, 1925. 19

[Handwritten signature]
Dept. file 154-0-12, March 26, 1925.

Sir:-

In reply to your letter above referred to I beg to enclose herewith copy of letter received from Rev. Father McGuire, Principal of the Kamloops Residential School, in which he makes a request for authority to expend a sum not exceeding \$200.00 in the purchase of paint to complete the painting of the buildings on the Kamloops school site. With regard to this I might state that the buildings to which the Rev. Father refers are very badly in need of paint and I would strongly recommend that favourable consideration be given to this request.

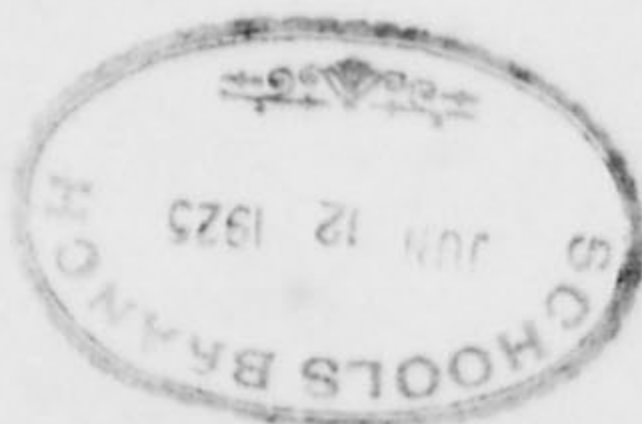

With reference to the second paragraph of the Rev. Father's letter, I might state that I am as yet without the itemized statement of the goods and tools required.

Regarding the third paragraph of the letter in which the Rev. Father requests information stating to what extent the Department would assist him in the purchase of a motor truck, I might state there is reasonableness in Rev. Father's suggestion, owing to the fact that he has to take a team off the land and also utilize the services of two or more of the larger boys in the hauling of freight, etc., between town and the school. Whether or not the Department would consider assisting the Rev. Father in this matter, I cannot say, but leave the question entirely in the hands of the Department, and would ask you to advise me as to what decision you arrive at. I might state that the Rev. Father has expressed his willingness to pay the balance of the purchase price on the motor truck if the Department would assist him to the extent of \$700 or \$800.00

Respectfully submitted.

Yours obediently,

Indian School, Kamloops, B.C.
May 7, 1925.

Dear Agent:-

Our requisition for paint last fall left one side and one end of our barn unfinished.

1. We are now asking you to present a request to the Department for paint not to exceed \$200.00 to finish the painting of the barn, two silos, the boys' class room and the cottage for the farm instructor, besides the ceiling in horse and dairy barn,
2. We are also enclosing the list for tools which has been revised.
3. Would you oblige us also by giving us information stating to what extent the Department would aid us in purchasing a motor truck? On the different R. roads and from every point of the compass we receive daily freight, trunks and baggage of all kinds, besides mail and express packages from as many more quarters. It has come to such a pass that we can no longer cope with the situation with a team without encroaching on the boys' class or being in one continual war over demurrage charges.

Yours very truly,

(Sgd.) James McGuire, O.C.M.I.

Mr. Helmsing,
Indian Agent,
City.

27th June

The Registrar
Department of Indian Affairs
Ottawa

Carhu
Sir.

R
I beg to acknowledge receipt of your instructions of the 15th inst and report as follows:
Electric Light Fixtures After a consultation with the Rev. Father McGuire I prepared a list of the fittings required and obtained tenders from the two Local Firms, they are herewith enclosed. For your information I would state that Mr. Wain is the Sub-contractor on the Girls Wing, whilst Messrs. Heller and Heller is the Firm that supplied the fittings for the Centre portion, Dining Room Partition etc I am rather at a loss as to the exact requirements re Partition in Dining Room. In conformity with instructions from the Department tenders were invited some months ago and forwarded to the Department for consideration. Is the present instruction an oversight or are new tenders required, Shelving etc I have consulted Rev. Father McGuire and the Sister Superior as to their requirements and expect to forward tenders on Wednesday next.

I should be glad to receive instructions in reference to the Electric Light fittings as soon as possible as the Building Contractor is making a big effort to complete his work at an early date.

Yours faithfully
H. H. Macaulay

The Secretary

Department of Indian Affairs
Ottawa

R

Sir I beg to report that for the period from June 15th to 30th work on the above mentioned Building has proceeded satisfactorily and the Building is now very nearly complete

Carpenter Work This Trade is complete with the exception of a few minor details and adjustments

Joinerys Floors These are all complete and satisfactory

Electrical Work Awaiting arrival of fittings

Heating Work under this Trade is practically complete

Pipe coverings on return pipes have to be secured with metal bands. The system has to be finally tested out

Plumbing Some few fixtures including the wash tub in Laundry have still to be fixed in addition to several minor adjustments and two small roofs (Porches) are not yet complete.

This work cannot be tested out until the system is connected with Septic Tank, this connection is now being made.

Painting With the exception of a little touching up in several places this work is complete

Grading to Site This work is complete but considerable work in the way of removing debris and superfluous material remains.

Yours faithfully
W. H. Macaulay

Dear Sir:-

We enclose confirmation of night letter sent you last evening. The advice referred to in the above night letter is from our Mr. E. Claydon, Jr., who is trying to get the Kamloops matter cleaned up with Mr. Macauley.

Apparently Mr. Macauley believes that it rests with the Department to accept or otherwise, although last week he promised a letter of acceptance. This however, he now denies and has promised a letter stating all work completed.

We trust however, from your telegram to us of this date, that Mr. Macauley will now feel that he has the authority to accept building and thus remove what seems to us, an almost impossible position.

We shall be very glad indeed to receive the payment by wire which you have kindly expressed your readiness to arrange.

Thanking you for your prompt reply to our message, we are,

Yours very truly,

Duncan C. Scott, Esq.,
Deputy Supt. General,
Dept. of Indian Affairs,
Ottawa, Ont.

Dear Sir:-

Enclosed is confirmation of night letter sent you under this date.

We understand from Mr. E. Claydon, Jr., who is now at Kamloops, that he expects to receive from Mr. Macauley, what purports to be from him, a final certificate, on the 7th inst.

We are further informed that Mr. Macauley ~~does~~ not feel that it is his duty to issue a final certificate, but that he will issue with his statement, a letter of acceptance. As this is a new experience to us on the completion of a job, we are at a loss to know how it will be dealt with by the Department, but we would appreciate the co-operation of the Department in relieving us from further responsibility by payment of the account as quickly as possible.

The hindrances we have met in the work, have not only cost us a lot of money, but has kept finances tied up far beyond when we expected they would be released. May we ask you therefore, that as soon as you can make it possible, you will return our contract deposit to Winnipeg.

Yours very truly,

REPORT
on
Proposed Water Supply,
Kamloops Industrial School,
Kamloops, B. C.

Prepared for
Department of Indian Affairs,
by E. H. Tredcroft,
Division Engineer,
Water Power & Reclamation Service,
Kamloops, B. C.
June 20th., 1925.

INTRODUCTION

The Kamloops Industrial School, situated on the Kamloops Indian Reserve, on the north bank of the South Thompson River, at a distance of three miles from the City of Kamloops, is at the present time in the course of construction. It is a brick building 57 feet in height and when finished will cover an area of 320 feet by 90 feet. It is being constructed in three units as follows:

1. centre portion,
2. left wing,
3. right wing.

Both the centre portion and left wing are practically completed, but there yet remains the right wing to be constructed. When finished this building will be capable of accommodating 250 persons.

WATER REQUIREMENTS FOR DOMESTIC PURPOSES

The maximum daily water requirements for domestic purposes in this institution, assuming 250 persons resident in the building, will amount to 40

U. S. gallons

Indian Affairs (RG 10 Volume 6448, file 882-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

40 U. S. gallons per capita, or a total of 10,000 U. S. gallons per day.

WATER REQUIREMENTS FOR FIRE PROTECTION PURPOSES

The building, as stated above, is 57 feet in height and will cover an area of 28,800 square feet. It will have a value when finished, including fittings, of over \$200,000 and should therefore be supplied with sufficient water to afford protection in the event of fire. The minimum amount of water necessary to afford proper protection to a building of this kind is 500 U. S. g.p.m. (i.e., 2 standard fire streams of 240 U. S. g.p.m. each, playing simultaneously). This amount should be available for a considerable period in order that a possible outbreak of fire, no matter how severe, may be subdued.

POSSIBLE SOURCES OF WATER SUPPLY

The only possible source of water supply for the Kamloops Industrial School is the South Thompson River, and this river being at a lower elevation than the ground on which the school is constructed, no water for either domestic or fire protection purposes can be obtained except by pumping.

PRESENT WATER SUPPLY

Water is obtained from the South Thompson River by means of a 4 x 5 reciprocating pump, belt-connected to a 2 H.P. 220 volt induction motor. This pump has a capacity of 20 U. S. g.p.m. and supplies water to a steel tank having a storage capacity of 1200 U. S. gallons. This storage tank is what is known

is what is known as a pneumatic storage tank, water being maintained in it under an air pressure of from 45 to 60 pounds per square inch. No water supply other than the above is at present available for the new school building.

REMARKS RE PRESENT WATER SUPPLY

The present water supply was designed for domestic use in the old school building, which building was recently destroyed by fire, and it is in no way adequate to provide water for either fire protection or domestic purposes in the new institution. It is far too small and not capable of satisfactory enlargement for the following reasons:

(1) The storage capacity of the present tank (1200 U. S. gallons) is too small to supply the new building, and additional tanks would have to be provided. These extra tanks, which are expensive, would only be of use in the event of fire.

(2) The existing pump house is too small to house the present pumping equipment together with additional storage tanks.

(3) The present pump, with capacity of 20 U. S. g.p.m., would have to be replaced with a larger pump, capacity 80 U. S. g.p.m.

(4) A fire pump, capacity 500 U. S. g.p.m., would have to be provided and pump house constructed to house same.

(5) With a pneumatic storage system it is not possible to install one pump with large capacity (i.e., 500 U.S. g.p.m.) for use in the event of

fire, and

fire, and arrange same so that it would also deliver water economically to comparatively small capacity pneumatic tanks operating under low pressure.

(6) A large pump suitable for fire protection, operating on a voltage of 2200 volts, cannot easily be arranged to commence and cease operation automatically as in the present system where the voltage is 220 volts, and it would therefore require to be started by hand several times a day in order to replenish the 1200 gallon tank, unless additional tanks are provided. (The average daily consumption of water in the institution being approximately 10,000 U. S. gallons).

(7) The cost of remodelling the present system so that it would be suitable for both domestic and fire protection purposes would be so great that for practically the same amount a complete new water system of different type and more suitable for general use by the above institution can be constructed as outlined below.

PART 2.

PROPOSED CONCRETE RESERVOIR AND FIRE PUMP

GENERAL DESCRIPTION

Water to be obtained from the South Thompson River by means of a centrifugal pump direct connected to a 60 H.P. 2200 volt A. C. induction motor, situated in a concrete pump house on the north bank of the South Thompson River immediately behind the new school building. (See accompanying plan No. 1) This pump will have a capacity of 500 U. S. g.p.m. and will supply water to a concrete reservoir of 18,000 U. S. gallons

Indian Affairs (RG 10 Volume 6448, file 882-5, part 4)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR-COPY

capacity to be constructed on the high ground situated behind the school.

The reservoir will be for domestic purposes and for immediate use in the event of fire, until such time as the pump may be placed in operation. After this has been accomplished, the reservoir may, by means of valves, be cut out of the system and the pump used to supply water at high pressure to four hydrants situated near to and outside the new school building. (See accompanying plan No. 1) By this method water will be available for domestic use at a pressure of 40 pounds per square inch and for fire protection purposes at a pressure of 78 pounds per square inch, both pressures being suitable for the purpose for which they are required.

DETAILED DESCRIPTION

Machinery

Water will be obtained from the South Thompson River by means of a centrifugal pump having a capacity of 500 U. S. g.p.m. and capable of delivering this amount against a pressure of 100 pounds per square inch at the discharge (with no suction lift), direct connected to one 60 H.P., 2200 volt, 3 phase, 60 cycle, induction motor, equipped with starting compensator, overload and no voltage release.

Pump House

Both pump and motor will be situated in a concrete pump house to be installed on the north bank of the South Thompson River immediately behind the new school building. This pump house will be 11'6" x 11'6" in size and will be connected with the river by means of an intake pipe.

Intake Pipe

120 feet in length, constructed of 12" vitrified sewer pipe.

Reservoir for Domestic Purposes

The above pump will supply water against a total head, including friction head, of 212 feet to a concrete reservoir 25' x 10' x 11' having a storage capacity of 18,000 gallons, by means of an

Pipe Line

8" diameter wood stave pipe line, 1750 feet in length. (See accompanying plan No. 1)

This pipe line will serve as both intake to and outlet from the reservoir and 8" diameter wood stave pipe will be installed from the pump house to the school buildings to connect with the proposed fire hydrants and inside piping for domestic supply.

Hydrants (outside)

Five standard, two-plug, frost-proof fire hydrants will be installed in the school grounds, as shown on the accompanying plans, four in close proximity to the school building and one in the vicinity of the barn and out-buildings. These hydrants have been located far enough away from the building so that in the event of fire no interference with their proper operation through heat, falling debris, etc. need be anticipated.

Hydrants (inside)

The above building being already equipped on the inside with suitable piping, fire
hydrants, hoses,

hydrants, hoses, nozzles, etc., no additional inside equipment will be necessary, beyond a suitable connection between the interior piping and the outside supply mains.

Gate Valves

Gate valves have been placed on all lines at positions where their installation is considered necessary. (See accompanying plan No. 3)

Check Valve

A check valve has been provided on the main discharge pipe to protect the pump from water hammer should the power be cut off at any time when the pump is being operated.

Pressure Reducing Valves

A pressure reducing valve has been installed on the by-pass between the main supply pipe and the school mains in order that water for domestic purposes may be obtained in the building at all times under low pressure, even though the pump is operating and the reservoir being filled at the time this water is required.

Air-Relief Valve

An air-relief valve has been located on the main supply pipe at the top of the vertical curve in order to minimize any danger of interruption to the service through the accumulation of air in the pipe. This valve has been protected by a gate valve to facilitate repairs, etc. (See plan No. 4)

Foot Valve

A foot valve has been provided at the bottom of the suction pipe to allow of easy priming.

Relief Valve

A relief valve situated in a concrete valve box will be installed (See accompanying plan No. 1) so that should the pump at any time succeed in building up an excessively high pressure swing to the reservoir having been cut out of the system and all hydrants closed, same will operate and relieve the pressure in the mains.

Drain Pipe

A 4" diameter drain pipe leading to the intake well in the pump house and connected with the main supply pipe has been provided, in order that the reservoir may be emptied at any time to allow for repairs, cleaning, etc.

Screens

Two screens of large area have been provided, one situated in the intake well and the other on the suction pipe.

By-Pass (priming)

A by-pass with valve which draws its supply from the discharge side of the check valve has been installed on the main pipe line to allow the pump to be primed.

Power Line

The present transmission line which supplies the school with power and light is too near the new building and a portion of this line must be

must be relocated to avoid the danger of same being burned down in the event of fire. (See accompanying plan No. 1)

Outside Equipment

The outside equipment necessary to complete the installation will be as follows:

- 500 lineal feet 2½" diameter, grade 2 fire hose,
- 4 standard fire nozzles, 1 1/8" diameter,
- 1 50' telescopic fire ladder,
- 4 fire axes,
- 1 wooden shelter for hose, etc.

OPERATING CONDITIONS

Pressure (Domestic)

From a study of the accompanying plans it will be seen that the elevation of the surface of the water in the reservoir will be 150.00 and that the elevation of the pipe where it enters the school building for domestic supply is 50.00. The static pressure in the domestic supply pipe at the ground floor will therefore amount to 43 pounds per square inch, which is a suitable pressure for domestic purposes in a large institution of this kind.

Pressure (Fire)

As stated above, in the event of fire the reservoir may be cut out of the system and the pump can supply water to the most distant hydrant through 630 feet of 8" diameter main. The static pressure in the hydrant will be 78 pounds per square inch, which is sufficient to allow of two 1 1/8" diameter standard fire nozzles, each attached to 100 feet of fire hose and discharging 240 U. S. g.p.m., being operated at the same time, the pressure of and the amount of water discharged by each of these nozzles being what is known as a standard fire stream.

standard fire stream. The height above the ground at which water may be applied from either of the above streams is equal to 65 feet. From this it will be observed that no part of the building will be without adequate protection in the event of fire.

EFFICIENCY OF OPERATION

The proposed plant has been designed so that the pump and motor will operate at maximum efficiency when performing their average daily work, and a pump will be selected whose efficiency is greatest when delivering against a pressure of 85 to 100 pounds per square inch. When the reservoir is being filled, the pump will deliver against a total head of 212 feet, as follows:

Static head	150 feet
Friction loss in 1750 feet of 8" diameter main	31 "
Friction loss in fittings, gate valves, check valves, etc.	19 "
Friction loss in pump and suction	12 "
Total	212 feet

which is equivalent to a pressure of 91 pounds per square inch at the discharge.

COST OF OPERATION (Power)

The above pump will deliver to the reservoir at the rate of 500 U. S. g.p.m. and assuming an average daily consumption of 10,000 U. S. gallons, the cost of power for operation for a month of 30 days would equal the cost of power for 450 Kilowatt hours. At the rate at which this institution is charged for power by the City of Kamloops this charge will amount to \$16.00 per month.

COST OF INSTALLATION

The cost of installation of the above
plant

plant, including purchase of machinery, material and fittings, and the construction of the reservoir, pump house, concrete valve boxes, etc., will amount to \$9,680.00 (See Appendix "A") but against this total cost must be placed the value of the equipment at present in use and which will be released for sale or for use at some other Government institution should the above scheme be carried out. The value of this equipment at a conservative estimate is \$800.00 (See Appendix "D") and the final cost of the above project will therefore amount to \$8,880.00.

GENERAL REMARKS

(1) Under the proposed scheme, water for domestic purposes will be available at a pressure of 43 pounds per square inch and for fire protection purposes at a pressure of 78 pounds per square inch. An adequate supply under gravity will be instantly available in the event of fire to last until the pump can be started. After this has been accomplished an amount of 500 U. S. g.p.m. will be available continuously.

(2) A centrifugal pump has been specified for this installation as these pumps are satisfactory for fire service, are simple and easy to operate and may be started by persons not ordinarily familiar with the operation of machinery.

(3) 8" diameter wood stave pipe has been specified for this installation owing to its comparatively low first cost, and the life of wood stave pipe in this locality may be assumed as being

7 years while

Indian Affairs (RG 10 Volume 6448, file 882-5, part 4)

ARCHIVES PUBLIQUES
CANADA

VERY

POOR-COPY

7 years, while the life of the remainder of the plant may be considered as being 30 years. Should it be desired, however, to install cast iron pipe throughout in place of the wood stave pipe specified in this report, thus making the life of the whole plant equal to 30 years, the cost of the above project will be increased by an amount of \$2,800.00.

DISPOSAL OF PRESENT EQUIPMENT

The present pumping equipment consisting of

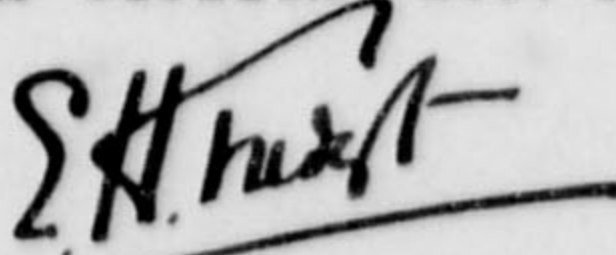

- 1 4 x 5 reciprocating pump, capacity 20 U. S. g.p.m.,
- 1 2 H.P. induction motor,
- 1 steel pressure tank and fittings, capacity 1200 U. S. gallons,

and having an estimated value of \$800.00, may either be disposed of by sale or removed for use at some other Government institution.

RECOMMENDATION

I would respectfully recommend that the above scheme as outlined in this report be installed at the Kamloops Industrial School and that the work be undertaken as soon as convenient, this institution being at the present time without adequate water supply.

Your obedient servant,

Division Engineer.

C. E. Webb, Esq.,
Acting District Chief Engineer,
Water Power & Reclamation Service,
119 Pender Street West,
Vancouver, B. C.

Cost of Proposed Water Supply System.

Reservoir

1 reinforced concrete reservoir,
25' x 10' x 11', as shown on plans, equipped
with valves, vent pipes, drain pipes, etc.,
and including excavation for and backfilling, \$1,450.00

Pipe Line from Pump House to Reservoir

1750 lineal feet 8" diameter wood
stave pipe in place, including 1 hydrant,
C.I. pipe for connections with valves,
vent pipes, etc., 1 air valve and concrete
box for same, freight, cartage, etc. 2,200.00

Pipe Line from Pump House to School

900 lineal feet 8" diameter wood
stave pipe in place, including 4 hydrants,
miscellaneous fittings, etc., freight and
cartage, 1,360.00

Pump House

1 reinforced concrete pump house,
as shown on plan, equipped with intake well
and 120 lineal feet 12" diameter vitrified
intake pipe, including excavation for and
backfilling, wiring, building, etc. 1,200.00

Machinery

1 500 U. S. g.p.m. centrifugal
pump (single stage),
1 60 H.P., 2200 volt, 3 phase,
60 cycle, squirrel cage, induction motor,
complete with starting compensator, overload
and no voltage release, freight, etc. 2,150.00

Fittings

As shown on plan, including gate valves, check valve, foot valve, screens, reducers, flanges, gaskets, drain pipe, elbows, tees and fitting of same 340.00

Fire Fighting Equipment

500 lineal feet 2½" diameter fire hose (grade 2)
4 standard 1 1/8" diameter smooth nozzles,
2 standard 7/8" smooth nozzles,
4 fire axes,
1 50 foot telescopic fire ladder,
1 wooden shelter for same, 460.00

Transmission Line

Moving 400 feet of present power line 60.00

SUMMARY

Reservoir	\$1,450.00
Pipe Line to Reservoir	2,200.00
Pipe Line to School	1,360.00

Dear Sir,

re Girls' Building, Indian School, Kamloops.

In accordance with our arrangement yesterday, we hereby undertake to erect the electrical fixtures, to be provided by the Department, and which were not delivered at the building at the time of completion of our contract work. This work is to be done on delivery of the fixtures at the building, and in accordance with the requirements of the specifications.

Yours very truly,

CLAYDON COMPANY LIMITED.

*Architect
and
Superintendent*
A. F. MacManzie, Esq.,
Acting Asst. Deputy,
Dept. Indian Affairs,
Ottawa, Ont.

Dear Sir:-

Since our last communication with respect to Kamloops Indian School, we have heard from Mr. E. Claydon, Jr., that Mr. Macauley has given him an acceptance of the building and submitted the final report to the Department.

Until the day before this was done, we understood that Mr. Macauley was well satisfied with everything and that he had no reservations to make that would deter from an unqualified approval of everything in connection with our work for the Department. Until Mr. Claydon returns to the City, which will be this week, all we can say at the present time is that our experience with Mr. Macauley has been very disappointing.

We trust however, that such an acceptance as has been given, places our account in such shape that you will be able to pay us the 10% retained and return our contract deposit without further delay.

We understand the question of the additional work amounting we believe, to about \$4000.00, will have to be the subject of correspondence after Mr. Claydon returns, but we would be very glad if the other payments can be made now. Will you kindly arrange this and advise if we may expect it within the next few days.

It is reported that Father Maguire has expressed himself as being extremely well satisfied with everything about the building and is happy to take possession.

Yours very truly,

CLAYDON COMPANY LIMITED

E. Claydon

In going over the settlement of work with Mr. Macauley, we find that it is an utter impossibility to arrive at a reasonable basis for settlement and in spite of making concessions to him in carrying out the work which he was not entitled to and further reducing some of the items for additions to the contract in the hope of getting him to accept our statement, we have been obliged to close up at Kamloops and leave the whole question of payment for additional work to be taken up ourselves with the Department.

Our statement on this matter is now being prepared and we hope to despatch it in a few days. In the meantime, as the amount is rather large and as stated before, a lot of the work having ^{been} done a number of months, will you please favor us with a speedy settlement of the 10% remaining on the contract.

Yours very truly,

CLAYDON COMPANY LIMITED

The Secretary,
Dept. of Indian Affairs,
Ottawa, Ont.

Dear Sir:- RE KAMLOOPS SCHOOL - Reference 150-0-5

We note from your letter of the 8th inst., that our deposit security will be released thirty days from the date of the acceptance of the building. We have what purports to be Mr. Macauleys' acceptance under date of July 10th, so we trust we may expect that on August 10th, you will be able to return our deposit.

There still remains the question of the 10% retained. You will notice that Mr. Macauleys' certificate only gives us 90% of the contract amount and nothing whatever on the additional items. We think that we should at least, have had some kind of a certificate on such additional items as Mr. Macauley has passed.

It is understood that Mr. Macauley's acceptance has prepared the way for you to pay us the 10% retained. We trust we are correct in this understanding and that if payment is not already on the way to us, may we ask you to kindly arrange to let us have the benefit of it at once.

Our account for additional work after deducting the credits allowed, is approximately \$4000.00. A number of these items have been passed and agreed to by Mr. Macauley and the balance left for us to take up with the Department direct. Some of these items have been completed for months. We have never in over twenty years building, had a contract completed and credit for additional work denied us until after the whole contract had been disposed of.

Ottawa

Girls Wing The Electric Lights fixtures in the Girls Wing have arrived and will be erected on the 20th July. This with the exception of minor repairs completes work on this contract.

Centre Portion The work covered by the \$1,000.00 held back has not been completed. Mr. Carson has not attended to these items as promised, and as he resides in Vancouver it is difficult to get in touch with him.

The metal ceilings I have been successful in having rectified. This work was done in the past week, they have now to be painted.

I beg to suggest that this work be done forthwith and charged against the \$1,000 held back.

Yours faithfully
H. H. Macaulay

The Secretary

Department of Indian Affairs
Ottawa

Sir

As there is little or no prospect of further work in Kamloops I am making arrangements to leave here for the coast on or about the 8th August next

Consequently I should be obliged if you will kindly ask for any information you may require in respect of the above mentioned Building at an early date, in any case before the 8th August.

With regard to the work required under Mr. Carson's Contract and the various fittings required (Tenders for which were submitted in my letter of the 18th inst) my services are at your disposal until the 8th August otherwise my work can terminate forthwith

I am forwarding my account for services rendered up to and including today. Any other work you may require from me can be arranged for.

Thanking you for the courtesy at all times extended to me

Yours faithfully
H. H. Macaulay

The Secretary
Department of Indian Affairs
Ottawa

Sir

I enclose Reader for additional
fixtures required by Rev. Father McGuire, as
per your instructions.

McGowan, Blayden and Company found it inconvenient
to quote on this work as they were withdrawing their
men for another job.

Mr. Davies can safely be entrusted with this
or any work you may require. I have always
found his work good, his prices fair, and his
general attitude conscientious. He does
practically all the work in Kamloops for the
Provincial Government.

Mr. Benson is engaged on a building in
Vancouver, and could not quote.

Yours faithfully
R. H. Macaulay

Reference Item 8

No Ventilators (except one to the Dairy Roof)
were included in either the Contract for Centre Portion
or the Girls Wing.

In this climate Ventilators are absolutely essential
the long period of severe dry heat splits and dries out
all the roof timbers, in addition to this these Ventilators
are required purely from a residential point of view

DATE 23/7/25.

We realize of course, that we have no legal claim whatever on the Department and we freely admit that if we could have foreseen the winter would have proved so exceptionally severe and cause such a loss, we would have wanted to have closed down the work and finish our contract under more favorable weather conditions.

If you can consider this matter in a favourable light and can suggest to us anything further we can do or produce that will assist in the matter being decided in our favor, we will be glad to comply on hearing from you.

Our request would not be made under ordinary contract conditions. We are well content to bear such losses as come our way when we find they are made through our own mistakes, but in this particular case where the loss is the result of the circumstances mentioned herein, we trust we may receive your co-operation in the matter.

Yours very truly,

E. Blaydon

Mr. /

July Twenty-third
Nineteen-Twenty-five.

Dear Mr. Scott:-

The final account with respect to the work at Kamloops which has been the subject of discussion between ourselves and Mr. Macauley, is being sent to the Department to-day. In addition to the account rendered Mr. Macauley, we invite your consideration of another situation which confronts us.

You will remember that when we placed our bid on this work, it was based on completing contract in about five months and further, that on the day the tenders closed, you received a wire from us stating that we could reduce our written tender by \$2,112.00. Will you kindly note the estimated length of time in which we could complete contract and the most of the reduction offered from our tender, was based on being able to work continuously through the winter without serious climatic hindrances.

Unfortunately last winter Kamloops was visited by the most severe weather and continued cold on record. So much so, that our work might have been carried out on the prairies where continued low temperature is to be expected.

We had under consideration the question of closing down the work owing to the severe weather, but cancelled these when we were aware of the situation brought about by the fire in December last. We felt there was an urgent need for the building and in the hope that the weather at that time would prove to be only of temporary severity, we adopted the policy of continuous operation. We have spent an additional \$6500.00 in wages and other expenses, to offset the winter weather and suggest that the Department bear \$4000.00 or two thirds of the loss.

Archived

Sir:-

I have the honour to submit that I am in receipt of a request from Rev. Father McGuire, O.M.I., Principal of the Kamloops Industrial School, that he be supplied with 1200 feet of flooring for repairs to the floor of the recreation hall and the outside platform leading to same, in the old building at present occupied by the boys at the Industrial School.

Regarding this matter I might state that while Mr. Commissioner Ditchburn was visiting this Agency last week, both he and I took the opportunity of going through the old building and Mr. Ditchburn authorized me to state that, in view of the fact that it is not the intention of the Department to construct the boys' new wing in the immediate future, that he would recommend that the 1200 feet of flooring be supplied as requested.

I would therefore ask you to authorize me to make the necessary purchase in order that the floors may be repaired, as the same are in very bad condition.

Yours obediently,

H. F. Helmsing
(H.F. Helmsing)
Indian Agent.

11th August, 1925.

Gentlemen:

With reference to the final statement regarding the girls' building at the Kamloops Indian Residential School, I beg to advise you that the Department cannot consider the payment of the following extra work, as noted in your statement:

Item #2, \$454.00- This item cannot be approved as the Inspector pointed out to your foreman in charge of the work that he was not taking the necessary precautions to prevent the sliding tendency of the earth and your foreman replied that it was cheaper to take it out and afterwards fill in, as it was all scraper work.

Item #3, \$346.17 - This item cannot be allowed as the Inspector allowed the use of concrete mixed 1 part cement to 5 parts gravel, instead of 4 parts gravel as specified, to offset the additional cost.

Item #4, \$206.25 - This item is covered by the Plans and Specifications and the extra charge cannot be allowed.

Also it will be necessary to make the following deductions from your account for changes in the work, in addition to those already shown on the first page of your final statement:

- 1147.50*
- | | |
|---|-------------------|
| (1) Deduct for Footings under part of West Wall, 6 c.yds. @ \$11.50 | -- \$ 69.00 |
| (2) Deduct for Brickwork in part West Wall, 25,500 Bks. @ \$45. M | -- <u>1047.50</u> |
| (3) Deduct for Lime instead of Cement Mortar, say 290M Bks. @ \$3. | -- 870.00 |
| (4) Deduct for Mastic flooring 30 Lin.Ft.corridor @ \$4. | -- 120.00 |
| (5) Deduct for concrete rough floor in corridor 6" thick,
30'-0" x 6'-0" - 3 1/3 c.yds @ \$11.50 | -- 38.33 |
| (6) Deduct for 79 Bolts 5/8 x 16" at 25 cts. each, | -- 19.75 |
| | <u>\$2164.58</u> |

8757.28

According to our file, the payments made to you to date amount to \$68580, which is \$450. more than shown on your final statement. This amount was the 12th certificate, issued 11th July. A final certificate is being issued for \$8,857.28 Your deposit security cheque will be returned in a few days

Your obedient servant,

The Secretary,
Dept. of Indian Affairs,
Ottawa, Ont.

Dear Sir:- RE GIRL'S WING - INDIAN SCHOOL, KAMLOOPS, B. C.

On July 23rd, we wrote you with respect to final payment on the above contract and requesting your kind co-operation in forwarding funds to cover the account. To date, we have received no reply to our communication and as there is a very large sum of money involved, may we ask you in the event of funds not already being on the way to us, to take such steps as will result in us receiving payment at a very early date.

We are anxious to close out matters with our sub-contractors. Kamloops is a long way from here and we shall be very sorry to have to keep our sub-contractors waiting beyond the usual period for your final payment.

In addition to the percentage retained on the contract and our account for additional work, you still have our contract deposit. We have a communication under the signature of Mr. MacKenzie, which promises release of this deposit thirty days after the building was taken over. As the building was taken over July 10th, we trust we are correct in assuming that security deposit would be automatically released to us on August 10th and as result, is now on the way to us.

The above items roughly enumerated are as follows:

Contract Deposit and Interest	-	\$8200.00
Percentage Retained		7600.00
Additional Items Approximately	-	4000.00
Total.....		<u>\$19800.00</u>

Mr. Cur.

BR

Dear Mr. Scott:-

RE GIRL'S BUILDING, INDIAN SCHOOL, KAMLOOPS

We have received over the signature of Mr. MacKenzie, under date of August 11th, a statement of various items which are deducted from our account rendered with respect to the above building.

It is impossible for us at this time, to make a full reply to this remarkable document, but we must state most emphatically that the allegations made by the Inspector as reported therein, are a tissue of garbled half truths and deliberate misrepresentation throughout.

While we are not surprised at anything Mr. Macauley may do, it is a matter of amazement to us that the Department would make such deductions from our account in what appears to us, an arbitrary fashion, without giving us an opportunity of replying to the statements reported to have been made by Mr. Macauley. In fact, we cannot at this time believe it is really the intention of the Department to make Mr. MacKenzie's letter, a final statement.

Owing to the absence from the city of all our men who took part in this work, may we ask you to kindly hold the account open until we are able to make a further detailed reply to the statements made in Mr. MacKenzie's letter.

The writer is prepared if need be, to visit Ottawa and take this matter up in person with the Department.

Why should Mr. Macauley give us his final certificate of acceptance as having earned the full amount of the contract, if he had these deductions to make and if there was any vestige of truth in them? Our representative was at Kamloops with the express purpose of dealing with him, yet he made no mention of such deductions as are shown in Mr. MacKenzie's letter.

Mr. Cur.
Dear Mr. Scott:-

RE GIRL'S BUILDING, INDIAN SCHOOL, KAMLOOPS

We have received over the signature of Mr. MacKenzie, under date of August 11th, a statement of various items which are deducted from our account rendered with respect to the above building.

It is impossible for us at this time, to make a full reply to this remarkable document, but we must state most emphatically that the allegations made by the Inspector as reported therein, are a tissue of garbled half truths and deliberate misrepresentation throughout.

While we are not surprised at anything Mr. Macauley may do, it is a matter of amazement to us that the Department would make such deductions from our account in what appears to us, an arbitrary fashion, without giving us an opportunity of replying to the statements reported to have been made by Mr. Macauley. In fact, we cannot at this time believe it is really the intention of the Department to make Mr. MacKenzie's letter, a final statement.

Owing to the absence from the city of all our men who took part in this work, may we ask you to kindly hold the account open until we are able to make a further detailed reply to the statements made in Mr. MacKenzie's letter.

The writer is prepared if need be, to visit Ottawa and take this matter up in person with the Department.

Why should Mr. Macauley give us his final certificate of acceptance as having earned the full amount of the contract, if he had these deductions to make and if there was any vestige of truth in them? Our representative was at Kamloops with the express purpose of dealing with him, yet he made no mention of such deductions as are shown in Mr. MacKenzie's letter.

Certificate of Completion of Contract

re

Sewage Disposal Plant

at

Kamloops Industrial School,

Kamloops, B. C.

August 7th., 1925.

I, the undersigned, do hereby certify that the balance of work in connection with the installation of a sewage disposal plant for the Kamloops Industrial School has been carried out by the Kamloops Plumbing and Heating Company in accordance with plans and specifications accompanying my report dated March 7th., 1924; and that the Kamloops Plumbing and Heating Company have fulfilled their contract inasmuch as they have supplied all the material for and carried out all work in this connection as follows:

installation of 282 lin. ft. 6" diameter
vitrified sewer pipe; and
construction of 2 concrete inspection
chambers.

Completed Work

I hereby certify that all material supplied by the Kamloops Plumbing and Heating Company and used in the construction of the above sewage disposal plant was of good quality and conformed in all respects to the requirements laid down in the specifications accompanying my report dated March 7th., 1924; and that all work undertaken by them or carried out on their behalf was performed in a neat and workmanlike manner, for which they are, in my opinion, entitled to payment.

R

Dear Sir:

We are the sub-contractors for the Heating, Plumbing and Metal work on the Indian School for girls here. We have completed our work, but we are not satisfied with the manner in which the General Contractors are settling the accounts. We ask you to protect us against loss, as we cannot afford to take a chance on losing the balance that is due us, which amounts to \$3450.00.

I am enclosing a copy of a letter we sent Claydon Company, Limited, also a copy of their reply. I have been informed that they are not very strong financially, thus our anxiety.

Trusting that you will protect us for the above amount, we are,

Yours truly,

Claydon Company, Limited,
Winnipeg, Man.

Gentlemen:

Your letter of July 22nd to hand and many thanks for the enclosed cheque which brings the account to 80% of the agreed price in accordance with the term of the contract.

The final payment is now due, as the contract says it shall be paid within twenty-eight days after completion of the work. We shall expect the final payment of the contract to reach us before that time expires, which is the fourth of August.

I was over at the Indian School this morning and would say that it is still there and everything looked O. K.

Trusting this meets with your approval, we remain,

Yours truly,

CARR & SON,

Messrs. Carr & Son,
Kamloops, B. C.

Dear Sirs:

Your communication of the 31st ult. duly received. We cannot agree with you that the final payment is due, for while the contract does state twenty-eight days after completion, it is also provided however on the written certificate of the Architect.

As Mr. Macauley has certified to the 80% only, leaving it for the Department to make a ruling with respect to the final certificate, we are unable to state how the matter will be disposed of. We expect, however, that the Department, will, in a very short time, signify their acceptance by the payment of the 20% still held and as soon as this is done, you will receive your share of it.

We have had no certificate with respect to the additional work, nor do we know how the department will handle it. Owing to the way in which Mr. Macauley handled it, we think it will be the subject of separate payments, but will advise you of this as soon as we hear from the Department about it. The additional items account went forward to Ottawa from Winnipeg, July 24th and up to the present, we have not had any reply.

Yours truly,

Sir:-

With reference to voucher 354-25, in the sum of \$347.20, in favour of Messrs. Weller & Weller, for electrical fixtures supplied Kamloops Industrial School, as per tender.

I understand from Mr. Weller that the account was previously forwarded by Mr. MacAulay, Resident Architect in charge of construction of the new School in Kamloops, but as no cheque has been received in payment for the same, Mr. Weller, upon Mr. MacAulay's instructions submitted the account to this office, and I would ask you to be kind enough to give it your attention.

Yours obediently,

H. F. Helmsing

INDIAN AGENT'S OFFICE

Kamloops,

October 15, 1925.....19

IN YOUR REPLY REFER TO No. 124-25 ALSO TO DATE OF THIS LETTER
--

Sir,—

I have the honour to submit that on the 14th inst., I visited the Kamloops Residential School, for the purpose of visiting the class rooms while classes were in session. The class rooms are very comfortable, well lighted and well ventilated, and the teachers and pupils alike appear to be very comfortable and happy in their new quarters.

There are, however, one or two recommendations which I would like to submit, and to which I would ask the Department to give favourable consideration, and if possible, grant same.

During the course of my visit to the Senior Girls, the Sister in charge of the class, Sister M. Armella, had the girls sing, and I must admit that the performance of the children would do credit to an advanced white school. Sister M. Armella appears to be very competent, not only in instructional ability, but also in singing. The same applies to the boys who have Mr. Pollock as teacher. Both Mr. Pollock and Sister M. Armella are musically inclined, and I regret to state that neither the boys' side nor the girls' side has a musical instrument of any kind to assist, either in the musical tuition, or in the conduct of church services.

Upon taking the matter up with the Rev. Father and teachers interested, I ascertained that for the girls' side, a piano would be preferable, and for the boys' side a small reed organ, and I most respectfully submit that the Department supply the Kamloops Residential School with the above mentioned instruments. I am of the opinion that, if I am authorized to make purchase of these articles, that a very good second hand piano and organ can be purchased at the Heintzman Agency at Kamloops, for a reasonable figure. I am sure the Department will agree with me that it is essential that they, at least, should have one musical instrument on each side of the school, and I therefore ask favourable consideration of this request.

Another matter which attracted me was the fact that the teachers have no desks in the class rooms, for themselves, and no shelves on which to keep their class-room books. The only desks they have are improvised ones, made by the boys themselves, and which are very inefficient. The class-room books are all stored in a corner of the class room in a pile made on the floor. I most respectfully submit that I be authorized to supply a teacher's desk in each class room, of which, at present, there are four, and also a small shelf or case in each room for the teacher's use.

All of the above most respectfully submitted

Yours obediently,

(H.F. Helmsing)
Indian Agent.

Ottawa, October 22, 1925.

Sir:

I have your letter of the 15th instant, regarding the request made by the authorities of the Kamloops Indian Residential School to be supplied a piano for the use of the girls and a small reed organ for the boys, as well as a teacher's desk and shelves or a bookcase in each room to store classroom supplies.

In reply I have to say that the Department does not supply pianos or organs to Indian schools and it is regretted that we will be unable to comply with the request to furnish same.

The Department will approve of the purchase of two teachers' desks and two small cupboards for the classrooms and you may arrange for the purchase of this equipment. You should obtain competitive prices from a number of firms and purchase the desks and two cupboards of a size that would be suitable for the storing of classroom books. Procure the articles from the firm quoting the lowest price. It is not intended that an expensive type of teacher's desk be obtained. When the above purchases have been made, you should forward properly certified vouchers, in duplicate, covering the expenditure incurred.

Your obedient servant,

J. D. McLEAN
J. D. McLean,

Ottawa, November 27th, 1925.

Sir:

I have your K-16-255 of the 21st instant, enclosing a letter from the Rev. Principal of the Kamloops Indian Residential School. I note his request that the boys' wing be erected next summer. You may inform the Rev. Father McGuire that there are so many pressing claims upon the appropriation for Indian education that it is unlikely funds will be available for this purpose next year.

Your obedient servant,

J. D. McLEAN

Indian School,

Kamloops, Nov. 21, 1925.

Dear Agent:-

As the accommodation at the School is proving insufficient, I am asking you to request the Department to place in the estimates an item to cover the construction price of the boys' wing which should be completed during the coming summer

As you know, we have spent practically no energy in recruiting, and yet our numbers in about three months, have gone from seventy to pretty nearly twice that number. We thought first that, probably our house would be too spacious. Such is not the case. There are plenty of children to fill it as experience proves. Hence our request that the boys' wing be erected next summer.

Yours very truly,

James McGuire, O.M.I.,

Sir:

I have your letter of the 16th instant, enclosing copy of a communication which you received from the Principal of the Kamloops Indian Residential School requesting that a quantity of varnish be supplied for the floors of the new wing.

In reply I beg to say it is considered that varnish is not a suitable finish except for the floors in the staff rooms. The floors in the classrooms, dormitories, etc., should be oiled. You may purchase one barrel of suitable oil after securing competitive prices. The school management should be responsible for the applying of the oil. In future, the Rev. Principal will have to make purchase of the oil that is necessary for the floors, as it is our practice to allow first coat only in new buildings.

Your obedient servant,

J. D. McLEAN

Dear Agent:-

Would you oblige me by calling the attention of the Department to the fact that the floors in the new wing have not received sufficient varnish? These floors are of good material, B.C. Fir; they are not supposed to be washed.

By what we can learn the English Varnish No. 61, gives most satisfaction, and we would require about a hundred gallons. If authority cannot be secured to purchase the entire amount, please let us know what quantity they would authorize us to purchase now, and we will apply it where most necessary at present and secure the remainder later.

Yours very truly,

(James McGuire, O.M.I.

Indian School,

Kamloops, Oct. 31, 1925.

Dear Agent:-

With the influx of new pupils, we find it impossible to give the boys baths in their old house from a thirty gallon tank. We have had to separate the big boys from the little ones and it is our intention to arrange bathing facilities for all of them, by installing a temporary shower bath in the new laundry where hot and cold water come from the heater in the furnace room.

Our plumber will do the work. But we are asking you to secure for us authority to spend for material in this regard a sum not exceeding sixty dollars.

Thanking you in advance, I remain,

Very truly yours,

James McGuire, O.M.I.

File 150-25

Sir:-

In reply to your letter of the 16th inst., with reference to voucher 354-25, in favour of Messrs. Weller & Weller, Kamloops, in the sum of \$347.20, regarding the matter of attaching abstract of tenders received, this is an impossibility, as tenders were not called for through this office, but were, I believe, called for by the Department or by Mr. Macaulay who was at that time Resident Architect in charge of construction of the new school in Kamloops. As stated in my letter of September 23rd, file 35-25, you will note that I state that Mr. Macaulay had previously forwarded this account with the request that Messrs. Weller & Weller be paid for the work of installing the electrical fixtures as per his tender, complete with insulating joints wired with lamps at the Kamloops Industrial School. As this was not paid at that time, Mr. MacAulay instructed Mr. Weller to forward the account to me to be reforwarded with a request that settlement be made as he has already waited a considerable time for payment after the completion of his work.

For your information I might state that Mr. W.H. Macaulay has now left the district, so that it is impossible for me to obtain any information as no tenders were submitted to this office, and I do not even know what firms tendered. These tenders, no doubt, have been forwarded to the Department when the contract was awarded by Mr. MacAulay or the Department, to Messrs. Weller & Weller for the above mentioned work.

In view of the fact that payment has been delayed for such a considerable time, I most respectfully submit that the account be honoured and paid at your earliest convenience.

I return herewith the voucher, as I am not in a position to attach any abstract as requested.

Yours obediently,

(H.F. Helmsing)
Indian Agent.

Kamloops New Indian Residential School
Girls Wing.

Report re Deduction and Extras

P. O. Box 453,

Kamloops, B. C.

18th July 1925.

Architect
The Secretary,
Department of Indian Affairs,
Ottawa.

Sir:-

"Girls Wing"

As information contained in my letter of the 11th inst. this Building was taken over on the 10th as authorized by your Telegram of the 9th inst.

The Electric light fixtures are not fixed, an exception was allowed in respect of this item as the delay was not due to Contractor.

Mr. E. Claydon has been here during the major portion of this month, the Building has, with this exception and a short period let the commencement of the work, been run by a Foreman Mr. Jennings.

Mr. Claydon compiled a list of Extras and general claims against the Building which he submitted to me for approval.

These claims appear to me to be extremely extravagant and utterly unreasonable.

In discussing this matter Mr. Claydon lays particular stress on the fact that the Firm did not visit the site before tendering and consequently could not be expected to know the actual condition; this fact should be clearly noted as it has a considerable bearing on certain items.

I have explained to Mr. Claydon that I consider his claim extravagant and his attitude unreasonable and in view

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

VERY

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

POOR-COPY

(2)

of these facts nothing remained but to submit the whole question to the Department.

Consequently I forward herewith (a) copies in duplicate, of the claims in question with certain Deductions.
(b) A list of Deductions prepared by me together with a criticism and explanation of each particular claim or deduction.

I would point out that in every Building the best results are obtained by a "Give and Take" policy, also that in the best and true interests of the Job, minor changes or alterations have to be made on the spot and without the least delay.

During the progress of this Building it has on many occasions been necessary to make prompt decisions under the following headings:-

- (a) What was required in accordance with the true intent and meaning of the Plans and specifications.
- (b) Alterations or additions which were materially favorable to the best interests of the Building.
- (c) Alterations or additions which were more or less insisted upon by The Rev. Principal Father McGuire or the Sister Superior.

Under these headings decisions have oft times been difficult, in some cases embarrassing; under heading (a) I have given decisions which I considered reasonable and insisted upon being carried out with the proviso that the Department would either confirm or correct same in the final adjustment of accounts.

(b) Under this heading alterations or additions have been made involving extra cost, always however with due regard to the cost incurred being covered by a Deduction.

(c) On many occasions both the Rev Father MacGuire and the Sister Superior have been most insistent on certain changes or additions, where possible these requests have been granted in other cases refused.

Deductions--- With this explanation I will proceed with the

*Yours faithfully
H. MacGuire*

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

Statement of Deductions which can reasonably be made from this Contract.

✓ Items 1 and 2. The Main South West wall, although shown on the Drawings for Girls Wing, was partly built under the Contract for the Centre portion; it is absurd to suppose that the Department should pay for this walling twice, under the Contract for the centre portion and again under the Contract for the Girls Wing. Messrs Claydon Company have claimed (Item 15) for increasing the thickness of this wall 4" but make absolutely no Deduction for the walling built; it is obvious that their contention that they were unacquainted with the Site and existing Building applies with equal force to this walling as to the nature of the excavation.

I may point out that this item clearly demonstrates the peculiar views entertained by Mr. Claydon with regard to Extras and Deductions.

✓ Item 3. This deduction is fair and reasonable and arises from the fact that Contractors absolutely refused to use Cement mortar as specified. I reported on this matter to the Department when the brick work was commenced. Mr Claydon insisted that lime mortar, with a portion of Cement added, was good enough and had been accepted on the other two schools built by them.

In any case the cost of lime mortar is less than cement mortar, and the cost of laying (disregarding other difficulties) bricks or tile in cement mortar is undoubtedly worth \$3.00 per M. more than in lime mortar, and the Department cannot be expected to pay for what it does not receive.

✓ Item 4. The Contractors insisted upon laying a fir floor in the Recreation Rooms instead of Maple, raising a quibble over the interpretation of Paragraph No. 22. Granted that this clause is contradictory and leaves a doubt as to what is required, a reference to Drawing (Sheet No.3) clearly shows that Hardwood

floors are intended.

Item 5 That portion of the Corridor, running North and South, I changed to a Fir floor. This enables us to get at the heart of the Plumbing System without taking up the floor, a trap door having been arranged here; in addition to this the ground was "made up" consequently cracks would have been probable. Further this mastic could be used to much better advantage as will be shown later.

The Contractors according to their own figures see "Trades Summary" allowed \$524.00 for complete Mastic floors.

One man only came from Winnipeg to lay this floor consequently \$124.00 very easily covers the cost of transportation of man and materials. There is actually 100 lin. ft of Corridor consequently after deducting \$124.00 for expenses leaves the cost of this mastic floor, including cove treatment at wall, at \$4.00 per lin. ft of Corridor. 30 Lin. ft of Corridor was cut out which accounts for this deduction of \$120.00

✓ Item 6. Owing to the change under Item No. 5 the concrete sub floor was unnecessary hence this deduction.

✓ Item 7. The bolts specified 5/8" x 16" for roof plates at 5 ft centres were useless for tile work, they formed no anchorage and this roof is exposed to extremely violent winds, further owing to the windows they could not be put in at 5"-0" centres. To gain the necessary anchorage I cancelled these bolts and ordered No 50 bolts 3/4" x 3" 0" and had these built in where they would be effective.

The contractors charge for these 3/4" bolts but make no deduction for the 79 bolts specified, hence my deduction under this item.

Item 8. This weeping tile was quite unnecessary owing to the fact that the ground, being either coarse or fine gravel will not hold water at any time or under any conditions.

Item 9. This item covers the substitution of concrete

(5)

for the granite plinth at the North East corner of Laundry. It was at an altogether different level to the major portion and the appearance more or less negligible.

Item 10. This deduction covers the change of roof treatment authorized by the Department and is not nearly as much as I anticipated, at least \$100.00 was reasonable but could not be obtained.

Item 11. These breaks were taken over from the centre portion one thousand remain for buttresses to chapel.

Item 12. The doors at the bottom of steps to Laundry, in the North wall, were not required by the Sister Superior consequently were not fixed, but stored with the storm sash. These remarks explain the deductions. The Extras are treated separately as follows:-

EXTRAS Item 1 This item is incorrectly stated, at no part of the Building has the excavation been carried below the levels or grades shown on Drawings, excepting only where a change of level was required in footings as at the junction of Laundry walls with Main Building.

In these cases owing to the sliding tendency of the foundation it was obviously necessary to come down in steps instead of abruptly as shown on Drawings.

This is probably what the Contractor refers to and is admitted as reasonable.

Item 2. This item cannot be approved by me, it is true that the excavation was treacherous and the sliding tendency abnormal, at the same time the Contractors omitted the usual and necessary precautions to hold the sides in place; ^{shoring} no ~~chasing~~, except of a very primitive character, was done, and the sliding tendency in no way checked.

I pointed out to Mr. Jennings the Foreman in charge the absence of the usual precautionary measures but he replied that it was cheaper to take it out and afterwards fill in, as it was all scraper work.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

Generally no excavation could have been easier except for the sliding tendency complained of.

+ Item 3. This item may be regarded as the result of Item 2. The natural foundation to these walls running North and South (The Building faces South) had been destroyed and it was absolutely impossible to allow the footings for these walls to be placed in "made up" ground. Consequently I insisted upon these walls being carried down to a good bearing and then stepped back to the level shown on Drawings.

The specification is quite clear on this point (see paragraph (1) page 12 Specification) I do not therefore see any justification for this claim.

I readily admit that some arrangement or allowances was necessary to offset stepping these concrete walls from the lower to the higher levels and this was done at the time by allowing the Contractor to use for all concrete a mixture of one part cement to five parts gravel, instead of the four parts gravel specified.

The concrete specified is exceedingly rich, for this class of work, one Part cement to six parts of gravel is adequate as the foundation will not stand a pressure of much more than $1\frac{1}{2}$ tons per sq ft.

The Contractor evidently claims the above concession as a right and not as the *quid pro quo* intended.

+ Item 4. This item constitutes nothing more or less than a quibble, and was reported to the Department at the time, in my usual report.

The footings referred to are under the internal walls forming the Corridor etc. and are clearly shown under the wood partition forming the Corridor. They are not only drawn but figured at 3' 0" x 1'-6" please see Sheet No 2. Left side elevation.

Paragraph 7 Page 15 calls for footings 12" wider than walls

unless otherwise shown on Section Drawings.

I insisted upon these Footings being put in 3'-0" x 1'-6"
The drawings called for it and the nature of the foundation demanded it. The contractors claim is to say the least utterly absurd.

Item 5. This wall is a continuation of the North West wall of Entrance Lobby (on the North Elevation) to Laundry. The natural grades falling North and East were more suitable for Father McGuire's requirements than the arrangement shown on Drawing No. 2. Rear Elevation. He desired a cart road between the Laundry and Refrigerator Plant leading to the kitchen door and this object could be secured very easily by the wall in question.

I authorized this wall owing to the necessity of a prompt decision and the fact that there was sufficient money from deductions to defray the cost of same.

Item 6. Here we get a change of grade of approx. 12'-0" we also have, inclining East, towards the River, alternate layers of coarse and fine gravel approx 4 feet thick each. Immediately it is disturbed this fine gravel, varying from a coarse sand to a fine pea gravel, runs almost like the shifting sands found in many parts of Ontario.

When the excavation for the retaining wall shown on Drawings was commenced it was obvious that there was a very real danger of this Bank moving and thus causing a severe settlement of the Southern part of the East Elevation, from the Laundry to the S. East Corner.

I ~~am~~^{may} also add that practically all the excavated material from the whole Building was dumped in a line parallel with the East wall of Building and before this was moved it was essential to get in this retaining wall.

After a careful examination of the Extras authorized and the estimated deductions I found that there were sufficient funds to extend this retaining wall and consequently gave instructions for it to be built.

The fact that this retaining wall shows a settlement

crack from top to bottom clearly shows the absolute necessity of protecting the South East wall of Building.

Item 7 and 8. These items were necessary owing to the change of grade required to meet Rev. Father McGuire's requirements on the North side of Building.

Item 9. No provision was included in the Contract for the disposal of Water from Laundry. The difference in Laundry floor level made it impossible to convey this drainage to the South. The only practical way of disposing of this drainage was to convey it Eastwards towards the River into a ^{water} Sack Away Pit. I consulted the Local Engineer of the Water and Power Branch who advised me to put in this Pit and necessary tile drain before the grading was completed, as in no way could it be included in the general system of drainage to the septic tank. This item therefore really comes under the heading of Sewers and Drainage rather than the Building Contract.

Item 10. This item is unreasonable, the grade is clearly denoted on Drawing 2 Rear Elevation. Further this grade has been maintained 12" above the level shown on Drawing. As before mentioned practically all the excavated material was dumped parallel with the East Wall of Building and the Contractors claim shows a tendency to claim for moving this material which could have been distributed at the time of the excavation.

Whilst the excavation was in progress I drew attention to the Foreman Mr. Jennings to this fact, he however contended that it was cheaper to do it that way as he thereby secured a good bank from which he could handle his Building operations to better advantage.

Item 11. This was authorized by me at the urgent request of the Sister Superior who was very anxious to utilize this area as a play ground for the Girls.

Item 12. This item belongs to the Centre Portion of the Building and was necessitated by the omission to provide drainage from the flat roof. This item has been fully reported to the Department.

I may add that two additional sump holes are required one for the ^{Boiler} Barber Room Roof the other is, desired by Rev. Father McGuire to take care of the Drainage from the Dairy and Vegetable room.

This item does not constitute a change against this Contract.

Item 13. This item has been fully reported to the Department and does not constitute a change against this Contract.

Item 14. I authorized this item owing to the nature of the foundation.

Item 15. This item refers to the West wall adjoining Centre portion. The Contractor increased the thickness of a portion of this wall to conform with the existing work.

In connection with this claim Item Nos. 1 and 2 of List of Deductions must be considered.

Item 16. This item was authorized by me.

Item 17. This item was authorized by me, the 2" x 10" joist at 12" centres for an 18 ft span were not adequate, excessive deflections or spring was particularly noticeable; as no alteration to the ceiling level was possible the joists in question were trussed, the result being quite satisfactory.

Item 27. This item is in no way correct. I was asked about these doors by Mr. Jennings at the beginning of March and informed him that I expected them to conform with the Corridor doors of the Centre portion, as such was intended by the Drawings and specifications.

A letter was forwarded to the subContractors by Mr. Jennings on March 5th the doors did not arrive here

Item. 18. I insisted upon the rough floor in Attic being carried through to walling all round the Building. With the absence of through cross walls and the change of direction of joists at the N. East corner it was essential as a tie between the external walls. The Contractor claims that Drawings show this rough floor only between the partitions, in other words, only under finished flooring.

The price charged is excessive. The prevailing rate of shiplap floor locally layed does not exceed \$45.00 per M.

Item. 19. Authorized by me. As explained in my reports the Heating Main from the Boiler had to pass through these Transoms necessitating a change.

Item 20. Authorized by me. Please see Deduction No. 6. and explanation thereof.

Item 21. Authorized by me. The cost being covered by Deductions. No ventilation was provided to either of the Dormitory floors. The Sisters strongly objected to this omission. A number of these Ventilators were also required under roofing at Eaves as per the change of treatment adopted by Department.

Item 22. Authorized by me. In this climate of dry hot weather two layers of paper are essential and are included in even small cottages.

Item 23. Authorized by me. The position of the radiators shown on Attic Dormitory floor was very strongly apposed by the Sisters, their contention being that such an arrangement left no place for the Beds etc. consequently the Radiators were placed under the windows necessitating opening being left at side for access to piping.

Item 24. Authorized by me. The Sister Superior insisted upon additional windows in the North Wall of Laundry. I compromised by having two lights put in the West wall near Stairway.

Item 25. The Contractor claims that these are not covered by the specification. My contention is that unless they open they are useless, and that the same might reasonably be inferred.

Item 26. It is unreasonable to suppose that this Burlap Rail is not called for under the true intent and meaning of the Plans and specification. It is clearly covered by Par. 5 Page 4.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

(1)07

until May 25th., nearly 3 months. In any case practically the lighting of the Corridors depends on these glass panels.

I may add that until the question was raised by Mr. Jennings I had not even entertained the idea of the upper panel being wood.

Item 28. This item was insisted upon by the Sister Superior offer a request by Rev. Father McGuire. It was authorized by me.

The charge made for this work is unreasonable and cannot be approved by me. It is admitted that the ordinary shelving was fixed on one wall only, before this work was ordered.

An interesting comparison may be drawn between this charge and the tender of Mr. Davis for exactly the same amount and description of these so called lockers on the Girls Locker Room on Basement Floor. You will note that Mr. Davis undertakes to duplicate this work for \$99.00.

Item 29. This work was authorized by me. The baluster treatment was objectionable to the Sisters. The ceiling of V joint I regard as merely a necessary finish.

Item 30. This item was authorized by me. It was found necessary to steady the roof of the East portion of Dormitory at two places (a) at the big opening containing three windows and door in West wall (b) at the point of intersection of Gable and South East Wall.

Further the door (fire escape) did not work out as shown on Drawings, there was insufficient head room.

The stiffening of roof at intersection of Gable was made without extra cost by moving the Staff Duty Room into this Gable.

Item 31. This was authorized by me and necessary to keep area clear of water from Main Roof.

Item 32. The Contractor claim and I agree therewith that there was not sufficient height for the Boiler, a Pit was

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR-COPY

necessary and it was essential for the footings of the Main West Wall to be safeguarded.

Item 33. Authorized by me. The Sister Superior insisted upon this change to obviate workers standing in their own light. The change is a big improvement.

Item 34. This item was a point of contention and was the last work completed.

Undoubtedly the shingle roof was a mistake and Mr. Jennings the Foreman offered to put on a Mastic roof at 40 cents per foot. He withdrew this proposition and \$18.00 was quoted for tar and gravel (\$15.00 per square is a reasonable price) Near completion of these roofs Mr. Claydon discovered that a mistake had been made and charged \$40.91.

Item 35. I wrote to the Department about these ventilation shafts but received no reply. These shafts are shown in Basement Ground and First floor (between Girls Dormitorys(but do not appear in the second floor (on attic Plan)

The Contractor claims for carrying these through to Roof space also lining same from the Basement up to Second Floor.

I contend that the lining be regarded as reasonably intended, a space between studs cannot be regarded as a flue, consequently whilst I disagree with any charge being made for lining the flues I think some allowance should be made for carrying flues from the attic floor to Roof.

Item 36. This was authorized by me in accordance with Rev Father McGuire's insistent demand for such arrangement as would allow all Bath water and water from Wash Table being run on to the land instead of into the septic tank.

Item 37. This was authorized by me. The Laundry could not be heated as shown on Drawings owing to the return being too low consequently I ordered this particular return pipe to be drained into the gully under Laundry Machinery.

Item 38. This was authorized by me. The stair (Metal) treads only allowed for 1/4 of cement, this is I think insufficient

(12)

and Mr. Jennings the Contractors Foreman informed me that the cement treads at the Cardstone School were badly cracked before they left the Job.

With the deduction of \$120.00 from the Corridor I accepted Mr. Jennings quotation of \$64.00 for Mastic in lieu of Cement.

Item 39. Authorized by me. Obscured glass requested by the Sister Superior.

Item 40. Authorized by me. The Sisters requested this to allow of sample papers being pinned above Blackboards.

Item 41. Authorized by me at the urgent request of the Sister Superior.

C O P Y

154-0-5.

Original on 154-0-9.

Ottawa, February 17, 1926.

Sir:

I have your 30/4/6500 of the 26th ultimo, with reference to the proposed enlarging of the irrigation system and domestic water supply at the Kamloops Indian Residential School. I am pleased to learn there is not the slightest doubt water licenses can be secured.

I note that it is advisable to make application for a license covering both proposals and that you have asked the District Engineer to prepare a report, which will give you the information needed in connection with the irrigation.

I have also your telegram of the 16th instant and have to assure you, in reply, that no purchase of machinery will be made until the Water Power Engineer's report is to hand. Further, it is likely that the Department will ask the Dominion Water Power Branch to have their District Engineer undertake the purchase and installation in this connection. I might state that I have officially requested the Director of the Dominion Water Power Branch to let me have a report concerning the proposed extension of the irrigation system.

Relative to Engineer Tredcroft's report on the domestic and fire fighting system, I have to inform you that the Department hopes to carry out his recommendation when the last wing of the building is erected. At the present time there are no funds for the purpose. You may make application for the water required in this connection when you are dealing with the irrigation license. I note that you have a copy of Engineer Tredcroft's report of June, last, and therefore the information needed for the application is available to you.

Your obedient servant,

J. D. McLean

J. D. McLean,
Asst. Deputy & Secretary.

W. E. Ditchburn, Esq.,
Indian Commissioner,

act
R
Re Kamloops Industrial School.

Sir,—

About the middle of October, 1925, I forwarded voucher No. 389-25, in the sum of \$80.10, in favour of the City of Kamloops, for labour and material required in connection with the installation of a power line to the electric motor in the boiler room, as arranged by Mr. W.H. MacAulay, at that time your resident architect in charge of the building of the new school.

I am advised by the City Clerk today that they have not, as yet, received payment of this account, and I would ask you to be kind enough to look into the matter, with a view to having the same attended to at an early date.

Yours obediently,

H.F. Helmsing

Ottawa, Feb. 3, 1926.

Sir,-

In the final settlement with the Claydon Company Limited of Winnipeg on their contract for the girls' wing of the Kamloops Indian Residential School at Kamloops, they take exception to the final report and comments of Mr. Macaulay, who was the Inspector of Construction on this work. Mr. Macaulay has recommended that certain deductions be made from their contract price, and he does not approve of certain items contained in their list submitted of additional work performed in connection with this contract. Mr. Claydon of the Claydon Company Limited has been in Ottawa for the past two days, and we have discussed in detail the above mentioned items, and from information submitted by Mr. Claydon it would appear that he has grounds for objecting to the recommendations of Mr. Macaulay.

I am enclosing herewith extracts from Mr. Macaulay's final report, covering the above mentioned items, also extracts from letters received from the Claydon Co. covering the same items, and I would ask you, if possible, to arrange a meeting with Mr. Macaulay, who I understand is now residing in Vancouver, and make recommendations to the Department as to whether you think these items should be allowed. If you cannot conveniently arrange a meeting with Mr. Macaulay your report without his opinion will be quite satisfactory to the Department.

With reference to items No 1 and 2 in the list of deductions covering footings and brick work, I do not think Mr. Macaulay is correct in his statement that the Claydon Co. had included in their tender an amount for the portion of the wall of the first unit already built, as they could readily see by the plans and specifications that this wall was already in place. With regard to deduction No 3, Mr. Claydon has stated in the Department that they did not substitute lime for cement mortar.

Duncan C. Scott, Esq.,
Deputy Superintendent General.
Department of Indian Affairs,
Ottawa. Ont.

Dear Sir,

re Girls' Building, Indian School, Kamloops.

Circumstances attending our work at Cardston, and other matters prevented us taking up outstanding items on our work at the above building, and we regret very much that we were unable to do so until this date.

Our letter of the 15th. August 1925 stated our general attitude. We cannot believe that any one of the deductions made as shown by Mr. MacKenzie's letter of 11th. August 1925, have been duly considered by the Department.

Our letter of 23rd. July 1925, covered the facts of our case. We offer additional comment dealing with the items as they appear in Mr. MacKenzie's letter already referred to.

Item No.2. \$ 454.00.

Our statement in letter of 23/7/25 is correct. The Department's letter reports the Inspector as warning our foreman about the way he was handling the earth. He did not warn our man. The two of them discussed the problem and Mr. Macaulay mentioned sheet piling, and our man pointed out that this method of handling it as unsuited to the case, and would likely have cost more in the event of its being used. Mr. Macaulay admitted this, and professed a sympathetic attitude toward our receiving compensation for the expense we were put to irrespective of how it was handled. The same ground was covered later with our Mr. Ernest Claydon, and Mr. Macaulay then said that while he could^{not} guarantee payment, he would, in view of the circumstances and the nature of the soil, recommend that we receive payment for the work done.

ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

✓ Item No. 3. \$346.17.

The Inspector's statement on this point is absolutely false. No such agreement or arrangement was even suggested. The concrete was made as specified, and these additional footings and greater depth of wall work were put in solely for the reason given in our letter of 23/7/25., viz., to make a proper footing where the earth had fallen away from the levels where the plans showed the work in question to be placed. Further Mr. Macaulay definitely promised that this would be paid for before it was ever started.

✓ Item No. 4. \$206.25.

The facts are as stated in our previous letter (23/7/25). It is not fair to claim this item as covered by specifications. An unbiassed perusal of our letter just referred to, and the drawings, will surely substantiate our claim.

There are farther deductions of items not covered by our statement, but which are listed in Mr. MacKenzie's letter under numbers one to six.

Nos. 1 & 2. re West Wall.

These refer to the corner of the existing West wall of the centre unit, but the deduction is made without justification of any kind. The new building was to join up to the existing work, and the plan showed the line of the building already there. It is obvious that the end wall was built with the first unit, and we naturally figured to join up to it. The absurdity of such a deduction is immediately apparent, as, to support it, it would be necessary to imagine the first unit built without an end wall, and standing waiting for our section to be built on to it.

The question of such a deduction was never raised by Mr. Macaulay to any member of our organisation, and we cannot express ourselves strongly enough on the injustice of deducting money from us for work which we knew to exist, and which in no way entered into our contract.

No. 3. Deduction for lime. \$870.00.

The mortar was not changed to straight lime mortar, but owing to the cold weather our bricklayer put in more lime than called for, as it is well known that mortar with a heavy lime content is necessary for successful winter work. The fact remains that the cement content was not impaired, and this deduction is as unjust as the former one.

VERY

POOR COPY

Nos. 4 & 5. re Mastic.

These two items are the result of a change in the mastic flooring in the basement corridor leading to the senior girls recreation room. This was done in order to give Mr. Macaulay mastic stair treads, and a wood floor in this end part of the corridor was put down to help offset the additional cost of stair tread work. Our superintendent made an estimate with the mastic worker, and it was agreed that in view of the extra wood floor we would have to put in and the much more expensive labour on mastic stair treads as against plain floor work, the whole question would make an additional cost of \$64.00. Mr. Macaulay agreed to pay this, but at the finish of the job insisted on a credit for the work omitted. This credit had all been allowed for in good faith when we gave the addition of \$64.00., but in an attempt to satisfy him, we made a further adjustment which appears in our statement of credits, viz., \$22.70.

As things stand now the charges against us are this \$22.70. plus your deductions nos. 4 & 5, of \$120.00. & 38.33, making in all a deduction of \$181.03 against which we are paid \$64.00. for doing a more expensive piece of work than the contract calls for. Thus we are being forced to forfeit about \$120.00. for doing more than specified as well as having against us an unsatisfied account for a further \$100.00. from the Mastic people, which they are claiming as the additional labour cost of the work they did.

Item No. 6. \$19.75.

Mr. Macaulay asked us to supply additional larger bolts to hold down roof timbers in place of those called for in contract. This was done, and he agreed to pay for them. The point about credit for bolts we had brought to the job was raised, but Mr. Macaulay was told that they were no use to us, and if he wanted them on the building we would leave them. We could not give credit as the bolts were worth no more to us than freight to Winnipeg. He appeared to be satisfied with this, and no more was said about it until time of settlement, when he again raised the point. He was given the same explanation as before, and again accepted it, and Mr. Ernest Claydon again offered to leave them to Macaulays order. Mr. Macaulays answer was that he supposed it was alright, and the matter was regarded as disposed of.

We cannot believe but that the Department will fully agree that obvious injustice has been done us by

DATE 27/1/26.

Mr. Macaulay in making these deductions, and in view of the information herewith, which is given in good faith, will restore to our credit all that has been deducted, as well as give the most generous consideration possible to our request for payment for services rendered by carrying on the work through the winter weather.

Yours very truly,

CLAYDON COMPANY LIMITED.

July Twenty-third
Nineteen-Twenty-five.

The Secretary,
Dept. of Indian Affairs,
Ottawa, Ont.

Dear Sir:- RE GIRL'S WING, INDIAN SCHOOL, KAMLOOPS, B. C.

With further reference to our recent communications, we are now in a position to review the whole circumstances of this building, as Mr. E. Claydon, Jr., has returned from Kamloops bringing the details of the settlement with Mr. Macauley.

As already mentioned, Mr. Macauley took the stand that a ninety per cent certificate was final so far as he was concerned and that the Department would automatically dispose of the balance of the account on receipt of his report that the building had been taken over. This we regard as most unusual and unsatisfactory, as we were, on finishing, entitled to receive from Mr. Macauley, a certificate of final completion.

When the whole of the work had been finally gone over and brought to the point of satisfactory completion, Mr. Macauley qualified his acceptance of the building by saying that he could only report on it and leave the acceptance to the Department. He has several times expressed his satisfaction with everything in the building. This has been done to our superintendent and to Mr. E. Claydon, Jr. separately, and to both of them in the presence of Father Maguire, the Principal. In addition to expressing satisfaction, Mr. Macauley has gone so far as to say, that it had been a pleasure to work with us on a job which had been handled so well.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

We now come to our account for additional items. Mr. Macauley maintained he had no authority to make settlement on these although he acknowledged having given orders for the work covered by most of our accounts. There are others which arose as a result of differences between plans and existing conditions at the site, and still others which are a matter of interpretation of specifications which are left for the Department to give a ruling on. We propose to deal with the account in the same order as the items appear and in explanation of the way the charges are made up, we have charged on time and material basis, plus commission for such items as could be kept distinct from contract work and where additions were carried out along with contract work with which they were incorporated, we have charged for them at rates equal to similar work in the contract. Items which are noted below as being agreed to, are those which Mr. Macauley initialled as being in order on a copy of the account returned to us.

Item #1. This item together with #2 and #11, are classed by Mr. Macauley as being covered by the clause in specifications calling for an examination of site. We submit that any inspection of a site will not give details of earth levels. No contractor can be held to make a survey and stake levels on any site for the purpose of submitting an estimate. He can only figure to levels shown on plans and is not responsible for setting levels. Where there is any difference between finished grade and original grade of site, it is a recognized practice that both levels shall be shown on plans. This particular site was of a sloping nature with a high side where the deepest excavation came, the nett result of which made an average excess of three feet to be excavated from the rear portion of the building over the finished grade lines shown on plan. We were able to join up to the centre unit without much difficulty so far as grade was concerned, but it was at the rear where the sub-basement came, that we were faced with the marked difference between level of site and grade shown on plan.

Item #2. This charge was made to cover cost of handling material due to caving of the banks of excavation. The soil at the site is made up of a very thin layer of fine top soil and everything below it is a fine dry gravel and sand mixture, which could not be made to hold up by shoring, so that it was almost equal to handling quicksand. This is a condition on which no information was furnished to contractors, no test holes had been dug before tenders were called and a contractor could not therefore have any knowledge of, or allow for such conditions. The question of visiting site is not applicable as there was nothing to see to indicate such soil conditions as were met with. The only way the banks could have been held and caving prevented, would have been by solid sheet piling all round the deep portion. Shoring would not hold it and piling would be a great deal more costly than handling the extra material. Where such conditions

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR-COPY

are met with, it is the custom of the trade for a contractor to be allowed payment for the extra material moved, or if sheet piling has to be used, the owner pays for it. We have had previous experience along these lines and have received payments as outlined. It was necessary to take out the earth, sloping it back from footing line to 17' wide at top on west side and 14' on south. When concrete was placed the earth had to be backfilled and we consider the charge made a very reasonable one, and that it should be allowed to us.

Item #3. The work covered by this item was necessary in order to place the footings on solid foundation. It applies where the banks caved and footings could not be placed on backfilled earth. At the time the work was done, Mr. Macauley said it would be paid for, but at finish of the job, he said it would have to be settled by the Department. The facts are, that this is clearly work which is additional to plans and specifications.

Item #4. Paragraph 7, page 15 of specification, calls for footings to be 12" thick and to project 6" on each side of the walls they support. The footings covered by item #4, are those carrying A, stud walls enclosing corridor between store room and staff rooms on opposite side; B, brick walls enclosing same corridor where it runs between bath rooms and C, stud partitions between locker room and junior recreation room. We figured on all of these footings as laid down by the specification. The cross section on sheet 2 of drawing, shows a footing 18" x 3' which we took as being intended to mean a column footing as we could not think that this dimension could apply to footings for stud walls as it made them bigger than the footings for the 20" masonry walls outside. We therefore, followed the specification rule for figuring these footings. In anyevent this cross section could not be made to cover the footings under the brick walls mentioned above, nor that of the stud wall at the other end of the building, yet Mr. Macauley insisted that this heavy size be carried right through. We had no alternate but to put it in or close the job down and lose good weather while waiting for a decision from Ottawa. We preferred to keep going and leave it to the Department's usual fair treatment to protect us against the Inspectors' unreasonable ruling.

Item#5. Ordered and agreed to by the Inspector.

Item #6. Ordered and agreed to in all except charges for excavation. Mr. Macauley claims that we had dumped the material excavated from basement in such a position that some of it had to be moved for the retaining wall. This argument does not fit the case. Had the wall gone in as shown on the plan, the question of moving the earth again would not have come up as we had it placed far enough out to allow for original retaining wall. Owing to the extra length, about which we did not know when the basement

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

**PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA**

VERY

POOR-COPY

excavation was done. We did have to move some material taken from the basement, but this was solely owing to the extra length of the wall. The nature of the soil again arises in this cost. Instead of a trench about 4' wide, we took out and backfilled a hole varying from 15' to 20' wide. As a matter of fact, our account stands at less than the time actually expended on this particular piece of work. In our original bill we charged actual cost and Mr. Macauley took exception to the charge. In an effort to arrive at a settlement which at the time we thought could be arranged, we cut out part of the actual cost and did so thinking this would satisfy Mr. Macauley, but this is something we have since found to be utterly impossible to attain.

Item #7. Ordered and agreed to by Inspector.

Item #8. Ordered by Inspector but not passed for some unknown reason. The work was done and should be paid for.

Items #9 & 10. Ordered and agreed to by Inspector.

Item #11. This work had to be done owing to the level of the site being in line with the top of the header course over laundry windows. The earth simply had to be graded away from the windows and no visiting of the site without surveyor's levels, could have established the necessity for it. We did not figure on anything of this nature and think it nothing but fair that we should be paid for it. Work such as this appears to us to be quite apart from contract excavation for a building, but is landscape treatment of site.

Item #12 & 25. Ordered and agreed to by Inspector.

Item #26. Ordered by Inspector and payment promised for it, but apparently through an oversight not initialled on copy of statement returned to us.

Item #27. This material is not in any way covered by the specification nor shown on section. Our sub-contractors for millwork on this account, did not include it in their estimate and refused to supply unless paid for it, and on going over the matter thoroughly, we had to admit the justice of their claim and pay for it. In turn, we think we are entitled to payment.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

Item #28. This change was ordered by Mr. Macauley, but he takes exception to the cost per door. Our sub-contractors received the change too late to put it into effect before the doors were made up and in any case, their charge of \$2.50 per light for the glass is not excessive. We were unfortunate enough to have the glass in one of the doors broken and the replacement piece of glass cost \$2.40 without any question of labor to glaze it. We showed the invoice for this glass to Mr. Macauley, but he still would not admit that the price charged by the Robertson & Hackett Company was a fair one.

Item #29 to 34. Ordered and agreed to by Inspector.

Item #35. This change was necessary because the roofs were too flat to allow use of shingles. The roof over laundry entrance is much larger than shown on plan, owing to changes made in entrance which were done at considerable expense and without payment to us. Messrs. Carr and Son, our sub-contractors, supplied metal fascia, gravel stop and more flashing than required for the shingle roofs and actually spent over fifty hours time on the job, although only thirty are charged for. Mr. Macauley claims this class of roof is only worth about fifteen dollars per square and while this may be right for large roofs, it cannot be made to cover tiny jobs with eight corners to the hundred square feet, nor does this fifteen dollars per square cover flashings and other metal work. In lieu of a credit for shingles, we supplied tar, pitch, gravel and 75% of the felt used. There can therefore, be no reasonable criticism of the cost of this item particularly in view of the changes made to entrance which cost as around \$100.00 and for which we get no payment.

Item #36. There is nothing in plans or specifications to call for metal lining of vent shafts. Mr. Macauley ordered them lined and our sub-contractors did it on the understanding that they would be paid. It was not until time of final accounting that Mr. Macauley raised any question about it being additional to contract. Had there been any doubt on this point, Carr & Son would not have done the work without a ruling from the Department. Mr. Macauley claims that the shaft has no ventilation value unless it is lined, but that has no bearing whatever on what is called for by plans and specifications, which in this case, do not cover metal lining. Further, the plans do not even provide for continuing the shafts past the first floor and the lining was put in to carry past the attic on Mr. Macauley's instructions.

Items 37 to 42. Ordered and agreed to by Inspector.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

It places us in a very unpleasant position to have to write a report of this nature at the close of a job. All the charges made for additional work are justified by work done at the building and a settlement could have been arrived at had Mr. Macauley made any attempt at a reasonable disposition of the various questions involved. We made a draft of the account and submitted it to him for approval. He criticised some points and in an effort to arrive at a settlement without friction, we made revisions. This was done solely in an effort to satisfy him and was a matter of a straight loss to us, as in each case we cut actual costs to arrive at figures which we thought would bring a settlement. The result is, that our account as it reaches the Department from Mr. Macauley, does not represent true costs on all of the items, but such less amounts as were offered for the reason already stated, although these reductions were actual loss to us.

Mr. Macauley made the statement that in the matter of mutual adjustment in the life of the job, we were not giving anything, but this is quite inaccurate. We went to Kamloops prepared to meet any ordinary conditions at least half way and as an example, started out by awarding the plumbing and heating contract to a firm which Mr. Macauley favoured. When we figured the work, our price was based on using a firm to whom we found Mr. Macauley took violent exception. Their bid was given us in good faith and from our present knowledge of the Kamloops situation, we believe their work would have been satisfactory. This change, done only with a view of the good of the work and Mr. Macauleys' satisfaction, cost us nearly \$300.00. Throughout the job there were many items on which we gave more than was called for, or made substitution at Mr. Macauleys' request, which cost us more than the original item and these are not shown in our final account so that there is no justice in the statement that we have not met him in any way.

With the information contained in this letter at your disposal, we trust you will now be able to pass on our accounts and let us have payment thereon at your early convenience. If there should be any further question you wish to raise, we shall be pleased to do anything we can to supply you with the necessary information.

Trusting that the matter will receive your usual kind consideration, we are,

Yours very truly,

CLAYDON COMPANY LIMITED

COMMISSIONER'S OFFICE,
P.O. BOX 666

VICTORIA, B.C. February 26, 1926.

IN YOUR REPLY REFER TO

NO. 15/6689.

ALSO TO DATE OF THIS LETTER

Your File 154-0-5.

Dear Sir:-

I beg to acknowledge receipt of your letter of the 3rd instant referring to certain claims made by the Claydon Company, Ltd., in connection with the contract for the construction of the Girls' Wing of the Kamloops Indian Residential School amounting to \$2,502.22, all of which are protested by Mr. Macaulay, who was the Inspector of Construction. On the other hand, Mr. Claydon, in his letters of the 23 July, 1925, and 27 January, 1926, disputes Mr. Macaulay's statements. This, therefore, places me in an awkward position in endeavouring to arrive at an opinion as to whether or not the claims of the Claydon Company should be allowed.

You ask that I should arrange, if possible, to meet Mr. Macaulay to discuss the several points of contention, but I may say that I am of the opinion that no good purpose would be served by my seeing Mr. Macaulay, if such were possible, for he would, in all likelihood, hold to his original objections; in fact he would be stultifying himself if he were to go back on his original objections in the slightest degree. So far as meeting Mr. Macaulay is concerned, I may say that I have every reason to believe that it will not be possible to do so in view of the fact that some two months ago, when I was in Vancouver, I met a friend of his and he informed me that Mr. Macaulay had been residing in Vancouver for a short time, but was leaving for the United States where there was a larger field for his profession as an architect.

As regards Mr. Claydon's replies to Mr. Macaulay's objections, I beg to say that they appear to reasonably explain away the contentions of the Inspector of Construction and are entitled to receive very careful and, if possible, favourable consideration by the Department. This Firm, has, I believe, constructed at least one other residential school for the Department of Indian Affairs and you should be in a favourable position to know whether they carried out their contracts in a satisfactory manner and without disputes with the Inspector of Works such as have arisen in connection with the building of the School at Kamloops.

It, therefore, appears to me that the proper course to follow would be to judge the merits of the claims of the contractors in the Kamloops' case with what has taken place on other works which they have performed for the Department.

WED/HM.

The Secretary,
Department of Indian Affairs,

FIR DOORS, SASH AND MILL WORK

WE SPECIALISE IN STORE, BANK AND OFFICE FITTINGS IN HARDWOOD

VANCOUVER, B. C., 4th March 1926.

M. C. Scott
Duncan C. Scott, Esq.,
Deputy Superintendent General of Indian Affairs,
Ottawa, Que.

Dear Sir:

Approximately a year ago we supplied to Messrs. Claydon & Company of Winnipeg the millwork for the Girls' Wing of the Indian Residential School at Kamloops, and up to the present time we have been unable to get a settlement in full for our account of this work.

We have taken the matter up with them from time to time ever since the work was completed, and have always received the reply that your Department had not given a definite ruling in connection with our Bill of Extras. The amount outstanding on our Books at the present time is \$208.94. This amount is our invoice of May 30th 1925, copy of which we attach, less the sum of \$88.00, the latter amount being a credit allowed Claydon & Company, for lavatory doors, and 3 other doors and one frame included in our original contract and not furnished.

The last communication we had from them was to the effect that Mr. E. Claydon was in Ottawa arranging for the final closeup of this contract and that upon his return to Winnipeg, which they expected would be in the course of two or three days, they would forward us any settlement arrived at. That letter was dated 9th February last. To date we have heard nothing further from them, although we wrote them very recently in respect to it.

As you are doubtless aware we are unable to protect ourselves with the process of a lien on Government work. Therefore we are appealing to your good offices in the hope that we may be afforded some protection as to the settlement of our account.

It appears there is a matter of controversy between the Contractors and ourselves in regard to the stair work specified in Paragraph 43, Page 39, of the Specifications, also in the footnote on Page 40, which distinctly states that Par-

.....2.....

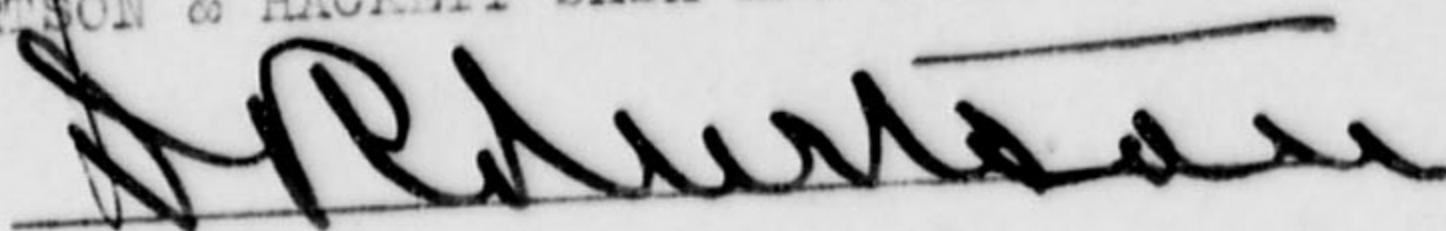

Paragraph 43 does not apply to Girls' Wing. Our contention is that this footnote entirely eliminates the staircase from the millwork and includes it in the special steel staircase specified on Page 28A. The material under dispute is the hardwood handrail which we supplied for this staircase under a threat from Claydon & Company that they would secure it elsewhere and deduct the same from our original contract. We wrote them fully at the time and explained that rather than delay the process of the work we would furnish same, but charge it to them as an "extra" to the original contract. We have consulted local architects in connection with this matter, and their interpretation of the specifications concurs with ours. Namely, that the footnote on Page 40 eliminates entirely Paragraph 43, and that the staircase specified on Page 28A should be supplied complete as detailed. Without prejudice, in any way, we would greatly appreciate having the opinion of your Architect in the matter.

Any assistance your Department can render us in the matter of final settlement of our account, as hereinbefore stated, will be appreciated by,

Yours faithfully,

ROBERTSON & HACKETT SASH AND DOOR CO. LTD.,

Dear sir,

As there is a balance still
owing on above work, kindly advise
me why this money is being
held up. I visited the school
some time ago and had all
small matters attended to.

You will do me a favor
by letting me have a cheque
and have this matter cleaned up.

and oblige

Thos Carson

Dear Mr. Fraser,--

With further reference to our conversation of this morning regarding the balance due Mr. Carson, who was the contractor for the first unit of the Kamloops Industrial School, I would say that a statement has been received from Mr. Carson showing that there is an item due him of nine hundred and ninety-nine dollars (\$999.00). It appears that this account is correct and an immediate settlement will be made with him.

Yours very truly,

Deputy Superintendent General.

Dear Mr. Fraser,-

I have looked up the correspondence from Mr. Carson with reference to the balance he claims on his contract for the Kamloops Indian Residential School, and find that he wrote to the Department some time around the first of April, (the letter is undated) asking that the balance due him be paid. He was informed on the 6th instant that if he would forward a statement showing the amount due on his contract on its receipt the matter would be given immediate consideration. To date we have not heard from Mr. Carson, but no doubt he will submit a statement, and when it is received there will be no delay in adjusting the matter.

Yours very truly,

Duncan Scott

Deputy Superintendent General.

Ottawa, February 8th, 1926.

His Excellency

The Governor General in Council.

The undersigned begs to refer to an Order of Your Excellency in Council, dated the 8th of October, 1924, which awarded the contract for the building of the Girls' Wing of the Kamloops Indian Residential School at Kamloops, in the province of British Columbia, to the Claydon Company Limited, of Winnipeg, Manitoba. The amount of the Claydon Company's tender as accepted was \$76,200.00. Their original tender as submitted to the Department of Indian Affairs was \$78,312.00, but a telegram was received from them, prior to the opening of the tenders, asking that \$2,112.00 be deducted therefrom, reducing the amount to the above mentioned sum of \$76,200.00. The next lowest tender received was from Thomas Carson, of Vancouver, and was for \$79,970.00. It will, therefore, be observed that the Claydon Company's tender was the lowest received even irrespective of the deduction.

The Claydon Company made this deduction after inquiry with regard to conditions in Kamloops, which had been in the past favourable for winter building. It would appear that owing to weather conditions, during the winter of 1924-25, which had not been experienced in the vicinity of Kamloops in the past forty years the Company had great difficulty in carrying out their work and have finished their contract with a loss of \$4,500.00. It was the intention of the Company to ask the Department for permission to abandon the work until favourable weather in the spring, but a serious fire occurred in the old school building which completely destroyed the Girls' Wing and in order to relieve the situation caused by this fire they continued with their building operations throughout the winter and satisfactorily completed the building in the spring of 1925.

In these circumstances it would seem only just that some consideration should be shown the Claydon Company and the undersigned accordingly has the honour to recommend that authority be granted to reimburse them to the amount of \$2,112.00 being the sum which was deducted from their original tender.

(sgd) Chas. Stewart
Superintendent General
of Indian Affairs.

Feb. 5, 1926.

Memorandum:

On the 8th of October, 1924, an Order in Council was passed awarding the contract for the building of the Girls' Wing of the Kamloops Indian Residential School, Kamloops, B.C. to the Claydon Co. Ltd. for \$76,200.00. Their written tender price was \$78,312.00, but a telegram was received from them, before the tenders were opened, asking that \$2,112.00 be deducted from their written tender submitted, which reduced their tender to \$76,200.00. The next lowest tender received was from Thomas Carson of Vancouver, which amounted to \$79,970.00. From the above figures it will be seen that the Claydon Company's tender, without the deduction, was the lowest tender received.

The Claydon Co. have advised the Department that due to weather conditions which have not been experienced in the vicinity of Kamloops for the past forty years they had great difficulty in carrying out their work, and finished their contract with a loss. It was this firm's intention to apply to the Department for permission to abandon the work until favourable weather in the spring, but a serious fire occurred in the old school, which completely destroyed the girls wing, and in order to relieve the situation caused by this fire they continued with building operations throughout the winter and satisfactorily completed the building in the spring.

It is proposed to reimburse the Claydon Company to the amount of \$2,112.00, which is the amount they deducted from their original tender.

They made the deduction after inquiry into building conditions in Kamloops which had been in the past favourable for winter building.

Certified copy of a Minute of a Meeting of the Treasury
The Deputy of
Board, approved by His Excellency the Governor
General in Council, on the 20th May, 1926.

INDIAN AFFAIRS:

The Board had under consideration the following memorandum from the Superintendent General of Indian Affairs:

"The undersigned begs to refer to an Order of Your Excellency in Council, dated the 8th of October, 1924, which awarded the contract for the building of the Girls' Wing of the Kamloops Indian Residential School at Kamloops, in the Province of British Columbia, to the Claydon Company, Limited, of Winnipeg, Manitoba. The amount of the Claydon Company's tender as accepted was \$76,200.00. Their original tender as submitted to the Department of Indian Affairs was \$78,312.00, but a telegram was received from them prior to the opening of the tenders, asking that \$2,112.00 be deducted therefrom, reducing the amount to the above mentioned sum of \$76,200.00. The next lowest tender received was from Thomas Carson, of Vancouver, and was for \$79,970.00. It will, therefore, be observed that the Claydon Company's tender was the lowest received even irrespective of the deduction.

copied

The Claydon Company made this deduction after inquiry with regard to conditions in Kamloops, which had been in the past favourable for winter building. It would appear that owing to weather conditions, during the winter of 1924-25, which had not been experienced in the vicinity of Kamloops in the past forty years the Company had great difficulty in carrying out their work and have finished their contract with a loss of \$4,500.00. It was the intention of the Company to ask the Department for permission to abandon the work until favourable weather in the spring, but a serious fire occurred in the old school building which completely destroyed the Girls' Wing and in order to relieve the situation caused by this fire they continued with their building operations throughout the winter and satisfactorily completed the building in the spring of 1925.

In these circumstances it would seem only just that some consideration should be shown the Claydon Company and the undersigned accordingly has the honour to recommend that authority be granted to reimburse them to the amount of \$2,112.00 being the sum which was deducted from their original tender."

The Board concur in the above report and recommendation, and submit the same for favourable consideration.

The Honourable,
The Superintendent General
of Indian Affairs.

RE INDIAN SCHOOL KAMLOOPS

Dear Sirs:-

We would like to have some information with regards to the Indian School here, of which Claydon Co. Ltd. of Winnipeg were the general contractors. We were the subcontractors for the plumbing, heating and metal work. We had a bill of extras on the work and in our last letter from Claydon Co. Ltd., they informed us that the accounts had all been passed, but that they were unable to get their money. Would you kindly let us know if the Claydon Co. Ltd. account has been settled with for the extras and oblige

Yours very truly,

ALSO TO DATE OF THIS LETTER

Your file 1927-B

Dear Sir:

Re Indian Education.

In my letter to you of the 30th ultimo, dealing with residential schools, I omitted to mention anything in connection with the residential school at Kamloops.

When in Kamloops in June last, I made a special visit to the school and the Sister Superior brought to my attention that there were no benches or lockers provided in the girls' recreation room. She also desired to have a cupboard built and divided into small sections for their hats, shoes etc. Apparently she had visited our school at Kuper Island, which is very thoroughly fitted out in this respect. I looked over the room to see what would be necessary to bring it up to the same standard as the one at Kuper Island and gave a description to Mr. Indian Agent Helmsing, asking him to get the figures from the Kamloops Sash & Door Factory as to what the cost would be. The Agent forwarded the report to me on the 15th of June which showed that the cost of the lockers, benches and cupboard would be \$366.00.

I found that the furnishing of an office for the Sister Superior had been overlooked during the purchasing of the furnishings for all the other rooms in the building, and I came to the conclusion that it was essential that a room should be equipped for the special use of the Sister Superior, and furnished with a desk, three chairs and a congoletum rug for the floor.

As Parliament dissolved about that time without passing the Estimates, I realized that it was futile to lay these matters before you, preferring to hold them over until the Estimates for 1927-28 were being dealt with.

In August during my vacation, the Rev. James McGuire, Principal of the Kamloops School wrote to Mr. Inspector Pragnell pointing out the necessity for the installation of a cupboard for the dairy, two boxes in the pantry for bread, a wood box for the kitchen, a cupboard and shelves for dishes in the scullery, which should have a sink in the centre, also two long tables.

The press reports state that Parliament will meet on the 9th of December, and it is expected that the Estimates for 1926-27 will be passed by the 18th,

The Secretary,
Department of Indian Affairs,
Ottawa.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

and, therefore, I would strongly recommend that if money is at all available that the fixtures and furnishings mentioned above should be installed.

For your information I am hereto attaching a copy of Mr. Indian Agent Helmsing's letter of the 15th of June, to which is attached a sketch of the lockers, benches and cupboard for the girls' recreation room, and also a copy of the letter received from the Reverend Principal, dated 16th of August.

C O P Y

Kamloops, B. C.
June 15, 1926.

Sir:

In compliance with instructions received from yourself while visiting Kamloops recently, I approached Harry Turner of the Kamloops Sash & Door Factory, with reference to the proposed cupboards and benches for the girls recreation room at Kamloops Residential School.

On the 14th inst., I visited the School, in company with Mr. Brown representing Harry Turner, and we looked over the whole situation. The enclosed rough plan, represents the girls' recreation room A.E.F.G. At the time of our visit, it was our intention only to put in lockers from the points D to C and B to A, but upon measuring out these two walls, it was discovered that it would be impossible to put in the necessary number of lockers required by Sister Superior, namely 80, and allow sufficient room in the locker to be of any value at all. We therefore decided that, in addition to these lockers mentioned, it would be better to run lockers from E to F. By doing this, you will note that we are able to get in 71 lockers, each of 12" width, namely A to B 23 lockers; C to D 20 lockers; E to F, 28 lockers.

Upon measuring up the walls for the benches, we have discovered that we will need 11 benches in all, namely 1 thirteen foot bench; 1 - 11 foot bench; 4 - 9 feet benches; 4 - 8 feet benches and 1 - 4'6" bench, the reason for the different lengths being the different distances between bulkheads at various intervals around the walls of the recreation room.

I also attach herewith quotation from Mr. H. Turner, in which he agrees to supply the material and do the work of installing the 71 lockers of dry fir, each locker to be supplied with a dry fir V-jointed door, brass hinges as per tracing on plan, each door being also fitted with a brass catch. At the places marked DH and BI are the pigeon holes referred to by Rev. Sister Superior, would be installed, each locker containing 42 pigeon holes 10"X12" in dimension. These are the presses----to which Sister Superior referred when speaking to you. Each of the lockers would be fitted with 3 hooks, one on each side of the locker and one at the back. The lockers are to be stained and varnished dark oak.

At the lower left hand corner of the plan you will see the detail of the cornice for the entire length of the cupboards installed. The figure quoted by Mr. Turner for this work and material is \$366.00. At the lower right hand corner of the plan I have made a rough sketch of the benches which are to be constructed. These are the same as the ones already supplied for the dining room of 2" dry fir.

Trusting that you will be able to follow the plan around the recreation room, and appreciate the idea I am intending to convey to you, and also the possibility of utilizing the wall for cupboards, in place of crowding them all into the space from A to D, and awaiting your instructions in the matter.

Yours obediently,
"H.F. Helmsing"
Indian Agent.

C O P Y

Indian School,
Kamloops, Aug. 16, 1926

Dear Inspector:

After the fire, as you remember, we all decided to exercise patience, to wait for the furnishing of the new wing instead of incurring expense by buying temporary fixtures. Last year the linoleums, desks, tables, bedsteads, mattresses and blankets were furnished for the corridors, offices, dormitories and sewing rooms. To complete that list I would suggest a desk for the Superior's room.

There were, however, furnishings or fixtures for the provision rooms, dining rooms and sculleries which should have fallen under a collateral contract. For one reason or another these furnishings or fixtures were left in abeyance. They comprised, roughly speaking, a cupboard for the dairy, two boxes for bread in the pantry, a box for wood in the kitchen, all of which should be lined with zinc, a cupboard and shelves for dishes in the scullery which should have a sink in the center and two long tables requiring the attention of a carpenter and a plumber for a few hours; tables for the girls' wash room and benches for their recreation. Would you kindly learn from the department how far they would wish to go in these matters and instruct the Agent here accordingly, as it appears to me that most of these fixtures would have to be manufactured by the carpenter in the different rooms? Attention to this matter would fall under the domain of the Indian Agent.

With best wishes, I remain,

Very truly yours,

"James McGuire, O.M.I."

DEPARTMENT OF INDIAN AFFAIRS

OFFICE OF
INSPECTOR OF INDIAN AGENCIES
BRITISH COLUMBIA

P.O. BOX 752
KAMLOOPS, B.C.
October 25th, 1926.

Dear Dr. Scott:-

I am in receipt of your 154-0-5 of the 13th inst., and in accordance with your instructions, I visited the Kamloops Residential School on the 22nd inst., and went carefully into the matter of accommodation there, whether any better use can be made of the present accommodation, and the advisability of proceeding in the near future with the other wing of the School. I discussed the matter lengthily with the Agent and Principal, and also looked into the matter myself by going over the whole of the dormitories and class rooms.

1. With reference to the best method of using the present accommodation, I find that there are now resident at the school 71 boys and 80 girls, a total of 151. They are distributed as follows in the new wing:- 30 of the younger boys, up to about 10 years of age are sleeping in the top storey dormitory of the new wing, i.e. the girls' wing. If there were more younger boys, about 10 more could be placed there, but it must be remembered that they have no inside toilet accommodation, except the two night closets.

28 and 33 girls are sleeping in the big dormitories and 13 in a little dormitory. This is full capacity, and the balance of the girls are sleeping in the infirmaries.

All the classrooms in the girls' wing are in use to their capacity, and the smaller male children have had to be accommodated in the staff dining room, a crowded and poorly lighted room for 27 children at school work. The new wing is, therefore, filled to capacity.

In the old buildings, there are 41 of the older boys sleeping in the dormitory, which is overcrowded. They have only outside lavatory accommodation, with very poor ablution tables inside, and practically no cupboard room. They have only one classroom in an old building, using double desks with room for 40. Their recreation room is in the old building and very small. The whole of the above mentioned buildings are heated inadequately with stoves, and in extreme cold I don't know what could be done to keep the place warm.

This accounts for the present accommodation, and although we all three went into the matter thoroughly, I cannot see how the present accommodation can be better apportioned. In other words, it is being used at the present time, to its very best advantage, though with various drawbacks and difficulties that cannot be overcome without further and improved accommodation.

Dr. Duncan C. Scott,
Deputy Superintendent General,
Department of Indian Affairs,
OTTAWA, Ont.

VERY

POOR COPY

October 25, 1926.

Having in view this fact, and for the hereinafter mentioned reasons, I can only advise the building of the new wing as a solution.

1. The mixing of boys and girls dormitories in the same wing, as at present, is not at all desirable, on moral and disciplinary grounds alone.
2. The boys that are accommodated there have, of necessity, to use outside toilets, which, at their best, are a serious menace to health in an institution of this kind, apart from the discomfort occasioned these younger children during the cold weather.
3. The necessary use for want of other accommodation of the staff dining room as a school room for these younger children is not advisable. The room is not built or lighted for such purpose, is far too small, and deprives the staff of a room where they can get their meals.
4. By having to accommodate boys in this wing, the number of girls that can be taken at the school is restricted.
5. The old building where over 40 now sleep, is not suitable for that purpose. It is crowded, difficult to heat, owing to its age, and dangerous from the point of view of fire, being heated with stoves, which, in addition, cause extra labour. It has no fire escapes and I have to point out that a fire already occurred in the girls' old wing. Overheating of stoves in attempting to keep the place reasonably warm, is a very probable danger.
6. The sanitary accommodation is very inadequate, and dangerous to health. There are no water closets in the building, and night pans have to be used, a poor and dangerous makeshift in crowded dormitories. The closets are all outside and are open pit ones, very difficult, despite the use of disinfectants, to keep clean. Serious contamination of the ground is likely to occur after all these years of use.
7. The wash room and ablution table is inadequate and subject to a total freeze-up.
8. Cupboard accommodation is practically nil.
9. The recreation room is very small, being the old laundry, and is in such a poor condition that it is very difficult to heat with a stove.
10. The bigger boys' classroom is heated by a stove and owing to its smallness, double desks have to be used, which system is not considered good by educational authorities. It might also be better lighted.
11. Owing to the isolation of these old buildings from the main building and one another, the difficulty of supervision is largely increased, and discomfort caused to all in cold, wintry weather, as all communication is in the open.

Dr. D.C. Scott.

-3-

October 25, 1926.

12. Under present conditions, the water pressure in the hydrants in the new building is very slight, and would be useless in case of fire.

13. The use at times of the infirmaries for sleeping accommodation is not desirable as they may be required in case of sickness.

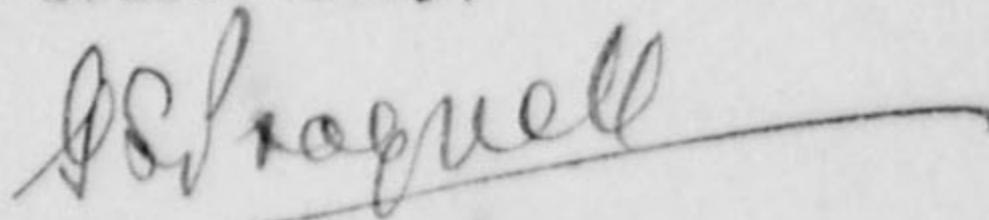

14. Finally, the Principal assures me that he can easily find many more pupils to fill the new wing if it is built. He, of course, would have 71 boys to put into it straight away, which would then leave the two ~~boys~~ dormitories in each wing to be filled. Mr. Agent Helmsing also informs me that there are a number of children in his area who might get a chance to go to school, and I myself know that in the Northern part of the Lytton Agency, there are a number of children who are not getting any schooling.

Having in view, therefore, all the above facts, and at the same time, bearing in mind that it is of urgent necessity that the Lytton School be rebuilt, which will mean double expenditure, I still can only recommend that construction of the new wing be proceeded with in the near future.

I am really somewhat reluctant in making this recommendation as I do not want the chance of the Lytton building being made to be held up, but after examining all details as specified above, I cannot make any other recommendation.

Hoping that this report is fully understandable,

Yours truly,

(Geo. S. Pragnell)
Inspector of Indian Agencies.

Sir,—

SCHOOLS BRANCH
NOV 10 1926

I beg to enclose herewith copy of a letter received from Rev. Father McGuire, O.M.I., Principal of Kamloops Residential School, which contains a request for the purchase of certain building materials for the completion of his potato cellar which he is building at the School.

You will notice that the total expenditure requested amounts to the sum of \$126.00, and I most respectfully submit that your favourable consideration be given this request, as a potato cellar is undoubtedly a very important addition to the school in order that they may keep their root crops from frost, and they have not room in the building itself to store the amount of potatoes and roots which they have.

You will also notice that the Father requests an answer to this request by night lettergram at his expense, in order that he may proceed with the work with the least possible delay.

Yours obediently,

(H.F. Helmsing)
Indian Agent.

Indian School,
Kamloops, B.C.,
Oct. 25, 1926.

Dear Agent:-

We are making a request for sme material to finish our potato cellar; for the walls and part of the roof we brought logs some fifteen miles. They were cut at the Timber Reserve outside the Indian Reserve.

We are requesting you for authority to purchase four thousand feet of shiplap, one thousand feet of two inch plank, one keg of two and a half inch nails, four barrels of lime, twelve sacks of cement and rubberoid roofing to cover sixteen hundred feet. The shiplap and planks would run \$21. from the Kamloops Lumber Company. The nails about \$5.65, and the rubberoid roofing, sixteen rolls at \$4.25 a roll. The cement would run about \$1.35 from Johnston & Gill, and the lime \$4.00 a bbl.

The Kamloops Lumber Company and Johnston & Gill are practically alone in the field here to supply lumber, lime and cement, so we are purchasing everything from them,

If an answer to this could be obtained from the Department by a night lettergram at our expense I would be pleased, as we are hastening to put our potatoes under cover.

Yours very truly,

(Sgd) James McGuire, O.M.I.

154-0-5 Indian School,
Kamloops, Sep. 30, 1926.

Dear Doctor *[Signature]*
[Handwritten: m/jm to file] The pressure of business at the end of the quarter has belated some of my correspondence, the enclosure included.

In further reference to your letter of Aug. 11th, I may say that my letter was not intended as an argument for the erection of the boys' wing; in fact I think I have not yet written to you concerning that matter.

The object of my letter was to learn whether or not you intended to place an item on the estimates covering the cost of the boys' building. I wished to know your attitude before placing before you any further information, or before taking any definite action.

In regard to the disposal of space at the school, I believe of course that we are making the best possible use of it. I have never done anything else besides school work, so I feel quite sure that we are using room to the best possible advantage. However, it is the obvious that very often escapes a man: a man too close to a church may see a stone instead of a building! So here. Why not ask the Agent, the Inspector of Agencies, the class Inspector, or Indian Commissioner to pay me a visit with this end in view?

The information of these Officers would have

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

the advantage of being first-hand; they would know
whereof they spoke.

My ordinary duties occupy too much of my
time to allow me much time for correspondence.
However, when I learn whether or not you intend to
list our building in your coming estimates, I may set down
in order some of this scattered information.

Yours very truly,
James McGuire O.M.S.

Ottawa, September 23rd, 1926.

Sir:

I have your letter of the 17th instant, relative to the request made in November, last, for authority to purchase 1 barrel of oil for the floors in the classrooms, dormitories, etc., at the Kamloops Indian Residential School.

In reply I beg to say that the Department will approve of the purchase of one barrel of suitable oil after securing competitive prices. It is understood that the school management will be responsible for the labour in applying the oil. In future, however, the Rev. Principal will have to make purchase of any oil that may be necessary for the floors.

Please forward properly certified vouchers, in duplicate, in the usual manner covering the expenditure incurred in the purchase of the barrel of oil.

Your obedient servant,

J. D. McLEAN

September 17, 1926

Sir,—

With reference to Departmental letter No. 154-0-5, under date of November 24, 1925, authorizing the purchase of one barrel of oil for use in the dormitories, classrooms, etc., I beg to say that the Rev. Principal has not as yet purchased the said oil, owing to his desire to get a suitable oil, that is, an oil that will not darken the floors.

Rev. Father McGuire, today phoned this office asking if it would be in order to purchase this oil now. As the fiscal year for which this expenditure was authorized, has expired, Mr. Inspector Pragnell and myself are both of the opinion that a new authority is now necessary.

I should be much obliged, therefore, if the Department would re-authorize this expenditure at as early a date as possible.

Yours obediently,

Alfred H. Barber

INDIAN AGENT'S OFFICE

Kamloops, B.C.,

IN YOUR REPLY REFER TO
No. K-16-1222
ALSO
TO DATE OF THIS LETTER

July 17, 1926 19

Sir,—

With reference to voucher 238-26 herewith enclosed, in favour of Mr. J.B. Stewart, Kamloops, B.C., for repairs to the floors, etc., at Kamloops Residential School, owing to scorching from the pipe leading from the boiler in the laundry room to the main chimney, as referred to in my wire of the 5th inst., I beg to advise you that Mr. Stewart, upon opening up the floor in the girls' recreation room, which is situated immediately above the laundry, discovered that the stringers in the floor were badly scorched, and also some paper and refuse which had been left in below the floor in the recreation room, and over the ceiling of the boiler room of the laundry, had also become scorched. The flue leading to the main chimney was situated quite close to the ceiling in the boiler room. Over the pipe there was a piece of metal nailed to the ceiling. This pipe, while the fire was burning in the furnace, on wash days, naturally became very hot, heating the metal which is nailed on the ceiling. There was no air space allowed between this metal and ceiling, consequently the ceiling had become scorched causing smoke to penetrate through the floors and baseboards in the girls' recreation room, causing the fire scare which we recently had.

Mr. Stewart removed this piece of metal and has replaced it with another piece of sheet metal, allowing an air space between the ceiling and the metal, and below this metal he has placed a sheet of asbestos, with another sheet of black iron below that, so that now there should be no danger of scorching the ceiling of the boiler room, and no danger of fire under ordinary conditions.

The voucher enclosed is in the sum of \$24.95 which includes material supplied, together with 19 hours labor and three trips between Kamloops and the School. I most respectfully submit that the account be honoured and paid forthwith.

Yours obediently,

H. F. Helmsing

November 23, 1926.

Memorandum:

Approved
Dr. Scott
R
Dr. Scott

Mr. Commissioner Ditchburn recommends that benches and lockers be built in the girls' recreation room; that cupboards and tables be provided for the dairy, pantry and kitchen and that the Sister Superior's office be furnished at the Kamloops Indian Residential School. The cost of these improvements will be nearly \$600. Mr. Orr agrees that the work is necessary and I wish to recommend that it be proceeded with at the present time. Funds will be available as soon as the House votes our Supply.

Ottawa, November 24, 1926.

Sir:

I have your 125/8091 of the 5th instant, with reference to improvements that are urgently needed at the present time at the Kamloops Indian Residential School. You may arrange for the purchase of a desk, three chairs and a congoleum rug for the office of the Sister Superior. Competitive prices should be secured.

You may also arrange to have built by day labour a cupboard for the dairy, two bread boxes for the pantry, a woodbox for the kitchen and a cupboard and shelves for dishes in the scullery. Further, you may arrange for two long tables in the scullery with a sink in the centre. The Indian Agent or yourself should purchase the materials and the work should be done under his supervision, on a day labour basis. Time sheets, in duplicate, showing the receipts of the carpenter, should be kept. If Mr. Helmsing requires an accountable cheque for payment of labour, he should make application to the Department.

With reference to benches and lockers in the girls' recreation room, I have the offer with rough sketch of the Kamloops Sash and Door Factory. Is it possible to secure competitive prices for this work? Is there another local firm who would like to quote? If so, you should have them do so and forward their tenders to the Department.

154-0-5

Ottawa, December 11th, 1926.

Sir:

I have your letter of the 3rd instant, enclosing a voucher in favour of C. C. Snowden, Calgary, covering the cost of one drum of floor oil supplied for the use of the Kamloops Indian Residential School.

In reply I beg to say that payment to the amount of \$61.10 covering the cost of the oil only will be made. The Principal of the school should arrange for the payment of the drum which contained this oil, and when the same is empty, he could have it returned to the above firm and a refund obtained. Please inform the Reverend Principal accordingly. We note that a charge of \$8 was made for the drum. We will forward a cheque to the above firm to the amount of \$61.10 covering the cost of the oil in the course of the next few days. We note from the copy of the letter which you enclosed from the Principal that this oil was considered by him to be the best he could obtain for the purpose for which it is required.

As you were informed in our letter of September 23rd, last, any further supply of oil required for the floors will have to be purchased by the school from their per capita grant or other receipts. Please explain to the above firm that payment is being made by the Department for the oil only.

Your obedient servant,

J. D. McLEAN

J. D. McLean,
Asst. Deputy and Secretary.

Department file 154-0-5, September 23, 1926.

Sir,—

R

With reference to the above matter, I beg to enclose herewith voucher No. 402-26, in favour of C.C. Snowden, Calgary, for one 47 gallon drum of Sanispray oil, shipped to Rev. Father McGuire, f.o.b. Kamloops, at the rate of \$1.30 per gallon.

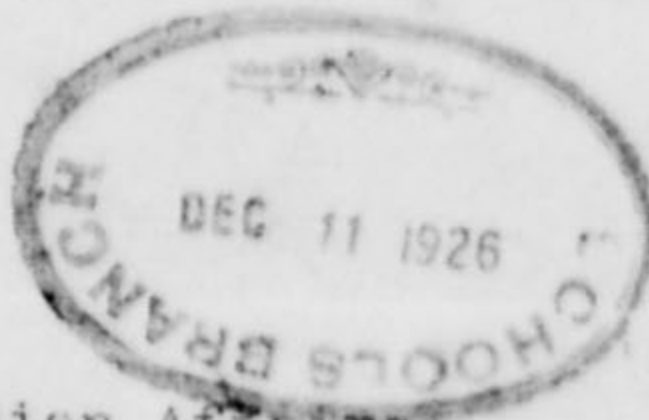

I also attach herewith copy of Rev. Father McGuire's letter, in which he requests that the oil quoted on by C.C. Snowden of Calgary, be purchased as, in his opinion, it is the most suitable oil for the purpose required, consequently, this oil was ordered and I trust that my action will be approved.

Yours obediently,

H.F. Helmsing
(H.F. Helmsing)

Indian School,

Kamloops, Nov. 13, 1926.

Dear Agent:-

About a year ago authority was granted to purchase a barrel of oil for the school floors.

We did not buy at the time. The floors were bright; the oil was dark. Since then we have found several oils which we think will preserve the wood and at the same time not darken it.- We renewed permission through Mr. Barber, Acting Indian Agent in September, as you see by the enclosure.

We are sending the prices submitted. We are of the opinion that the oil supplied by Mr. C.C. Snowden, Calgary, Alta., is the most suitable.

As usual we are leaving the actual ordering to your office.

Yours very truly,

James McGuire, O.M.I.

Mr. Helmsing,
Indian Agent,
City.

Kamloops, B.C.,

January 31, 1927. 19

IN YOUR REPLY REFER TO
No. **K-16-1858**
ALSO
TO DATE OF THIS LETTER

Sir,—

I have the honour to submit that under date of December 1, 1926, I was instructed by Mr. Commissioner Ditchburn to have some cupboards and benches constructed for the girls' recreation room at Kamloops Industrial School, also some cupboards for the dairy, two bread boxes, a wood box, and cupboard and shelves for the sculleries, all these various items to be constructed by day labour at the School.

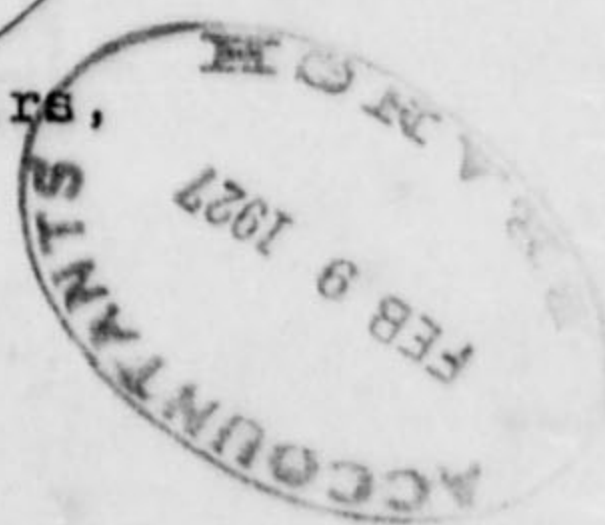

In instructing me to have this done, Mr. Commissioner Ditchburn advised me to make application to the Department for an accountable cheque to cover payment for labour, and I would appreciate it if upon receipt of this letter, the Department would forward me the sum of \$300.00, to cover this item, the same to be accounted for by pay-sheets in the usual manner.

Yours obediently,

(H.F. Helmsing)
Indian Agent.

Ottawa, January 31st, 1927.

Sir:

I have your letter of the 24th instant, relative to the request of the Principal of the Kamloops Indian Residential School for authority to expend a sum not exceeding \$10 in the placing of a spark arrester on the chimney of the boiler in the laundry.

In reply I beg to say that the action taken by you in authorizing the Principal to proceed with the work is approved. Vouchers, in duplicate, properly certified, should be forwarded covering the expenditure when this work has been completed.

Your obedient servant,

J. D. McLEAN

ALSO

TO DATE OF THIS LETTER

[Signature]
Sir,—

I have the honour to advise you that Rev. Father McGuire, Principal of Kamloops Residential School, has made the request that I ask the Department for authority to expend a sum not exceeding ten dollars, to be used in placing a spark arrester on the chimney of the boiler in the laundry, as he finds a certain amount of danger from fire, due to heavy red-hot sparks falling from this chimney to other parts of the building.

In view of the fact that the expense of the manufacture of this arrester, and the placing of the same on the chimney will not exceed ten dollars, I have authorized the Reverend Father to proceed with the work, and I trust that my actions in this matter will meet with the approval of the Department.

Yours obediently,

H.J. DAVIES
Builder & Contractor

Kamloops, B.C., Feb. 18, 1927.

To
Rev. Father McGuire,
Indian Reserve School,
Kamloops, B.C.

Rev. Sir:-

Re your recent enquiry regarding cost of
cupboard built recently in scullery at Indian Reserve
School, Kamloops, would say that in the event of your
requiring a similar cupboard built, the cost would not
exceed \$135.00.

Yours truly,

(Sgd) H.J. Davies.

K-16-1996

Kamloops, B.C.,
March 7th, 1927.

Sir:-

I have had constructed recently, upon instructions from Mr. Commissioner Ditchburn, a cupboard in one of the sculleries for dishes, table linen, brooms, etc., at the Kamloops Residential School.

Rev. Father McGuire, Principal of the School, has now made request for a similar cupboard to be constructed in the second scullery. Upon approaching Mr. Commissioner Ditchburn, I have been instructed by him to forward you a sketch of the same, together with copy of a letter received from Mr. Davies, contractor, stating that he is willing to construct a similar cupboard for a price not exceeding \$135.

I am enclosing herewith sketch of the cupboard in question, which you will notice I have marked "A" in red chalk, and I would appreciate if, upon the Department's purposes having been served, you will be kind enough to return this sketch, as the contractor would like to have same when constructing the cupboard, if so authorized.

Kindly advise me at your earliest opportunity if I may have Mr. Davies construct this second cupboard.

Sir:

I have your letter of the 7th instant, relative to the request of the Principal of the Kamloops Indian Residential School to have a cupboard built in the second scullery of a similar type to that recently constructed in one of the other sculleries. We note that the contractor will build this cupboard at a cost not exceeding \$135.

In reply I beg to say that the Department will approve of this cupboard being erected, and the sketch plan which you forwarded is returned herewith as requested for the use of the contractor.

When the work has been completed, you should forward properly certified vouchers, in duplicate, covering the expenditure incurred.

Ottawa, April 16, 1927.

Sir:

I have your letter of the 8th instant, enclosing copy of a communication from the Principal of the Kamloops Indian Residential School, in which he requests to be supplied with a sewing machine to be used in the work of shoe-repairing.

I shall be pleased if you will have the Principal forward a description of the machine he requires. The Singer Sewing Machine Company manufacture a machine for leather stitching, known as their Improved No. 29-K 51, which might be satisfactory for the requirements at this school. However, please consult the Principal and inform the Department definitely as to the type of machine that is required, giving, if possible, a catalogue number, the name of the manufacturer and where the same can be obtained. When we have this information, consideration will be given to supplying the machine requested.

Your obedient servant,

J. D. McLEAN

Sir,—

I beg to enclose herewith copy of letter this day received from Rev. Father McGuire, Principal of Kamloops Residential School, which is self explanatory.

In view of the large number of shoes constantly needing repairing, I would recommend that the present obsolete and worn out machine be replaced by a new one.

Awaiting your instructions in the matter,

Yours obediently,

Indian School,

Kamloops, April 7, 1927.

Dear Mr. Barber:-

As the sewing machine, or sewing machine patcher, which has been here since my arrival, and I know not how long before, has completely worn out, I am asking you to request the Department for a new one. The large number of shoes now to be repaired makes it imperative to have the work done rapidly.

Yours very truly,

((Sgd)) James McGuire, O.M.I:

DEPARTMENT OF INDIAN AFFAIRS

OFFICE OF
INSPECTOR OF INDIAN AGENCIES
BRITISH COLUMBIA

DEPT. OF INDIAN AFFAIRS
MAY 3 1927
RECORDED

P.O. Box 752
KAMLOOPS, B.C.
April 28, 1927.

Dear Sir:-

I have to report that on Monday, April 25th, a fire occurred at Kamloops Residential School, in which the slaughter house and implement shed were burned down, becoming a total loss. As luck would have it, the wind was blowing away from the main buildings, otherwise it is more than probable that they would have caught fire as well.

The Kamloops Fire Brigade took a chance against the advice of the Public Works Engineer, and crossed over the bridge to the School in order to deal with the fire. When they arrived there, it was found that they could do nothing, as their length of intake, (suction hose) was not long enough to get down to the river in the low state of the water. They were, therefore, powerless to help in any way.

The fire originated from some sparks in connection with the boiling of some chicken food in a small iron boiler some 30 feet or more away from the building, but there was a strong wind blowing at the time.

arrangement being made when necessary completed

I am reporting this matter because I wish to again draw your attention to the fact that this school, a valuable new building is now without any fire protection whatever, and it is naturally a very anxious job for the Principal to be responsible both for the property and life in a building of this sort.

At the time of my visit over to the School to see what had happened, my attention was drawn to a matter that I have not noticed or heard of before. The chimney from the laundry is not sufficiently high to carry off the sparks. Apparently an attempt was made to rectify this matter by placing a spark arrester on the top of the chimney, but from what was shown me this spark arrester is evidently not sufficient, and the chimney should be heightened at least ten feet. The shingles on the top of the school building are already drying out and beginning to curl. This is due to excessive heat of the sun and radiation from surrounding rocks and sand. Sparks, therefore, from this laundry chimney are liable to lodge in the turning ends of these shingles and start fire, and if a fire should be started at the present moment, nothing could stop it.

I should recommend, therefore, that authority be wired this Agency to have this chimney heightened as soon as possible.

Yours truly,

Geo. S. Pragnell

(Geo. S. Pragnell)

Inspector of Indian Agencies.

Ottawa, May 4th, 1927.

Sir:

I have your letter of the 28th ultimo, reporting a fire which occurred in the slaughter house and implement shed at the Kamloops Indian Residential School. It is noted that the fire originated from sparks from a small iron boiler in which chicken food was being boiled. The Department is pleased to learn that under the circumstances as mentioned by you at the time no further damage occurred.

With reference to your recommendation that the chimney of the laundry be heightened some 10 feet, I beg to confirm the following telegram to you of yesterday's date: -

"You may add to chimney laundry building Kamloops school".

You should arrange for the purchase of any material required and for the labour. When the work is completed, you should forward properly certified vouchers, in duplicate, covering the expenditure incurred.

In connection with fire protection for the buildings, I may say that arrangements will be made to install adequate fire escapes, fire protection, etc. when the new wing is completed. I shall be pleased, however, if you will state what fire extinguishers, if any, are on hand at this school and if you would recommend that a further supply be installed at the present time.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy and Secretary.

Ottawa, May 6th, 1927.

Gentlemen:

I have to request that you will arrange to supply one (1) Singer sewing machine for leather stitching for the use of the Indian residential school at Kamloops, B.C. The style required is that described in your catalogue as "Improved No. 29-K-51".

Please notify Mr. Geo. S. Pragnell, Inspector of Indian Agencies, P.O. Box 752, Kamloops, B.C., from your nearest branch office concerning who will furnish this machine and when it will be available. Mr. Pragnell will then give your local representative directions for delivery.

The account for the machine should be made out in duplicate and should show the retail price and discount of 40% allowed "on which terms purchase is made". This account should be forwarded in duplicate to Mr. Pragnell, who, upon receipt of the machine, will certify the account and send it to the Department for payment.

Yours very truly,

Dear Colonel:-

In reply to your recent kind letter regarding a sewing machine for shoe repairing, I wish to say that at present, we do not intend to use this machine for teaching the work to the boys. So far the repair work, which consists mostly of stitching, the Singer **Sewing Stitcher**, Improved No. 29-K-51, is quite satisfactory. It goes, I believe, under the above catalogue name and number and can be obtained through the agency of Mr. Julian Garrish of this City.

Yours very truly,

Sgd.) James McGuire, O.M.I.,

Colonel Pragnell,
Inspector of Ind. Agencies,

Dear Mr. Orr:

Rumor has it that our last wing goes up this year. In the event, may I ask you two favors:

1. To send the plans first, as is your custom:

2. As Mr. Macauley is no longer here, to allow me or yourselves, to secure the services of the Architect, Mr. E. F. Brown, to aid us look over the plans and send back to you our suggestions before the contract is let, allowing him the usual remuneration of six dollars a day (I think) for the labor.

This was done for the girls' wing. During construction there was no trouble: when finished, it is what we want.

Yours very truly,
James McGuire O.M.S.

Ottawa, May 6th, 1927.

Sir:

I have your letter of the 26th ultimo, enclosing copy of a communication from the Principal of the Kamloops Indian Residential School relative to the type of sewing machine required for shoe repair work.

In reply I beg to inform you that we are today placing an order with the Singer Sewing Machine Company, here, to supply one (1) leather stitching machine, described in their catalogue as "Improved No. 29-K-51". This firm have been requested to notify you from their nearest branch office concerning who will furnish the machine and when it will be available for delivery. You should then supply them with full shipping directions.

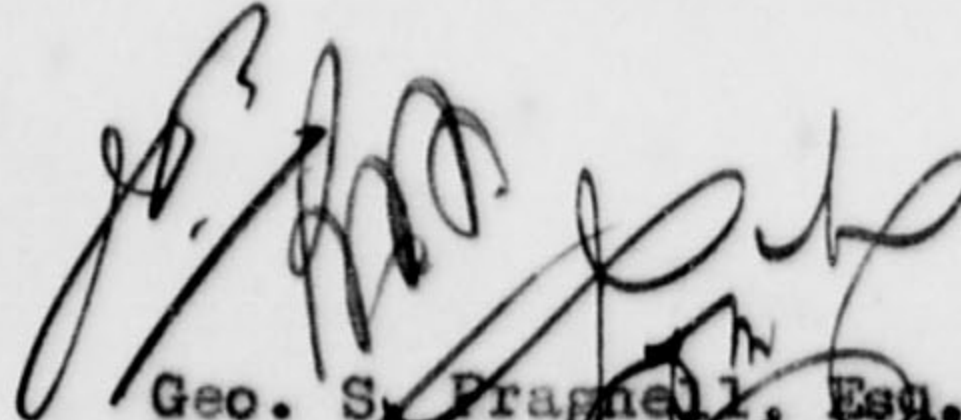

The account for the machine will be sent you in duplicate, and should show the retail price and discount of 40% allowed "on which terms purchase is made". Upon receipt of the machine, if in good condition, you should certify the account in the usual manner and send it to the Department for payment.

It is hoped that when this machine arrives it will be satisfactory and meet the requirements of the school.

Your obedient servant,

J. D. McLEAN

DEPARTMENT OF INDIAN AFFAIRS

OFFICE OF
INSPECTOR OF INDIAN AGENCIES
BRITISH COLUMBIA

P.O. Box 752
KAMLOOPS, B.C.

June 23rd., 1927.

Dear Sir:-

I beg to enclose copies of the letters just received by me from the Principal of Kamloops Indian Residential School, and the Medical Health Officer, respectively. The latter, I have to point out, is also Medical Officer for the Indian Department.

*ack also
his letter
25th with
encl
RDP*

The matter has arisen over the fact that the Boys' Wing of this school is not to be erected immediately, and the question as to what is to be done with the boys during the coming winter.

You will notice from the letters of both these gentlemen, that they consider the present accommodation and arrangements for the boys at the school, most unsanitary and unsuitable from the health point of view, in addition to the extreme difficulty and discomfort over the heating in the cold weather; to which I might add the great danger from fire, and possibly loss of life.

They attribute, as you can see, a lot of the ill health amongst the children during the last eight or nine months, to these conditions.

If you will refer to my report, ^{made} at Dr. Scott's request, dated October 26th, 1926, I think you will find that I have covered the ground as completely as possible, and showed the necessity for immediate improvement in the accommodation for the boys.

I have nothing to add to this except to say that probably both these gentlemen are right in attributing the infection, colds, pneumonia, etc., that has been prevalent among the children, to the conditions complained of.

You will note in the Principal's letter that he asked me to pay an early visit and make arrangements for the housing of the boys.

I therefore made the visit, discussed the matter with him, the Sister Superior and the Medical Health Officer. It is a very hard matter to make suggestions in this case, except that I agree with them that something should be done, and that it would be very risky, if not cruel, to keep the boys during this coming winter, under the present conditions.

I take it that in order to save time, I am in order in laying before you, the alternatives and suggestions in the matter, as they occur to me.

The Secretary,
Department of Indian Affairs,
OTTAWA, Ont.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR-COPY

June 23rd., 1927.

The alternatives appear to be three.

1. To close the school during the winter, anyhow as regards the boys.
2. To improve, if possible, the present accommodation.
3. To make fresh accommodation, even if only temporary.

No. 1 is for many reasons not desirable, and I take it, it might lead to the closing of the rest of the School, owing to want of necessary boy labour.

No. 2 would cost quite a lot of money, due to the age of the present buildings, and their detachment from the new building. Even then, it is doubtful if they could be made sanitary as the surrounding ground is honeycombed with old cesspits. Any money, too, spent in this way would be a total loss, having in view the probable erection of the new wing in the near future.

No. 3, seems to be the only solution other than closing, that I can see.

My suggestion in this matter is as follows:

Having in view the fact that at some future time, a building will have to be erected for work shops and manual training, which I understand is considered of importance by the Department, that the said building be erected immediately, and used for the winter to accommodate the boys.

I should suggest a two storey, concrete walled building about 20'X 50' with gravelled roof, abutting on to the concrete engine house of the new building. I attach a rough sketch to help explain my suggestion. This building I estimate, very roughly, should cost about \$5000.00, but please do not take my figure, as Mr. Orr can probably estimate the cost very quickly. Some money is, of course, saved by the fact that one wall, the end one, would abut against the concrete wall of the engine house. Again, the heating of the building could be done by connecting with the present heating plant. This also applies to the plumbing, which would be of the simplest and only temporary. Rough ablution tables, after the style of those used in the barrack hutments during the war. I attach sketches of same.

The ground floor could be concrete floored at one end, and could ultimately be used as a blacksmith shop, but temporarily as an ablution and wash room. The remainder of the ground floor, where the carpenter, shoemakers, harness repair shops, and possibly garage would ultimately be, could be used temporarily as a recreation room, and not partitioned off.

Upstairs could be used a dormitory for the boys during the winter, and then finally used as sleeping quarters for the male help on the farm, who at the present time, have no decent sleeping quarters.

*Not included
Credited to
Prague's all App*

The Secretary.

-3-

June 23rd., 1927.

Large windows would not be required, nor any expensive inside fittings. Any partition required could be of a temporary nature.

This building would be fireproof, with easy access to the engine room roof from the dormitory, and so to the ground in case of fire. It would be sanitary, away from any possible source of contamination, and would be handy for administration. It would be attached to the boys' wing, which would be desirable in the future, as such training and work would be in the boys' curriculum. It would not disfigure the main building. The money would not be wasted, and finally, I do not think it would be a costly matter, and could be erected, I expect, at short notice.

The above is the only solution that I can think of, though tendered with due respect to your more mature judgment of the situation.

I have sent a copy of this correspondence to Mr. Ditchburn, as I have already done with my previous report already mentioned.

Hoping that I am in order in tendering my summing up of the situation and suggestions,

Yours truly,

G. S. Pragnell

Indian School,

Kamloops, June 17, 1927.

Dear Colonel:-

1. The enclosure from our Medical Health Officer explains itself in its own line. Dr. Archibald, Dr. H.L. Burris, the Sister and I have been following these outbreaks in a quiet and determined manner for some time past. So these findings are nothing new.

2. We have removed the old laundry and the little boys's toilets and are giving the ground a copious coat of lime before harrowing or spading thoroughly.

3. Where the laundry water overflowed last year we have cultivated the ground and planted a small vegetable garden.

4. In the face of these difficulties I would suggest that you pay us an early visit and make arrangements for the housing of the boys.

5. We may consider ourselves extremely fortunate that we have succeeded in carrying out these investigations without the news spreading among the Indians. The nearest approach to it was when Joe Jules, during the cold weather, removed his children from school. Their commentaries on the little boys in the old laundry caused me much alarm indeed. I'll have no more of it.

6. The children leave for holidays on June 21st and return Aug. 1st.

Yours very truly,

(Sgd) James McGuire O.M.I.

THE KAMLOOPS CLINIC

Kamloops, B.C., June 15th.1927.

Reverend Father McGuire,
Superintendent, Industrial School,
Kamloops, B.C.

Dear Sir:-

At your request I have recently examined the sanitary conditions at your school and find as follows:-

The recreation room for the younger boys is the old laundry which is most inadequate and most unsanitary. The wood about the floors is water-soaked and the surrounding soil is saturated with the accumulation of years. It is most unsanitary besides being very cold in winter. The younger boys going from this room to the heated dormitories of the new building where they sleep are subjected to conditions very detrimental to their health, and we have had experience of numerous infections, colds, bronchitis and pneumonia during the past winter.

The dormitories and school room of the older boys consists of two buildings which are scarcely an improvement on the old laundry. They are cold in winter and absolutely unsuitable for the purposes for which they are intended. I looked over the wash-room of the dormitories yesterday which is in a decidedly dilapidated and unsanitary state.

Besides this, these old buildings have outside toilets which are in a tumble-down, rotten condition; the soil about them is saturated with sewerage and the stench from them is unbearable. These toilets are a distinct menace to the health of the children and not at all in keeping with the appointments of a modern school. I would advise that these be demolished at once and some new arrangements made.

During the past year we have had a succession of infections in the school which it is impossible to eradicate in the presence of such unsanitary conditions.

Yours very sincerely,

(Sgd) M.G. Archibald,
MEDICAL HEALTH OFFICER

Sir:

I have your letter of the 16th instant, enclosing voucher for \$25 in connection with the installation of a spark arrester on one of the chimneys of the Kamloops Indian Residential School. Your action in this connection is approved. I note that it will not be necessary to lengthen the chimney.

I have also your letter of the 14th instant, with reference to a temporary fire alarm system at this school. You may accept the offer of Fernie Brothers as mentioned in their tender, which I am returning to you for your guidance. This tender should accompany the certified voucher in duplicate when the work has been satisfactorily completed.

I have also your letter of the 11th instant, enclosing a communication from the Reverend Principal relative to a drying-room for the Kamloops Institution. I regret there are no funds for this purpose at the present time, but a note has been made for future estimates. Please inform the Reverend Principal.

Your obedient servant,

J. D. McLEAN

DEPARTMENT OF INDIAN AFFAIRS

OFFICE OF
INSPECTOR OF INDIAN AGENCIES
BRITISH COLUMBIA

P.O. Box 752
KAMLOOPS, B.C.
June 16th, 1927.

Dear Sir:-

With further reference to the matter of heightening one of the chimneys at Kamloops Residential School, I now beg to enclose vouchers for \$25.00, covering charges for installing a proper spark arrester in order to avoid danger from sparks from the said chimney falling on the shingle roof.

OK
This matter was gone into very carefully and the local builders here inform me that with a proper spark arrester placed on this chimney as has now been done, there is no need of heightening the chimney as was originally considered by me. There is also some doubt whether, without great expense, this chimney could be heightened. Therefore, having in view the said expense and the opinion expressed by the builders on this point, I came to the conclusion that if, as stated, the spark arrester of a certain mesh was placed on the chimney, it would eliminate the danger, and there was no need of going to a much greater expense in strengthening and heightening the chimney. I trust that my decision will meet with the approval of the Department.

Payment recommended
I notice, with reference to back correspondence on this matter with the Indian Agent, that your 154-0-5 of the 31st of January, authorized the Indian to expend the sum of \$10.00 for a spark arrester. Now \$10.00 would properly instal a proper spark arrester, I don't know, as it is utterly impossible to put one in at this price. Having the urgency of the case in view, and the danger involved by delay as well as the saving effected by not having the chimney heightened, I took it that my authorizing an extra \$15.00 would be in order.

Yours truly,

[Handwritten signature]

Dear Sir:-

In accordance with your instructions, contained in your 154-0-5 of the 25th ulto., in connection with the installing of a temporary fire alarm system in Kamloops Residential School, I beg to enclose the only tender that I have received upon the same.

There are only two electrical firms in Kamloops, and although I have approached the other man, Mr. C.L. Wain, and asked for a tender from him, I have received no tender as yet, and on enquiry by phone, I find that he is out of town.

I have only asked for small vibrating bells, as the gongs, which run from 9" upwards, which would largely add to the expense, and as this is only a temporary measure, I thought it was unnecessary. These vibrating bells ring in eight important positions, and will, I think do all that is required.

Yours truly,

[Handwritten signature: Geo. S. Pragnell]

TRUCK DRY ROOMS

TRUCK DRY ROOMS will at once appeal to those who are looking for a strong, well built and symmetrically proportioned dry room. The outside wood cabinet is constructed of the most carefully selected white pine, tongued, grooved and beaded, and finished with two coats of yellow shellac. Built in sections which bolt together and thus can be easily transported and erected. The inner surface of the wood is sheeted with asbestos, which in turn is covered with a lining of bright tin. The tin used is of heavy plate and the sheets (10 x 14 inches) are lock-jointed rather than being soldered together. This construction makes the Truck Dry Room absolutely fire-proof on the inside.

The steam coils are of $1\frac{1}{4}$ in. pipe, 18 pipes high, and are made up in sections with return bends, so that each is a complete coil in itself. After being made up, each coil is tested to 150 pounds pressure before leaving the factory.

The trucks are constructed entirely of metal and are supplied with galvanized iron carrier bars. Furnishings for a Truck include three all-metal collar and cuff bars and six plain bars. If the three collar and cuff bars are not desired, we will substitute six plain bars therefor, provided this is specified when ordering. Each truck will be fitted with three pairs of cleats arranged for four bars each, so that there will be more openings for bars than there would be bars furnished.

The proper circulation of the air in each compartment is effected by means of a fan suspended from the roof. This fan has four metal blades and is driven by a horizontal countershaft and bevel gears.

The equipment also includes a floor covering of galvanized iron, to be used when dryer is placed on a wood floor, or anchor bolts where dryer is placed on cement floor.

The kind of floor on which dryer is to be placed should be specified when ordering. Suitable angle iron tracks for guiding the trucks are also provided.

Furnished in "Canadian" diversity of control—Belt or Motor Driven.

OFFICE AND FACTORY
47-93 STERLING ROAD

Vancouver, B.C.,

May 18th, 1927.

Reverend Father McGuire, O.M.I.,
C/o Indian School,
Kamloops, B.C.

Dear Sir:-

We acknowledge with thanks your request of May 12th, and in
reply are enclosing catalogue page illustrating Truck Type Dry Rooms, on
which we can quote you the following prices:-

#3420 - Wood Cabinet, 1 door, two trucks.....\$450.00

3430 - Metal " , 1 door, two trucks..... 735.00

While the above cabinets are shipped with two trucks, the
dry room itself only holds one.

#3421 - Wood Cabinet, 2 doors, three trucks.....\$630.00

3431 - Metal " , 2 " , " "1045.00

You will note that three trucks are sent with the above cab-
inets, but dry room itself holds two only.

The above prices are f.o.b. our factory, Toronto, subject to Government
Sales Tax of 4%. The #3420 and 3430 will weight approximately 3000 lbs.
The #3421 and 3431 will weigh approximately 4000 lbs. We bring carloads
of machinery through from the factory quite frequently, and no doubt could
have one of these Dry Rooms enclosed for you, and could offer you the car-
load rate of \$2.20 per 100 lbs. The local rate from Vancouver to Kamloops
can be give you by your own agent at that point.

If there is any further information that you are requiring,
please advise.

Yours truly,
STANLEY BROCK LIMITED.

ALSO TO DATE OF THIS LETTER

Dear Mr. Orr:-

On April 4th I dictated a letter in your office to be forwarded to Mr. Inspector Pragnell, asking him to get quotations on cupboarding to be installed at the Kamloops Indian School, the sketches for which were forwarded to me at Ottawa by Mr. Indian Agent Helmsing.

I find now that the sketches were not forwarded to Inspector Pragnell with my letter, a copy of which is attached hereto.

I would be much obliged if you would have the above referred to sketches sent out to me.

I may say that I have also received from the Kamloops office sketches of further work which the Rev. Principal would like to have installed at the School. These I am enclosing herewith in order that you may decide as to whether or not they should be built. If you are determined that any or all of them should be constructed, please return the sketches to me so that tenders for the construction of the same may be obtained.

WED/KD.

Enclosures:-

Yours obediently,

H. E. Ditchburn

Dear Sir:-

I have received a letter today, dated 30th ultimo, from Mr. Helmsing with reference to the cupboards, wash tables, etc., asked for by the Reverend Father McGuire for the Kamloops Indian Residential School. Mr. Helmsing was to have included with these sketches a quotation for the building of the same. This has not been sent, and I would be obliged if you would obtain and forward to me a price for the building of the cupboards, etc.

Yours truly,

"W. E. Ditchburn."

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Ottawa, May 25, 1927.

Sir:

I have your letter of the 17th instant, with reference to fire protection at the Kamloops Indian Residential School. I note that you are securing a report on the possibility of heightening the laundry chimney.

The Department is today ordering a full supply of chemical fire extinguishers. An extra quota of the 2½ gallon size is being supplied, as these are considered more useful than the large extinguishers that are on wheels. One quart size extinguishers are also being supplied. Three of the large size should be placed in the basement and three on each of the other three floors, at convenient and easily accessible places. The six extra of the large size should be placed where they can be quickly used in the event of fire on the roof. The small size extinguishers should be placed in the more remote portions of the building. A total of 18 large and 20 small ones are being ordered.

You may let me have an estimate of the cost of installing a simple fire alarm system in the building. Nothing elaborate should be estimated on, as I consider it sufficient to have two gongs and two push buttons on each floor. When you have received a quotation on this installation, you should forward it to the Department without delay. You may also arrange to have fire axes placed in inexpensive cases at the exit points of the building, which are ordinarily kept locked at night.

Your obedient servant,

J. D. McLean,
Asst. Deputy and Secretary.

Geo. S. Pragnell, Esq.,
Inspector of Indian Agencies,
P. O. Box 752,
Kamloops, B. C.

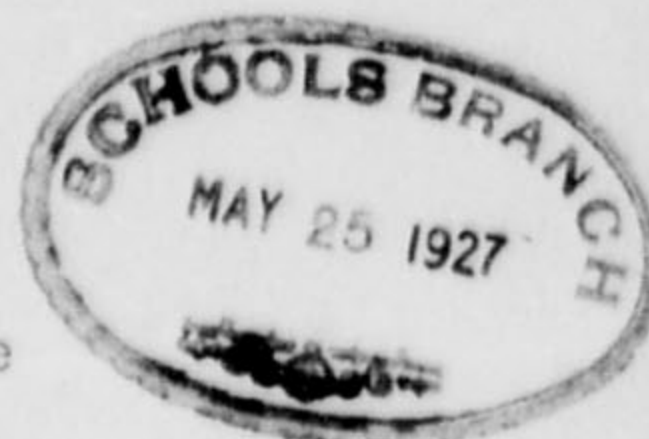

154-0-5

DEPARTMENT OF INDIAN AFFAIRS

OFFICE OF
INSPECTOR OF INDIAN AGENCIES
BRITISH COLUMBIA

P.O. Box 752
KAMLOOPS, B.C.
May 17th, 1927.

Dear Sir:-

I am in receipt of your 154-0-5 of the 4th inst., with reference to fire protection at Kamloops Indian Residential School.

note | I am awaiting the builder's report upon the possibility of heightening the laundry chimney in question, but, in the meanwhile, as a temporary expedient, a spark arrester has been placed over the top of the said chimney. You probably know that authority has been granted for a spark arrester before, but it had not been properly erected, and even then, I shall not be satisfied until the said chimney is heightened, as I believe that is the only safe method during the extremely hot weather here.

In the last paragraph of your letter, you mention that adequate fire protection will be installed when the new wing is completed. I had hopes, and so had Father McGuire, that the new wing would shortly be started, but I hear a rumor to the effect that it is not going to be done this year. I much regret this, in more ways than one, as I am constantly in fear of an outbreak of infectious disease, owing to the unsatisfactory accommodation now being used by the boys.

at mep | In the meanwhile, however, particularly having in view the fact that the school, apparently, is not going to be started this year, I am very strongly in favour of a reasonably powerful chemical fire extinguisher being placed on each floor. This might save incipient fire started in the building, but, as I have already pointed out, the chief danger from fire is in connection with the roof, and whether these extinguishers would be of any use in the case of fire on the roof, I cannot say.

*Supply
fire supply
extinguishers* | As you know from my reports, wood shingles up here in the Dry Belt, are very apt to curl, in the extreme heat and allow sparks to lodge underneath them. After four or five months, without a drop of rain, or even dew, these shingles become like tinder. An instance of this was the fire in the roof at Cranbrook Indian Residential School.

I notice that you ask whether I would recommend a further supply of fire extinguishers. Apparently there is some error in this, as according to Reverend Father McGuire, there are none at all.

I should also strongly recommend that some system of fire alarm be installed in the building. I should

suggest that gongs be placed outside each door, and that an electrical button (push) to ring these gongs, be placed in the Principal's room, and in that of the head Sister on each floor.

This should not be an expensive business to instal, and would, in case of fire, ensure the children getting out of bed immediately and proceed to their nearest fire escape. As it is, in case of fire, somebody is liable to run along the passage shouting that there is a fire and this, naturally, would only lead to confusion. In addition too, it would be useful for fire drill.

Finally, outside each fire escape an axe, in a glass case, should be placed, in order that, in case of fire, in the confusion, the keys to the exits, should be forgotten, there is something handy to break open the exits. I might say that these exits have to be kept locked at nights, owing to the fact that some of the children would leave for other parts during the nights, if they were not locked in.

Yours truly,

G. S. Pragnell

Ottawa, August 16, 1927

Dear Dr. King -

Upon my return to the city, I have received your letter of the 18th ultimo, with enclosure from the Kamloops Health Officer concerning the advisability of the early erection of the proposed new boys' wing at the Indian Residential School there.

It is true that conditions for the older boys at this institution are far from satisfactory. I quite understand the impatience of the Reverend Principal, but we are discussing our plans with him and will try to secure an appropriation to complete the new main building as soon as possible.

Yours faithfully,

CHAS. STEWART

Ottawa, August 9, 1927.

Dear Dr. King:

I have your letter of the 18th ultimo with enclosure from the Kamloops Medical Health Officer concerning the advisability of the early erection of the proposed new boys' wing at the Indian residential school there. It is true that conditions for the older boys at this institution are far from satisfactory, and I hope to secure an appropriation to complete the new main building next year. I quite understand the impatience of the Rev. Principal, but the Department's plans for the future are well known to him. As I have already informed you, it will be impossible for me to visit Kamloops at this time.

MEMORANDUM

Ottawa, 4th August, 1927.

Dr. Scott

I am enclosing herewith a letter addressed to Mr. Stewart by the Hon. Dr. King regarding the sanitary conditions at the Indian School at Kamloops.

Since Dr. King signed this letter we have seen him and advised that it would be impossible to visit Kamloops, but I would be pleased if you would look into the letter from the Medical Health Officer at Kamloops regarding the school and have a letter prepared to Dr. King for Mr. Stewart's signature.

Ottawa, August 1st, 1927.

Rev. Sir:

I am directed to acknowledge your letter of the 9th ultimo and to authorize you to expend approximately \$215.00 in the furnishing of two staff rooms and a sister's room in the girls' dormitory at the Kamloops Indian Residential School. You may also arrange to have a door placed between the kitchen and dining room. Mr. Inspector Pragnell is being advised of this authority, and you should send your accounts to him for his certificate.

I am writing to Mr. Indian Commissioner Ditchburn with reference to a wash stand and lockers. The plans are being forwarded to his office.

I am returning the enclosures.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy and Secretary.

Ottawa, August 1st, 1927.

Sir:

I have your No. 125/9230 of June 7th addressed to Mr. Orr, which I regret has been inadvertently unanswered. I regret that no trace can be found of the sketches which should have been directed to Inspector Pagnell in April, last. At the first opportunity, you should determine exactly what is required, and forward your recommendation, with prices, if possible. I may say that Father McGuire has written that he would like the wash stand and lockers for the girls' side installed at the first opportunity.

The sketches you forwarded which have to do with further work requested by the Reverend Principal are being returned to you. Some of this appears unnecessary to the Department, but you may make a recommendation, with estimate of the cost, regarding whatever you consider is required.

Your obedient servant,

A. F. MacKenzie,
Acting Asst. Deputy and Secretary.

Dear Doctor M. J. [Signature]

As the children return from vacation on Aug. 1st and at the same time two more Sisters are added to our staff, I am requesting authority:

1. To furnish two more rooms and put a wardrobe and dresser with drawers in the Sister's cell in the medium girls' dormitory. - The prices would not exceed those enclosed:

2. To install the washstand and lockers for the girls. - The enclosure says the plans are with you. These plans cost us much time and money. Please return them and permit us to install the washstand and lockers at least immediately:

3. To put in the door between the kitchen and dining room to control the fly pest.

Yours very truly,

James McQuire O.M.S.

Dear Sir:-

I am in receipt of your 154-0-5 of the 26th ulto., with reference to voucher 331-27, in favour of Messrs. Fernie Bros.

attached to vouchers
I regret that I omitted to enclose the said tender, which now accompanies this letter. This was the only tender I received from the two firms of Electric Lighting engineers in Kamloops. Messrs. Wain was approached upon the matter giving him full particulars, and I repeatedly asked him to submit a tender, which was never done. I therefore could not wait any longer.

Yours truly,

Geo. S. Pragnell

(Geo. S. Pragnell)

Inspector of Indian Agencies.

Dear Sir:-

I beg to enclose copy of a letter that I have just received from Rev. James McGuire, Principal of Kamloops Residential School.

I also enclose three copies of account mentioned in his letter, which is more or less self explanatory, and apparently amounts to this, that the original motor, which I presume was installed by the Department was not adequate for present requirements. The Principal therefore purchased a more powerful one, for which he paid himself, and seems to think that the Department should pay for the installation, and which seems reasonable enough.

Yours truly,

(Geo. S. Pragnell)

Inspector of Indian Agencies.

COPY.

Indian School,
Kamloops, Aug. 23, 1927.

Dear. Colonel:-

Will you kindly present the remainder of this account to the Department for payment?

The pump motor and pneumatic tank were intended for the old house: they were efficient and satisfactory.

For the new kitchen, laundry and toilets they were never intended: they are inadequate and unsatisfactory.

In this account I paid for a three horse power motor to replace one of two and a half to increase the efficiency.-- I feel the Department should meet the incidentals.

Yours very truly,

James McGuire, O.M.I.

Dear Sir:-

On this date I sent you a night lettergram informing you that one of the furnaces at Kamloops Residential School had a burned out grate, and that the second furnace grate was also going, the bars apparently bending with the heat.

The exact description of the parts required to replace the grate in the first furnace are as follows:-

Centre strong back bar No. C.9.A.;
Cross bars E.25.S.;
Complete set of fire bars or grate.

These furnaces are called Birchfield Furnaces, and are made by Vulcan Iron Works of Vancouver, B.C.

I do not know what kind of agreement was made between the Department and the Manufacturers, but even presuming bad handling and all wood being used in these grates, it looks to me as though they could not have been of very good quality to go in such a short while. I am told that they have actually only been in use for two winters, this being the third one.

The grate on the second furnace will soon be out of business as well. The bars are all bending downwards, one having already broken away and the others are likely to break off very soon.

I thought that you would like to have this information.

The Secretary,
Dept. Indian Affairs,
OTTAWA, Ont.

Sir,-

With further reference to your telegram of the 18th instant, regarding the boilers at the Kamloops School, I am at a loss to know why the grates in these boilers are burnt out, as they have only been in use a very short time. It would appear that the school authorities have neglected to keep the ash pit clean, which of course would immediately cause the burning out of the grates.

Please let me have a full report on these boilers, and if the grates were defective I think the Vulcan Iron Works of Vancouver should replace them without cost.

Your obedient servant,

J. D. McLean.

Dear Sir:-

RE: INDIAN SCHOOL. KAMLOOPS.

We have your letter of the 23rd inst., requesting payment in connection with an alleged overpayment to us in connection with certificate # 13, Indian Residential School, Kamloops.

The payment made to us, namely, \$2,207.10, was accepted by us as payment in full of an account we had against the Department for \$2,836.90.

As we accepted such a reduction in our bill in order to get a settlement we cannot consider any further refund, and we think if the heads of the Department took the trouble to go over our account as it ought to be gone into we should be in receipt of additional payment.

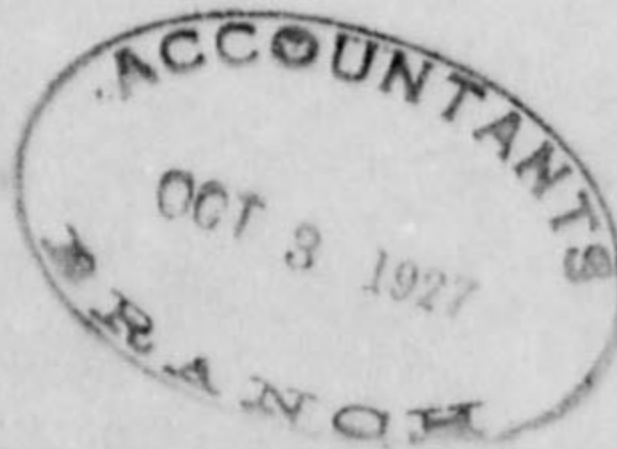

As the matter stands we were mulcted of so much money due to the misrepresentations of Government Inspector McCauley that we think it would be gross injustice for us to be asked to make further contribution to the cost of this school.

Yours very truly,

CLAYDON COMPANY LIMITED.

MEMORANDUM

Re: Overpayment, Kamloop Indian
Industrial School.

Education cheque No. 4829 of January 13, 1927, for \$2,207.10 was issued in favour of Claydon Co., Ltd. under certificate No. 13 as final payment on contract for the erection of wing on Kamloops Industrial School.

In the accounts submitted in support of this payment the following errors appear:-

Item 5, Sheet 1, 943 lbs at 6¢	\$ 58.58
should be \$56.58 overpaid \$2.00	
Item 6, Sheet 2, Car & Son, hand rail	70.60
should be \$72.60 underpaid \$2.00	
Item 28, Sheet 5, total is carried out as	197.61
should be \$118.86 overpaid \$78.75	
10% commission	19.76
should be \$11.87 overpaid \$7.89	
Item 32, Sheet 6, 68 feet at 15¢	10.70
should be \$10.20, overpaid .50¢	

In the credits shown on the final statement under "materials used for fir floor" the total is carried out as \$45.15. It should be \$42.75

As a result of the errors referred to above, there is a total overpayment to the Claydon Co. of \$84.74. Will you kindly have the necessary adjustment made.

P.O. Box 752
KAMLOOPS, B.C.

November 18th, 1927.

K-16-2529.

Dear Sir:

On yesterday's date I visited Kamloops Indian School, and met the new Principal, Rev. Father Duplanil. I am glad to say that he has managed to work out a method of housing the boys as regards their sleeping quarters, any-way during the winter months.

He proposes to use the top storey of the girls' wing. In the interests of discipline, and in order that there be no contact between the boys and girls, he will use the fire escape as a staircase for the boys to get up and down to their dormitory. However, we find that a few necessary changes will have to take place to make this possible. The fire escape, as it is, would be dangerous to use during the winter time, as the iron gets very slippery under foot, and also the hand rail, owing to the extreme cold, would be likely to hurt the hands. It is therefore necessary that a hand rail 2x4, planed, be wired to the present iron rail, and also that the platforms be covered with boards, and that boards be fastened to each step.

In addition, it would be necessary to build a further flight of about ten steps from where the fire escape ends to the ground. Finally, a double sided Yale, or other patent lock would be necessary on the door communicating between the upper dormitory and the flight of steps leading to the second floor where the girls are.

Having in view the fact of the difficulty of accommodating the boys, and the present bad state of their other accommodation, I would strongly recommend that authority be granted to do this work.

The Principal also drew my attention to the fact that the scullery shelves, lockers and ablution tables, as already planned for, have not been installed. I wrote Mr. Ditchburn upon this matter today, as I understand he has it in hand.

The Principal also asked that I get authority to purchase some strips of Battleship linoleum about one foot wide to place above the blackboards that are now being installed. This linoleum is to take the children's work and drawing pins, and is exactly the same thing that was placed above the blackboards originally put in the school.

Finally he requested that a door be built in, at an estimated cost of \$65.00, from the second floor just at the head of the staircase. This board would serve two purposes:

The Secretary,
Department of Indian Affairs,
OTTAWA, Ont.

The Secretary,

-2-

November 18th, 1927.

(1) It would cut off the girls' dormitories from the staircase in case the boys may have to use that in very bad weather;

(2) It would be very useful in acting as a check draught in the case of fire.

As, apparently, the new Principal is doing his best to make a success of the school, using what accommodation he has available, I think it would be as well to encourage him by granting these requested improvements.

Yours truly,

GS Pragnell

Dear Sir:-

With reference to your 154-0-5 of the 21st inst., regarding necessary replacement of grates at Kamloops Indian Residential School, owing to their being burned out, I have to report that my enquiries on the subject resulted as follows:-

Firstly, it is alleged by the authorities at the school that the ashes have always been kept clear. Secondly, that nothing but wood has ever been used in these boilers. Whilst I, myself, am not technically clear upon the matter, having in view the fact that only wood has been used in these boilers, I should not think that the grates should have burned out so quickly, even if they there had been a certain amount of wood ash left in the pits. This neglect, however, is denied by the school authorities. Certainly when I visited the School and saw the boilers in use, the pits were quite clear of any ashes whatever.

When making the order to the Vulcan Iron Works, I pointed out that I did not think that these grate bars would have burned out and bent in such a short time. Their answer was that they thought that probably the grates had not been cleaned out often enough and ash allowed to accumulate. They did not, however, comment upon the fact of which I informed them, that only wood had been used. I am writing them again upon the matter.

Yours truly,

Geo S. Pragnell

Dear Sir:-

I beg to enclose in triplicate, an account handed to me by Rev. Father Duplanil, Principal of Kamloops Residential School. He does not know whether this account was authorized by yourselves directly to the late Principal, Rev. Father McGuire. Whilst the work was apparently very necessary, and had to be done, the matter was not referred to this office. No authority was given to Mr. Giddens to do this work, by me.

I am therefore enclosing same to find out whether you know anything about the matter at all. If you have no correspondence upon the matter and want to save time, I can only recommend that the account be paid as it was for work that was done and absolutely necessary, the said work being in connection with the lavatories at the school, and in explanation of the necessity of same, Mr. Giddens, the plumber, informs me that the defects were probably caused through some foreign matter, possibly sand, in the water pumped from the river.

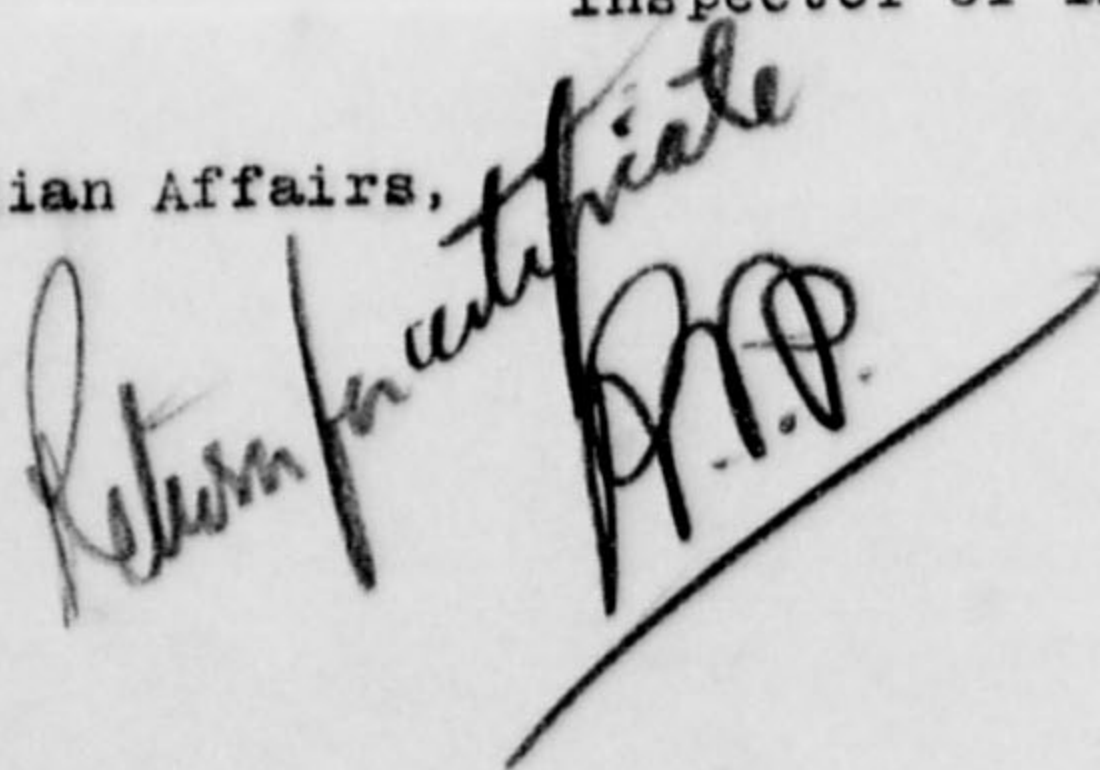

Yours truly,

(Geo. S. Pragnell)

154-0-5

Nov. 25, 1927.

Sir,-

Replying to your letter of the 18th instant, with reference to placing the boys in the top floor of the new girls' wing, I beg to say that I do not think it is necessary to make use of the fire escapes as a means of access to these dormitories. If the corridors on the ground and first floor are closed by doors, as indicated in red on the accompanying blue prints, the boys could use the general stair case, without being able to obtain access to the girls' portion of the building.

You may purchase the necessary battleship linoleum for placing above the black boards.

Your obedient servant,

J. D. McLean.
Assistant Deputy and Secretary.

Your file 154-0-5.

Dear Sir:-

Replying to your letter of the 1st ^{August} ~~instant~~ dealing with the question of installing in the Kamloops Indian school certain fixtures as shown on sketches supplied by Reverend Jno. McGuire, Principal, and others on sketches which have been lost, I beg to report that on a visit to this School on September 15th last, the matter was taken up with Principal McGuire and I asked him to have new sketches prepared for the fixtures shown on those sketches which could not be found. These were for the lockers in the wash room, wash room tables, etc., etc., and it was arranged that he should do this, after which he should turn them over to Constable Barber (Inspector Pragnell being absent) who was to obtain estimates from the local factories for the different fixtures. After waiting until the 11th November, I wrote to Mr. Inspector Pragnell on the matter and then learned that shortly after my September visit to the School, Father McGuire had been replaced by Reverend Jno. Duphlanil. On the 17th instant I went to Kamloops to see the new Principal and on other Departmental business.

In discussing the subject with the Reverend Principal, he informed me that he believed that what he considered to be necessary in the way of fixtures could be constructed on the premises at a great deal less expense to the Department than if the work were given out by contract and manufactured in one of the local wood work shops. He estimated that by carrying out the elaborate ideas of Reverend Father McGuire it would cost fully \$1,200. or \$1,500., but he felt that if he were allowed to employ a joiner himself and purchase the material, he could have the work done for about \$700.00. He stated that he had arrangements whereby he could purchase lumber and other material in Vancouver at much cheaper rates than the same could be obtained in Kamloops.

I, therefore, would recommend the matter be handled in this manner, as the new Principal is a very practical man with considerable experience. He was principal of St. Mary's School at Mission and the Sechelt School before going to Kamloops.

After going all over the building, I recommend the following fixtures be installed:-

Lockers for the wash rooms,
Wash tables in the wash rooms,
Table for the fruit room,
Two cupboards for the pantry,
Lockers for the girls' kitchenette rooms,
Cupboard in the store room,
A few more lockers in the girls' recreation room,

The Secretary,
Department of Indian Affairs,
Ottawa.

January 5, 1928.

Memorandum:

DR. SCOTT.

Mr. Commissioner Ditchburn, after very careful consideration and a personal visit to Kamloops, strongly recommends that \$700 be allowed the Reverend Principal for the purpose of providing lockers, cupboards, etc., in the main building. Mr. Orr and I have discussed this at some length and we wish to recommend the scheme. Father J. Duplanil will be responsible for the activity. The past principal's proposals involved an expenditure of nearly twice this amount.

Sir:

I wish to acknowledge and thank you for your 125/10605 of the 23rd ultimo, reporting on the lockers, cupboards, etc., required at the Kamloops Indian Residential School. The Deputy Superintendent General has approved of your proposal that Rev. Father Duplanil be authorized to expend the sum of \$700 in the purchase of material and for the wages of an expert carpenter. As you have been at the school, I should be grateful if you would send Father Duplanil the letter of instructions.

Dear Sir:-

I enclose herewith duplicates of notice of annual fees for boiler inspection, which were forwarded to me by Rev. Father J. Duplanil, Principal of Kamloops Residential School. His letter reads as follows:

"I am mailing you herewith a bill in connection with the inspection of boilers at the Kamloops Indian Res. School. The inspection was made at the request of the Dept. but before my taking over the school, and, though I know that the inspection was made, I cannot sign the vouchers."

I presume that these documents were forwarded by the Provincial Government, but I do not know. Beyond the fact that I was informed by the authorities at the School that a boiler inspection had taken place, I know nothing of the matter. I can find no precedent as to who pays these accounts.

Yours truly,

(Geo. S. Pragnell)
Inspector of Indian Agencies.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

COMMISSIONER'S OFFICE,
P. O. BOX 666

VICTORIA, B.C., February 11, 1928.

IN YOUR REPLY REFER TO
No. 20/10918.
ALSO TO DATE OF THIS LETTER

Your File 154-0-5.

Dear Sir:-

I have the honour herewith to submit the following vouchers in connection with the installation of certain fixtures required at the Kamloops Indian Residential School as recommended in my letter of December 23, 1927, and authorized in your letter dated January 7th, 1928:-

Voucher No. 90A---Marshall-Wells B.C. Ltd-----\$79.95,
" " 91A---Canadian Western Lumber
Co. Ltd.-----315.70,
" " 92A---Rev. Jno. Duplanil-- (wages paid) 73.50,
" " 93A---Rev. Jno. Duplanil-- (frt. paid) 96.01.

It will be noted that Vouchers Nos. 92A and 93A are made out in favour of Rev. John Duplanil, Principal of the Kamloops Indian Residential School, as it was necessary for him to pay the freight on the materials shipped and also to advance wages to Mr. C. Reedman, the carpenter employed to install the fixtures. Other vouchers will follow as the work proceeds.

Your obedient servant,

W. E. Ditchburn

Ottawa, March 14, 1928.

Sir:

With reference to your statement of the 5th instant, requesting payment of current year's boiler fees, to the amount of \$30.47 and interest thereon, 13¢, covering the cost of the inspection of the boilers at the Kamloops Indian Residential School, I beg to say that an account was received from your office, dated October 7, 1927, to the amount of \$30.47. Cheque, No. 4022, in payment, was sent you on November 21st, last.

If the statement which you now forward is in payment of the fees for any inspection made since the above mentioned date, I shall be pleased if you will forward an account, in duplicate, to Lt. Col. G. S. Pragnell, Inspector of Indian Agencies, Post Office Box 752, Kamloops, B. C.

Your obedient servant.

MEMORANDUM:

Dr. Scott.

Plans and specifications have been prepared for the proposed boys' wing for the Kamloops Indian Residential School. Will you please advise me of the names of newspapers in which advertisements may be inserted inviting tenders for the building.

In 1924 when tenders were invited for the Girls' wing the advertisement was inserted in the Vancouver Sun, and the Telegram of Kamloops.

Dear Sir:-

Further to my letter of the 17th instant, I have the honour herewith to enclose voucher No. 111-A for \$42.00 in favour of Rev. Jno. Duplanil, Principal of the Kamloops Indian Residential School, for wages advanced by him to Mr. C. Reedman, carpenter.

This is the final voucher to be submitted as the installation of the fixtures at the abovementioned School has now been completed.

I am herewith attaching a copy of the Reverend Principal's letter and also a description of the work carried out.

Enclosures:-

Your obedient servant,

W.E.Ditchburn, Esq.,
Indian Commissioner for B.C.
Victoria, B.C.

Dear Sir:-

I am sending you herewith the last voucher in connection with certain fixtures required by the Kamloops Indian Residential School, at Kamloops, B.C. The brief description I am mailing you will give you a fair idea of the work done by Mr. Reedman and the value the Indian Dept. is getting.

There is only a certain fixture in the linen room to bring the work to an end, but I am willing to pay for it. It will be only a question of about one week's work.

I hope that you will recommend that payment be made of the vouchers sent you last week and this day.

Yours very sincerely,

(Sgd.) John Duplanil.

Deputy Superintendent General of Indian Affairs,
Ottawa, Ont.

Dear Mr Scott:-

I thank you for your prompt reply to my request, and at the same time for approving of the appointment of Rev. J. Mc Caffrey to Sechelt.

You will be pleased to know that under Father J. Duplanil's management the Kamloops school continues to increase in pupilage. This is due to his energy, and also to the assurance you have given the Indians that the building will be completed this year. This I venture to repeat is all important. May I take the liberty of asking when the work will be begun?

I have the honour to be
Yours very respectfully,

J. Welch. D. M. S.

COMMISSIONER'S OFFICE,
P. O. BOX 666

VICTORIA, B.C., March 17, 1928.

IN YOUR REPLY REFER TO
No. 20/11151.
ALSO TO DATE OF THIS LETTER

Your File No. 154-0-5.

Dear Sir:-

I have the honour herewith to submit voucher No. 107-A for \$260.50 in favour of Rev. Jno Duplanil, Principal of the Kamloops Indian Industrial School, for wages advanced to Mr. C. Reedman, carpenter, employed to install the fixtures at the abovementioned school.

The amount of \$700.00 is likely to be exceeded to a small extent, but the Reverend Principal informs me that the Department is really getting \$1,400.00 worth of fixtures than had they been manufactured as at first proposed. It is expected that it will take about another week to complete all the work.

Your obedient servant,

W. E. Ditchburn

W. E. Ditchburn.

TENDERS WANTED.

Sealed tenders addressed to the undersigned and endorsed on the envelope, "Tender for Boys' Building Indian Residential School, Kamloops, B. C." will be received up to noon of the 31st day of May, 1928, for the erection of the above mentioned building.

Plans and specifications may be seen at the offices of the Indian Commissioner at Victoria; the Inspector of Indian Schools, Room 14, 249 Hastings St. E., Vancouver; the Inspector of Indian Agencies, Kamloops; and the Department of Indian Affairs at Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank of Canada for ten percent of the amount of the tender, payable to the order of the undersigned. (War Bonds of the Dominion or Canadian National Railway Bonds will also be accepted as security, or Bonds and cheque if required to make up an off amount,) which amount will be forfeited if the person or persons tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for.

The lowest or any tender not necessarily accepted.

DUNCAN C. SCOTT.
DEPUTY SUPERINTENDENT GENERAL.

Dear Sir:-

Your advertising order No. 9491 covering 52 lines of legal advertising to appear in this publication for a total of three insertions before May 19th, appeared in error in our May 7th issue.

It was brought to our attention this morning by the Vancouver Inspector of Indian Affairs that the address of the Inspector of Indian Schools should read "415 Winch Building, Vancouver," instead of "Room 14, 249 Hastings St., East," as appeared in the copy received by us.

We are therefore inserting corrected advertisement in our issues of Wednesday, Friday and Monday, and trust this will meet with your wishes.

Very truly yours,

J. G. McLean

COMMISSIONER'S OFFICE, JUN 5 1928
P. O. BOX 666

VICTORIA, B.C., JUN 29 1928

Dear Sir:-

Re-New Indian School at Kamloops.

When visiting the Kamloops School on the 12th instant, Rev. John Duplanil, the Principal, drew my attention to the fact that on page 69 of the Specifications it provides that there are to be trough-urinals. The Rev. Principal would prefer that these urinals should be up-right ones the same as those in the new Lytton School.

It is also observed that there are to be no toilets in the washrooms on the ground floor. The Principal considers there should be at least one in each washroom and I believe he is correct in this regard. Therefore, I would recommend that the changes above mentioned should be made.

I observe also that the front doors of the present building are being seriously affected by the strong sun and I would recommend the Principal be authorized to purchase sufficient oil and varnish to keep these doors in good condition. The labor of putting on the varnish will be done without cost.

WED/KD.

Your obedient servant,

W. E. Ditchburn

TENDER FORM

DEPARTMENT OF INDIAN AFFAIRS

OTTAWA, CANADA

Building Boys Residential School
Location Kamloops B.C.

I, (we) Thomas Carson
the undersigned, hereby offer to the Deputy Superintendent General of Indian Affairs, to furnish all the necessary tools, implements, materials and labour, and to execute and complete in a satisfactory and workmanlike manner, all the works required in completing the aforesaid building, according to drawings, specifications and form of contract exhibited to (me, us), and prepared under instructions of the Deputy Superintendent General of Indian Affairs, for the sum named as under.

Tender for the whole of the work as shown on drawings and described in the specifications (Amount of tender to be written) Seventy four thousand eight hundred and forty dollars
(\$ 74,840.00)

I, (we) herewith agree to complete the work within a period of Ten months from the date of notification of acceptance of tender, and hold myself (ourselves) ready to enter into a contract for the due execution of the work.

(a) I, (we) herewith enclose an accepted cheque for \$ 7484.00 on a chartered bank, payable to the order of the Deputy Superintendent General of Indian Affairs, equal to ten (10) per cent of the amount of the tender, as per terms of the advertisement and specifications for this work.

(b) Attached hereto is a letter from the Manager of the Bank of _____ certifying that War Bonds to the value of _____, have been deposited in the Bank of _____ subject to the order of the Deputy Superintendent General, Department of Indian Affairs at Ottawa, Ont.

War Loan Bonds of the Dominion will be accepted as security, or War Bonds and cheque, if required to make up an odd amount.

Envelopes containing this tender are to be endorsed "TENDER FOR Boys Building
Indian Residential School Kamloops B.C.
and addressed to the Deputy Superintendent General of Indian Affairs at Ottawa, Ont.

"TENDERS MUST BE IN THE HANDS OF DEPUTY SUPERINTENDENT GENERAL BY 12 O'CLOCK NOON OF DATE FIXED FOR THEIR RECEPTION. CARE SHOULD THEREFORE BE TAKEN TO MAIL SAME IN PROPER TIME."

The signatures of persons tendering must be in their respective handwritings.

In the case of firms, the signature, post office address and occupation of each member of the firm must be given.

SIGNATURES, OCCUPATIONS AND POST OFFICE ADDRESS OF PERSONS TENDERING:

Thos. Carson
1836 14th St
Vancouver B.C.
Dated at Vancouver, this 24th day of May, 1928.

NOTE.—The security cheque or War Bonds will be forfeited if the person or persons tendering refuse to enter into a contract when called upon to do so, or fail to complete the work contracted for. The Department does not bind itself to accept the lowest or any tender. No conditional tender which is not in accordance with the above will be considered.

NOTE.—Amount of deposit security should be indicated in space provided above.

Certified to be a true copy of a Minute of a Meeting of the Committee
of the Privy Council, approved by His Excellency the Governor
General on the 20TH JUNE 1928

R

The Committee of the Privy Council have had
before them a report, dated 1st June, 1928, from the
Superintendent General of Indian Affairs, submitting
that, the same being necessary, tenders were called for
the construction of the proposed new boys' wing of the
Kamloops Indian Residential School, in the Province of
British Columbia, and that the following tenders were
received, together with the required deposit security:

Johnston & Co. Ltd., Kamloops, B.C.....\$63,373.81
H. J. Davies, Kamloops 69,995.
Adkison and Bill, Limited, Vancouver..... 72,948.

The Architect of the Department of Indian
Affairs has reported that the lowest of the above tenders
is fair and reasonable.

The Committee, on the recommendation of the
Superintendent General of Indian Affairs, advise that
the said lowest tender, that of Johnston and Co., Ltd.
be accepted, pursuant to the requirements of subsection
2 of section 36 of the Public Works Act. Funds for the
purpose are provided for in the vote for Indian Educa-
tion.

G. H. Kagan

Asst

Clerk of the Privy Council.

Ottawa, June 1, 1928.

His Excellency

The Governor General in Council.

The undersigned begs to report that the same being necessary, tenders were called for the construction of the proposed new boys' wing of the Kamloops Indian Residential School, in the Province of British Columbia, the same to be receivable by the 31st day of May, 1928, and that the following tenders were received, together with the required deposit security:-

Johnston and Company, Limited, Kamloops, B.C.....	\$63,373.81
H. J. Davies, Kamloops.....	69,995.00
Adkison and Dill, Limited, Vancouver.	72,948.00

W. M. Ait
Dec
Dec
Dec
The Architect of the Department of Indian Affairs has reported that the lowest of the above tenders, namely, that of Johnston and Company, Limited, Kamloops, in the Province of British Columbia, is fair and reasonable, and the undersigned has the honour to recommend that it be accepted pursuant to the requirements of Sub-section 2 of Section 36 of the Public Works Act. Funds for the purpose are provided for in the vote for Indian Education.

Superintendent General
of Indian Affairs.

MEMORANDUM:

DR. SCOTT.

Plans and specifications were prepared and tenders invited for the boys' wing of the Kamloops Indian Residential School, and the following have been received.

Johnston & Co Ltd., Kamloops,	\$63,373.81
H. J. Davies, Kamloops,	\$69,995.00
Adkison & Dill Ltd., Vancouver,	\$72,948.00

As the tender of Johnston & Co. Ltd. is the lowest and a fair and reasonable price for the work, I beg to recommend that it be accepted.

The required deposit security has been furnished.

TENDER FORM

DEPARTMENT OF INDIAN AFFAIRS OTTAWA, CANADA

Building Boys Building, Indian Residential School
Location Kamloops B.C.

(we) Johnston & Co. Ltd. Kamloops - B.C.
the undersigned, hereby offer to the Deputy Superintendent General of Indian Affairs, to furnish all the necessary tools, implements, materials and labour, and to execute and complete in a satisfactory and workmanlike manner, all the works required in completing the aforesaid building, according to drawings, specifications and form of contract exhibited to (me, us), and prepared under instructions of the Deputy Superintendent General of Indian Affairs, for the sum named as under.

Tender for the whole of the work as shown on drawings and described in the specifications (Amount of tender to be written) Sixty-three thousand three hundred & seventy three dollars & 81/4
(\\$ 63 373. 81/4)

(we) herewith agree to complete the work within a period of Five months from the date of notification of acceptance of tender, and hold myself (ourselves) ready to enter into a contract for the due execution of the work.

(a) (we) herewith enclose an accepted cheque for \\$ 6,337.38 on a chartered bank, payable to the order of the Deputy Superintendent General of Indian Affairs, equal to ten (10) per cent of the amount of the tender, as per terms of the advertisement and specifications for this work.

(b) Attached hereto is a letter from the Manager of the Bank of _____ certifying that War Bonds to the value of _____, have been deposited in the Bank of _____ subject to the order of the Deputy Superintendent General, Department of Indian Affairs at Ottawa, Ont.

War Loan Bonds of the Dominion will be accepted as security, or War Bonds and cheque, if required to make up an odd amount.

Envelopes containing this tender are to be endorsed "TENDER FOR Boys Building
Indian Residential School Kamloops - B.C."
and addressed to the Deputy Superintendent General of Indian Affairs at Ottawa, Ont.

"TENDERS MUST BE IN THE HANDS OF DEPUTY SUPERINTENDENT GENERAL BY 12 O'CLOCK NOON OF DATE FIXED FOR THEIR RECEPTION. CARE SHOULD THEREFORE BE TAKEN TO MAIL SAME IN PROPER TIME."

The signatures of persons tendering must be in their respective handwritings.

In the case of firms, the signature, post office address and occupation of each member of the firm must be given.

SIGNATURES, OCCUPATIONS AND POST OFFICE ADDRESS OF PERSONS TENDERING:

James H. Gill Contractor Kamloops B.C.
John Johnston Contractor Kamloops B.C.
Dated Kamloops, B.C. this 25th day of May 1928

The security cheque or War Bonds will be forfeited if the person or persons tendering refuse to enter into a contract when called upon to do so, or fail to complete the work contracted for. The Department does not bind itself to accept the lowest or any tender. No conditional tender which is not in accordance with the above will be considered.

NOTE.—Amount of deposit security should be indicated in space provided above.

Architect
Secretary, *Arch*

Department of Indian Affairs,
Ottawa.

154-0-15
343 Seventh Avenue,
Kamloops, B. C.

August 1st, 1928.

Sir:- re Addition to Indian Residential School.

I enclose herewith Certificate No 1 for \$7129.26, in duplicate, together with duplicate copies of the contractors' estimate of work done and material on the job which I have checked.

In this estimate you will notice two items for extra work; one of \$420.00 for extra concrete, and one of \$108.00 for filling.

These items are due to the fact that the site on the left of the front elevation drops abruptly and this runs back almost to the rear of the left elevation.

I shall be glad to have your sanction for these extras in writing.

The contractors have made a good job of the concrete work and are now laying the hollow tile in the basement.

They will be ready for the granite base course tomorrow.

This has not arrived yet but is expected tomorrow or Saturday.

The materials on the site are excellent; the hollow tile especially so, and the pressed brick are a good match for those in the existing building.

your truly
J. Hodgson Inspector

Ottawa.

Sir:- re Addition to Indian Residential School.

I enclose herewith Johnston & Co's estimate of the cost of the extra items mentioned in my letter of the 21st inst.

I shall be glad if you will wire me if these items and the omissions mentioned in my previous letter are approved.

If they are I will get a memo of the deductions for the work to be omitted.

The Reverend Principal wishes to know if a folding partition can be placed between the senior and junior recreation rooms instead of the 2" x 6" partition shown on the plan.

yours truly

Ottawa,

Sir:- re Addition to Indian Residential School.

The contractors are making fairly good progress with the work. The ground floor joists are on above the wash-rooms and lavatories and the rest of the building is up to the height for the joists, but the steel for this has not yet arrived. They have been promised delivery of this by the end of the week. All the granite work and the metal lath are on the job and plumbing supplies are being delivered. Dr Scott was here last Thursday, Friday and Saturday and seemed satisfied with the work.

yours truly

J. Hodgson.

Secretary,

Dept of Indian Affairs,

Ottawa.

Sir:- Re Addition to Indian Residential School.

When Dr Scott was here, the Reverend Principal took up with ^{him} the question of several alterations and additions.

Two or three of the suggested alterations were so expensive that he could not sanction them but he asked me to write and say that the following have his approval providing the architect approves them too.

Basement. Increase the number of showers from six to twelve and shorten the wash table.

Instal Shanks #4547 Seat Actuated Closets in place of range P9801.

Ground Floor. Decrease the size of the two bathrooms, put in extra partition and door and instal extra toilet next to the outside wall.

At the end of the corridor next to the existing building, leave out the partition between Stores and Staff room and make one room. Also leave out one door.

First Floor. The stud partition about sixteen feet six inches long, between Staff Duty Room and the ventilating

(2)

shafts to be left out.

These changes will probably cost in the neighbourhood of one thousand dollars , but I will let you know definitely as soon as I receive the contractors' prices.

If these changes are approved by the architect I shall be glad if you will wire me as the plumber is ready to start his work and will need to prepare for these.

Yours truly

J. Hodgson.

Attention Departmental Engineer.

I have received your letter of the 23rd instant enclosing copy of communication from the Deputy Superintendent General of Indian Affairs authorizing the construction of the water supply system for the Indian Residential School now in course of erection at Kamloops, B.C.

Instructions have been given to Mr. Webb, our District Chief Engineer at Vancouver, to have this work carried out in accordance with your instructions on the plan proposed in Mr. Tredcroft's report of June, 1925, and under his supervision. I will advise you as soon as Mr. Webb reports that the work has been begun.

Your obedient servant,

J. T. Johnston,
Director.

August 23rd, 1926.

Sir:

I beg to enclose herewith copy of a communication just received from the Deputy Superintendent General of Indian Affairs, in connection with the proposed installation of a water supply system at the Indian Residential School now in course of erection at Kamloops, B.C.

J.P.
I should be grateful if you would give the necessary instructions at once to your district Engineer at Kamloops in order that tenders be obtained as early as possible for this work in accordance with the report already prepared by Mr. Tredcroft in June, 1925, with the understanding that cast iron pipe be used instead of the wooden stave type suggested in the report. I may add that it will be necessary that an Order in Council be first obtained by this Department before a contract is awarded and I would ask you therefore to kindly inform your district Engineer accordingly.

Will you please advise me whether it will be possible for one of your local Officers at Kamloops to undertake on behalf of this Department the supervision of the above mentioned installation.

J.D. McLean
Yours truly,

J.D. McLean
Acting Deputy Superintendent General

J.T. Johnson, Esq., C.E.,
Dominion Water Power Branch,
OTTAWA.

*Please refer to Mr. Finner letter to C. Litchburn
Feb. 17-1926 re delay in going ahead with this work*

OFFICE OF
INDIAN AGENT

Kamloops, B.C.,
August 17th, 1928.

Dear Mr. McLean:-

I had an opportunity of inspecting Kamloops Indian Residential School building with the Contractor. The foundation is finished and they are beginning the brick work. I believe he is having some difficulty in finding bricklayers, and the work is not progressing as rapidly as I had hoped.

One matter, of first importance, was brought to my attention, and that is provision of an adequate water system. I think you find on file a report from Mr. E.M. Tredcroft of the Water Power Branch, of the 13th of June, 1925, with plans and specifications for a complete water system. He estimated the cost at between \$11,000. and \$12,000. Cast iron pipes are to be used. At present the building has no fire protection excepting the chemical fire extinguishers.

I am not aware whether we have provided in our estimates for the cost of this system, but it must be constructed at once, and if necessary, we will obtain a supplementary estimate for the amount. Will you kindly ask the Water Power Branch to instruct Mr. Tredcroft to call for tenders for this work at once? If we begin action now, the water system should be in good working order when the building is completed.

While we have many good schools, I think this establishment at Kamloops will be the premier school when it is finished.

Yours sincerely,

J.D. McLean, Esq.,
Acting Deputy Superintendent General,
Department of Indian Affairs,
OTTAWA, Ont.

Sir:- re Addition to Indian Residential School.

I beg to acknowledge receipt of your wire of the 30th ultimo "REFERENCE YOUR LETTER TWENTY FIRST RE CHANGES KAMLOOPS SCHOOL ARCHITECT APPROVES SAME PROVIDING PRICES QUOTED BY CONTRACTOR ARE FAIR AND REASONABLE." and your further wire of the 6th inst. "APPROVE CHANGES OUTLINED YOUR LETTER TWENTY NINTH ULTIMO INCLUDING FOLDING PARTITION IN PLACE OF STUD."

The Reverend Principal has found another type of urinal which is not so expensive as those submitted to Dr Scott when he was here, and asked me to see if these can be substituted for those specified.

I secured a price from the contractors and enclose it herewith together with a cut of the urinal.

yours truly

J. Hodgson

Dear Sir;- Re-New Wing Kamloops School.

I beg to inform you that I have received from the Northern Electric Company, Vancouver, a tender for the supplying of the electric lighting fixtures of the new wing of the Kamloops School, now under construction, and the same are attached hereto for your consideration.

Section 14, Page 58, of the Specifications reads as follows;-

"14. Lighting Fixtures.

"All lighting fixtures with the exception of switches, shall be supplied by the Department and installed complete by the Contractor. The Contractor shall give the Department due notice in order that the fixtures may be supplied when required."

I believe the School is to be completed early in December this year.

WED/AH.

Your obedient servant,

W.E. Ditchburn

Re: Kamloops Indian Residential School
Boys' Building.

Mr. W. E. Ditchburn,
1220 Government St.,
Victoria, B. C.

Dear Sir:-

We are attaching details with prices of the units we suggest for the above Boys' School. Our total price of \$355.92 is for these units complete with wired safety type holders, except lamps. Delivery - approximately three weeks.

There has been some delay in getting these prices to you. The reason for this was that we had trouble in getting the particulars of the fixtures that they have now in the old building and also the writer made the mistake of sending the plans to the Department of Indian Affairs at Ottawa. I wish to apologize to you for doing this.

We trust that you will find our prices O.K. and that we may have the pleasure of entering your order for these units.

Yours very truly,

Frank Pitt
LIGHTING SPECIALIST.

Dear Sir:-

Estimate was sent in to your Department by Johnston & Company, Contractors, for the additions to the Indian School here, about the first of the month. Please advise on receipt of this letter by telegraph when we may expect cheque, as these people are carrying on two large contracts at the present time and require to receive their money promptly.

Any assistance you can give us in this direction will be very much appreciated.

Yours very truly,

Manager.

Dear Sir:-

It has been brought to my attention that the new fire alarm system is being installed in the new wing of the Kamloops School.

No allowance is being made for the extension of the wires to an alarm button near the principal's rooms.

I shall be much obliged therefore, if you will give me permission to have same extended.

This new system is of course a more elaborate one than the system I installed in the center and girls wing.

However I believe there is no hurry to have both sides correspond as the old system, whilst on a smaller scale, will do for the present anyway. I am more anxious that other systems should be installed in some of the other schools that you will see in my reports of Agencies visited which I am now busy at work on.

Yours truly,

(Geo. S. Pragnell)

The Canadian Junior Drying Tumbler

Single Motor — Belted Motor Driven

Size and Style

The inside cylinder shall measure 30 inches in diameter by 42 inches in length, constructed of galvanized woven wire, and shall be of *Reversing* type.
(Reversing or Non-reversing)

Frames

Shall be of heavy cast iron, bolted together and connected by heavy stiffening angles, and shall support housing, cylinder, fans, coils and driving mechanism. Two heavy iron uprights, bolted to frames at each end of machine, shall provide bearings for an overhead shaft and motor, and starting device shall be attached to same.

Housing

Shall be of No. 16-gauge sheet iron, riveted to iron frames and made tight to prevent the escape of heat and air. The door shall be constructed of No. 16 galvanized sheet iron, hung on heavy wrought-iron strap hinges and securely latched by malleable-iron clamps, making it close fitting and preventing the leakage of air and heat. Shall be provided with cleanout door at bottom between fans.

Two upright castings shall be bolted to top of frames for tub door to rest against when open.

Cylinder

Shall be constructed of No. 21½-mesh, 110-inch diameter, galvanized woven wire, rolled after being woven, so that the intersections shall be interlocked. Shall be riveted to inwardly projecting cast-iron trunnions and reinforced by wide hoops. Shall be further strengthened by four channels, riveted to trunnions. Shall be constructed with 3 galvanized cast-iron ribs projecting 4 inches into cylinder, securely riveted to the woven wire and bolted to the trunnions. Door shall be of No. 16 galvanized sheet iron, perforated, hung on heavy hinges, and fitted with heavy door latches.

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

The Canadian Junior Drying Tumbler—Continued

Single Motor — Belted Motor Driven

Coils

Shall be located within the housing at rear and consist of 202 lineal feet of one-inch iron pipe, connected at each end with right and left return bends.

Fans

Shall be equipped with 2 single fans of the multi-blade type, 7½ inches in diameter, mounted on fan shaft beneath cylinder, for circulating air through the coils and thence through the cylinder and out through an 8-inch duct, leading to rear of machine. Shall be fitted with screened air intakes.

Gearing

Gears shall be machine cut from solid blanks of sufficient width and diameter, and provided with suitable cast-iron gear guards. Shall be equipped with hand wheel gear lock for bringing cylinder door into position and locking same.

Driving Mechanism

Reversing type shall consist of one tight and two loose pulleys, each 10 inches in diameter, requiring 1-inch and 1½-inch belts, operating in connection with a worm and cam movement, producing a fixed number of reverse revolutions of the cylinder.

Non-reversing type shall consist of one tight and one loose pulley, taking a 1-inch belt to operate cylinder. Cylinder shall revolve in one direction only.

Driving mechanism shall be mounted on cast-iron adjustable swiveling arm, bolted to machine, and embody strength, simplicity and reliability. Shall be 3-inch diameter tight and loose pulleys on fan shaft, taking 2-inch belt to operate fans. Fan belt shall be equipped with foot treadle shifter and shall be protected by sheet-metal guard.

Electrical Equipment

Specifications for electrical equipment cover:

- (a) Direct current, 110 or 220 volts.
- (b) Alternating current, 110 or 220 volts, single phase, 50 or 60 cycle.

Motor

Shall be Canadian design, of ample capacity and proper speed to insure quiet running, guaranteed to meet operating characteristics of machine and shall be mounted on tumbler, driving same by belt to overhung shaft. Shall be supported by two cast-iron uprights bolted to frame of machine and shall be equipped with pulleys of proper size for belting to fans, motor and driving pulleys.

Both direct and alternating current motors shall be horizontal type and insulated to withstand heat and dampness incidental to laundry machinery.

Direct Current

Shall be furnished with grid covers, as protection to commutator and brush rigging.

Alternating Current

Shall be squirrel-cage, constant-speed type.

Starting Device

- (a) Direct Current — Shall consist of enclosed hand starter and line switch with fuses.
- (b) Alternating Current — Shall consist of enclosed switch with fuses.

Wiring

Shall be furnished in conduit between motor and starting device. Proper terminals for line connections shall be left at starting device.

Sir:- re Addition to Indian Residential School.

I beg to report that the brickwork is all finished.
The pressed brickwork has been cleaned down and looks very well indeed.

The roof framing has been completed and shingling can be commenced as soon as the tinsmith has placed the galvanized iron around the eaves. I expect this will be done tomorrow. The carpenters are at work covering the ceilings with shiplap in readiness for the metal ceiling.

The electricians and the plumbers have completed their rough work and the steam fitters are getting along with their work.

It is as difficult to secure lathers and plasterers as it was to secure bricklayers and so far the contractors have only been able to get two lathers.

In the meantime the plasterers are getting on with their work on the hollow tile, until they can get to work on the metal lath.

yours truly

J. Hodgson.

R

Dear Mr. Orr,

In the boys' wing, now nearing completion, specifications call for concrete floor in the bath room shoe repair shop, broom and clothes room and stairs. The inspector of construction has written to the Dept. for a small change which I hope you will approve. I did not find concrete satisfactory anywhere for stairs nor for public places used a great deal by children. Concrete floors are never clean, they are always dusty and therefore very unsanitary. The extra cost is small. Moreover concrete floors have not been specified for the present wing used by the girls.

You will oblige me greatly by approving of the change recommended by the Inspector of Construction.

Yours very sincerely

John Reupland

Sir,-

I beg to confirm telegram sent you today in reply to your letter of the 20th instant, authorizing the changing of asphalt mastic flooring in place of cement flooring.

On Sept. 26th a telegram was sent to the Reverend Principal authorizing the installation of Tyford's No. 117 urinals, at a cost of \$954.00.

With reference to your letter of the 11th instant, regarding the extension of the fire alarm system to the Principal's room you may authorize same, also the changes recommended in your letter of the 11th regarding the placing of valves on the heating mains.

Your obedient servant,

J. D. McLean.
Assistant Deputy and Secretary.

Ottawa.

R

Sir:- re Addition to Indian Residential School -

The Reverend Principal wishes to know if asphaltic mastic flooring may be substituted for the cement floors in the basement except in the broom closet and the carpenter's shop, and also on the landings and treads of the stairs. The extra cost of this will be \$508.00.

If this work is sanctioned will you please wire me.

On Sept. 26th the Principal received a wire sanctioning the installation of Twyford's No. 117 urinals.

This work has been proceeded with and I shall be glad to receive a letter authorising this.

yours truly

J. Hodgson.

Sir,

I beg to advise you that your price of \$1,160.00 is accepted for 30" x 42" Junior Drying Tumbler motor driven for the Kamloops Indian Residential School, Kamloops, B. C. I would ask you to please ship this machine at the earliest possible date, addressed to Rev. Father Duplanil, Kamloops Indian Residential School.

The accounts should also be forwarded to Father Duplanil in duplicate.

The electricity at the school is obtained from the town of Kamora, and before shipping this tumbler, I would ask you to make sure of the size and cycle of the motor required.

Your obedient servant,

J. D. McLean.
Assistant Deputy and Secretary.

Rev. Sir,-

I beg to advise you that an order has today with the Stanley Brock Ltd., of Winnipeg, for one 30"x 32" Junior Drying Tumbler, motor driven, for the Kamloops Indian Residential School. This company have been asked to ship this machine addressed to you, also to send the accounts in duplicate to you, which I would ask you to certify to and return to the Department when the tumbler is received.

When the tumbler arrives you may make the necessary arrangements to have same installed in the laundry.

Your obedient servant,

J. D. McLean.
Assistant Deputy and Secretary.

Dear Sirs: Attention: Mr. J. D. McLean.

We have pleasure in quoting you on one
Beaver Vorclone Tumbler, size 32 x 40, as per spec-
ifications enclosed herewith for the sum of \$1,325.00,
Sales Tax not included, F. O. B. - Kamloops.

We are shipping to Vancouver three carloads
of machinery within the next thirty days, and if favored
with your valued order at once, we can make you a price
of \$1,275.00, F. O. B. - Kamloops - the reason of this
being the saving which we make on carload shipments and
L.C.L. shipments.

Trusting we may be favored with your valued
order, we remain

Yours very truly,

The BEAVER LAUNDRY MACHINERY CO. Limited

R

Sir:- re Addition to Indian Residential School

The heating engineer suggests that a valve be placed on the main close to the boiler so that the whole of the new wing may be controlled from there.

I think the suggestion is a good one as if anything went wrong or for any reason it became necessary to close this wing it could be done without affecting the rest of the building.

The cost would be \$62.40 for which I enclose estimate. The same thing would apply to the East wing and the main building and I enclose estimates of \$114.85 and \$77.90 covering cost of this work if you should desire to have it done.

When the boiler inspector was here a week or two ago he ordered valves to be placed on the damper regulators.

The Principal asked me to secure an estimate of the cost and submit it to you and I enclose it herewith (\$33.00)

yours truly

Dear Sir:-

I was over at Kamloops Residential School yesterday, seeing what progress is being made in the Boys' Wing. I notice that the southwest corner of the building will want considerable grading on the outside. The foundations there are sticking up out of the ground seven or eight feet, at least, and there is no access of any kind to the front of the building by road.

I wondered whether any arrangements had been made to do the said grading, or whether your attention had been drawn to the matter.

Yours truly,

MEMORANDUM

Ottawa, June 6th, 1928.

DR. SCOTT:

With reference to my memorandum of the 30th ultimo regarding the position of Inspector of Construction at Kamloops, if you are anxious to have someone appointed immediately I would suggest that Mr. Richard Gleave be appointed. I understand he is a brick-layer, plasterer, tiler, and has fifteen years contracting experience. He also has an all-round knowledge of building and recently worked on the Banff Hotel and other large buildings. He has splendid references and is absolutely dependable and reliable and should prove an exceptionally good man for a position of this kind.

Mr. John Hodgson is also recommended. He has worked in the building trades practically his whole lifetime and has done contracting for 25 years. He also has a splendid knowledge of work of this kind and is absolutely dependable and reliable.

Private Secretary.

MEMORANDUM

23rd May, 1928.

Dr. Scott.

Referring to your memorandum of the 8th instant regarding the appointment of an Inspector of Construction on the unit for the Kamloops Indian School, I may say that Mr. W.H. Macaulay, who was Inspector when the first part of the School was under construction, is not now a resident of Kamloops and, therefore, I presume it will be necessary to re-advertise the position.

In this regard I may say that Mr. Wm. A. Foote of Kamloops has been very strongly recommended and a copy of the poster should be forwarded to him so that he may make application. He is an experienced contractor and lumberman and is reported as being fully capable and dependable.

W. H. Pratt
Private Secretary.

by

Dominion Water Power and
Reclamation Service,
Kamloops, B. C.

September 11th., 1928.

Approved

District Chief Engineer,
Dominion Water Power and
Reclamation Service,
Vancouver, B. C.

P A R T 1.

TERMS OF CONTRACT

The bidder to whom an award is made shall execute a written contract with the Department of Indian Affairs, and, if bond is required, furnish good and approved bond within seven days after receiving the form of contract and bond for execution.

If the bidder to whom an award is made fails to enter into a contract as herein provided, the award will be cancelled, and an award may be made

to the bidder

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

to the bidder whose proposal is the next most acceptable in the opinion of the Department of Indian Affairs.

ENGINEER

The word "Engineer" used in these specifications or in the contract means the District Chief Engineer of the Dominion Water Power and Reclamation Service, Vancouver, B. C., acting on behalf of the Department of Indian Affairs, who will be represented by assistants or inspectors authorized to act for him.

On all questions concerning the acceptability of material or machinery, the execution of the work and the determination of costs, the decision of the engineer shall be final.

CONTRACTOR

The word "Contractor" used in these specifications or in the contract means the person, firm or corporation with whom the contract is made by the Department of Indian Affairs.

The contractor shall, during the erection of the plant, be represented on the works in person or by a foreman or duly designated agent, and instructions or information given by the engineer to the contractor, foreman or agent shall be considered as having been given to the contractor.

MATERIAL AND WORKMANSHIP

All machinery and material must be of the specified quality and equal to approved samples, if samples have been submitted.

All work shall be done and completed in a thorough workmanlike manner, notwithstanding any

omission from these

omission from these specifications or the drawings.

All material furnished and all work done must be satisfactory to the engineer; work not in accordance with these specifications in the opinion of the engineer shall be made to conform thereto.

Unsatisfactory work or material may be rejected by the engineer at any stage of the work and if so ordered by the engineer shall, at the contractor's expense, be immediately removed from the vicinity of the works.

The absence of an inspector at the time the work was carried out shall not relieve the contractor from his responsibility to perform a satisfactory class of work.

DELAYS

The contractor shall receive no compensation for delays or hindrances to the work, except when, in the judgment of the engineer, direct or unavoidable extra cost to the contractor is caused by the failure of the Dominion Water Power and Reclamation Service to provide necessary information or site for installation.

All decisions of the engineer with regard to any claims for compensation shall be accepted by the contractor and regarded by him as final.

CLIMATIC CONDITIONS

The engineer may order the contractor to suspend work at any time should he consider that this work may be damaged by climatic conditions.

When delay is caused by an order to suspend work given on account of climatic conditions,

the contractor shall

the contractor shall be entitled to a reasonable extension of time on account of such an order and the engineer's decision as to what constitutes a reasonable extension of time shall be considered as being final.

CHANGES

The engineer may, upon notice to the contractor and without notice to the sureties on the contractor's bond, make such changes in the work or in the design or in the amount of materials required as the engineer may deem advisable; if such changes result in an increase or decrease of cost to the contractor the engineer will make such additions or deductions on account thereof as he may deem reasonable and proper, and his action shall be final.

EXTRA WORK OR MATERIAL

In connection with the work covered by this contract, the engineer may order work or material not covered by these specifications. Such work or material will be classed as extra work and will be ordered in writing. No extra work will be paid for unless ordered in writing and only at the rate or amount fixed upon in the written order.

INSPECTION

All materials furnished and work done under this contract will be subject to inspection.

The contractor shall furnish complete facilities, including the necessary labour, for the inspection of all material and workmanship.

The engineer shall have at all times free

access to all

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Y
R-COPY

access to all places where materials under construction are being stored, manufactured or installed, and all materials or work that do not conform to the specifications, accepted through oversight or otherwise, may be rejected at any stage of the work.

ERRORS AND OMISSIONS

The contractor will not be allowed to take advantage of any error or omission in these specifications or drawings; suitable instructions will be given where an error or omission is discovered.

SPECIFICATIONS AND DRAWINGS

The engineer will furnish the contractor with such detailed plans and information as he may consider necessary for the contractor's guidance.

DATA TO BE FURNISHED BY THE CONTRACTOR

The contractor shall furnish the engineer reasonable facilities for obtaining such information as he may desire respecting the character of the material and the progress and manner of the work, including all information necessary to determine its cost, such as the number of men employed, their pay, the time during which they worked on the various classes of construction, etc.

DAMAGES

The contractor will be held responsible and required to make good, at his own expense, all damages to person or property caused by carelessness or neglect on the part of the contractor, his agent or employees.

CHARACTER OF WORKMEN

The contractor shall not allow his agents
or employees to

Y
R-COPY

or employees to trespass on lands or premises in the vicinity of the work; and shall, when required by the engineer, discharge any person in his employ who is, in the opinion of the engineer, disorderly, dangerous, incompetent or objectionable.

METHODS AND APPLIANCES

The methods and appliances adopted by the contractor shall be such as will, in the opinion of the engineer, secure a satisfactory quality of work and enable the contractor to complete the work in the time agreed upon.

If at any time the methods or appliances appear to be inadequate, the engineer may order the contractor to improve their character or efficiency and the contractor shall conform to such an order; but the failure of the engineer to order such improvement of methods or efficiency will not relieve the contractor from the obligation to perform a satisfactory class of work and to finish it in the time agreed upon.

PROTECTION

The contractor shall be responsible for all material furnished him and for the care of all work until its completion and final acceptance.

The contractor will be responsible for the safety of all men engaged upon the work and shall adopt such methods of construction as will ensure their well-being, and shall accept full liability for all damage suits, claims for compensation, etc. arising out of any injury to an employee working

under his control.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

under his control.

COMPLETION OF WORK

The contractor shall complete the work in the time agreed upon in this contract and shall, upon its completion, remove all plant, rubbish or unused material at his own expense.

MATERIAL AND FITTINGS TO BE SUPPLIED BY THE CONTRACTOR

CONCRETE (Machinery Foundations)

- 2 cu. yds. 1:2:4 mixture,
comprising - cement 12 sacks
sand 1 cu. yd.,
gravel or
broken stone 1.8 cu. yds.,
water

MACHINERY

- 1 2200 volt, 3 phase, 60 cycle, A.C., squirrel-
cage induction motor, complete with starter,
switches, overload and no voltage release,
1) direct connected to
1 single stage, double suction, split casing,
centrifugal pump, capacity 500 U.S. g.p.m.
against a pressure of 100 lbs. per square
inch at the discharge with no suction lift.
Pump and motor to be mounted on a single
cast-iron base of suitable dimensions.

ELECTRICAL EQUIPMENT

Switches

- 2) 1 60 Amp., 2500 volt, manually-operated non-
automatic oil switch (wall type)
3) 3 standard 60 Amp., 2500 volt, disconnecting
expulsion fuses, mounted on porcelain blocks
4) 1 standard steel cabinet of sufficient size to
contain 3 expulsion fuses, 2 meter trans-
formers and necessary metering equipment
5) 1 60 Amp., 2500 volt, outdoor type, 3-conductor
pothead for No. 6 B & S gauge, lead-covered
cable
6) 3 3-conductor condulets
7) 50 lin. ft. (approximately) 1½" dia. sheradized
cable conduit
8) 50 lin. ft. (approximately) No. 6 B & S gauge,
3-conductor, double-braid, lead-covered
copper cable (working pressure 2500 volts)

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

RY

oor copy

- 9 -
- 9) 1 30 ft., 8" top, butt-treated cedar or long leaf pine pole, equipped with standard cross-arm, cross-arm braces, insulators, etc. for 3-conductor, 2200 volt circuit
 - 10) necessary No. 6 B & S gauge, triple-braid, weatherproof copper wire to connect above pole with existing power line
 - 11) 2000 11a. ft. No. 14 B & S gauge, lead-covered Duplex wire, 600 volt
 - 12) 1 standard 220 volt, single pole, single throw knife switch, suitably mounted in a steel cabinet and externally operated
 - 13) 1 standard enclosed type float switch, 220 volt, A.C., complete with copper float, counterweight, chain, etc.

FITTINGS

Increasers

- 14) 1 standard 4" dia. to 6" dia. cast-iron flanged increaser
- 15) 3 standard 6" dia. to 8" dia. cast-iron flanged increasers

Tees

- 16) 1 standard 6" dia. cast-iron flanged tee

Elbows - Wrought-Iron

- 17) 4 2" dia. wrought-iron elbows

Elbows - Cast-Iron

- 18) 1 standard 6" dia. cast-iron flanged elbow
- 19) 2 standard 4" dia. cast-iron flanged elbows
- 20) 1 8" dia. cast-iron long radius 90° elbow, flanged

Gate Valves

- 21) 1 standard 4" dia. cast-iron, bronze-mounted flanged gate valve, non-rising stem
- 22) 4 standard 6" dia. cast-iron, bronze-mounted flanged gate valves, non-rising stems
- 23) 1 2" dia. gate valve, threaded, non-rising stem

Foot Valves

- 24) 1 standard 8" dia. cast-iron flanged foot valve and screen

Check Valves

- 25) 1 6" dia. cast-iron, bronze-mounted horizontal swing check valve, flanged

Crosses

- 26) 2 6" to 6" to 4" flanged reducing crosses, run and 1 outlet 6", 1 outlet 4"

Flanges

- 27) 3 standard 4" dia. cast-iron flanges (for 4" dia. wrought-steel pipe)

Reducing Flanges

- 28) 1 4" dia. to 2" dia. reducing flange, 2" outlet threaded

Gaskets

- 29) 7 4" dia. No. 27 gauge full-face copper gaskets
30) 14 6" dia. No. 27 gauge full-face copper gaskets
31) 5 8" dia. No. 27 gauge full-face copper gaskets

Wrought-Steel Pipe

- 32) 1 9½ in. length 6" dia. W.S. pipe, flanged
33) 1 4' length 4" dia. W.S. pipe, flanged one end
34) 1 18' length 8" dia. W.S. pipe, flanged
35) 1 5½" length 4" dia. W.S. pipe, flanged

Wrought-Iron Pipe

- 36) 1 10' length 2" dia. W.I. pipe, galvanized

Bolts

- 37) 56 5/8" x 2 3/4" bolts and hex nuts
38) 112 3/4" x 3" bolts and hex nuts
39) 40 3/4" x 3 1/4" bolts and hex nuts

Foundation Bolts

- 40) 6 1 1/8" dia. x 30" steel bolts and hex nuts

Miscellaneous Fittings

- 41) All other necessary 2" dia. pipe and fittings for priming pipe

P A R T 3.

WORK TO BE PERFORMED BY THE CONTRACTOR

Upon receipt of his contract, the contractor shall, at the place designated by the plans accompanying these specifications and in the buildings provided for that purpose, install and erect all machinery, pipes and fittings called for in this contract, which work shall include the proper installation of

- 1) 1 - electrically-operated pumping unit, capacity 500 U. S. gallons per minute;
- 2) The installation of all pipes, valves and fittings in connection with this pumping unit as called for by the accompanying plans;
- 3) The dismantling, removal and reconstruction of approximately 600 feet of existing 2200 volt power line;
- 4) The installation in a concrete reservoir which will be provided by the Department of 1 electrically-operated float switch and the connection by means of approximately 2000 lineal feet of lead-covered wire (buried) of this float switch with the no-voltage release coil situated on the compensator of the above pumping unit;

and the contractor shall perform all labour necessary for the proper installation and erection of the pumping unit, power line, etc., and when the above pumping unit has been properly installed and tested, connect said pumping unit to the outside water main and power line as directed by the engineer.

PART 4.

DETAILED SPECIFICATIONS.

CONCRETE

Concrete used for the foundations of the machinery shall be composed of the following ingredients proportioned by volume into what is known as a 1:2:4 mixture:

cement	1 part
fine aggregate	2 parts
coarse aggregate	4 parts
water	

CEMENT

The cement shall be a first-class Portland cement of standard brand, free from lumps or foreign matter, and until it is used shall be stored in a building which will protect it from the weather.

FINE AGGREGATE

Fine aggregate shall consist of sand, crushed stone or gravel screenings; the particles shall be hard, dense and durable and such that they will pass through a 1/4 inch mesh screen. It shall be clean and free from soft particles, clay, loam and all organic matter; and it shall be so graded that when dry and well-shaken the voids will not exceed thirty percent.

COARSE AGGREGATE

Coarse aggregate shall consist of crushed stone or gravel having its smallest particles approximately 1/4 inch in diameter and its largest

particles approximately

particles approximately $\frac{1}{8}$ inches in diameter. It shall be graded from the smallest to the largest particles and shall be clean, hard, durable and free from all deleterious matter.

WATER

Water used in mixing concrete shall be free from oil, acid, alkalies or organic matter.

PUMP

The pump to be supplied by the contractor shall be a high-grade, cast-iron, split-casing, double-suction centrifugal pump, bronze-fitted throughout.

It shall be equipped with a bronze impellor of the non-overloading type, so designed that it will not overload the motor more than 25% should the operating head on the pump be suddenly removed.

It shall be capable, when being driven at its rated speed, of delivering 500 U.S. gallons per minute at the discharge against a pressure of 100 pounds per square inch when operating with no suction lift.

MOTOR

The motor to be supplied by the contractor shall be a high-grade, 2200 volt, 3 phase, 60 cycle, A. C., squirrel-cage induction motor, of suitable horse-power to operate the above pump at its normal running speed.

The motor shall be capable of carrying a continuous overload equivalent to 100% of the normal name-plate rating, and shall not be of larger horse-

power than is

power than is required to operate the above pump with good over-all efficiency.

STARTING COMPENSATOR

The starting compensator shall be of the hand-starting type and of standard design.

The coils in the starter shall be equipped with 4 sets of taps, giving 40, 60, 70 and 85 per-cent of line voltage.

It shall include both overload and no voltage protection and shall be so encased that when in position no current-carrying parts are exposed.

OIL SWITCH

The oil switch to be provided by the contractor shall be a 60 Amp., 2500 volt, single-throw, hand-operated, wall-type oil switch of standard design.

It shall be properly insulated and mounted in a suitable iron body having holes for conduit connection.

All live parts shall be enclosed.

The operating handle shall be of such design and the case so marked on the outside that the operator can tell at a glance whether the switch is in the open or closed position.

OIL

A supply of suitable transformer oil for use in the starting compensator and oil switch shall be provided by the contractor.

FLOAT SWITCH

The float switch supplied by the contractor shall be a standard 220 volt, A. C., enclosed type float switch.

All electrical parts

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

All electrical parts shall be mounted in a heavy cast-iron cover, drilled at the top for connection to 1½" conduit and having the lower half of the cover removable for inspection and making connections, etc.

The switch shall be operated by a weighted arm falling over centre, or some other device which will ensure a quick motion of the contacts when opening and closing.

A copper float, together with a counter-weight and chain of suitable dimensions, shall be included.

MISCELLANEOUS

All other electrical equipment, including lead-covered cable, wire, potheads, condulets, switches, cabinets, conduit, etc., shall be standard equipment and satisfactory to the engineer.

PIPE FITTINGS

SUCTION PIPE

Suction pipe shall be 8" diameter wrought-steel pipe.

It shall be flanged where required and connected to the pump by means of a cast-iron reducer.

FOOT VALVE

Foot valve shall be of cast-iron construction and of flap design.

It shall be suitable for connection to an 8" diameter wrought-steel suction pipe and the area of the foot valve shall be at least 150% of the area of the suction pipe.

The flaps shall be

The flaps shall be so constructed that they rest against the sides of the valve when open and allow free passage for the water.

SCREEN FOR FOOT VALVE

The screen shall be of cast-iron of suitable size and design and shall be connected to the foot valve by bolts.

GATE VALVES

All gate valves called for in these specifications shall be good quality, iron-body, bronze-mounted gate valves, flanged or threaded as required, and equipped with non-rising stems.

CHECK VALVE

The check valve to be supplied by the contractor shall be a standard 6" diameter iron-body, bronze-mounted, horizontal swing check valve of such design that the check when it is open does not interfere with the passage of the water.

It shall be provided with a removable cover on top to permit of inspection, adjustment, etc.

CAST-IRON FITTINGS

All cast-iron fittings called for in these specifications, including all cast-iron tees, reducing tees, elbows, increasers, crosses, flanges, reducing flanges, etc., shall be of good standard quality and capable of performing the work for which they are designed.

They shall conform in size to the standard
dimensions for such

dimensions for such fittings and shall be subject to rejection by the engineer should he deem them unfit for the purpose for which they are required.

PIPE - MISCELLANEOUS

All other miscellaneous lengths of pipe required in the above installation and including priming pipe, drain pipe, pipe used for connection between valves, fittings, etc., shall be standard cast-iron, wrought-steel or wrought-iron pipe of suitable diameter, as required by the engineer.

PIPE JOINTS

Flanged joints shall be used throughout on all pipe and fittings over 3" in diameter.

GASKETS

Gaskets shall be of the required diameter, full-face and made from No. 27 gauge sheet copper.

BOLTS FOR CONNECTING FLANGES

All bolts used for connecting flanges shall be of steel of standard dimensions and not more than 1/8" smaller in diameter than the holes in the flanges through which they pass.

They shall be equipped with square heads and hexagon nuts and threaded so as to permit the nut to run the entire length of the thread.

NUTS

Nuts shall be hexagonal in shape and of sufficient thickness to ensure against stripping of threads.

W O R K

WORK - GENERAL

All work undertaken by the contractor, including all pipe fitting, pouring of concrete for machinery foundations, installation of machinery, setting of poles, wiring, etc., shall be carried out by such methods and in such a manner as to be satisfactory to the engineer, and the engineer may order the contractor to re-set, re-wire and re-install at the contractor's expense all or any part of the work which, in the opinion of the engineer, is found to be unsatisfactory when completed, except in such cases where the engineer has directed the contractor to perform a certain piece of work in a certain manner and has assumed direction of the operation, in which case all extra charges in this connection shall be borne by the Department, and the contractor shall be relieved of his responsibility for that portion of the work.

ELECTRICAL WORK

All electrical work undertaken by the contractor in connection with the above installation shall be performed by the contractor in such a manner that when it is completed it shall be satisfactory to the Electrical Superintendent for the City of Kamloops and to the Inspector of Electrical Energy for the Province of British Columbia, and the contractor shall perform the work in such a manner and adopt such methods as will ensure the lives and safety of the workmen engaged upon the work.

All 2,000 volt circuits shall be made dead

before any

before any work is carried out thereon.

GROUNDING

All metal non-current-carrying parts of the above installation, including pump casing, motor frame, pipes, conduit, starter housing, cabinets, etc., shall be thoroughly grounded by the contractor to the satisfaction of the engineer.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

PART 5.

SPECIAL CONDITIONS

INTERRUPTIONS TO POWER SERVICE

The contractor shall not interrupt the supply of power to the Kamloops Industrial school for the purpose of performing any work in connection with the above installation for a period in excess of 8 hours in any one day of 24 hours, and then only between the hours of 8 A.M. and 6 P.M. daily and after due notice (8 hours) has been given to the engineer of such intended interruption, and permission to do so obtained; and the engineer shall have the right to instruct the contractor to re-connect the above school with the power line so that power will be immediately available for use in the school and school buildings at any time that the engineer may consider it necessary, and the contractor shall conform to such an order, notwithstanding that the contractor may have given due notice to the engineer of the intended interruption and have obtained permission from the engineer for the interruption.

Additional charges incurred by such connection, other than loss of time to workmen, will be borne by the Department.

Interruptions shall be as far as possible continuous.

Not more than three interruptions in any one day will be allowed.

DISPUTES (Electrical Work and Material Only)

All disputes between the engineer and the
contractor with

contractor with reference to the methods to be adopted, safety of workmen engaged upon the work, suitability of work performed and material supplied by the contractor, shall be referred for decision to the Electrical Superintendent for the City of Kamloops, and in the absence of the Electrical Superintendent or upon his refusal or failure to act, to the Inspector of Electrical Energy for the Province of British Columbia, and the decision so rendered by one or other of the arbiters appointed by the engineer shall be accepted by the contractor and regarded by him as final.

PROTECTION OF INDIVIDUALS

The contractor shall not leave current-carrying parts of the above installation unguarded or exposed in such a manner that they can be reached, touched or interfered with by unauthorized persons, either during the progress of or after the completion of the work, until same is handed over to the engineer, and he shall take such steps as may be necessary to prevent unauthorized persons (children and others) from coming into contact with any electrical apparatus under his control.

Doors of pump house and switch cabinets, etc. to be securely locked by the contractor upon the completion of each day's work and at such other times during the day when apparatus contained therein is being left unattended, notwithstanding that this electrical apparatus may not be carrying current at the time it is left; and the contractor shall accept full liability for all damage suits, claims for compensation, etc., arising out of an injury to any unauthorized person (children and others) through contact with electrical apparatus under his control.

COMMENCEMENT, PROSECUTION
AND COMPLETION OF WORK

Work shall be commenced by the contractor within 5 days from the date on which he receives notice from the engineer that the site for installation is available, and shall be completed within 10 days from the date of commencement of work, provided that the contractor shall not be required to commence work before November 15th., 1928, unless satisfactory to the contractor.

CONTRACT

THIS AGREEMENT made the 15th. day of October
1928.

BETWEEN

FERNIE BROTHERS,
of Kamloops, British Columbia,

hereinafter called "the Contractor",
of the First Part,

And the

DEPARTMENT OF INDIAN AFFAIRS,

hereinafter called "the Department",
of the Second Part,

WITNESSETH AS FOLLOWS:-

1. In consideration of the covenants and agreements hereinafter contained and to be performed by the Department, the Contractor hereby covenants and agrees with the Department to do the following work, viz.:

Installation of a pumping unit which work will include the supply and installation of one (1) #3L - 95A Worthington High Efficiency Ball Bearing Centrifugal Pump, double suction, single stage, with bronze non-overloading type impeller, split casing, mounted on heavy cast iron extended bedplate and direct connected through flexible coupling to a 50 H.P., 3600 R.P.M., 2200 volts, 60 cycle, Westinghouse Squirrel Cage Induction Motor with type KL wall mounting auto starter embodying overload and low voltage protection, together with all other necessary equipment in a thorough and workmanlike manner and in every respect in strict accordance with this agreement and plans numbered 1, 3 and 5, respectively, and the Detailed Specifications and General Conditions of Contract hereunto annexed (and which for the purpose of identification have been signed by the Contractor and the Department and form a part of this Agreement as if embodied herein), and to commence such work within Five (5) days from the date of notification from the Engineer that the site for installation is available and shall be completed within ten days from the commencement of work. Provided that the Contractor shall not be required to commence work before November 15, 1928, unless satisfactory to the Contractor, or within any extended time allowed by the Engineer under these presents.

2. In consideration of the faithful performance by the Contractor of all and singular the covenants and agreements herein contained and to be performed by the Contractor, the Department hereby covenants and agrees with the Contractor to pay him for the

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

POOR-COPY

full completion by him of all work embraced in this agreement in the manner and within the time herein specified and limited for the completion thereof and subject as herein provided the amounts or at the unit rates mentioned in the Contractor's tender for the said work (copy of which tender is hereto annexed and for the purpose of identification has been signed by the Contractor and the Department, and forms part of this Contract as if embodied herein) upon completion of work and in the manner and subject to the drawbacks and penalties mentioned in the Specifications.

3. The term "work" or "works" in the said Specifications and Conditions shall, unless the context requires a different meaning, mean the whole of the works and materials, matters and things required to be done, furnished and performed by the Contractor under this Agreement.

4. The term "Engineer" in the said specifications shall mean the District Chief Engineer of the Dominion Water Power and Reclamation Service, Department of the Interior, and shall extend to and include any of his assistants acting for him under his instructions, and all instructions or directions or certificates given or made by anyone acting for him shall be subject to his approval, and may be cancelled, altered, modified and changed as to him may seem fit.

5. Wherever in this Agreement it is stipulated that anything shall be done or performed by either of the parties hereto, it shall be assumed that such party has thereby entered into a covenant with the other party to do or perform the same, and that such covenant is entered into only by, for and on behalf of the parties hereto, but is also entered into by and on behalf of their respective executors, administrators, successors and assigns, and whenever this Agreement is entered into by more than one person or party of the first part the word "Contractor" shall be read "Contractors" and the pronouns referring to the Contractor shall be read as plural, and whenever a corporation is the party of the first part the said pronouns shall be varied accordingly.

IN WITNESS WHEREOF the parties hereto have caused these presents to be executed.

For the sum of \$ Twelve Thousand Six Hundred and Ninety-one
(\$12,691.00). Dollars.

We, the undersigned bidder, propose to do all the work
and to supply all the material and equipment necessary
for the installation and construction of the above-
described Water Supply System in accordance with and
in the manner required by the attached plans and specifications
accompanying this proposal; and bind ourselves upon the
acceptance of this proposal to execute a contract with
necessary bond, if required, of which this proposal and
the attached plans and specifications shall be a part,
for the performance and completion of the said work
within the time required by and in the manner called for
by these plans and specifications.

Accepted for Department
of Indian Affairs.

- NOTICE TO BIDDERS -

Information contained under Part 2 of these specifications,

"MATERIAL AND FITTINGS TO BE SUPPLIED BY THE CONTRACTOR" has been compiled for general estimating purposes only.

Intending bidders must satisfy themselves that the number, amount, etc. of material and fittings called for under Part 2 of these specifications and which must be supplied by the contractor are sufficient in number and quantity to make a complete and satisfactory installation when they have been assembled together.

No extra charges for additional fittings under Part 2 of these specifications, except where such fittings may reasonably be included under the heading "Extra Work", will be allowed. (See Paragraph 3, Page 4, Part 1 of these specifications)

The contractor is not required under these specifications to supply any pumping machinery or to supply any fittings, valves or miscellaneous pipe necessary to connect this pumping unit with the water main. The above will be included under a separate contract.

SPECIFICATIONS
for
The Supply and Installation of a Water Supply System
at the
Kamloops Industrial School,
Kamloops, B. C.

Prepared for

Department of Indian Affairs,

by

Dominion Water Power and
Reclamation Service,
Kamloops, B. C.

September 11th., 1928.

Approved

District Chief Engineer,
Dominion Water Power and
Reclamation Service,
Vancouver, B. C.

P A R T 1.

TERMS OF CONTRACT

The bidder to whom an award is made shall execute a written contract with the Department of Indian Affairs, and, if bond is required, furnish good and approved bond within seven days after receiving the form of contract and bond for execution.

If the bidder to whom an award is made fails to enter into a contract as herein provided, the award will be cancelled, and an award may be made to the bidder

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

to the bidder whose proposal is the next most acceptable in the opinion of the Department of Indian Affairs.

ENGINEER

The word "Engineer" used in these specifications or in the contract means the District Chief Engineer of the Dominion Water Power and Reclamation Service, Vancouver, B. C., acting on behalf of the Department of Indian Affairs, who will be represented by assistants or inspectors authorized to act for him.

On all questions concerning the acceptability of material or machinery, the execution of the work and the determination of costs, the decision of the engineer shall be final.

CONTRACTOR

The word "Contractor" used in these specifications or in the contract means the person, firm or corporation with whom the contract is made by the Department of Indian Affairs.

The contractor shall, during the erection of the plant, be represented on the works in person or by a foreman or duly designated agent, and instructions or information given by the engineer to the contractor, foreman or agent shall be considered as having been given to the contractor.

MATERIAL AND WORKMANSHIP

All machinery and material must be of the specified quality and equal to approved samples, if samples have been submitted.

All work shall be done and completed in a thorough workmanlike manner, notwithstanding any

omission from these

omission from these specifications or the drawings.

All material furnished and all work done must be satisfactory to the engineer; work not in accordance with these specifications in the opinion of the engineer shall be made to conform thereto.

Unsatisfactory work or material may be rejected by the engineer at any stage of the work and if so ordered by the engineer shall, at the contractor's expense, be immediately removed from the vicinity of the works.

The absence of an inspector at the time the work was carried out shall not relieve the contractor from his responsibility to perform a satisfactory class of work.

DELAYS

The contractor shall receive no compensation for delays or hindrances to the work, except when, in the judgment of the engineer, direct or unavoidable extra cost to the contractor is caused by the failure of the Dominion Water Power and Reclamation Service to provide necessary information or site for installation.

All decisions of the engineer with regard to any claims for compensation shall be accepted by the contractor and regarded by him as final.

CLIMATIC CONDITIONS

The engineer may order the contractor to suspend work at any time should he consider that this work may be damaged by climatic conditions.

When delay is caused by an order to suspend work given on account of climatic conditions,

the contractor shall

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

the contractor shall be entitled to a reasonable extension of time on account of such an order and the engineer's decision as to what constitutes a reasonable extension of time shall be considered as being final.

CHANGES

The engineer may, upon notice to the contractor and without notice to the sureties on the contractor's bond, make such changes in the work or in the design or in the amount of materials required as the engineer may deem advisable; if such changes result in an increase or decrease of cost to the contractor the engineer will make such additions or deductions on account thereof as he may deem reasonable and proper, and his action shall be final.

EXTRA WORK OR MATERIAL

In connection with the work covered by this contract, the engineer may order work or material not covered by these specifications. Such work or material will be classed as extra work and will be ordered in writing. No extra work will be paid for unless ordered in writing and only at the rate or amount fixed upon in the written order.

INSPECTION

All materials furnished and work done under this contract will be subject to inspection.

The contractor shall furnish complete facilities, including the necessary labour, for the inspection of all material and workmanship.

The engineer shall have at all times free

access to all

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

access to all places where materials under construction are being stored, manufactured or installed, and all materials or work that do not conform to the specifications, accepted through oversight or otherwise, may be rejected at any stage of the work.

ERRORS AND OMISSIONS

The contractor will not be allowed to take advantage of any error or omission in these specifications or drawings; suitable instructions will be given where an error or omission is discovered.

SPECIFICATIONS AND DRAWINGS

The engineer will furnish the contractor with such detailed plans and information as he may consider necessary for the contractor's guidance.

DATA TO BE FURNISHED BY THE CONTRACTOR

The contractor shall furnish the engineer reasonable facilities for obtaining such information as he may desire respecting the character of the material and the progress and manner of the work, including all information necessary to determine its cost, such as the number of men employed, their pay, the time during which they worked on the various classes of construction, etc.

DAMAGES

The contractor will be held responsible and required to make good, at his own expense, all damages to person or property caused by carelessness or neglect on the part of the contractor, his agent or employees.

CHARACTER OF WORKMEN

The contractor shall not allow his agents

or employees to

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

COPY

or employees to trespass on lands or premises in the vicinity of the work; and shall, when required by the engineer, discharge any person in his employ who is, in the opinion of the engineer, disorderly, dangerous, incompetent or objectionable.

METHODS AND APPLIANCES

The methods and appliances adopted by the contractor shall be such as will, in the opinion of the engineer, secure a satisfactory quality of work and enable the contractor to complete the work in the time agreed upon.

If at any time the methods or appliances appear to be inadequate, the engineer may order the contractor to improve their character or efficiency and the contractor shall conform to such an order; but the failure of the engineer to order such improvement of methods or efficiency will not relieve the contractor from the obligation to perform a satisfactory class of work and to finish it in the time agreed upon.

PROTECTION

The contractor shall be responsible for all material furnished him and for the care of all work until its completion and final acceptance.

The contractor will be responsible for the safety of all men engaged upon the work and shall adopt such methods of construction as will ensure their well-being, and shall accept full liability for all damage suits, claims for compensation, etc. arising out of any injury to an employee working

under his control.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

MATERIAL AND FITTINGS TO BE SUPPLIED BY THE CONTRACTOR

CONCRETE

84 cu. yds. 1:2:4 mixture,
comprising - cement 504 sacks,
sand 38 cu. yds.,
gravel or broken stone 75 cu. yds.,
water

REINFORCING STEEL

10400 lin. ft. 1/2" dia. round rods (6940 lbs.)
900 lin. ft. 1 1/8" dia. round rods (1134 lbs.)
50 lin. ft. 7/8" dia. round rods (100 lbs.)

STEEL PIPE

2750 lin. ft. 8" dia. bituminous-coated, burlap-wrapped steel pipe, having ordinary hub and spigot lead-filled joints throughout, or plain ends, having welded joints throughout, except where flanges are necessary to connect to flanged fittings

CAST-IRON PIPE

1 8'6" length 4" dia. C.I. pipe (plain ends)
1 12' length 4" dia. C.I. pipe (flanged)
1 12 in. length 8" dia. C.I. pipe (flanged)
1 10' length 8" dia. C.I. pipe (flanged)
1 10' length 8" dia. C.I. pipe (flanged one end)
1 4' length 10" dia. C.I. pipe (flanged)
1 10' length 10" dia. C.I. pipe (flanged one end)

DRAIN TILE

150 lin. ft. 4" dia. drain tile

VITRIFIED PIPE

120 lin. ft. 12" dia. vitrified sewer pipe

FITTINGS

Gate Valves

- 1 2½" dia. Iron-body bronze-mounted flanged gate valve (non-rising stem)
- 1 2½" dia. Iron-body bronze-mounted threaded gate valve (non-rising stem)
- 2 4" dia. Iron-body bronze-mounted flanged gate valves (non-rising stem)
- 1 8" dia. Iron-body bronze-mounted flanged gate valve (non-rising stem) with 11'6" extension rod
- 1 12" dia. Iron-body bronze-mounted flanged gate valve (non-rising stem) with 23' extension rod

Water Relief Valve

- 1 standard cast-iron bronze-mounted water relief valve suitable for 8" dia. water main (to relieve at a pressure of 125 lbs. per square inch)

Air Relief Valve

- 1 standard air relief valve for connection to 8" dia. water main (normal working pressure 45 lbs. per square inch.)

Elbows

- 3 8" dia. cast-iron flanged elbows (special bends)
- 2 10" dia. cast-iron flanged elbows, 90°

Tees

- 4 8" dia. cast-iron flanged tees

Reducer Tees

- 2 8" to 4" cast-iron flanged reducer tees, run 8" outlet 4"
- 1 8" to 2½" cast-iron flanged reducer tee, run 8" outlet 2½"
- 1 8" to 2½" cast-iron reducer tee, run 8" flanged outlet 2½" threaded

Reducers (straight)

- 4 8" to 6" cast-iron flanged reducers

Flanged Spigots

- 1 18" x 10" dia. cast-iron flanged spigot
- 1 24" x 12" dia. cast-iron flanged spigot

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Flanges

16 8" dia. cast-iron companion flanges

Reducing Flanges

1 4" dia. to 2½" dia. cast-iron reducing companion flange, 2½" outlet threaded

Gaskets

2 2½" dia. full-face copper gaskets
3 4" dia. full-face copper gaskets
4 6" dia. full-face copper gaskets
28 8" dia. full-face copper gaskets
5 10" dia. full-face copper gaskets
1 12" dia. full-face copper gasket

Bolts and Hex Nuts

24 5/8" dia. x 2 3/4" bolts and hex nuts
40 3/4" dia. x 3" bolts and hex nuts
232 3/4" dia. x 3 1/4" bolts and hex nuts
40 7/8" dia. x 3 1/2" bolts and hex nuts

Pipe Covers

1 cast-iron pipe cover for 4" dia. cast-iron vent-pipe
1 cast-iron cover for 8" dia. stand-pipe

MANHOLE FRAMES AND COVERS

3 18" dia. cast-iron manhole frames and covers

HYDRANTS

1 standard 4" dia. iron-body, bronze-mounted flanged fire hydrant for 4' trench with 1 - 2½" dia. hose connection outlet (City of Kamloops thread)
4 standard 6" dia. iron-body, bronze-mounted flanged fire hydrants for 4' trench with 2 - 2½" dia. hose connection outlets (City of Kamloops thread)

HYDRANT WRENCHES

5 standard cast-iron or steel hydrant wrenches

WORK TO BE PERFORMED BY THE CONTRACTOR

Upon receipt of this contract the contractor shall, at the place designated by the plans accompanying these specifications, install, lay and erect all fittings, pipes and buildings called for in this contract, which work shall include the proper installation of

- 2750 lin. ft. of 8" dia. steel pipe,
- 150 lin. ft. of 4" dia. drain tile,
- 120 lin. ft. of 12" dia. vitrified sewer pipe,

and the contractor shall perform all excavation necessary for the proper laying of the above pipe and shall, upon its completion, backfill all or such portions of the trench occupied by this pipe as may be deemed necessary by the engineer.

The contractor shall, in addition, erect at points shown in the plans and which will be staked out for him by the engineer, the following buildings:

- 1 reinforced concrete reservoir,
- 1 reinforced concrete pump house and intake well,
- 3 reinforced concrete valve boxes.

The dimensions and construction of the above buildings shall be as shown in the accompanying plans, and the work shall include all excavation for, all construction of forms and the performance of all labour necessary for their proper erection and completion.

The contractor shall, during the construction of, or upon the completion of the buildings, or at any

other time when

other time when specified by the engineer, install all pipes, hydrants, fittings, valves, etc., in accordance with these specifications and shall do such backfilling around and upon the completed buildings or fittings as may be required by the engineer.

PIPE LAYING

All 8" diameter steel pipe shall be laid in straight lines on even grades at a depth of not less than 4' below the surface of the ground when measured from the top of the pipe.

Where additional excavation is necessary to maintain these even grades, this excavation shall be undertaken by the contractor.

Where bends are required and elbows are not used for this purpose, the bends shall be made subject to the approval of the engineer.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

DETAILED SPECIFICATIONS

RESERVOIR

The reservoir shall be of the following dimensions:

Inside length	25'	Outside length	26'8"
Inside width	10'	Outside width	11'8"
Inside height	11'	Outside height	12'8".

Roof, walls and floor shall be 10" in thickness.

It shall be of concrete construction, reinforced as shown in the plans with 1/2" diameter and 11/16" diameter round steel rods.

It shall be finished in a workmanlike manner and when completed the walls, floor and roof shall be given one coating of cement plaster on the inside.

PUMP HOUSE

The pump house shall be of the following dimensions:

Inside length	13'6"	Outside length	15'
Inside width	11'6"	Outside width	13'
Inside height	9'6"	Outside height	10'9"

Walls and floor shall be 9" in thickness.
Roof slab shall be 6" in thickness.

It shall be of

It shall be of concrete construction, reinforced as shown in the plans with 1/2" diameter round steel rods.

It shall be finished in a workmanlike manner so that when it is completed it shall be of neat appearance.

INTAKE WELL

The intake well shall be of the following dimensions:

Inside depth	26'9"	Outside depth	27'6"
Inside length	4'	Outside length	5'6"
Inside width	3'	Outside width	4'6".

Walls and floor shall be 9" in thickness.

It shall be of concrete construction, reinforced as shown in the plans with 1/2" diameter round steel rods.

It shall be finished in a workmanlike manner so that when it is completed it shall be of neat appearance.

VALVE BOXES

Valve boxes shall be of the following dimensions, approximately:

Height	5'6"
Inside length	3'
Inside width	3'

Walls and roof shall be 6" in thickness.

They shall be of concrete construction as shown in the plans and shall be finished in a workmanlike manner.

CONCRETE

CONCRETE

All concrete used in the construction of the above buildings shall be composed of the following ingredients proportioned by volume into what is known as a 1:2:4 mixture:

cement	1 part
fine aggregate	2 parts
coarse aggregate	4 parts
water	

CEMENT

The cement shall be a first-class Portland cement, of standard brand, free from lumps or foreign matter, and until it is used shall be stored in a building which will protect it from the weather.

FINE AGGREGATE

Fine aggregate shall consist of sand, crushed stone or gravel screenings; the particles shall be hard, dense and durable and such that they will pass through a 1/4 inch mesh screen. It shall be clean and free from soft particles, clay, loam and all organic matter; and it shall be so graded that when dry and well-shaken the voids will not exceed thirty percent.

COARSE AGGREGATE

Coarse aggregate shall consist of crushed stone or gravel having its smallest particles approximately 1/4 inch in diameter and its largest particles approximately 1 1/2 inches in diameter. It shall be graded from the smallest to the largest particles and shall be clean, hard, durable and free from all deleterious matter.

WATER

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

WATER

Water used in mixing concrete shall be free from oil, acid, alkalies or organic matter.

MIXING

A mixer of the type which ensures the uniform proportioning of the materials throughout the mass shall be used for mixing the concrete and the mixing shall continue for at least one minute after all the ingredients are assembled in the mixer.

CONSISTENCY

The materials shall be mixed wet enough to produce a concrete of such consistency that it will flow sluggishly into the forms and about the metal reinforcements and which, at the same time, can be conveyed from the mixer to the forms without separation of the coarse aggregate from the mortar.

STEEL REINFORCEMENT

All steel reinforcement used shall be of medium hardness, free from excessive rust, scales or coating, and shall conform to the standard specifications for Concrete Reinforcement Bars of the American Society for testing materials.

SPLICING

No splicing of reinforcement bars will be allowed at points receiving stress; and all splices made are to be subject to the approval of the engineer and may be rejected by him at the contractor's expense, should he deem them to be unsatisfactory.

CEMENT PLASTER

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

CEMENT PLASTER

Cement plaster used on the inside of the reservoir shall be mixed by weight in the following proportions:

Portland cement	1 part
sand	1 part.

It shall be applied uniformly so as to give a smooth finish and shall in no place be less than $3/32$ of an inch in thickness.

STEEL PIPE

All 8" diameter steel pipe called for in these specifications shall be standard 8" diameter bituminous-coated, burlap-wrapped steel pipe.

The pipes may be of random lengths, but their average length when taken over all shall not be less than 18'.

The pipes shall be straight and shall be true circles in cross-section with their inner and outer surfaces concentric.

They shall be smooth, free from dents, scales or lumps or any other defect which may unfit them for the purpose for which they are intended.

No plugging or filling will be allowed.

PIPE JOINTS FOR STEEL PIPE

All pipe joints for 8" diameter steel pipe shall be either standard hub and spigot lead-filled joints, or welded joints, as directed by the engineer, except where flanges are necessary to connect to flanged fittings.

LEAD-FILLED JOINTS

Each lead-filled joint, if used, shall contain a minimum of not less than $3/4$ of a pound of hemp yarn and $4\frac{1}{2}$ pounds of lead.

Joints shall be

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

RY

OR-COPY

Joints shall be poured hot and finished in a workmanlike manner and so made that when they are completed they shall be capable of withstanding a pressure of 200 pounds per square inch.

WELDED JOINTS

Each welded joint, if used, shall be made by the oxy-weld process, and shall be what is known as the butt-welded, chamfered-end type.

They shall be so made as to leave a smooth surface on the inside of the pipe, and shall be subject to the approval of the engineer.

COATING AND WRAPPING OF JOINTS

All joints, either lead-filled or welded, shall, when finished, be coated with hot asphalt and burlap wrapped in such a manner that they shall have the same protection as the remainder of the pipe.

All coating and wrapping shall be subject to the approval of the engineer.

FLANGED JOINTS FOR STEEL PIPE

Where flanged joints are required to connect to flanged fittings, the pipe may be cut, threaded and standard cast-iron flanges fitted thereto.

CAST-IRON PIPE

All cast-iron pipe called for in these specifications shall be made of good quality cast-iron, strong, tough and of even grain, and free from all scales, lumps, blisters, blow-holes, sand-holes, etc.

They shall be

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

-COPY

They shall be connected together where necessary by standard cast-iron flanges, but other joints may be permitted, subject to the approval of the engineer.

VITRIFIED SEWER PIPE

All sewer pipe supplied by the contractor shall be standard salt-glazed vitrified sewer pipe, free from all blow-holes, scabs, blisters or fire-cracks.

Each section of the pipe shall be of uniform diameter, straight and not less than 24 inches in length, and provided with a hub at one end of sufficient width to leave a clear space all around between the spigot and the inside of the socket when the pipes are fitted together of not less than 1/2 an inch.

JOINTS FOR SEWER PIPE

All joints for 12" diameter sewer pipe shall be of the standard cement and gasket type and subject to the approval of the engineer.

LAND TILE

All land tile supplied by the contractor shall be standard 4" diameter land tile, and no section shall be more than 18 inches in length.

Each section shall be straight and of uniform diameter and free from all bad, holes, cracks, blisters, etc.

GRADE

All pipes shall be laid accurately to the required depth and on the required lines and grades called for in the plans accompanying these specifications and which will be staked out for the contractor by the engineer.

CAST-IRON FITTINGS

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

CAST-IRON FITTINGS

All cast-iron fittings called for in these specifications, including all cast-iron tees, elbows, spigots, reducers, reducing tees, flanges, etc., shall be of good standard quality and capable of performing the work for which they are designed.

They shall conform in size to the standard dimensions for such fittings and shall be subject to rejection by the engineer should they not fit for the purpose for which they are required.

GATE VALVES

All valves called for in these specifications shall be of good quality, iron-body, bronze-mounted valves equipped with non-rising stems.

Where extension rods are required, these shall be connected in a workmanlike manner, and such connections shall be subject to the approval of the engineer.

WATER RELIEF VALVES

All water relief valves called for in these specifications shall be good quality, iron-body, bronze-fitted relief valves of standard design.

They may be either 1 or 2 in number, and shall be of such dimensions as to be capable of relieving the pressure in 1200 lineal feet of 8" diameter water main when the pressure in this main exceeds 125 pounds per square inch; and the combined area of their outlets shall be sufficiently large to permit them to discharge water at the rate of 500 U. S. gallons per minute.

They shall be capable of adjustment and shall be free from all objectionable features, such as dripping, leaking, etc. when they are not performing the work for which they are required.

AIR RELIEF VALVES

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

AIR RELIEF VALVES

All air-relief valves called for in these specifications shall be of standard design, constructed of good quality brass, bronze or other material.

They shall be of such size as to be capable of removing the accumulated air from 2000 lineal feet of 8" diameter water main when this main is carrying a pressure of not more than 60 pounds per square inch.

They shall be capable of adjustment and so fitted that no leakage of water from the main shall take place when they are operating.

MANHOLE FRAMES AND COVERS

Manhole frames and covers shall be of good quality cast-iron of standard design and shall have a circular aperture when open of not less than 18" and not more than 20" in diameter.

Covers shall be required to fit snugly into the places for which they are provided and when in place shall present a neat and workmanlike appearance.

HYDRANTS

All hydrants supplied by the contractor shall be of standard design and of such dimensions as are called for in these specifications.

They shall be constructed of good quality iron and bronze fitted throughout.

Each hydrant shall be supplied with a drain valve in the base of the body so arranged that this drain valve shall be open when the hydrant is closed and closed when the hydrant is open.

They shall be

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

-COPY

They shall be flanged for connection to 4" diameter or 6" diameter flanged fittings as required, and shall be suitable for use in a 4' trench.

Hose outlets shall be 2 $\frac{1}{2}$ " in diameter, and threads on same shall be what is known as the City of Kamloops thread.

HYDRANT WRENCHES

Hydrant wrenches shall be of cast-iron or steel and of standard design.

GASKETS

Gaskets shall be of the required diameter, full-face and made from No. 27 gauge sheet copper.

BOLTS FOR CONNECTING FLANGES

All bolts used for connecting flanges shall be of steel of standard dimensions and not more than 1/8" smaller in diameter than the holes in the flanges through which they pass.

They shall be equipped with square heads and hexagon nuts and threaded so as to permit the nut to run the entire length of the thread.

NUTS

Nuts shall be hexagonal in shape and of sufficient thickness to ensure against stripping of threads.

PIPE COVERS

Pipe covers shall be of cast-iron and may be either flat or semi-spherical in shape.

They shall be of sufficient size to properly protect the opening in the pipe for which they are required and shall be so made that when they are in place they do not interfere with the entrance or exit of air into or from the pipe.

An approved method

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

An approved method of fixing the pipe covers to the pipe so as to prevent their removal shall be devised and carried out by the contractor.

MISCELLANEOUS

All other miscellaneous fittings such as
galvanized iron screening,
doors for pump house,
windows for pump house,
locks, catches, hinges, etc.,

and other miscellaneous items of minor importance necessary to the installation of the above water supply system and not mentioned in detail in these specifications shall be supplied by the contractor and shall be subject to the approval of the engineer.

W O R K

EXCAVATION

All excavation necessary for the proper installation and construction of the above buildings and pipe shall be undertaken by the contractor and the contractor will be required to carry such excavation down to the grade lines or stakes, as set out on the ground by the engineer, notwithstanding any errors or omissions in, or resulting from changes to, the plans accompanying these specifications.

BACKFILLING

The contractor will be required to perform all backfilling upon all pipe, buildings, fittings, etc. as may be considered necessary by the engineer, but no backfilling shall be carried out during the absence of the engineer or before the engineer has had sufficient time to inspect the work upon which the backfilling is to be placed.

Work covered up

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

COPY

Work covered up without due notice first having been given to the engineer shall be uncovered and re-covered at the contractor's expense.

PIPE LAYING AND TESTING

All 8" diameter steel pipe installed by the contractor shall, before backfilling is carried out or before the pipe is covered in any way, be subjected by the contractor to either an hydraulic or air pressure test in the presence of the engineer so as to ensure that all joints are tight and properly made. All leaks found at the time of the test shall be made tight by the contractor.

The pressure which the pipe will be required to carry during this test shall not be less than 200 pounds or more than 250 pounds per square inch.

STEEL REINFORCEMENT

CLEANING

Steel reinforcement before being placed shall be thoroughly cleaned of rust, scale and coatings of any character that will destroy or reduce the bond.

Reinforcement appreciably decreased in section shall be rejected.

BENDING

Reinforcement shall be carefully formed to the dimensions indicated in the plans accompanying these specifications.

The radius of bends shall be 4 or more times the least diameter of the reinforcement bar.

STRAIGHTENING

Metal reinforcement shall not be bent or straightened in a manner that will injure the material. Bars with kinks or sharp bends shall not be used.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

be used.

PLACING

Steel reinforcement shall be accurately placed and secured against displacement by using annealed iron wire of not less than No. 18 gauge, or suitable clips at intersections, and shall be supported by concrete or metal chairs or spacers or by metal hangers.

Parallel bars shall not be placed closer than $1\frac{1}{2}$ times the diameter of round bars.

The reinforcement shall be firmly and accurately placed so that the centre of the bars shall be the exact distance from the inside of the nearest forms as required by the plans accompanying these specifications, and so fixed that no sagging of the reinforcement against or away from the forms while the concrete is being poured can take place.

SPLICING

Splicing of tension reinforcement at points of maximum stress will not be allowed. Splices where required shall provide sufficient lap to transfer the strain between bars by bond and shear.

GENERAL

All other work in connection with the above installation is to be carried out by the contractor in such a manner and by such methods as will, in the opinion of the engineer, ensure a satisfactory quality of work.

SPECIAL CONDITIONS

In connection with the supply of material for the above installation, the following steel reinforcement and fittings, the property of the Department of Indian Affairs, are on hand at Kamloops:

- | | |
|------|---|
| 1 | 12' length 4" dia. cast-iron pipe, flanged, |
| 1 | 2 1/2" dia. iron-body, bronze-mounted threaded gate valve, non-rising stem, |
| 2 | 4" dia. iron-body, bronze-mounted flanged gate valves, non-rising stems, |
| 1 | 18" dia. cast-iron manhole frame and cover, |
| 1000 | lbs. (approximately) 1/2" dia. round steel rods, |

and it is hereby agreed that the contractor will accept from the Department of Indian Affairs the above steel and fittings for use in the above installation and will, upon their delivery to the contractor in good order, recompense the Department of Indian Affairs for same up to the amount of their full current market value.

1 Smith tilting drum, portable concrete mixer (3 1/2 cu. ft. capacity) with Stover gas engine, all in first-class condition, the property of the Department of Indian Affairs, is available at Kamloops. This mixer may be used by the contractor

without charge on

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

without charge on this work on receipt by the engineer of an agreement signed by the contractor to return the mixer in the same condition as when received, subject to allowance for reasonable wear. The decision of the engineer as to condition of the mixer at all times to be accepted as final.

COMMENCEMENT, PROSECUTION
AND COMPLETION OF WORK

Work shall be commenced by the contractor within 10 days and shall be completed within 60 days after the execution of the contract on behalf of the Department of Indian Affairs.

And the contractor further agrees to start operations on the construction of the pump house and intake well on the same date as the commencement of work, and to complete this portion of the work (pump house and intake well) within 30 days from the date of commencement so that same shall be available for the installation of machinery within 40 days from the date of the execution of his contract.

The contractor shall at all times during the continuation of the contract prosecute the work with such force and equipment as, in the judgment of the engineer, are sufficient to complete it within the specified time.

FAILURE TO COMPLETE THE WORK
IN THE TIME AGREED UPON

LIQUIDATED LIABILITIES

Should the contractor fail to complete the work or any part thereof in the time agreed upon in the contract, or in such extra time as may have been

allowed for delays

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

allowed for delays, a deduction of \$15.00 (Fifteen dollars) per day will be made for each and every day, including Sundays and holidays, that the work remains uncompleted after the date required for the completion.

The said amounts are hereby agreed upon by the contractor as being liquidated liabilities for loss to the Department of Indian Affairs on account of expenses incurred by the Department due to the employment of engineers, inspectors and other employees after the expiration of the time for completion and on account of the cost of operating the present pumping system, the additional fire hazard, etc., caused by delay on the part of the contractor, and the amount due the Department of Indian Affairs for these causes will be deducted from any money due the contractor under this contract.

His Excellency

The Governor General in Council.

The undersigned has the honour to report that the Water Powers Branch of the Department of the Interior by public advertisement asked for tenders for the construction of the water supply system for the Kamloops Indian Residential School, in the Kamloops Indian Agency in the Province of British Columbia, upon plans and specifications prepared by the Branch. A schedule of the tenders received is attached hereto.

Mr. C.E. Webb,
District Chief Engineer of the Water Powers Branch resident at Vancouver, recommends that the tender of the E.J. Ryan Contracting Company of Vancouver for \$12,691.00 for the water supply system; and the tender of Messrs. Fernie Brothers of Kamloops for the pumping unit, including the pump and motor for \$3,100.00 be accepted.

*S.S. 2.11.28
iB. 15.11.28*

The Engineer of the Department of Indian Affairs has reported that the above tenders are fair and reasonable, and the undersigned has the honour to recommend that they be accepted pursuant to the requirements of Sub-section 2 of Section 36 of the Public Works Act. Funds for this purpose are available from the appropriation for Indian Education.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

Oct. 30, 1928.

MEMORANDUM:

Dr. Scott.

Upon your instructions competitive prices have been secured by the Dominion Water Power Branch at Kamloops for the construction of a water supply system for the Kamloops Indian Residential School. The tenders were obtained in the usual way by advertising in a Vancouver newspaper.

According to the District Engineer's report it is recommended that the contract for the construction of the water supply system, that is the pipe line, intake work and reservoir, be awarded to the firm of E. J. Ryan Contracting Co. of Vancouver, at their price of \$12,691.00, and that the contract for the pumping machinery be let to Messrs. Fernie Bros. of Kamloops for the sum of \$3,100.00. The above mentioned tenders were accepted on account of being the lowest which complied with the requirements of the plans and specifications. It is estimated that the total cost of the work will amount to \$17,000.00 owing to the fact that the fire fighting accessories are not included in the above mentioned contract and will have to be purchased direct by the Engineer in charge.

As the prices quoted are reasonable considering the extent of the work provided for, I beg to recommend that the necessary Order in Council be obtained confirming the awarding of these contracts, which have already been signed by both contractors and the District Chief Engineer on behalf of this Department.

Funds are available from the appropriation for Indian Education.

J. Stehne
DEPARTMENTAL ENGINEER.

R

Sir,

Your file number: 154-0-5.

Encl.

In further reference to Dr. Scott's letter of the 12th instant regarding the water supply system at Kamloops residential school, I enclose herewith copy of a letter received from Mr. Webb, our District Chief Engineer at Vancouver, regarding the letting of contracts for this work. You will notice that the work has been divided into two parts, one covering the material for and the construction of the water supply system, and the other the material and machinery for and the installation of the pumping plant.

The contract for the water supply system has been let to the E.J. Ryan Contracting Company of Vancouver for \$12,691.00, and that for the pumping unit to Messrs. Fernie Brothers of Kamloops, for the sum of \$3100.00. In addition to these contracts, fire hose and accessories have to be provided, and including cost of advertising and supervision will bring the total cost to about \$17,000.00. Mr. Webb requests that he be supplied with the sum of \$17,000.00 to cover the cost of this work at your early convenience.

I am sending you herewith one copy each of the signed contracts and specifications, list of tenders and the advertisement for the information of the tenderers, which appeared in the Vancouver and Kamloops press.

The plans referred to in Mr. Webb's letter have not yet been received but they will be sent as soon as they are available.

Your obedient servant,

J. T. Johnston,
Director.

DOMINION WATER POWER AND RECLAMATION SERVICE

Vancouver, B.C.,
October 17, 1928.

Sir,

Re: Kamloops Indian School,
Domestic Water Supply.

In compliance with your authorization of August 25th for construction of water supply system for Kamloops Industrial School, in accordance with Mr. Tredcroft's report of August 20, 1925, tenders were called on September 26th for the carrying out of Mr. Tredcroft's proposals. Time for receipt of tenders was set for October 6th.

In drawing up tenders work to be contracted for was split in two units.

1. For the supply of material for, and construction of, water supply system.
2. For the supply of material and machinery for, and the installation of, a pumping unit.

A list of tenders received is appended herewith in duplicate.

Upon receipt of your telegram of the 12th inst. contracts were awarded as follows:-

1. Water supply system including pipe line, reservoir and intake, to E.J. Ryan Contracting Company for \$12,691.
2. Pumping unit including pump and motor to Fernie Brothers, Kamloops, for \$3100.

In the first instance the lowest tender was accepted which called for provision of satisfactory material.

The second contract was left on the recommendation of Mr. E.H. Tredcroft after careful study of the bids submitted.

I am also enclosing for your reference, in duplicate, the following records in connection with the letting of the contract.

1. Advertisement which appeared in Kamloops and Vancouver press.
2. Signed contracts and specifications.
3. Under separate cover set of plans Nos. 1, 2, 3, 4 and 5.
4. List of bids received.

In addition to the above work fire hose and accessories are to be provided and hose houses built. The cost of advertising and supervision must also be included which will bring the total cost to approximately \$17,000.00.

Your obedient servant,

(Sgd.) C. E. Webb,
District Chief Engineer.

VANCOUVER DAILY PROVINCE. SEPT. 26. 1928.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Water Supply System" or "Tender for Pumping Unit" as the case may be, will be received at the office of the Dominion Water Power and Reclamation Service, Vancouver, B. C., until twelve o'clock noon.

SATURDAY, OCTOBER 6, 1928.

(1st) for the supply of material for, and the construction of a water supply system for the Indian Industrial School at Kamloops, B. C., which work will include the construction of one reinforced concrete reservoir (18,000 U. S. gallons capacity); one reinforced concrete pump house and intake well; and the installation of approximately 2750 lineal feet of 8-inch diameter steel water main, together with other miscellaneous fittings; and

(2nd) for the supply of material and machinery for, and the installation of, a pumping unit which work will include the supply and installation of one centrifugal pump (500 U. S. gallons per minute capacity); one 2200-volt induction motor; together with all other necessary equipment, such as starter, switches, fuses, wiring, etc., and including all valves, wrought-steel pipe and fittings necessary to connect the above pumping unit with the outside water main.

Detailed plans and specifications having reference to the above work may be obtained upon application at the offices of the Dominion Water Power and Reclamation Service, 515 Winch Building, Vancouver, B. C., and Federal Building, Kamloops, B. C.

Tenders should be submitted for each unit separately. The lowest or any tender not necessarily accepted.

C. E. WEBB,

District Chief Engineer.

CONTRACT

THIS AGREEMENT made the 15th day of October, 1928,

BETWEEN

E. J. RYAN CONTRACTING COMPANY, LIMITED,
of Vancouver, British Columbia,

hereinafter called "the Contractor",
of the First Part

And the

DEPARTMENT OF INDIAN AFFAIRS,

hereinafter called "the Department",
of the Second Part,

WITNESSETH AS FOLLOWS:-

1. In consideration of the covenants and agreements hereinafter contained and to be performed by the Department, the Contractor hereby covenants and agrees with the Department to do the following work, viz.:

687.
inc

Supply material for and construct a water supply system for the Indian Industrial School at Kamloops, British Columbia, which work will include the construction of one reinforced concrete reservoir, one reinforced concrete pump house and intake well and the installation of approximately two thousand seven hundred (2700) lineal feet of eight (8) inch diameter Stewart & Lloyd's lap welded, coated and wrapped steel water main with Patented inserted joint, together with other miscellaneous fittings, in a thorough and workmanlike manner and in every respect in strict accordance with the provisions of this agreement and plans numbered 1, 2, 3 and 4, respectively, and the Detailed Specifications and General Conditions of Contract hereunto annexed (and which for the purpose of identification have been signed by the Contractor and the Department and form a part of this Agreement as if embodied herein), and to commence such work within Five (5) days from the date of notification from the Engineer that the site for installation is available and shall be completed within ~~ten~~ days from the commencement of work. Provided that the Contractor shall not be required to commence work before November 15, 1928, unless satisfactory to the Contractor, or within any extended time allowed by the Engineer under these presents.

2. In consideration of the faithful performance by the Contractor of all and singular the covenants and agreements herein contained and to be performed by the Contractor, the Department hereby covenants and agrees with the Contractor to pay him for the

Indian Affairs (RG 10 Volume 6448, file 882-5, part 5)

full completion by him of all work embraced in this agreement in the manner and within the time herein specified and limited for the completion thereof and subject as herein provided the amounts or at the unit rates mentioned in the Contractor's tender for the said work (copy of which tender is hereto annexed and for the purpose of identification has been signed by the Contractor and the Department and forms part of this Contract as if embodied herein) upon completion of work and in the manner and subject to the drawbacks and penalties mentioned in the Specifications. One progress estimate may be submitted for payment of labour and materials up to eighty-five (85) per cent after thirty days.

3. The term "work" or "works" in the said Specifications and Conditions shall, unless the context requires a different meaning, mean the whole of the works and materials, matters and things required to be done, furnished and performed by the Contractor under this Agreement.

4. The term "Engineer" in the said specifications shall mean the District Chief Engineer of the Dominion Water Power and Reclamation Service, Department of the Interior, and shall extend to and include any of his assistants acting for him under his instructions, and all instructions or directions or certificates given or made by anyone acting for him shall be subject to his approval, and may be cancelled, altered, modified and changed as to him may seem fit.

5. Wherever in this Agreement it is stipulated that anything shall be done or performed by either of the parties hereto, it shall be assumed that such party has thereby entered into a covenant with the other party to do or perform the same, and that such covenant is entered into only by, for and on behalf of the parties hereto, but is also entered into by and on behalf of their respective executors, administrators, successors and assigns, and whenever this Agreement is entered into by more than one person or party of the first part the word "Contractor" shall be read "Contractors" and the pronouns referring to the Contractor shall be read as plural, and whenever a corporation is the party of the first part the said pronouns shall be varied accordingly.

IN WITNESS WHEREOF the parties hereto have caused these presents to be executed.

Dear Sir:-

Att'n Mr. J.D. McLean,
Ass't Deputy & SecretaryWe have just received your wire reading as
follows:

"PLEASE HOLD BACK SHIPMENT DRYING TUMBLER RECENTLY
ORDERED FOR KAMLOOPS SCHOOL UNTIL FURTHER ADVISED"

Note from the above wire that you wish us to
hold back shipment of Drying Tumbler recently ordered, until
further advised. In this connection we might state that we
ordered this by telegram from Toronto immediately we received
your order because we had planned on shipping this Tumbler to
Vancouver in a carload and then re-shipping to Kamloops.

When we quoted you on this Tumbler we gave you the
benefit of the carload rate of freight and we are wondering if
it would be all right to have this Tumbler go to Vancouver in our
carload and hold it in Vancouver until it is required.

Hoping you will advise us immediately concerning
this matter, we are,

Yours very truly,

WHB/H

STANLEY BROCK LIMITED.

P.S. We take it from your wire that this shipment is to be held
up for a short while and not cancelled.

Kamloops, B.C., October 22, 1928.

Rev. Father Duplanil,
City.

Dear Sir:-

We would agree to instal a Steam coil in the dry room of your Laundry, but find that the returns cannot go back to the boiler,, as it would mean that your coil would be water logged and would not heat. Therefore we are figuring on installing a high pressure return trap, and shall run the discharge into the sump or into the injector barrel.

Our price for the above work would be One Hundred and Forty Dollars (\$140.00). This price includes all necessary valves and drips.

Yours truly,

Carr & Son.

Dear Mr. MacLeod:-

I am mailing you herewith quotations received from the Canadian Laundry Machinery Co., and also some other quotations regarding the coils, etc.

I can have the same drier built and installed for the sum of five hundred and sixty-five dollars, complete with seventeen coils and four trucks. All the walls will be properly insulated and will be lined with galv. sheeting.

The necessity of a drier is obvious. At present we have no dry room in our laundry and clothes are spread along the corridors, near and on the radiators. It is most unsatisfactory and dangerous. The Dept. of Indian Affairs, some time ago, agreed to install the drier upon the completion of the boys' wing. The need of it is urgent.

The extractor and the tumbler can be used only for certain pieces of clothing.

Yours sincerely,

(Sgd) John Duplanil.

The American Wood Truck Dry Room

Size
1 Section 2 Doors 3 Coils 3 Trucks.

Cabinet

Shall be constructed of kiln-dried lumber, tongued, grooved and beaded, and built in sections securely bolted together. Inner surface shall be covered with sheet asbestos and lined with heavy tin plate sheets, lock-jointed and blind nailed, making same heat retaining and fire-proof on inside. Outer surface shall be finished with two coats of yellow shellac. Doors shall be constructed in similar manner, hung on heavy coppered hinges and fitted with malleable-iron latches.

Coils

Shall be provided with vertical stands of 1 1/4-inch steam coils of the circulating type, 18 pipes high, with suitable supply and return connections and located on either side of door opening.

Circulation and Ventilation

A fan suspended from roof and constructed with four metal blades, and operated by a horizontal countershaft with bevel gears, shall be furnished for proper circulation of air.

Ventilation shall be arranged by intake of air at door opening and outlet of damp air through funnel-shaped galvanized pipe connection in roof.

Trucks

Shall be constructed with metal bases, mounted on casters, and galvanized-pipe uprights carrying iron cleats for holding metal clothes bars, and tied with galvanized pipe-ties. Shall be provided with wood handles for convenience in handling and angle-iron floor tracks for guiding trucks into room.

*The above is a cut of the kind asked for at
the Kameoops Residential School.

INDIAN AGENT'S OFFICE

Kamloops, B.C.,

October 31, 1928. 19

IN YOUR REPLY REFER TO
No. 4-7-3535.
ALSO
TO DATE OF THIS LETTER

Sir,

I have the honour to report that I wired you today as follows:- "If drying tumblers from Stanley Brock Limited Winnipeg have not yet been shipped hold order until my letter mailed today reaches you please"

In sending the foregoing telegram I was prompted to do so for the reasons as herein. Rev. John Duplanil, O.M.I., Principal of Kamloops Industrial School advised me some time ago that he needed a drying outfit for the School besides the drying tumbler now in the school laundry. He said that he wanted a wood truck drying room, and that he had already spoken to some of the Departmental authorities about it and that he was promised that the matter would be given the necessary consideration before the new wing to the school was completed. I then asked him to get quotations from various firms of the cost of the dryer.

Yesterday he wrote me a covering letter about the matter, a copy of which is herewith attached. I also attach copy of the quotations he received. The originals are here in my office.

This morning the matter came up again when the Reverend gentleman phoned me that he had just received a letter from the Department dated October 24th, stating that a 30"x 42" Junior Drying Tumbler motor driven, had been ordered from the Stanley Brock Limited of Winnipeg, Manitoba, for the school, and that he did not want this. What he wants is a truck drying room. I then visited the school, and laundry in particular, in order to see for myself just what was meant and what is required.

I find that owing to the present position of the laundry machinery, in order to instal a new tumbler, some considerable alterations will have to be made, the cost of which is placed by Father Duplanil at about \$150.00. There is a space in the corner of the Laundry that will be suitable for the proposed truck drying room. The Rev. Father states that if the Department will allow him the tumbler they have ordered from Winnipeg and the Truck Drying Room that good use may be made of both, and if only one of the two articles is allowed, then by all means, he wants the truck drying room and wants the Department's authority to build it himself as his quotation is so much lower than any of the firms that quoted.. I do not pretend to be an authority on this subject, but the situation is as herein described. An early reply will be appreciated.

I have the honour to be, Sir,

EM/S.

R

Sir:-

I regret to have to inform you that a fatal accident occurred at the Indian Residential School yesterday afternoon, when a painter, who was taking a 2"x6" scantling off the roof, threw it down just as two of the steam fitters walked out of the doorway on the north side of the building to carry in some radiators.

One of the men, named Joseph Rigby, was hit on the head by the scantling and his skull was fractured:

This occurred about 1-50 p.m. and the man died in the hospital about 11-20 p.m.

I attended the inquest held this afternoon, when the verdict of the coroner's jury was "that Joseph Rigby met his death accidentally by being hit on the head by a falling timber at the Indian Industrial School on the afternoon of November 30, 1928.

If there is anything further you wish to know or to have me to do I shall be glad to have your instructions.

yours truly

Sir:- re Addition to Indian Residential School,

I beg to report that the work is progressing very well. We have been favoured with very good weather and practically all the outside work has been completed.

In the basement all the woodwork is completed except the hanging of the doors and the casing of the beams for the sheet metal worker. I expect the men here to lay the mastic floors in a few days.

On the ground floor and the first floor, most of the woodwork is finished except the picture mould and casing the beams, and the doors are being hung. The painters are following along behind the carpenters as quickly as possible.

On the second floor the floor has been laid but no casings have yet been fixed.

The sheet metal workers are not getting on very quickly owing to a scarcity of men.

The heating engineers are making progress and we shall soon be able to have the heat on.

yours truly

J. Hodgson.

Sir:- re Addition to Indian Residential School.

I beg to report that the work is now approaching completion.

All trades are finished except the plumbers, painters and electricians.

The plumbers are installing the fixtures except the urinals which have not yet arrived. These had to come from England, and are due in Vancouver today and we hope to receive them in a few days.

The electrician has not yet received the fixtures but tells me that he expects them very soon.

The second floor is finished and the beds are in, ready for occupation.

I expect the building will be completely finished in about two weeks.

The Reverend Principal, who has been ill and is away recuperating, intends to occupy the building on his return, which will be about the end of the month.

yours truly

J. Hodgson.

Sir:- re Addition to Indian Residential School

On pages 66 & 67 of the specifications are enumerated the plumbing fixtures which have to^{be} installed.

On the first floor are mentioned 1 slop sink with back and 3 slop sinks without backs, but the plan shows 2 sinks with backs and 3 without backs.

Neither the plumber nor myself noticed the discrepancy until now when the fixtures are being installed and there is one short, although the roughing in has been done for all of them.

I have instructed the plumber to instal another sink with back, and shall be glad to know if you will allow an extra for this.

March 6th, 1929.

Sir:- re Addition to Indian Residential School

I am glad to inform you that the above building is now complete; the last work being completed on the last day of February.

The delay was caused by the fact that the extra plumbing, which had to come from England, did not arrive until the beginning of February.

The Reverend Principal, however, has occupied the dormitories, class rooms, recreation rooms and some of the other rooms since the last day of January.

I enclose herewith certificate for \$5787.50 in duplicate together with contractor's statement.

Amongst the extras is an item for \$38.50 for small doors in the attic to enable the steam fitters to get in under the roof at any time to inspect the pipes. I have not received a statement of this before to submit to you.

These are not shown on the plan or mentioned in the specifications - and on that ^{account} the contractor claims an extra for them - but similar doors were put in east wing for the same purpose, and the specifications say that the new building had to be the same as the old one.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 6)

ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

I said I would draw your attention to it and you would decide whether to accept it or not.

The contractors asked me to inquire if you would return their deposit with certificate as there will still be 10% of the cost of the building in your hands.

I forgot to get the contractor's written guarantee as mentioned in clause ¹⁴ of the specifications, but they have promised to let me have it tomorrow and I shall send it on by next mail.

Can you let me know when this cheque and the final cheque are mailed to the general contractors as some of the sub-contractors seem rather anxious and have asked me if I can let them know when payment is made.

I shall be glad to have your instructions with regard to the plans and specifications and stationery and any other matters that you may require me to attend to

yours truly

J. Hodgson.

KAMLOOPS INDIAN RESIDENTIAL SCHOOL
Kamloops, B.C.

October 18, 1928.

E. H. Tredcroft, Esq.,
Div. Eng.,
Kamloops, B.C.

Dear Mr. Tredcroft:-

In the plans that you have prepared for the water supply of this Institution could you include a smaller pump in the same building and a reservoir outside to supply water for the garden, trees and lawns? It will be very expensive to use the large irrigation plant for these purposes. Moreover, the water taken directly from the river is too cold in the springtime and retards growth.

The extra expenses will be very small indeed, but the benefit will be very great.

I shall be greatly obliged to you for recommending these changes to the Dept.

Yours very sincerely,

"John Duplanil".

C O P Y

File No. 4854-K.

Department of the Interior
Dominion Water Power & Reclamation Service,

Box 330, Kamloops, B.C.
October 26, 1928.

Sir:- Re - Kamloops Industrial School.
Your file #174-2C.

I am enclosing herewith copy of letter from the Rev. Father Duplanil, principal of the Kamloops Industrial school, in which he asks to be supplied with a small pump to be used for irrigation purposes on the school garden, trees and lawn.

Father Duplanil claims that the amount of water delivered by the present irrigation pump, i.e., 2,000 gallons per minute, is too large to be handled when the garden only requires irrigation, and that during the spring the water from the South Thompson river is too cold to be placed directly upon the land.

He therefore suggests that a small pump (100 gallons per minute capacity) delivering into an open concrete tank, capacity from three to four thousand gallons, would be of great assistance, as it would enable the water to have the chill removed from it before being used.

Father Duplanil mentioned this matter to Dr. Scott when he was here, at which time I was present, and asked Dr. Scott if he could retain the existing pump and tank for this purpose after the new one was installed.

I objected to this at the time on the grounds that the pump was not suitable for his requirements, and the tank was a high-pressure tank too valuable to be used for such a purpose; and that the complete system could well be used in some other school.

The matter, however, was not discussed any further at the time, and Father Duplanil now informs me that when he left Dr. Scott he was under the impression that arrangements would be made for the installation of this pump.

I informed Father Duplanil that I had had no instructions from you regarding this matter, and if such a pump was going to be installed authority for its installation should be obtained immediately in order that provision could be made to have it placed in the new pump house, and informed him that, in view of the short time available, if he would write to me I would forward the letter to you for your consideration.

C. E. Webb, Esq.,
District Chief Engineer,
Dominion Water Power & Reclamation Service,
Vancouver, B.C.

C. E. Webb.

- 2 -

I am of the opinion that a small pump for irrigating the garden and lawn should be supplied, as the large irrigation pump is undoubtedly too big to operate satisfactorily unless general irrigation of the farm lands is being carried out at the same time, and I would therefore respectfully suggest that a small pump as outlined above be supplied for this purpose.

With regard to the installation of a concrete tank for the purpose of removing the chill from the water before it is used, not being familiar with the cultivation of these crops, I am unable to say definitely whether same is absolutely necessary, but I see no reason for doubting Father Duplanil's good judgment in this regard.

Will you kindly notify me what action you intend to take, or wish me to take, in this matter.

An estimate of cost of the proposed installation, together with blue print showing its location, is herewith enclosed.

Your obedient servant,

(sgd.) E. H. Tredcroft,
Senior Assistant Engineer.

CANADA

PLEASE REFER TO ONE SUBJECT IN A
LETTER AND IN YOUR REPLY QUOTE

FILE NO. 174-20

DOMINION WATER POWER AND RECLAMATION SERVICE

VANCOUVER, B.C. October 27, 1928.

Sir: Re - Kamloops Industrial School,
Domestic Water Supply.

As you were advised in my letter of 17th inst., contracts have already been let for the construction of a water supply system for the Kamloops Industrial School. I am now in receipt of a letter from Mr. E. H. Tredcroft, dated October 26, where-with he encloses a copy of a letter, dated October 18, from the Rev. Father Duplanil, Principal of the Kamloops Indian School, from which you will note that Father Duplanil requested he be supplied with a small pump, etc., to be used for irrigation purposes on the school garden. Mr. Tredcroft has estimated that it will cost some \$880.00 to provide the small irrigation system requested.

Enclosed you will find:

- (1) Copy of Mr. Tredcroft's letter of October 26.
- (2) Copy of Father Duplanil's letter to Mr. Tredcroft of October 18.
- (3) Copy of Mr. Tredcroft's estimate of cost.
- (4) Copy of plan of proposed water supply system for Kamloops Industrial School showing location of small garden irrigation system.

I would ask you to take this matter up immediately with the Department of Indian Affairs and ascertain if it is their desire that this work should be undertaken. If it is to be done at all, it would be advisable to have it put in while the water supply system for the school is being done.

Encl.

Your obedient servant,

C. E. Webb,
District Chief Engineer.

Mr. Phin
Sir:-

Your file number: 154-0-5

In further reference to my letter of the
3rd instant regarding a small pump proposed to be
used for irrigation purposes at the Kamloops Industrial
School, I have received the following telegram from
Mr. Webb in response to one of mine requesting further
information on the subject -

"Replying your wire tenth re garden
pump Kamloops School. Stop. Tredcroft
advises irrigation pump used so far but owing
to capacity is wasteful also new water supply
system could be used but this also is not
economical due to extra lift to reservoir and
might result in reservoir being empty when
required for fire purposes. Stop. Am asking
Tredcroft for further information."

I have also received a letter from Mr. Webb
on the subject, dated the 18th instant, copy of which
is enclosed herewith, *together with copy of a second
telegram received today.* Your obedient servant,
Encl.

DOMINION WATER POWER AND RECLAMATION SERVICE

Vancouver, B.C.
November 8, 1928.

Sir:

Kamloops Industrial School

With further reference to my letter of October 27th regarding a request of the Reverend Father Duplanil, principal of the Kamloops Industrial School, to Mr. Tredcroft, for the installation of a small pump and concrete reservoir to be used for irrigation purposes on the school garden.

This matter has been given further consideration here and if the Department of Indian Affairs has not already made a decision in the matter I would suggest that for the present at least, only the installation of pumping unit with necessary apparatus, be proceeded with for supply of irrigation water to the school garden, and the matter of a concrete tank be left in abeyance as it is not fully appreciated that a reservoir of this nature is necessary.

Should it be found after the small irrigation plant has been in service that it is necessary to take the chill off the water before using it for irrigation purposes then a reservoir may be constructed without any appreciable additional cost over installing it at the present time when it's necessity is questionable.

Kindly let me have a reply to this at an early date and if you have already replied to my earlier letter I would appreciate your wiring your further instructions upon receipt of this letter.

Nov. 14, 1926.

Sir,-

J.P.

I am in receipt of your letter of the 3rd instant, together with copies of Mr. Webb's communication of the 27th ultimo, addressed to your office, concerning the advisability of installing an additional pumping plant for the irrigation of the garden at the Kamloops Indian Residential School at a cost of \$880.00. In reply I beg to say that this matter will be given definite consideration as soon as I am furnished with a detailed report from Mr. Wedderburn giving the reasons why the following pumping plants cannot be used to supply irrigation water for the above mentioned garden, -

1. The present irrigation system.
2. The water supply system for domestic purposes which is now being installed.
3. The existing pump and tank, as suggested by the Principal of the School.

With regard to the change in the make of the piping for the water supply system as agreed upon by the District Engineer, Mr. Webb, I beg to say that the Department approves of this action on condition that it will not entail additional expense.

Your obedient servant,

Dear Sir :-

Attention Mr. J.D. McLean,
Assistant Deputy and Secretary.

We have your letter of the 6th, asking that we cancel the Drying Tumbler which was recently ordered for the Indian Residential School at Kamloops. We will carry out your wishes in this connection.

We have received a telegram from our Vancouver manager who has recently been in Kamloops, advising that this institution already has a Tumbler but that they want a Dry Room. No doubt this is where the error occurred. We certainly would be very pleased indeed to receive your order for a Dry Room if you decide to order one of these.

We would be very pleased indeed to hear from you in this connection.

Yours very truly,

STANLEY BROCK LIMITED.

Nov. 14, 1920.

Memorandum: *Hold* *del*

Dr. Scott.

Referring to Mr. Johnston's letter of the 3rd instant, and the report submitted by the District Chief Engineer suggesting that a separate pumping plant be installed at the Kamloops Indian Residential School for the irrigation of the school garden at a cost of \$880.00, I beg to give you the following reasons why this additional installation is advisable.

1. The pumping plant which is now used for general irrigation purposes on the reserve has too great a capacity, and it would involve unnecessary expense should it be used to supply such a small amount of water as is required for the garden.
2. The domestic water supply system which is now in course of construction could also be used, but this scheme is not recommended owing to the fact that the water is being pumped to an elevated reservoir, this requiring extra lift which is not necessary in the case of an irrigation system.

It would not, therefore, be practical or economical to adopt either of the above mentioned systems, which are costly to operate simply to supply the water necessary for an open concrete tank, which would be slightly above the level of the ground and of the capacity suggested by the Principal.

As to the use of the old pneumatic water supply system which has been discarded, I have to rely on the statement given by the Engineer in charge that it is not the proper type required for irrigation purposes. I have asked the local office of the Dominion Water Power Branch to furnish me with a more detailed report on the matter. In the meantime will you please advise whether this question should be left in abeyance or the installation of the additional pump authorized.

De Hein
DEPARTMENTAL ENGINEER.

Sir,

Re: Kamloops Indian School,
Domestic Water Supply.

With further reference to my letter of the 17th ult. referring to the E.J. Ryan Contracting Company's contract for the construction of a water supply system including pipe line, reservoir and intake, I have been informed by the contractors that it will be impossible for them to obtain and install Stewart and Lloyd steel pipe as specified in their contract within the time limit. They request permission to substitute a pipe manufactured by Page Hersey Tubes Company, Limited, of Toronto, which is equal in cost and other particulars to that specified and they guarantee it to meet our specifications. In view of the necessity that this work be completed by the middle of December, I have informed the contractors that it will be satisfactory to us to have Page-Hersey, or other pipe of equal quality and grade, substituted.

Copy of the E.J. Ryan Contracting Company's letter of October 30, together with my reply thereto of the same date, is enclosed herewith for your information.

Your obedient servant,

(Sgd.) C. E. Webb,
District Chief Engineer.

Dear Sir,

Indian School Water Service,
Kamloops, B.C.

We beg to advise you that we find that it will be impossible to obtain and install Stewart and Lloyd Steel Pipe as specified in our Contract within the time limit. Delivery of this Pipe which is manufactured in England, cannot be obtained in less time than about six weeks or perhaps two months, and we therefore wish to request that you will allow us to substitute Pipe manufactured in Canada by Page Hersey Tubes Limited of Toronto. This Pipe is in our opinion, suitable for the purpose for which it is required, and equal in cost and other particulars to that specified, and we guarantee it to meet your Specifications.

It is very desirable from all points of view to get as much work done as possible before the bad weather sets in and we would be glad to have your decision in the above matter immediately.

Awaiting your advices,

Yours faithfully,

E. J. RYAN CONTRACTING COMPANY, LTD.,

October 29, 1928.

Sir: Re: Kamloops Industrial School.

I am today paying from Indian General Funds an account for \$23.41 rendered by the City of Kamloops for changing location of one of their high tension line poles and wires. In submitting this account Mr. Tredcroft states as follows:-

"This work was authorized by me in view of the fact that while at the Kamloops Industrial school I found that the high tension line (2200 volts) was resting on the roof of the new school building, and that on at least one occasion one of the workmen engaged thereon had taken hold of these wires while engaged in his work. As there was grave danger that he might have been seriously injured and that if a short circuit occurred during wet weather the school might possibly have been set on fire, I considered it advisable to have the change made at once."

If the Department of Indian Affairs wishes this account paid from some other source kindly notify me and the adjustment can be made.

Your obedient servant,

C. E. Webb,
District Chief Engineer.

Certified to be a true copy of a Minute of a Meeting of the Committee of the Privy Council, approved by His Excellency the Governor General on the 15 th NOVEMBER 1928

copied

The Committee of the Privy Council have had before them a report, dated 2nd November, 1928, from the Superintendent General of Indian Affairs, stating that the Water Power Branch of the Department of the Interior by public advertisement asked for tenders for the construction of the water supply system for the Kamloops Indian Residential School, in the Kamloops Indian Agency in the Province of British Columbia, upon plans and specifications prepared by the Branch. A schedule of the tenders received is submitted.

Mr. C. E. Webb, District Chief Engineer of the Water Powers Branch, resident at Vancouver, recommends that the tender of the E. J. Ryan Contracting Company of Vancouver for \$12,691 for the water supply system; and the tender of Messrs. Fernie Brothers of Kamloops for the pumping unit, including the pump and motor for \$3,100 be accepted.

The Engineer of the Department of Indian Affairs has reported that the above tenders are fair and reasonable. The Minister, therefore, recommends that they be accepted pursuant to the requirements of Sub-section 2 of Section 36 of the Public Works Act. Funds for this purpose are available from the appropriation for Indian Education.

The Committee concur in the foregoing recommendation and submit the same for approval.

E. J. Ryan
Clerk of the Privy Council.

The Honourable
The Superintendent General of Indian Affairs.

" C O P Y "

November 13, 1928.

Sir,

Re - Garden Irrigation Supply,
Kamloops Industrial School.

This will acknowledge receipt of your letter of the 12th inst. re the above mentioned project. From our recent correspondence you will gather that the Department of Indian Affairs does not appear anxious to install further machinery at this school and, therefore, it has occurred to me that it might be possible to get away from the necessity for a further pump by the construction of a reservoir to be filled from either the present irrigation system or the fire and water supply system which is now being installed for this institution. If a reservoir could be constructed at the end of the present irrigation ditch it might collect sufficient water for use on the garden and if not, it would only be necessary to operate the irrigation pump for a short time to fill the reservoir. The same might apply if using water from the water supply and fire protection system.

Without being fully conversant with conditions at the school, it is difficult to say whether this proposal is feasible or not, considering that one would have to know the quantity of water required, by the garden, the size of reservoir necessary, cost of same, cost of water supply and possible location of reservoir and method of drawing off. In this connection I would consider that the reservoir need not hold more than one days supply and if water was not to be held for more than one day, the question of seepage should not be a serious factor, so that an excavated reservoir might be considered. This could easily be constructed if the location is suitable, with slip scrapers. If the seepage was not unreasonable it might be cut down by lining the reservoir with clay. I am not, of course, advised as to whether clay is convenient, nor do I know the type of soil which one might expect in such an excavation. The presence of a lake on the school grounds, however, leads me to believe that losses would not be excessive.

The construction of a reservoir such as outlined above would slightly improve water temperature (even if not necessary) and in this way we could to a certain extent, meet the contentions of the school authorities that a water pump direct from the river is too cold for irrigation purposes. However, against the construction of a reservoir one should consider the resultant damage from seepage losses, although as previously stated, I do not consider that such losses would be serious.

On receipt of this letter will you kindly let me have immediately by wire your opinion as to the feasibility of handling the matter as outlined above. It is rather unfortunate that we were not instructed to consider a comprehensive water supply system for all purposes in the first instance so that we could have obviated the necessity of constructing the several separate systems which now are necessary.

Your obedient servant,

E.H. Tredcroft, Esq.,
Senior Assistant Engineer,
Dom. Water Power & Reclam. Service,
Box 330, Kamloops, B.C.

(Sgd.) C. E. Webb,
District Chief Engineer.

" C O P Y "

Department of the Interior
DOMINION WATER POWER AND RECLAMATION SERVICE

Kamloops, B.C.,
Nov. 12, 1928.

Sir,

With reference to your telegram of Nov. 10th re proposed pump for the Kamloops Industrial School garden I would state that it will not be possible to use the new fire protection pump for this purpose in view of the fact that this pump is designed to deliver against a head of 231 feet, whereas the head which the garden pump will operate against will be approximately 50 feet.

In addition to the above it would not be good practice even if it were possible, to provide a pump for fire protection and domestic supply and allow same to be used for general irrigation purposes; the fire protection pump has a definite function to perform in the case of an emergency and if it is being used for general utility purposes then it is impossible to guarantee that it will be in good operating order at the time it is required for fire protection.

When it would be quite possible to supply water from the new reservoir to the school garden for irrigation purposes it would however be most uneconomical in view of the fact that the reservoir is situated at an elevation of 200 feet while the garden is at an elevation of approximately 50 feet and any water used on the garden would have to be pumped first into the reservoir at an elevation of approximately 150 feet higher than would be necessary if it is pumped to the garden direct. This would mean that the school would be paying for raising water 200 feet when 50 feet would be sufficient.

With reference to the proposal to use the existing irrigation pump for garden purposes this is exactly what they have been doing up to the present time and the reason that the principal of the school asked for a separate pump was that they found that unless general irrigation of the other farm lands was being carried out at the same time as the garden was being irrigated, the volume supplied by the irrigation pump i.e. 2000 U.S.G.P.M. was too large to handle satisfactorily, and as the garden contains an area of only 10 acs. this contention of the principal's would appear to me to be quite reasonable.

One other reason against allowing the garden to be irrigated from the domestic supply is that if this is permitted then it is quite possible that should a fire occur the reservoir supplied for fire protection might be found at that time to be empty.

After considering the matter very carefully I have come to the conclusion that unless they are prepared to carry on under the old method i.e. irrigating the garden only when irrigation of other farm lands is being carried out, then a separate pump is the only economical and safe method of handling the situation.

Your obedient servant,

(Sgd.) E. H. Tredcroft,
Senior Assistant Engineer.

With reference to your letter of the 14th instant regarding the proposed additional pumping plant for the irrigation of the garden at Kamloops industrial school, I enclose herewith copies of an exchange of correspondence between Mr. Webb and Mr. Tredcroft regarding the proposal which, if suitable, will do away with the necessity of putting in an additional pump.

Mr. Webb states that he is awaiting a reply to his suggestion from Mr. Tredcroft and will wire when that is received.

Your obedient servant,

J. T. Johnston,
Director.

REPORT

re

Garden Irrigation Supply,
Kamloops Industrial School.

Prepared by

E. H. Tredcroft,
Senior Assistant Engineer,

Dominion Water Power and
Reclamation Service,
Kamloops, B. C.

November 23rd., 1928.

Sir:-

With reference to your letter of November 21st. regarding the proposed installation of a pump to supply the garden at the Kamloops Industrial school with water for irrigation purposes, and requesting information as to why the present irrigation pump or the proposed new fire protection pump cannot be used for this purpose, in this connection I would report to you as follows:

Irrigation of the garden at the Kamloops Industrial school is carried out at the present time by means of the large irrigation pump (capacity of 2000 U.S. gallons per minute) which was installed in 1927 for irrigating the farm lands.

It is now claimed by the principal of the Industrial school that this pump is too large to be handled satisfactorily when the garden only is being irrigated, for unless general irrigation of the other farm lands is being carried out at the same time, the volume of water supplied by this pump, i.e., 2000 U.S. gallons per minute, is far

more than can be

Indian Affairs (RG 10 Volume 6448, file 882-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR-COPY

more than can be utilized on the garden at one time and a large portion therefore has to be allowed to go to waste.

The principal also claims that whereas ordinary farm lands when being irrigated can be flooded with water with beneficial results, in cultivating a garden such is not the case, and what is really required is a small and continuous supply of water.

He also points out that in cultivating farm lands it is possible to run the large irrigation pump for a day or two and give these lands a thorough flooding or saturation, after which they require no more water for a week or ten days, whereas in the case of the garden it is desirable that water be applied to the land daily and without flooding.

It is for this reason that he has requested that the school be equipped with a small pump having a capacity of 100 U.S. gallons per minute, so that in irrigating the garden the operation of the large irrigation pump, having a capacity of 2000 U.S. gallons per minute, would not be necessary, and after having considered his request quite carefully I am of the opinion that same is justified.

With reference to the proposal to use the new domestic water supply, consisting of a fire pump and reservoir, for this purpose, I would state that whereas this is possible it would nevertheless be a most uneconomical method, besides being particularly bad practice from a fire protection point of view.

The fire pump which is about to be installed is a high-grade, high-pressure pump and is

supplied for one

supplied for one purpose only, i.e., that of keeping the reservoir filled for the domestic supply and for use in case of fire.

To permit this pump to be used for other purposes, such as general irrigation of the school garden or farm lands, would in my opinion be very bad practice from a fire protection point of view, and would probably mean that after a while, the pump having been used continuously as an irrigation pump, it would come to be regarded by the operator as such, instead of as a fire pump, and after continual use might in case of a fire quite possibly be found to be out of order or working badly at a time when it is most urgently required.

When it is remembered that the value of the school buildings is in the neighborhood of a quarter of a million dollars, it would not seem as though we were justified in using this pump or water supply system for any purpose other than those for which they were originally designed, i.e., domestic supply and fire protection.

In addition to the above, the pump, as stated before, is a high-pressure pump designed to pump water to a reservoir against a pressure of 91 pounds per square inch, whereas the elevation of the garden above the source of supply is only 50 feet. It would therefore not be possible to pump water to the garden direct by means of this pump without throttling down the discharge to prevent overloading the motor, which would be very wasteful of power, while to use water out of the reservoir for irrigating the garden would mean that the water would be pumped four times as high as is necessary, which would also be very uneconomical from an operating point of view, and in

addition would give

addition would give the extra hazard that were a fire to occur just after irrigation of the garden had been carried out it is quite possible that the reservoir, which is provided to supply water for domestic purposes and for immediate protection in case of fire, might be found to be empty and no water supply would then be available until the fire pump could be started, which operation might occupy an inexperienced operator ten or fifteen minutes.

I would therefore strongly recommend that no proposal to use either the fire pump or the domestic water supply reservoir for irrigation purposes be considered in any way.

With reference to the proposal of the principal of the Industrial school that the existing pump and tank might be used for this purpose, I would state that whereas the completed garden will have an area of from eight to ten acres, which will require a supply of water of from 80 to 100 U.S. gallons per minute for its cultivation, the capacity of the existing pump is only 20 U.S. gallons per minute, which amount is far too small for this purpose.

In addition to the above, the existing pump is of the reciprocating type designed to operate intermittently and is not a heavy-duty pump suitable for continuous operation, as is the case when being used for general irrigation purposes.

The existing plant as it stands is compact and in fairly good condition and could no doubt be transferred to some other school or institution requiring a small domestic water supply system, which disposal would, in my opinion, prove

to be far more

to be far more economical than attempting to use it for a purpose for which it was never designed and in which we could not hope for its successful operation.

In conclusion I would state that unless they are prepared to carry on under the old system, i.e., that of irrigating the garden at the same time that irrigation of the other farm lands is being carried out, which method the principal of the Industrial school claims is very unsatisfactory and uneconomical, there is no way other than by the installation of a small separate pump for this purpose that we could recommend as being both safe and economical.

Your obedient servant,

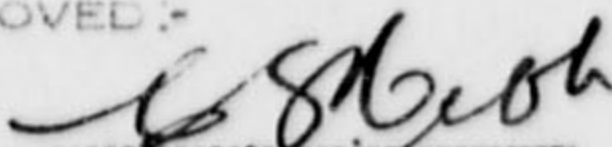

E. H. Tredcroft,
Senior Assistant Engineer.

C. E. Webb, Esq.,
District Chief Engineer,

In further reference to my letter of the 20th instant I enclose herewith a report received from Mr. Webb on the irrigation supply for the garden at Kamloops Indian school, which explains fully the reason why it would be advisable to install a small pump to irrigate the garden rather than to obtain a supply from the new installation intended for domestic supply and fire protection, and explains also the difficulties of carrying on under the old system of irrigating the garden at the same time as irrigation of other farm land is being carried on.

I shall be glad to have your instructions in regard to this matter.

Your obedient servant,

J. T. Johnston,
Director.

Sir,-

J. T. Johnston

I wish to acknowledge receipt of your letter of the 30th ultimo, together with a report on the proposed irrigation system for the supplying of water to the garden at the Kealeope Indian Residential School.

In reply I beg to say that in view of the explanation given in Mr. Webb's report I would request that you arrange to have the additional pumping unit installed, in the manner suggested and as economically as possible, with the exception of the concrete tank to take the chill off the water before using it for the garden. The question of installing this reservoir will be taken into consideration later on, should it be found that it is absolutely necessary to complete this installation.

Dear Sir:-

Please find herewith enclosed Vouchers Nos. 61-29, 62-29 and 63-29, covering expenses in connection with the installation of a Drying Room at Kamloops Indian Residential School, as authorized by your Letter No. 154-0-5, under date of November, 1928.

The Department will observe that we have had to expend \$7.80 over the authority granted by you. However, I am pleased to see that our estimate came as close as it did.

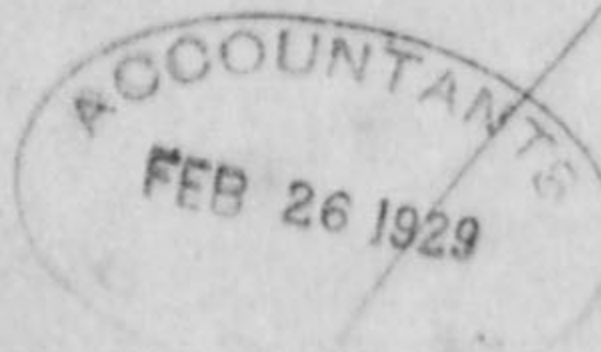

Trusting that you will approve of these accounts, I have the honour to be, Sir,

Your obedient servant,

April 9, 1929.

Sir,-

I wish to acknowledge receipt of your communication of the 2nd instant, with reference to the final payment to be authorized to E. J. Ryan Contracting Co. Ltd., on their contract for the construction of a water supply and fire protection service at the Kamloops Indian Residential School, Kamloops, B. C.

In reply I beg to say that Mr. Trederoft was advised by wire on April 8th to issue certificate for the balance due on the above mentioned contract, including the payment of an additional amount of \$239.47 for extras authorized by him. With regard to the other items for extras amounting to \$464.80, also recommended by Mr. Trederoft for labour and material required to meet the unusual conditions on the construction of the coffer-dam for the intake pipe, I should like to be advised, before giving the matter any further consideration, whether, according to the requirements of the specifications and contract, this Department is actually responsible, and would be justified in granting this extra payment to the contractors. As requested I am enclosing herewith a copy of a telegram sent to Mr. Trederoft at Kamloops.

It will be necessary that the Department be furnished with copies of final certificate issued by your Kamloops Office, in connection with the above mentioned work, as was done for Onion Lake.

Your obedient servant,

J. D. McLean.
Assistant Deputy and Secretary.

Sir,

Re: Kamloops Industrial School,
Water Supply and Fire Protection.

Encl.

I enclose herewith copy of a letter received from Mr. Webb with enclosures, regarding the final account of the E.J. Ryan Contracting Company, Limited, for the construction of the water supply and fire protection system at the Kamloops industrial school. From this you will note that there is a sum of \$2334.86 due on the contract price, together with two accounts for extras amounting to \$239.47 and \$511.28 respectively.

Mr. Webb recommends payment in full of the first account for extras and suggests that the second should be paid, deducting a sur-charge of ten per cent, leaving an amount of \$464.80.

Mr. Webb asks that instructions be given him by wire so I shall be obliged if you will advise me in regard to this as soon as possible.

In replying will you kindly return the final account and statements herewith in order that they may be returned to Mr. Webb with your instructions.

Your obedient servant,

J. T. Johnston,
Director.

Department of the Interior
Canada
DOMINION WATER POWER AND RECLAMATION SERVICE

Vancouver, B.C., March 27, 1929.

Sir,

Re Kamloops Industrial School,
Water Supply and Fire Protection.

Enclosed herewith is copy of letter received from E.H. Tredcroft to which is attached copy of letter to him from the E.J. Ryan Contracting Company. There is also enclosed copy of the Ryan Company's final account under their contract in connection with the above water supply and fire protection system. This account is recommended for payment by Mr. Tredcroft, who states in his letter that the work has been satisfactorily completed.

With reference to the account for extras, the first one amounting to \$239.47 covers work ordered by our engineer in charge, Mr. Tredcroft, and has my approval for payment. The second account for extras, \$511.28, is recommended by Mr. Tredcroft and, considering the extremely adverse weather conditions and the fact that the contractor made every effort to rush the job to completion in order that the school might have the earliest benefit of these works, I would suggest that this account be paid for \$464.80. The sur-charge of 10% is hardly justified.

I am withholding payment of that part of the account (extra \$511.28) in the meantime pending your instructions, and I would be obliged if you would wire those instructions in order that the account may be disposed of as soon as possible.

Your obedient servant,

(Sgd.) C. E. Webb,
District Chief Engineer.

Box 330, Kamloops, B.C.,
March 26th, 1929.

Sir,

Re Installation of Domestic Water Supply
and Fire Protection System, Kamloops
Industrial School.

I am enclosing herewith final accounts from the E.J. Ryan Contracting Co. Ltd., with reference to their contract at the Kamloops Industrial school, which work has now been completed by them in a satisfactory manner.

You will note on the attached accounts that the Ryan Contracting Co. have asked for an additional payment of \$511.28 to recompense them for expenditures made in the construction of the coffer dam. As you will remember, I mentioned to you previously the difficulty the Ryan Contracting Co. experienced in undertaking this work, owing to the nature of the ground and the amount of water it was necessary for them to handle. A great part of the work also had to be carried out at a most unfavourable time of the year when the temperature was below zero.

While the charge can, of course, be disallowed under their contract, nevertheless, I consider same to be fair and would respectfully recommend that it be paid.

Your obedient servant,

(Sgd.) E. H. Tredcroft,
Senior Assistant Engineer.

Department of the Interior
Canada

Dominion Water Power and Reclamation Service

Vancouver, B.C.,
April 9, 1929.

Sir,

Re: Kamloops Indian Residential
School, Domestic Water Supply
and Fire Protection.

I have to inform you that all work in connection with the installation of the domestic water supply and fire protection systems at the Kamloops Indian Residential has now been completed and the finished building will be handed over immediately to the local Indian Agent.

Mr. Tredcroft, our engineer who had charge of this installation, informs me that the contractor on the building connected the inside fire protection pipes to the domestic supply lines when installing the fire hydrants inside the building, instead of running separate lines to connect with the eight inch water main outside the building.

As the pressure in the case of fire when the pump is running, would be quite high, 80 to 100 pounds per square inch, there is danger that the interior domestic fixtures might be damaged or blown off the wall, with a consequent great leakage of water and with a corresponding reduction of pressure at the hose nozzles.

The remedy for this would be to run a separate line from the 8" water main outside the building the connect this with the stand pipes that supply the inside fire hoses, so that, should a fire occur the interior fire protection system would be entirely separate from the domestic water supply. The estimated cost of providing this additional fire line amounts to \$400.00 and should, in my opinion, be carried out, for while it is not absolutely essential, the inside fire protection as it is today does not conform to good standard practice which demands that all inside fire protection systems should be separate from domestic systems which supply bathrooms, washrooms, kitchens, etc.

I would ask you to kindly refer this matter to the Department of Indian Affairs and inform me if they wish this change to be made.

Your obedient servant,

(Sgd.) C. E. Webb,
District Chief Engineer.

Sir,

Re: Kamloops Industrial School,
Water Supply and Fire Protection.

Encl.

I enclose herewith copy of a letter received from Mr. Webb reporting that the domestic water supply and fire protection systems at the Kamloops industrial school have been completed and suggesting certain changes in regard to the fire protection which he estimates will cost \$400.

I shall be glad to have your instructions in regard to this additional expenditure.

Your obedient servant,

J. T. Johnston,
Director.

Sir,-

Re: Kamloops Industrial School,
Water Supply and Fire Protection.

In further reference to my letter of April 2nd regarding the contract for the construction of the water supply and fire protection system at the Kamloops Industrial School, I enclose herewith copy of a letter received from Mr. Webb regarding the additional extras for which payment is asked by the contractor. Mr. Webb refers to his letters of October 17th, 1928 and March 27th last, copies of which were sent you at the time. He also refers to a letter from Mr. Tredcroft of April 19th and a certificate of completion of contract of the same date, copies of which are enclosed herewith.

I shall be glad to have your instructions as to whether payment of the second extras amounting to \$464.80 should be made to the Ryan Contracting Company.

ENCLS.

Your obedient servant,

J. T. Johnston,
Director.

Dominion Water Power and Reclamation Service

Vancouver, B.C.
April 23, 1929.

Sir:

Your letter of the 11th inst. is acknowledged having reference to the installation of water supply and fire protection system at the Kamloops Indian Residential School, which has recently been completed for the Department of Indian Affairs. Your reference to that Department's letter of April 9th regarding the payments to the E.J. Ryan Contracting Company in connection with the work they performed on this project is noted.

I would ask you to refer to my letter of March 27th and also copy of Mr. Tredcroft's letter of March 26th which was attached thereto. The original contract price was \$12,691.00. Extra work authorized by this Service amounted to \$239.47. The Ryan Company claim an additional payment on account of unforeseen contingencies of \$511.28. The Department of Indian Affairs under the contract is not legally bound to pay this claim for \$511.28. Due to the extremely adverse weather conditions which existed during the greater part of the construction period and the fact that the contractor made every effort to rush the job to completion through this bad weather in order that the school might have the earliest possible benefit of the water system, I suggested that this account be paid, less the 10% surcharge indicated by the Ryan Company.

In order to make this quite clear, if you will refer to your copy of the contract with Ryan Company which was attached to my letter of October 17, 1928, and the Ryan Company's final account which accompanied my letter of March 27th last, you will see that the total contract amounted to \$12,691.00. This account was paid in two progress estimates and a final account as follows:-

1st Progress Estimate, 27th November, 1928	\$7820.00
2nd Progress Estimate, 9th February, 1929,	2536.14
Final payment under contract, 21st March, 1929.	<u>2334.86</u>
Total	<u><u>\$12691.00</u></u>

J.T. Johnston, Esq., - 2 - April 23, 1929.

Extras as per list attached to Ryan's final account were as follows:-

1st. Extra, \$239.47. Authorized by engineer and paid less credits.

2nd. Extra, \$511.28. According to Ryan Company's bill. Has not been paid nor is the Indian Department responsible for it, but I am recommending for reasons previously stated that this extra be paid, less 10% surcharge of Ryan Company, making the sum which I recommend for payment \$464.80.

For your further information in the matter I am enclosing copy of a letter in duplicate, dated the 19th inst. from Mr. Tredcroft, relative to the Ryan Company's work; also two copies of certificate from Mr. Tredcroft of same date, accepting the work performed by this company.

I trust this information is sufficient to allow the Department of Indian Affairs to decide as to whether or not payment for second extra shall be made to the Ryan Contracting Company.

Your obedient servant,

(Sgd.) C. E. Webb,
District Chief Engineer.

DEPARTMENT OF THE INTERIOR
DOMINION WATER POWER AND RECLAMATION SERVICE

Box 330, Kamloops, B.C.,
April 19th, 1929.

Sir: Re Kamloops Industrial School

I am enclosing herewith in triplicate certificate of completion of contract with reference to the installation of a domestic water supply and fire protection system at the Kamloops Industrial School, which was carried out by the Ryan Contracting Co. under their contract dated October 15th, 1928.

In this regard I may state that this work, which included:

- 1) the supply of material for and the construction of
 - 1 reinforced concrete reservoir (capacity 18,000 U.S. gallons),
- 2) the supply of material for and the construction of
 - 1 reinforced concrete pump house and intake well,
- 3) the supply and installation of
 - 120 lin. ft. of 12" dia. vitrified intake pipe,
- 4) the supply and installation of
 - 3000 lin. ft. of 8" dia. steel water main,

complete with hydrants, valves, fittings, etc., was satisfactorily carried out by the Ryan Contracting Co. in every respect and upon its completion by them was thoroughly inspected and tested by me and found to be operating satisfactorily.

The original amount of the Ryan Contracting Co.'s contract was \$12,691.00 and the amount claimed by the Ryan Contracting Co. at the completion of the work was \$13,399.25, made up as follows:

Original contract price	\$12,691.00
Extra work authorized by this office	349.47
Claim for additional payment on account of unforeseen contingencies	511.28
Credit for material (manhole frame and cover and round steel) supplied by the department	42.50
Bal. due	<u>13,399.25</u>
	<u>\$13,441.75 \$13,441.75</u>

With regard to the third item, I may state that it is the claim of the Ryan Contracting Co.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 6)

VERY

POOR-COPY

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

that these extra charges were incurred during the installation of the intake pipe, it being their contention that owing to the time of the year at which this work had to be undertaken and the unknown nature of the ground which it was necessary for them to excavate, together with the fact that in laying this pipe it was necessary for them to carry out excavation at a depth of seven feet below the water level, it was impossible for their engineer to estimate accurately what the final cost would be, and while they do not contend that they have any right to this additional amount, they have asked that the department give consideration to this claim to save them from actual loss.

While I have not been supplied with any figures from the Ryan Contracting Co. showing the actual cost to them of installing this intake pipe, I know from personal observation that they experienced considerable difficulty in carrying out the work, and must, in my opinion, have run very close to, if they did not actually exceed, their original estimate.

In addition to the above, I would state that while the work was not always carried out in exactly the manner I would have adopted myself, nevertheless it was carried out by their engineer in good faith and in accordance with his ideas of what was most suitable, and was brought to a satisfactory conclusion.

Before payment of this account is made, however, it might be advisable for the department to request further details from the Ryan Contracting Co. with reference to this extra expenditure.

Your obedient servant,

E. H. Tredcroft
Senior Assistant Engineer.

OFFICE OF
INDIAN AGENT

Kamloops, B.C.,
May 21st., 1929.

I-8-4108.

Dear Sir:-

I beg to report that while at Kamloops Indian Residential School recently, the Reverend Principal John Duplinal, O.M.I., drew the fire escape situation on the Girls' Wing of the School, to my attention from the exit. The door on the rear of the building (above the entrance to the laundry) is approximately 8' high and should be provided with an iron ladder without delay. The fire escape ladder now provided is also eight feet off the ground and should be added to by the addition of another twelve feet, that is to say, the School now requires two pieces of fire escape stairways in addition to that provided, each piece to be about twelve feet long. This is necessary for the safety of the children while using the fire escapes for practice or emergency.

I may also state that the proper fire alarm systems are ^{not} now provided in the old wing of the building. I understand that Mr. Inspector Pragnell wrote the Department more fully in this matter.

I have the honour to be, Sir,

Your obedient servant,

Ewen MacLeod
(Ewen MacLeod)
Indian Agent.

ALSO TO DATE OF THIS LETTER

COMMISSIONER'S OFFICE,
P. O. BOX 666

VICTORIA, B.C., May 1, 1929.

Dear Sir:-

When attending the public opening of the Indian Residential School, at Kamloops, on the 17th ultimo it was brought to my attention that while an efficient fire alarm system has been installed in the boys' wing, that in the girls' wing is only a temporary one put in some time ago. This temporary system while working alright has no connection whatever with the one on the boys' side of the building. Thus, in case of a fire two sets of alarms would have to be handled which might lead to confusion. I am of the opinion that a system be installed in the girls' wing similar to that of the boys', all working under single control.

DEPT. OF INDIAN AFFAIRS
MAY 3 1920
RECORDED

Indian School Opened

AT a largely-attended gathering, the Industrial School, administered under the Indian Department by Roman Catholic teachers, was formally opened at Kamloops this week. For several years the administration building in the centre and the wing at the left have been in operation, and the ceremony on Wednesday marked the completion of the other (boys') wing. The whole building, exclusive of furnishings, cost nearly \$300,000.

W. E. Ditchburn, Indian commissioner for the province, gave some interesting data concerning the progress of administration of Indian affairs in British Columbia and other provinces. In 1917 the Kamloops school could not have been in worse condition; today there is only one school that equals it in the province, in size and distinction, and that is the one at Chilliwack.

There are 200 children, all resident in the school, with room for 250 eventually. Conditions are of the best, the school rooms and dormitories being huge and airy.

Addresses were given also by E. McLeod, Indian agent; Rev. J. Duplanall, principal, and Mayor W. J. Moffatt of Kamloops. Col. G. S. Pragnell, D.S.O., inspector of Indian agencies, also attended.

There was a song of welcome from the children, and well they sang it. "O Canada" was also rendered, and the pupils turned and saluted the flag as it fluttered to the top of the high mast.

May 10, 1929.

Sir,-

I wish to acknowledge receipt of your letter of the 1st instant together with that addressed to your office by District Chief Engineer Webb, recommending the extra payment of \$464.00 to the Ryan Co., as compensation for the unforeseen contingencies in connection with their contract for the construction of a water supply system at the Kamloops Indian School at Kamloops, B. C.

In reply I regret to say that the Department is unable to give the contractor's claim any consideration under the circumstances as cases such as reported are of usual occurrence in work of this kind and should have been provided for by the contractors in the preparation of their tender. Although it is realized that the amount claimed by the contractors was actually unforeseen, the Department would not be justified in granting any extra payment, as this work was awarded after publicly inviting tenders. I would ask you to kindly explain the Department's situation to the contractors, who are, however, at liberty to furnish your office, as stated in Mr. Webb's letter, with further details with reference to the additional work which has been performed by them in the installation of the intake pipe, etc.

Your obedient servant,

Dear Sir:-

Schools.

I have the honour herewith to submit voucher No. 166-29 of the Kamloops Agency for \$75.30 in favour of Fred G. Nicholson, of Kamloops, for the manufacture and erection of a flag pole at the Kamloops Indian School.

When at Kamloops on the 17th, the Reverend Principal drew my attention to the pole which he had had erected and asked if the Department would bear the cost. I stated that I felt sure that it would, if a regular account was submitted. The pole is a very fine one having been made with two pieces spliced together, as long pole timber is not available in the Interior.

I would recommend that this account be paid.

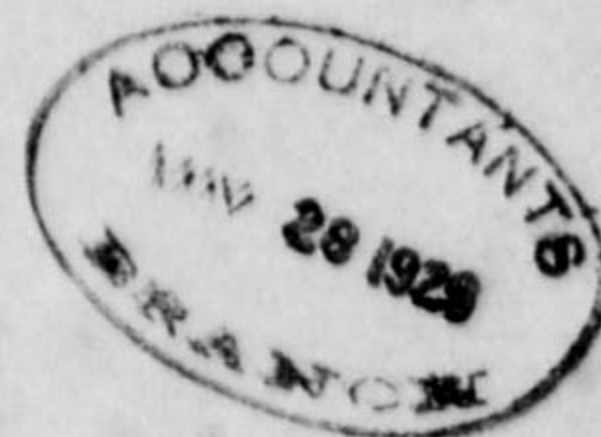

Your obedient servant,

EXTRACT FROM INSPECTOR PRAGNELL'S REPORT on
KAMLOOPS AGENCY, dated May 18, 1929, forwarded
through COMMISSIONER DITCHBURN'S OFFICE.

Original on 77-154.

At various times I have visited the Kamloops Residential School, and am pleased to report an enormous improvement throughout. The principal, the Rev. John Duplanil, seems to understand how to handle the Indians, and instead of having to force the parents to send their children to the school, they are now only too eager to send their children. There are about 200 children there now, and I do not doubt that the principal will be able to fill the school to its capacity, possibly next term. However, he states, and I agree with him, that it is not advisable to have too many newcomers all at once.

The new wing (Boys') was officially opened a short while ago. This completes the building, and the many visitors who went over the building were agreeably surprised at the completeness and efficiency of the school. The children all seem happy, and swings, games, etc., are now supplied. The grounds have all been tidied up and grading and planting are now in process. When complete, the grounds will look a credit to such a fine school. The addition of a fine flagstaff has given quite a finished and patriotic look to the place.

I was present during a demonstration, under Mr. Engineer Tredcroft, of the new pump, reservoir and water plant, as to its fire fighting capabilities. I am glad to say that under both conditions, gravity and direct pumping, the hose streams could easily reach the roof, the danger point in such a dry climate.

The electric fire alarm system wants extending to the girls' wing, and the small temporary alarms, in use for a number of years, should be removed. The girls' fire escape needs to be extended to the ground, and also that part of the escape, now separate, which leads to the girls' classrooms. Two short iron staircases should be sufficient, and I have asked the Agent to take up this matter. The Principal now informs me that he will be able to proceed to organize a system of fire drill in the school.

As far as I know, no arrangements have yet been completed for a regular inspection of all the valuable pumping and electrical machinery in the school. I wrote you upon the matter before, and asked that authority be given the Agent to employ Messrs. Fernie Bros., who installed most of this plant.

Some trouble has occurred with the sanitary drainage system. This also should be regularly inspected, or reports made as to when cleaned by the school authorities.

Please find attached hereto copy of Inspection
Report of Mr. Inspector Pragnell, dated the 18th instant,
dealing with conditions in the Kamloops Agency.

The fire escape and the electric fire alarm
system for the girls' wing of the Kamloops School are,
no doubt, receiving the attention of the Department, as
these have been referred to before.

I think it is important that some arrangement
should be made for a regular inspection of all the
valuable pumping and electric equipment at the school
in order that the Department may be assured that it is
properly taken care of. This matter was referred to
some time ago by District Chief Engineer Webb, of the
Dominion Water Power Branch.

Sir,

Your file number: 154-0-5

In further reference to your letter of May 10th regarding extra payments claimed by the Ryan Contracting Company as compensation for unforeseen contingencies in connection with their contract for the construction of a water supply system at the Kamloops Indian school, I enclose herewith copy of a letter received from Mr. Webb together with copies of letter from Mr. Tredcroft, who supervised the construction, and a statement from the Ryan Contracting Company showing details of the work involved.

Encl.

You will notice that both Mr. Tredcroft and Mr. Webb are still of the opinion that on account of the extremely adverse weather conditions which existed during the greater part of the construction period, and the fact that the contractor made every effort to complete the work in order that the school might have the earliest possible benefit from the water system, that some consideration might be given to the contractor's claim although it is realized that under the contract the Indian Department is not bound to pay the claim.

Your obedient servant,

J. T. Johnston,
Director.

Per

M. F. C.

Mr. J.D. McLean,
Assistant Deputy and Secretary,

DOMINION WATER POWER AND RECLAMATION SERVICE

VANCOUVER, B.C.
June 25, 1929.

Sir,

Re: Kamloops Industrial School.

This will acknowledge receipt of your letter of 14th ult., regarding the Ryan Company's claim for compensation to the amount of \$464.80 to cover unforeseen contingencies in connection with their contract for the construction of a water supply system at the Kamloops Indian School, Kamloops, B.C. In accordance with your instructions, I have obtained from the Ryan Company an itemized statement as to these extras, copy of which is enclosed herewith, dated May 30th. You will note that their account is now the amount of \$447.15 or, less the 10% surcharge, \$406.50. I also enclose copy of letter, dated June 21st, from Mr. Tredcroft in regard to the Ryan Construction Company's account.

I am still of the same opinion as Mr. Tredcroft and, as previously mentioned in my letter of April 23rd, feel that, due to the extremely adverse weather conditions which existed during the greater part of the construction period and the fact that the contractor made every effort to rush the job to completion during this bad weather in order that the school might have the earliest possible benefit of the water system, that the Ryan Company's account, less the 10% surcharge, might well be paid by the Department of Indian Affairs. At the same time I realize that under the contract the Department is not legally bound to pay this claim.

Encl.

Your obedient servant,
C. E. Webb,
District Chief Engineer.
(Sgd.) per G.H. Whyte.

Department of the Interior
DOMINION WATER POWER AND RECLAMATION SERVICE

Box 330, Kamloops, B.C.
June 21st, 1929.

Sir,

I am in receipt of your letter of June 5th having reference to claim by the Ryan Contracting Co. for an amount of \$447.15 in payment for extra work performed by them in connection with the installation of the domestic water supply system at the Kamloops Industrial school, and in this connection note that in submitting this claim the Ryan Contracting Co. have made it appear that this extra expenditure was incurred through changes made to the original plans and which were authorized by me in order to improve the general quality of the work, whereas the only changes authorized were made with the sole view of enabling the contractor to complete the work at a fair and reasonable cost and so that his expenditure would not exceed the amount of his contract.

With reference to the detailed accounts submitted by the Ryan Contracting Co., the first item, "Extra excavation caused by change from vitrified pipe to cast-iron pipe - \$210.00" is not, in my opinion, a fair statement of the charge. No extra excavation was caused by the change from vitrified to cast-iron pipe.

Item No. 2, "Three extra concrete footings - \$62.50" is a charge that I feel should receive certain consideration, for whereas the contractor did not actually install concrete footings, nevertheless, acting upon my instructions, he placed concrete around the joint of each pipe to ensure its being held in place.

Item No. 3, "Extra cost of handling and setting cast-iron pipe above cost of installing vitrified pipe - \$39.00" is, in my opinion, too high a charge for this work. The labour involved in handling the cast-iron pipe was very little more than what would have been necessary in order to install 3 ft. lengths of vitrified pipe in its place. A charge of \$15.00 would, in my opinion, be sufficient.

Item No. 4, "Extra depth of coffer dam necessary on account of silting nature of ground - \$79.78" is apparently a fair charge, but was incurred solely through the contractor's failure to install a suitable and substantial coffer dam in the first place, and is not the result of any changes carried out. It could, in my opinion, only be allowed under the heading "Unforeseen Contingencies".

Item No. 5, "Additional cribbing, shoring, planking, etc. for placing cast-iron pipe - \$54.00" may be considered as being reasonable in view of the fact that timber crib-work was driven under the end of the pipe.

Item No. 6, "Extra pumping, labour, gas and oil, etc. - \$66.00" is not, in my opinion, a fair statement of the charge. No additional pumping was required through the change from vitrified to cast-iron pipe.

C. E. Webb, Esq.,
Vancouver, B. C.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

From this it would seem that the only charges included in this account for which the company is justified in making a claim are as follows:

(1) Extra concrete footings	\$62.50
(2) Extra cost of handling cast-iron pipe	15.00
(3) Additional cribbing and shoring	<u>54.00</u>
or a total of	\$131.50

and against this charge must be set the fact that the cast-iron pipe was supplied to them free of charge and that no deductions have been made in payment to them for the equivalent of 3 ft. lengths of vitrified pipe. Also, it was felt at the time the changes were authorized and apparently agreed to by the contractor's representative, that these changes would assist the contractor, in view of the fact that the installation of 3 ft. lengths of vitrified pipe in soft wet silting ground would have been exceedingly difficult, and it would have been practically impossible to have made satisfactory joints to same owing to the type of coffer dam which they were using.

I may also state that at no time was the excavation or the water level inside the coffer dam carried down to the required level as shown by the plans, owing to the fact that it was practically impossible with the equipment they had on hand to keep the coffer dam in a dry enough condition.

While it is therefore impossible for me to certify these accounts as being correct and to recommend the additional amount of \$447.15 for payment, owing to the manner in which the accounts have been submitted, nevertheless, should the Department agree to pay the Ryan Contracting Co. the amount of their claim (\$447.15), the Ryan Contracting Co. would not, in my opinion, be overpaid, for the reason that in submitting their original tender the Ryan Contracting Co. were forced to estimate on work, the exact nature of which it was impossible for them to ascertain, and that in carrying out work which entails excavation and construction under water it is only reasonable to allow the contractor a margin of from 20 to 25% each way.

Moreover, the Ryan Contracting Co. at all times carried out their contract in good faith and brought the work to a satisfactory completion, notwithstanding the fact that the work had to be undertaken during the winter season when weather conditions were particularly severe and that the expenditure incurred by them in carrying out this work was undoubtedly far greater than was originally anticipated by them in their tender dated October 15th, 1928.

Your obedient servant,

(Sgd.) E. H. Tredcroft,
Senior Assistant Engineer.

C. E. Webb, Esq.,
District Chief Engineer,
Vancouver, B.C.

C O P Y

E. J. RYAN CONTRACTING CO.

Suite 5,
Fairfield Building,
Vancouver, B.C.

May 30th, 1929.

District Chief Engineer,
Dominion Water Power and Reclamation Service,
Vancouver, B.C.

Dear Sir:

With reference to your letter dated May 20th., re our account for Extras amounting to \$511.28 in connection with the work we carried out for you at Kamloops Industrial School, Kamloops, B.C., we are sorry that this reply has been delayed owing to the writer's absence from the City.

Regarding this Bill of Extras, we now beg to submit a detailed list of the costs, showing how this account was made up and regret that these details did not accompany our original bill as we feel sure that had you been fully informed of the conditions under which this additional work was created, the account would have been passed on for payment.

The Plans and Specifications called for a vitrified pipe intake, but after the excavation had been made ready to receive same, it was found that on account of the peculiar nature of the ground, this type of intake pipe would be very unsatisfactory. It was therefore arranged with the Resident Engineer that we would return the vitrified pipe and he would supply us with cast iron pipe of the same size with no extra charge for the material, but you can readily understand that we had to make special arrangements to handle the cast iron pipe in 12 foot lengths instead of the vitrified pipe in 3 foot lengths.

Even after the change was made from the vitrified to cast iron pipe, on account of the silting nature of the ground, it was found necessary by the Resident Engineer, to instal concrete piers under each joint of the cast iron pipe, which we are sure will prove to you without any question of doubt the necessity for carrying out this additional work in order to make a satisfactory job.

Additional excavation was also required and we had to keep the channel clear until the total length of intake pipe was laid, which necessitated a great deal of extra labour and expense. Further work had to be done on the coffer dam and it was necessary for the pumping plant to be operated continuously during the progress of the work.

In attaching the details of this additional cost, all of which work was carried out under the supervision and instructions of your Resident Engineer who is quite familiar with the changes necessary in order to make a satisfactory job, we feel that, in order to obtain your approval of same, we would gladly forego the cost of the additional Sheet Piling, amounting to \$79.78 and reduce the amount of Extra Pumping by \$25.00, thus carrying a portion of this additional cost ourselves and reducing the total amount of the bill to \$447.15, which we trust you will find in order and satisfactory, after taking into consideration the facts of the case as set forth above.

Yours very truly,
E. J. RYAN CONTRACTING CO. LTD.

Vancouver, B.C.,
July 19, 1929.

Sir,

Re: Kamloops Industrial School.

It has been brought to my attention that due to the installation of water supply system at Kamloops industrial school which we have recently completed, there is certain equipment in connection with the old water supply system which is available for disposal. I would be pleased if you would take this matter up with the Department of Indian Affairs and ascertain from them if they wish us to dispose of the material to the highest bidder or to dismantle it and put it in storage where it will be available for installation at some other point. I may say that I am advised that the equipment will deteriorate very rapidly if it is left assembled and unused in its present location.

The equipment in question consists of the following:-

- 1 steel pressure tank (capacity 1200 U.S. gals.)
- 1 reciprocating pump (capacity 20 U.S. gals. per minute).
- 1 3-horse power, 220 volt, 3 phase induction motor, together with valves, piping, switches, pressure gauges, etc.

Your obedient servant,

(Sgd.) C.E. Webb,
District Chief Engineer.

Box 330, Kamloops, B.C.
August 15th, 1929.

Sir:-

I am in receipt of your letter of August 7th. having further reference to the claim of the Ryan Contracting Co. Ltd. for additional payment in connection with the installation of a domestic water supply and fire protection system at the Kamloops Industrial school, and in this regard would state that the claims put forward in the second paragraph of their letter to you dated July 24th., 1929, a copy of which was enclosed with your communication to me dated August 7th., are incorrect and do not, in my opinion, represent the case at all fairly.

In the first place, the Ryan Contracting Co. state that we changed the plans and specifications in connection with the intake to such an extent that it was necessary to change the type of pipe used.

This is not correct. The only change to the intake works carried out was that the last 20 feet of pipe extending into the river was changed from vitrified pipe to cast-iron pipe, and this change was made, not because we desired to do so, but owing to the fact that the Ryan Contracting Co. was carrying on the work in such a manner that it appeared to me absolutely impossible that they could ever make a satisfactory job of same unless a different type of pipe were substituted.

I may state that the original plans and specifications called for vitrified pipe, which necessitated a cement joint being made approximately every 2½ feet. The coffer dam constructed by the Ryan Contracting Co. was entirely inadequate to keep the ground dry while this pipe was being installed. At the time I decided upon the change, the officials supervising the work for the Ryan Contracting Co. were attempting to lay these short lengths of vitrified pipe in a mixture of mud, water and silt which was anywhere from 18 inches to 2 feet above the required grade line.

This being the case, it was absolutely impossible for them to make a satisfactory cement joint, and this state of affairs, as mentioned above, was caused solely through their inability to maintain the coffer dam in a dry condition.

Realizing that this work, if carried out in the manner in which they were proceeding, even if it could have been completed, which is extremely doubtful, could not prove satisfactory, I decided to substitute a different and more rigid type of pipe so as to give them a chance to make connections under water, and for this purpose I decided to substitute two sections of cast-iron pipe each 10 feet long.

C.E. Webb, Esq.,
District Chief Engineer,
Dom. Water Power & Reclamation Service,
Vancouver, B.C.

Indian Affairs (RG 10 Volume 6448, file 882-5, part 6)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

By this method I reduced the number of joints it would be necessary to make from 8 to 1, and this one joint had the advantage of being a bolted joint instead of a cement joint.

I may state that this pipe was supplied to the contractor free of charge and no deduction was made from his contract for vitrified pipe which he agreed to supply and which was not required owing to the change.

With regard to their claim that in order to install the cast-iron pipe they were compelled to construct additional scaffolding and platforms, this is not correct.

I was present at the time this pipe was installed and the cast-iron pipe was delivered on the ground and skidded by them into place without any additional timbering being required, with the exception of a few short pieces of 4 x 4 used to support the chain block by which means the pipe was being handled.

Their statement that I ordered that this cast-iron pipe be put together before being placed in the water is incorrect. I made no order in this connection, neither was this done.

Each section of pipe was placed independently and a bolted connection was made after the last section of pipe was in place. It would have been impossible to have installed a 20 foot section of cast-iron pipe in one piece owing to the fact that the coffer dam was not of sufficient size to permit doing so.

With regard to driving and placing of timbers under the end of this pipe, this was insisted upon by me in view of the nature of the ground encountered after the excavation to grade line had been made, which change is fully covered under paragraph 7, part 1, page 4 of the original specifications.

As stated in my previous letter to you dated June 21st., 1929, I feel that the Ryan Contracting Co. were unfortunate in that, when tendering on this work, they did not allow a sufficient amount to cover unforeseen contingencies, and that owing to severe weather conditions the expenditure incurred by them in completing the job was far greater than was originally anticipated.

They have, in my opinion, a right to ask the Department to make them an additional allowance on the grounds that the work cost more than was anticipated owing to the fact that part of this work consisted of under-water excavation and about which they had no means of estimating accurately what the final cost would be at the time they made their estimate, but they are not, in my opinion, entitled to any extra payment on the grounds of additional work or material performed or supplied by them owing to changes made by us in the original plans, with the exception of those items mentioned in my letter to you dated June 21st., 1929, as follows:

Extra concrete footings	\$62.50
Extra cost of handling cast-iron pipe	15.00
Additional cribbing and shoring	<u>54.00</u>
	\$131.50

3.

I may state that the reason that these extras were not included for payment when the accounts were forwarded to you at Vancouver was because I considered that by supplying the cast-iron pipe to the Ryan Contracting Co. free of charge and by not making any deduction for vitrified pipe called for in the contract and which was not used owing to this change, I had more than offset any additional work performed by the Ryan Contracting Co.

I may also state that the engineer for the Ryan Contracting Co. at no time gave me to understand that he considered this work as an extra. He did not ask for authority for this work in writing, and appeared at all times to regard it as the best means of getting out of a difficult situation.

Your obedient servant,

(sgd.) E.H. Tredcroft,
Senior Assistant Engineer.

July 22nd, 1929.

Sirs:-

In reply to your letter of the 30th May with reference to your account for extras in connection with the work which you carried out at the Kamloops Indian Residential school at Kamloops, B.C., I am today in receipt of a communication from my director at Ottawa in which he quotes the following letter received by him from the Department of Indian Affairs under date of July 16th:-

"I wish to acknowledge receipt of your letter of the third instant together with a copy of a communication addressed to your office by Mr. Tredcroft and Mr. Webb of Vancouver with further reference to the claim being made by the Ryan Construction Company, amounting to \$464.00, covering unforeseen contingencies in connection with their contract for the construction of a water supply system at the Kamloops Indian Residential School, Kamloops, B.C.

In reply I have to say that the Department sees no reason why it should alter its decision set forth in communication to your office of May 15th with regard to the above mentioned claim. You will realize that the granting of the additional payment applied for would be an injustice to the contractors who have tendered on this work, besides creating an injudicious precedent if a similar case arose in the future."

Yours very truly,

C.E. Webb
District Chief Engineer

E.J. Ryan Contracting Co. Ltd.,

Vancouver, B.C.

Dear Sirs: Attention Mr. C.E.Webb, District Chief
Engineer.

We have your letter of July 22nd in reply to ours of May 30th dealing with additional work we carried out for you in connection with water supply for Kamloops Industrial School, Kamloops, B.C. We cannot understand the attitude your Department has taken in connection with this account, especially the last paragraph of the Director's letter which reads as follows:

"With regard to the above mentioned claim you will realize that the granting of the additional payment applied for would be an injustice to the contractors who have tendered on this work, besides creating an injudicious precedent if a similar case arose in the future".

Surely you do not consider that our claim comes under this category, and if you do, the writer would appreciate the opportunity of an interview with you in order that he may clear up any doubts which may exist as to the exact nature of our account.

In the first place, you changed the plans and specifications in connection with the intake, to such an extent that it was necessary to change the type of pipe used, thus creating an absolutely new arrangement for laying same and increasing the cost. The original intake pipe as specified was supposed to be laid in short lengths, but your engineer on the work decided that on account of the nature of the ground this would not stand and he ordered that this pipe should be made of cast iron put together before being placed in the water, which necessitated considerable additional labour and supplies to take care of putting this pipe in the water in long lengths. As you know this cast iron pipe is very heavy and we had to make special arrangements for scaffolding and platforms in order that same could be lowered into the water properly. The balance of our account as covered by invoices submitted, is based on similar arrangements to this and we still maintain that we are entitled to this additional cost.

When we estimated on this work we were guided by your plans and specifications and we do not want for one minute to make a claim for any additional cost which was originally covered by them, but we do want you to pay for the additional work we carried out for you, which was caused through no fault of ours. In view of these circumstances we feel that we cannot allow ourselves to be placed in the category as set forth in the last paragraph of your Director's letter mentioned above.

2.

We might add that we do not mind paying our just proportion of any additional work you require us to do, but we do feel that the balance of the cost should be properly distributed. We therefore again refer you to our account as submitted with our letter of May 30th and ask that you reconsider the matter.

Yours very truly,

E.J.RYAN CONTRACTING COMPANY LTD.

DOMINION WATER POWER AND RECLAMATION SERVICE

OTTAWA, ONT.. September 19th, 1929.

*cc'd
Mr. Hillier
Archivist*
Sir,

In further reference to my letter of August 28th regarding the claim made by the Ryan Contracting Company for extras in connection with their contract for the construction of a water supply system at the Kamloops Indian residential school, Mr. Webb reports that a conference was held recently in his office with two representatives of the contracting company, Colonel Keen and Mr. Hillier with Mr. Tredcroft and Mr. Webb.

Mr. Hillier, who was superintendent of this work for the contracting company, and Mr. Tredcroft had a long conference following which Mr. Tredcroft wrote to Mr. Webb under date September 12th, explaining the results of the conference and transmitting an account for \$211.28 which Mr. Tredcroft had certified as correct for extra work performed under the contract of October 15th, 1928. Mr. Tredcroft's recommendation of the payment of these extras agrees with his original letter of June 21st, as to the amount of the extras which should be allowed, with the exception that he has now included an item of \$79.78 claimed by the Ryan Contracting Company to cover extra depth of coffer dam, sheet piling, et cetera.

You will remember that when Mr. Webb originally transmitted Mr. Tredcroft's recommendation for payment of certain extras the impression was given that the increased cost was due to adverse weather conditions and other difficulties which the contractor had to overcome. This of course is not a sufficient reason for the payment of amounts additional to the contract price, but it is now clear from Mr. Tredcroft's statements that certain items are legitimate extras due to changes on the original specifications, made necessary by conditions met with during the progress of the work. For this reason I believe that the extras now recommended for payment by Mr. Tredcroft form a legitimate part of the expenditure covered by the contract and recommend that the amount of \$211.28 be paid to the Ryan Contracting Company. You will notice that this is less than half of what the company originally claimed and appears to represent only valid claims.

A copy of Mr. Tredcroft's letter to Mr. Webb of September 12th is enclosed, together with a statement of the account for \$211.28.

Encl.

C O P Y

Your file #174-2C

Box 330, Kamloops, B. C.,
September 12th, 1929.

Sir:

With reference to our recent interview at Vancouver, B. C. regarding the claim for extras put forward by the Ryan Contracting Co. for an amount of \$447.15 in connection with the installation of a domestic water supply system at the Kamloops industrial school, I would state that in accordance with your instructions I interviewed the representative of the Ryan Contracting Co., Mr. Hilyer, in this regard and discussed this matter with him at considerable length.

I stated to Mr. Hilyer at the time, that this claim by the Ryan Contracting Co. for \$447.15 could not be entertained by the Department, with the exception of those items mentioned in my letter to you dated June 21st, 1929, as follows:

Extra concrete footings	\$ 62.50
Extra cost of handling cast-iron pipe	15.00
Additional cribbing and shoring	54.00

and that the following items included in his account, i.e.,

Extra excavation	210.00
Extra depth of coffer dam, sheet piling etc.	79.78
Extra pumping	66.00

could not be allowed, as these items were not, in my opinion, caused through any change in the plans.

After a great deal of discussion, Mr. Hilyer agreed to waive their claim for the following items:

Extra excavation	210.00
Extra pumping	66.00

but maintained that the item "Extra depth of coffer dam, sheet piling, etc. - \$79.78" was a fair charge and was incurred solely through it being necessary for him to deepen the coffer dam at the point where the concrete was placed around the joints of the cast-iron pipe at my instructions.

He stated that in placing these footings it was necessary to carry the excavation from two to three feet below the required grade line in order to place the concrete, and after having given the case due consideration and hearing all his arguments in this connection I am of the opinion that this charge is justified.

I would therefore respectfully recommend that in addition to the following items:

C.E. Webb, Esq.,

Memorandum:

Mr. J. M. Roberts,
Secretary,
Department of the Interior.

Re Kamloops Industrial School.

I have received from you an account in duplicate from the Kamloops Sentinel amounting to \$11.48 being charges for the printing of a notice of tender for the purchase of pumping machinery at the Kamloops industrial school, this machinery being rendered surplus by the installation of new equipment, with your notation asking if the usual practice of securing the approval of the Deputy Minister was followed in this case.

In reply I beg to advise you that this sale of machinery was authorized by the Department of Indian Affairs who are responsible for the construction and maintenance of the school. Advertising for tenders was carried out under the direction of Mr. Webb, our District Chief Engineer at Vancouver, in accordance with instructions received from the Department of Indian Affairs.

I would suggest that the account should be sent to Mr. Webb who will certify as to its correctness and present it for payment to the Indian Department.

1-8-4

Dear Sir:-

I beg to draw your attention the fact that repairs are necessary to be made to the sewage system at Kamloops Indian Residential School.

This system was installed in 1924 and has received no attention until last fall when the syphon chamber was found to have become clogged. The tank was then cleaned, but owing to sewage have been going over the overflow pipe instead of through the syphon disposal pipes, it became blocked and, instead of the sewage going to the disposal bed, it breaks out over the surface of the ground, thus endangering the health of the pupils and staff of the school.

I wish to recommend that the Department instruct me to have Mr. E.H. Tredcroft, Dominion Water Power Engineer, of Kamloops, B.C., make a report on the requirements of this system at an early date.

I have the honour to be, Sir,

Your obedient servant,

Ewen MacLeod

Ewen MacLeod Esq.,
Indian Agent,
Kamloops, B.C.

Dear Mr. MacLeod,

Please find out how much assistance the Dept. is willing to give me in putting all the buildings and grounds in good condition.

The barn needs painting, the manual training school needs painting and general repair, the root cellar (an eye sore) must be shingled and generally repaired.

I am planting trees around the property. Will the Dept. help me in getting the necessary pipes and hoses for watering them and keeping the grounds green and beautiful?

This Institution belongs to the Dept. The buildings are visited by many outsiders. The Dept. should encourage me in improving the place as much as possible. As you know it is not my intention to spend my whole life in an Indian School, but as long as I stay in one of these Institutions I wish to improve it and beautify it.

How much assistance may I expect from the Dept.

Yours sincerely

John Sutherland

Dear Sir:-

I have the honour to enclose herewith original letter from Rev. John Duplanil, O.M.I., Principal of Kamloops Indian Residential School, with reference to improvements to the grounds of the Institution.

The work that I know the Rev. Principal has in view, the beautifying of the grounds at the Institution, entails a great deal of labour and time, besides certain materials to be purchased such as pipes and hoses for watering as he mentions. The cost of these materials is difficult to estimate at this time, but I would recommend that the Department assist the Rev. Principal in his efforts.

I might say that the Rev. Principal has pointed out to me on the ground, the various things he has in view in the line of improvements, but as his letter speaks for itself, I will be glad to hear what the Department suggests in this matter.

I have the honour to be, Sir,

Your obedient servant,

Ewen MacLeod

Sir,-

I have the honour to refer to Departmental letter addressed to Mr. Indian Agent MacLeod, of Kamloops Agency, dated March 11th and numbered 154-0-5, with regard to the giving of authority to Mr. E. H. Tredcroft, engineer of the Dominion Water Power and Reclamation Service, to proceed with the examination into, and estimate of the cost of, the proposed repair of the sewage system at the Kamloops Indian Residential School.

In this matter it is expected that Mr. Tredcroft's report is now in the hands of the Department, and it is recommended that authority be given the Water Power and Reclamation Service authorities in Ottawa to instruct their District Chief Engineer, at Vancouver, to have Mr. Tredcroft proceed with the carrying out of the work which he has advised should be done. The Department will understand that Mr. Tredcroft would not be prepared to proceed with this work until authorized to do so direct from the superiors of his Service in Ottawa.

Sir:-

Re Sewage Disposal System,
Kamloops Industrial School.

With reference to your letter of March 25th., 1930 regarding repairs to the sewage disposal system at the Kamloops Industrial school, I would state that I have investigated conditions regarding this system and find the situation to be as follows:

The above sewage disposal system was originally installed by this branch in 1924 (see report dated March 5th., 1924) and has now been in operation for nearly six years.

The system, as you know, consists of a two-chamber reinforced concrete septic tank, the effluent from this tank being discharged into disposal beds composed of 4" diameter vitrified drain tile. (See accompanying plan)

On page 4 of my report it was clearly stated that this septic tank should be cleaned once every twelve months, and instructions to that effect were given to the principal of the Industrial school at the time the system was handed over.

This system, however, was permitted to run for over four years without the cover on the tank ever being removed, with the result that so much sludge accumulated in the settling chamber that the screened outlet from the settling chamber

to the effluent chamber

to the effluent chamber became clogged and the liquid in the settling chamber, instead of passing through into the effluent chamber via the screened passage provided for that purpose, was raised to such an elevation that it was forced through the air-vent between the two tanks, carrying with it a considerable amount of sludge.

This condition of affairs must have continued for so long a period and in the process so much sludge must have been carried into the effluent chamber that the automatic siphon provided to discharge the effluent at specified intervals also became blocked, and the only means of exit for the liquid from the second chamber into the disposal beds was through the overflow pipe.

The effluent, as a result of the above conditions, instead of being clear and in liquid form, carried with it a considerable amount of sludge.

The natural result was that the vitrified drain tile provided to dispose of the effluent became entirely clogged with sediment and the liquid, instead of draining away into the ground, forced its way up to the surface, causing a bad condition of affairs and much unpleasant odour.

I may state that had this tank been properly cleaned, there is very little likelihood that the disposal beds would have failed to function properly, and in addition, I personally on several occasions warned the principal of the Industrial school (Father MacGuire) that the tank was due for cleaning, and each time he assured me he would attend to it.

I may state that since

I may state that since the management of the school has changed, the tank has been cleaned regularly, but of course it was too late for them to do anything to remedy the condition of the pipes, the above unsatisfactory condition of affairs having been allowed to go too far.

With the exception of the disposal beds which have become clogged, the remainder of the system (septic tank, inspection chamber, sewage pipes, etc.) is functioning perfectly, but I understand that a certain amount of trouble is experienced inside the building owing to the sewage traps clogging up. As these traps were installed by the contractor for the building, I have no knowledge as to how they were installed or just what should be done to remedy their conditions, but this can be attended to at the time the other repairs are carried out.

Proposed Repairs to System

In view of the fact that without taking up the drain tile it is impossible to tell exactly how much of this system is blocked, it is not possible to give an exact estimate of what the cost of repairs to this system will be.

Should it be found after these tiles had been exposed that the entire system is blocked, then the cost of repairing same would probably amount to \$1,200, but should the blocking of these pipes have taken place only at or close to the point where they leave the main sewer pipe, the cost of repairs will be considerably less.

I would therefore recommend that a competent sewage contractor be employed under the supervision of this office on a cost-plus basis to

expose and repair

expose and repair that part of this drain tile system which may be necessary, and that in addition to these repairs the tank be thoroughly cleaned out and overhauled, and an auxiliary 6" diameter vitrified pipe be installed from a point immediately above the tank to the centre of the garden, which pipe would act as a by-pass in the future for any repairs to the system that may require to be undertaken, and which would permit work being carried on on this system without sewage facilities in the school being interfered with.

The cost of installation of this additional pipe, together with a concrete diversion chamber, valves, etc. would amount to \$400.00, and the total cost would therefore be \$400.00 plus the cost of cleaning out the drain tile, which might vary from \$100 to \$1,200.

I would point out that this school is located in a particularly difficult situation as far as sewage disposal is concerned. It is on the extreme edge of the river with the ground sloping only one way. The Department of Health will not permit the sewage to be drained into the river, owing to the fact that the city of Kamloops obtains its water supply a short distance downstream. The depth of the foundations of the school and the low elevation at which the drainage pipes leave the school building make it impossible to direct the flow of sewage in any direction other than the one in which it has already been carried, and the nature of the soil, which is a sandy gravel (mostly sand) makes it impossible to guarantee that these beds will not become clogged after five or six

years unless great care

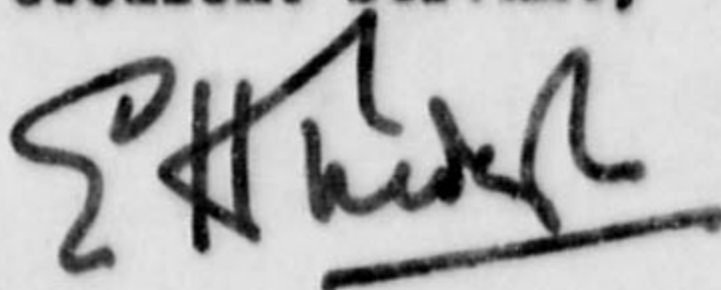

years use unless great care is taken in the operation of the septic tank.

In addition to the above, the sewage in the school carries a large proportion of soap (from the school baths) which is very difficult to handle satisfactorily in disposal beds.

The only other method of handling this sewage would be by means of a system of mechanical filters, which would be expensive to install and which would require continual cleaning and care; and the cost of their operation, together with the cost of installation, would not, in my opinion, be warranted at the present time.

It would appear that repairs to the system as outlined in this report should first of all be carried out, and provided ordinary care is exercised in the maintenance of the septic tank I do not consider that further trouble will be experienced, but should it be found that after another five or six years the same condition occurs, then the department can consider the advisability of installing mechanical filters.

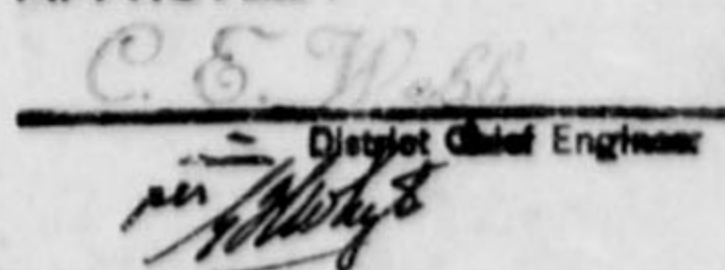

Your obedient servant,

E. H. Tredcroft,
Senior Assistant Engineer.

C. E. Webb, Esq.,
District Chief Engineer,
Dominion Water Power and
Reclamation Service,

Sir,

On March 25th I was advised by Mr. Webb, our District Chief Engineer of Vancouver, that he had received a request from Mr. Ditchburn for an investigation into the condition of the Sewage Disposal System at the Kamloops Residential School. This investigation was made by Mr. Tredcroft and the report has been received which is enclosed herewith.

You will note that Mr. Tredcroft states that in his opinion, the necessity for these repairs is due to the fact that the septic tank was not cleaned at proper intervals. The repairs and improvements recommended will cost from \$500. to \$1600. depending on the damage which has resulted and which can only be determined when the disposal beds are exposed. It is recommended that a competent contractor be employed, under Mr. Tredcroft's supervision, on the cost-plus basis, to make such repairs and improvements as are considered necessary.

A copy of this report has been sent to Mr. Ditchburn.

Your obedient servant,

J.T. Johnston,
Director.

Kamloops, B.C.

May 1930.

Rev. J. Duplanil,
Kamloops, B.C.

Safety in Laundry at
Indian School.

Dear Sir:-

While making the annual boiler inspection at your School today, I noticed while in the laundry certain exposed parts of the machinery which might involve accident to the operators in the laundry.

The undernoted are the parts in question.

1. The gears on the small washer machine are exposed.
2. A platform and guard (shoulderhigh) would prevent accident to the operator of the hydro-extractor, through contact with the drive of the adjacent washer machine.
3. There is an exposed pulley, with projecting setscrew on the ironer or mangle machine.

Attention to the above will eliminate possible nasty accidents.

✓
Yours truly,

(Sgd) S.H. Excell
Inspector.

Dear Sir:-

I beg to enclose herewith copy of letter from S.H. Excell, Inspector of Boilers and Machinery, with reference to the inspection at Kamloops Indian Residential School.

It seems that certain exposed parts of the machinery might involve accident to the operator in the laundry.

I would recommend that the precautions mentioned be taken in regard to this machinery at an early date, and request that the Department authorize me to this effect.

I have the honour to be, Sir,

Your obedient servant,

Ewen MacLeod

Dear Sir:-

I have the honour to acknowledge receipt of your letter of the 8th of April, in which you request me to get an estimate of the cost of painting the barn, the manual training school, and reshingling and repairing the root cellar at Kamloops Indian Residential School.

I am now in receipt of a reply from Rev. John Duplanil, Principal of the School in connection with these repairs, in which he states that this work can be done for the sum of \$359.00, that is, the cost of repairing the root cellar \$112.00, and the manual training school \$247.00.

Trusting that this will meet with the approval of the Department, I have the honour to be, Sir,

No funds noted for next yr

Ottawa, June 12, 1930.

Sir:

I have your letter of the 28th ultimo, enclosing copy of a communication from the Inspector of Boilers and Machinery in which he draws attention to certain exposed parts of the machinery in the laundry at the Kamloops Indian Residential School which might involve accident to the operator.

In this connection I have to say that you should arrange with the Principal to take the necessary action at the earliest possible date to have the precautions as mentioned by the Inspector in regard to this laundry equipment carried out. He should see that all exposed or dangerous parts are properly protected. All expense in connection with this work should be kept as low as possible, having in view the installing of satisfactory safeguards so that there will be no danger of the operator incurring accident. When these safeguards have been installed, you should forward an account, in duplicate, properly certified, covering the cost.

I have also your letter of the same date relative to the cost of painting the barn and manual training school and re-shingling and repairing the root cellar, and giving an estimate of the cost of this work. In connection with these repairs, I have to say that the Department has no funds available this year to provide for the cost of this work. The same have been noted for our estimates for next fiscal year, when an item will be included for the purpose of carrying out these repairs. In the meantime, these repairs will have to stand over for the present.

Your obedient servant,

A. F. MacKenzie

CONTRACT

re

Repairs to Sewage Disposal Plant
Kamloops Industrial School
Kamloops, B. C.

MATERIAL TO BE SUPPLIED BY THE CONTRACTOR

350 lin. ft. 6" dia. vitrified sewer pipe
1 6" dia. cast-iron gate valve, flanged
2 6" dia. cast-iron flanged spigots
1 length 4" dia. cast-iron pipe
1 extension rod and wheel
1 concrete diversion box, 4' x 3'6" x 1'6",
complete with manhole, manhole cover
and necessary fittings
necessary oakum and cement for pipe
joints

WORK TO BE PERFORMED BY THE CONTRACTOR

1) The construction of 1 concrete diversion box
(4' x 3'6" x 1'6") on the sewer line between the central
inspection chamber and the septic tank at a point to
be designated by the engineer.

2) The installation of 350 lineal feet of 6"
diameter vitrified sewer pipe from diversion box to
centre of garden, this pipe to be laid at a depth
of not less than 3'6" below the surface of the
ground at such grades and alignment as shall be
directed by the engineer.

3) The installation of 1 - 6" diameter cast-
iron valve and necessary pipe and fittings to
connect the septic tank with the above sewer line.

The above work, including the installation of
the diversion box, the excavation for and installation
of the sewer pipe and the back-filling thereon, together

Sir: Re: Repairs to Kamloops Industrial School
 Sewage Disposal Plant-Yr. File 174-2A

With reference to your letter of June 4th authorizing repairs to be carried out to the Kamloops Industrial school sewage disposal system, I would state that in this regard I called for tenders from all the plumbing firms in town for this work, and on June 13th, 1930 received tenders from the following firms:

F. W. Carr and Son,
H. Giddens.

Two other contractors investigated this work but did not put in any tender.

As you will see from the enclosed tenders, price quoted by Carr and Son for installing the sewer pipe is reasonable (\$385.00), but the balance of his tender is, in my opinion, far too high.

I have therefore awarded Carr and Son a contract to install 350 lineal feet of 6" vitrified pipe only, at a price of \$385.00, but propose to do the balance of the work (digging up drain tile and cleaning septic tank, etc.) by day labour. This will be more satisfactory, as Indians can be employed on this work without trouble, and Mr. MacLeod informs me that they are in urgent need of employment.

Your obedient servant,

E.H. Tredcroft
Senior Assistant Engineer.

OFFICE OF
INDIAN AGENT
Kamloops, B.C.,
September 6th, 1930.

1-8.

Dear Sir:-

While visiting Kamloops Indian Residential School yesterday, the Principal, Rev. John Duplanil, O.M.I., pointed out to me the difficulty he is experiencing in the matter of storage for fruit and vegetables, and school supplies, such as large quantities of canned goods, soap, etc.

They use, approximately, six tons of potatoes per month alone, and, of course, other vegetables in proportion. He wishes to buy about fifteen tons of apples at this time of the year for winter use. The storage provided when the school had 100 pupils is now inadequate, as the number of children at present in school is about 250, besides a larger staff.

The Rev. Principal wishes an appropriation of about \$500.00 to make an addition to the store rooms. After investigating the situation, I am of the opinion that this request is reasonable, and wish to recommend that the Department assist to provide extra storage to that extent.

I have the honour to be, Sir,

Your obedient servant,

(Ewen MacLeod)
Indian Agent.

Sir,

In further reference to your letter of the 11th instant regarding the alterations to the septic tank at the Indian residential school at Kamloops, Mr. Webb advises me that as the authorization for this work had been received some two weeks before my letter of the 13th instant asking him to have the work given to Carr and Sons, Kamloops, tenders had been called for the work.

Fortunately, however, only two firms bid on this work and we are advised by letter from Mr. Tredcroft that F.W. Carr and Sons have been awarded the contract to install sewer pipe at a cost of \$385.00. Mr. Tredcroft considered the balance of the tender too high and has arranged to do the rest of the work by day labour, employing Indians of the Kamloops Reserve, who are said to be urgently in need of employment. I trust that this arrangement will be satisfactory to the Department of Indian Affairs.

Enclosed herewith are copies of the following correspondence,-

Letter from Mr. Tredcroft to Mr. Webb
of the 16th instant;
Tender of H.J. Gidden of June 11th;
Tender of Carr and Sons of June 12th; and

DEPARTMENT OF THE INTERIOR
CANADA Hydrometric Bureau
DOMINION WATER POWER AND RECLAMATION SERVICE

OTTAWA, ONT.. October 14th, 1930.

Sir,

Re Kamloops Indian School,
Sewage Disposal Plant.

With reference to the repairs recently
carried out to the sewage disposal plant at the
Kamloops Indian school, Mr. Webb reports as follows,
under date October 8th,-

"I have to inform you that repairs to
the sewage disposal system at the above institution
have now been completed and the system is working
satisfactorily.

Provided plant is inspected regularly
and the septic tank given the necessary attention
every four or five months, no further trouble
should be experienced. In an institution of this
kind considerable disinfectant is used, which event-
ually finds its way into the septic tank. Regular
inspection and cleaning is required to ensure the
satisfactory operation of the system.

Having this in mind, I would suggest
that I be authorized by the Department of Indian
Affairs to carry out regular quarterly inspections
of both the sewage plant and domestic water supply
system, in order that both systems may be kept
in first class condition at a minimum of cost.

Accounts covering repairs will be for-
warded in a short time, Mr. MacLachlan our accountant
being indisposed at the present time."

I shall be glad to be able to authorize
Mr. Webb to carry out his suggestion to have the sewage
plant and domestic water supply systems regularly
inspected.

Your obedient servant,

J. T. Johnston,
Director.

Sir:

Mr. Indian Agent MacLeod has recently telegraphed the Department as follows:-

"Owing to South Thompson river being extraordinary low, I am requested by Principal of Kamloops Industrial School to ask your authority to lower irrigation pump well four feet. This will include digging well and extending intake into the river - probably cost two hundred fifty dollars. I recommend work be done, otherwise shortage irrigation water for school lands coming season possible."

An answering telegram was directed to him, as follows:-

"Regret, no funds to deepen well, Kamloops School."

The Deputy Superintendent General believes that the Dominion Water Power and Hydrometric Bureau may be in a position to give advice in this connection. They may have access to statistics which would advise us concerning the seriousness of the situation. Will you please discuss the matter with Mr. Webb and let me have a report.

Your obedient servant,

154-0-5-

Kamloops, B.C., December 30th, 1930.

Dear Sir:

My inspection of Kamloops Agency No.3, as usual, extends over a considerable part of the year, as occasions arise to pass through certain portions of it.

X X X

KAMLOOPS RESIDENTIAL SCHOOL.

At the time of my inspection visit there were 274 children at the school. The health there has been good, and so far, they have escaped the bad epidemics of scarlet fever and whooping cough raging in the town. This is probably due to the care of the Principal in keeping the children from contact in the town. He has installed a moving picture machine in the dining room, conforming to regulations. This saves any excuse for parents wanting to take their children to town for a show. What with the above, radio reception fitted in the playrooms, swings, slides, etc., all provided by the principal, the children in this school are lucky. At the meal at which I was present, the children had meat, vegetables, bread and milk. Their evening meal was to be vegetables, gravy, bread, peanut butter and cocoa. The school also this year, procured and salted several truck loads of salmon.

The extinguishers and fire apparatus were all in place, and free, unlocked access to fire escapes allowed. Eight more chemical extinguishers are, required, however, for the boys' wing. Refills for the sixteen extinguishers already installed are required.

Whilst the boilers heat the building alright, they appear to be very extravagant. Anyhow, they use twenty tons of coal per month. The Principal showed me that his coal bill since the 1st of August was \$2944.00. The hot water storage tank in the boiler room is now not adequate for the call upon it. Over 3000 pieces of washing are done every week. To my mind, it wants a second tank of equal capacity. There is great difficulty too, in the summer, to obtain really hot water, so necessary for dishwashing in the kitchen. I should advise the installation of two small jacket heaters right in the kitchen, for this purpose alone, leaving the larger jacket heater, in the boiler room for laundry or bath days alone, in the summer.

The dormitories, class rooms, kitchens, laundries, etc. I found in excellent order.

The barn wants repainting very shortly, if for nothing else than to preserve the wood.

Practically all the ground surrounding the school has been graded and levelled, and young trees planted around. When these grow up, and with the addition of some lawn grass, the school will look a handsome building.

However, the school is very short of storage room for supplies, such as potatoes, apples, etc., which

See under

Sir:

With reference to that portion of your letter of the 18th instant, enclosing the report of Mr. Inspector Pragnell on his inspection of the Kamloops Indian Residential School, I have to say with regard to the additional fire extinguishers required for the boys' wing and the refills for the extinguishers at present on hand, that the Department will be pleased if you will arrange for the purchase and delivery of same. You may supply eight (8) extinguishers of the size and type considered necessary, also the chemical refills for the sixteen (16) extinguishers already in the school. The Principal should be instructed to have the refills installed in the extinguishers when received, and he should see that these extinguishers are in good condition and ready for immediate use if required. Our funds for the balance of the present fiscal year are entirely assigned, and I have to request that the account covering the cost of the new extinguishers and refills be withheld until after the 1st of April, next, when our new appropriation will be available.

Consideration is being given to the providing of an additional hot water storage tank in the boiler room and the installation of jacket heaters in the kitchen.

The repainting of the barn and the erection of a storage shed have been noted.

DEPARTMENT OF THE INTERIOR
CANADA

Dominion Water Power and Hydrometric Bureau.

Vancouver, B.C.
March 26, 1931.

Sir:

Further to my letter of the 16th inst. regarding extension of the irrigation well at the Kamloops Industrial School, I am today in receipt of a letter from Mr. Tredcroft of March 23rd in which he points out if the work outlined in his letter of March 14, 1931, is to be carried out it must be commenced immediately in order to obtain the benefit of low water work conditions. He states even at this date it is very late to commence work of this nature, and it may be necessary to delay installation of the last two lengths of pipe until the water recedes in the fall.

Mr. Tredcroft has had further conversation with both Mr. Indian Agent MacLeod and the Principal of the Industrial School with reference to the advisability of carrying out this work. The principal of the school stated definitely that even if the work were to cost \$1000.00 the benefit derived therefrom would more than compensate for the expenditure.

It is evident therefore, if your department wishes to have this work done before next high water authorization for the work should be immediately forthcoming.

Your obedient servant,

(Signed) C. E. Webb.
District Chief Engineer.

ALSO TO DATE OF THIS LETTER

COMMISSIONER'S OFFICE,
P. O. BOX 666

VICTORIA, B.C., March 18, 1931.

R

Dear Sir:

I beg to refer to Departmental letter No. 154-0-5, dated February 21st ultimo, with regard to the proposed lowering of the irrigation pump well at the Kamloops Indian Residential School a further four feet owing to the shortage of water occasioned during the irrigation season which affects the school crops, more particularly as this year the water of the South Thompson River is very low.

In reply I beg to say that this matter was taken up with the District Chief Engineer of the Dominion Water Power & Hydrometric Bureau with the result that a report has been prepared by Mr. E. H. Tredcroft, Senior Assistant Engineer stationed at Kamloops, in which he advises that the cost of the proposed work would be \$800.00.

In submitting a copy of Mr. Tredcroft's report dated March 14th, instant, to this office, further copy of which is sent herewith for the Department's information, Mr. Webb, District Chief Engineer, points out that his Bureau had nothing to do with the construction of this intake well.

It is recommended that the work be undertaken at once if the Department is able to furnish the funds therefor, for it is apparent that irrigation in the autumn season, impossible under the present condition of supply, would permit of a fair crop of alfalfa such as is much desired for cattle feed.

Your obedient servant,

W. E. Ditchburn

C O P Y

Box 330, Kamloops, B.C.
March 14th, 1931.

Sir:

I am in receipt of your letter of March 3rd having reference to the lowering of the intake well for the irrigation pumping plant at the Kamloops Industrial school, and am enclosing herewith estimate of cost of same.

In this connection, I would like to point out that this well, which the principal of the Industrial school now claims it is necessary to lower, was not constructed by this branch, but was built by the Rev. Father MacGuire, late principal of the school, on his own initiative, without this office ever having been consulted or asked for advice. Had I known that this work was being carried out, I would have informed the Rev. Father MacGuire that same was likely to go dry at the latter end of the season. As both the Indian Agent and the principal of the Industrial school were under the impression that this work had been carried out by the Water Power Branch, I think it is a point which should be drawn to the attention of the department.

The elevation of the Thompson river at Kamloops at the present time is approximately 6" above minimum low water, and in the vicinity of the pumping plant the water is now 6" below the bottom of their present intake pipe.

There is no doubt, in my opinion, that before they find it necessary to irrigate this season the water in the South Thompson river will have risen sufficiently to fill the intake well, but Father Duplanil claims that it is the latter part of the irrigation season, from September 1st to 15th, that he requires water for his last crop, and is unable to obtain same.

He has therefore requested that the intake pipe and well be lowered an amount of 4'.

After having examined this intake well, I find that if an extension has to be made to same, it will be necessary to purchase 110' of 14" dia. wood stave pipe, as it would not be advisable to attempt to lower the existing culvert, which is a patchwork affair, partly of vitrified pipe, partly wood culvert and partly concrete culvert. The excavation for the lowering of the well itself would also be difficult, owing to the restricted area in which to work and the fact that water would undoubtedly be encountered. These features make the cost of carrying out these repairs comparatively high, i.e., \$800.00.

As far as it is possible to judge from comparing gauge heights at our stations on the Thompson river at Kamloops and the South Thompson

Indian Affairs (RG 10 Volume 6448, file 882-5, part 6)

**PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA**

VERY

POOR-COPY

river at Chase, it is quite true that the water around September 15th is just low enough to make it difficult to pump, i.e., the well is not empty, but the suction pipe, which is approximately 1½' above the floor, is only partially submerged.

From this it would appear that the Rev. Father Duplanil's statement that he is unable to obtain water for irrigation purposes after September 15th is quite correct.

Just whether the amount he loses by not being able to obtain this last irrigation and whether the expenditure of \$800.00 is justified, I am not prepared to state, but Father Duplanil informs me that this last irrigation permits him to obtain a fair crop of alfalfa, on which they turn their cattle in to feed.

Father Duplanil has also informed me that he would be prepared to carry out some of the work by school labour, but in view of the conditions we should encounter, i.e., great depth of the cut (19' at places) and the fact that excavation would be wet and difficult to handle, I have not considered it advisable to take this into consideration in preparing the estimate of cost.

Your obedient servant,

E. H. Tredcroft
Senior Assistant Engineer.

C. E. Webb, Esq.,
District Chief Engineer,
Dominion Water Power and Hydrometric Bureau,
Vancouver, B.C.

Our No. 1110

The Government of
The Province of British Columbia
411 Dunsmuir Street, Vancouver, B.C.

November 1, 1930.

Kamloops Indian Residential School,
Kamloops, B.C.

Dear Sirs:-

We have just completed an inspection of the electrical wiring in the above school and would draw your attention to the following:

1. The loose conduits at distribution centres are to be gone over and tightened up so that the conduits will be securely fastened to the metal boxes.
2. All metal non-current carrying parts are to be permanently and effectively grounded.

LAUNDRY

3. Breakdown switches are required for all motors at distribution.
4. Loose conduits are to be gone over and tightened up.
5. The 125 Volt fuses being used on 220 Volts are to be replaced by approved fuses.
6. Loose conduit at the small washer is to be tightened up. A conduit is to be placed on the end of the conduit for the dryer motor.

BOILER PUMP MOTOR

7. Loose conduits are to be gone over and tightened up.
8. A connecting box is to be placed on the motor. The conduit containing the motor wires is to enter into and be securely fastened to this box.

The above work is required to be completed by December 31/1930. Please notify this office upon the completion of same.

Yours truly,

J.E. Dubberby,
Assistant Inspector of Electrical Energy.

OFFICE OF
INDIAN AGENT

Kamloops, B.C.,
July 17th, 1931.

1-8.

Dear Sir:-

I beg to enclose herewith, copy of letter received from Rev. John Duplanil, O.M.I., Principal of Kamloops Indian Residential School, asking the Department to supply him with the following:

3 *ARO* Five (5) Sewing Machines (Singer) to replace old ones badly out of condition;

no funds ARO [Seventy-five (75) gallons of gray paint;
Five (5) gallons of turpentine;
Ten (10) gallons of white paint.

The buildings are all in the condition he describes.

The supplies he requests can be bought wholesale from Vancouver, and I recommend that authority be granted for these purchases.

I have the honour to be, Sir,

Your obedient servant,

Ewen MacLeod
(Ewen MacLeod)
Indian Agent.

KAMLOOPS INDIAN RESIDENTIAL SCHOOL,
KAMLOOPS, B.C.

July 8th, 1931.

Ewen MacLeod, Esq.,
Indian Agent,
Kamloops, B.C.,

Dear Mr. MacLeod:-

Will you be kind enough to apply to the Department at Ottawa for the following supplies; 5 sewing machines to replace some old ones that are badly out of condition. 75 gals of gray paint, 1 barrel of linseed oil, 5 gals of turpentine and ten gallons of white paint. You know exactly the improvements that have been made in the outbuildings. I have had the barn painted at my own expense but no other buildings have been done. We have built a new chicken house and have also put an addition to the Manual training school.

If the Indian Department wishes to have these buildings kept in good condition and be a credit to them they should at least supply the material with which to improve and preserve them.

Yours truly,

(Sgd) John Duplanil.

Gentlemen:

I have to request that you will arrange to supply from your nearest branch office, for the use of the Indian residential School at Kamloops, B.C., the following:

3 No. 2 - 5 Drawer Machines, 127 - 3 G.O.

Please notify Mr. Ewen MacLeod, Indian Agent, Kamloops, B.C., when these machines will be available for delivery and he will furnish the necessary shipping directions.

Your account, in duplicate, covering the cost of the machines should be forwarded to Mr. MacLeod, who is being informed of the order placed with you. This account should be in duplicate and should show the discount of 45% allowed off the net cash price, "on which terms purchase is made". When the machines are received, if in good condition, Mr. MacLeod will certify the account and forward it to the Department, when payment will be made.

Yours truly,

Sir:

I have your letter of the 17th instant, enclosing copy of a communication which you received from the Reverend Principal of the Kamloops Indian Residential School, requesting that five sewing machines and a quantity of paint be supplied.

In reply I have to inform you that an order is today being placed with the Singer Sewing Machine Company here to supply, from their nearest branch office to the school, three (3) Singer sewing machines, described in their catalogue as follows:

No. 2 - 5 Drawer Machines, 127 - 3 G.O.

This firm have been requested to notify you when the machines will be available for delivery, and you should then give them the necessary shipping instructions. Three machines are the full number we can authorize at the present time.

The account, in duplicate, covering the cost of the machines will be sent you. This account will show the discount of 45% allowed off the net cash price, "on which terms purchase is made". When the machines arrive, if in good condition, you should certify the account in the usual manner and forward it to the Department for payment.

Regarding the paint required, I regret that we have no funds available this year to provide the expenditure required in the purchase of the paint.

Dear Colonel Pragnell,

Upon my return to the office this morning I find your letter of the 2nd. June regarding the Kamloops school. I am sorry that it has been impossible for me to include the last wing of the Kamloops school in our building programme for the present year. Our funds are limited and had to be divided as equably as possible. In the meantime, therefore, the school authorities will have to manage with the accommodation now provided.

Dear Dr. Scott /

2 - 6 - 27

Father Maguire is hopping against hope that the last wing of the Kamloops School will be started this year. I promised him I would drop you a line to see if there is any chance. He is worried as I am about the boys accommodation. Rumour had it that it was going to be started!

I hope you have been keeping well? I myself had another go of flu which left me with aches and lumbago. However when the warm weather comes I hope that it will go away again. I also hope that it won't be long before an agent is assigned for here. The work has been particularly pressing just lately, and I can't get along with my own job, what I would have done without Mr. Barber's able assistance I don't know.

One thing I have been relieved of is the military

August 19, 1926.

Dear Father McGuire,--

I have your letter of the 12th instant, with reference to the necessity of completing the Kamloops school building. I hardly appreciate the reference to Father Guy, who is so interested in the welfare of the schools in British Columbia and has done such useful work in supporting the claims for progress in Indian educational matters. Are you quite convinced that you are making the best use of the space at your disposal in the interest of the male pupils. I have not lost an atom of my interest in the Kamloops school, and hope that before long Parliament may provide the funds to continue the building operations.

Yours very truly,

DCS

Dear Doctor:

You know very well what it means to a staff to have construction spread over a period of four years, - and then two or more years added. No doubt, construction troubles, like other school troubles are part of my business and I must expect them and meet them with an even mind.

Your policy of construction, to build by units, I am not discussing. That is your business entirely, not mine.

There was, however, one feature concerning the boys' wing, which should have been finished this year, that annoyed me profoundly. In a letter dated Dec. 14, Father Guy says: "We have discussed this matter while preparing the estimates in the course of October, but found no immediate necessity for said work." I said nothing at the time, nor since; I have no intention of answering that letter. It might hurt you or the Hon. Supt General. It was too late to rectify the error. But, Doctor, it was very unfair. Father Guy had absolutely no authority either from Very Rev. Father Welch or me to discuss the matter. And even if he had, he might easily arrive at the conclusion that there was no immediate necessity for the work, or any other conclusion equally stupid: he knows nothing of the situation, not

+

even the geography! So he concludes: "It will probably be considered next year, or later, as the case may be," which for him is quite as logical as the first! - Neither of us has anything to gain by making further mention of the matter. -

The girls' house was burned. You remember the dilapidated condition of the boys' house five years ago. There are some forty odd boys still occupying that house! And there are thirty odd boys living in the old laundry!

Doctor, if anything happens these seventy-five boys, what can either of us say? If their house burns, or if this new house burns, what can you say to me? We are living now, as we lived before, under impossible conditions when the thermometer goes twenty below. Or, will it be sufficient to say that some irresponsible person saw no necessity for the work!

You cannot hold me hard for drawing your attention to the critical condition of the boys and buildings here. - I haven't had a week's holiday in ten years! I cannot take them. You could not yourself.

Will you kindly oblige me by saying whether or not you intend to place an item

Ottawa 23d February, 1925.

Dear Dr. Scott,-

Re- N. S. Dalglish & Sons, Kamloops.

On the 4th of February, you wrote acknowledging my letter with reference to the purchase of supplies for the Indian industrial school at Kamloops. You stated in this letter that these purchases were made by the Indian Commissioner at Victoria after obtaining competitive prices, and the contract was awarded to the firm whose quotation was the lowest.

Upon transmitting this information to my correspondent, I am advised that this statement would not appear to be quite correct, as Messrs. N. S. Dalglish & Sons were not asked to furnish quotations, although this firm had placed their name before your Department some months before the work on the building was completed, advising that they carried stocks of furniture and house furnishings.

I would be very glad if you would make it a point to see that this firm is sent a tender form when the next call for tenders goes out, which will possibly be next summer on the completion of the Girls' Wing.

Yours very truly,

Dr. D. C. Scott,
Deputy Superintendent General,

November 30, 1927

Duncan C. Scott Esq.
Deputy Superintendent General of Indian Affairs,
Ottawa, Ont.

Dear Mr Scott;

Let me thank you for your telegram approving of Father Duplanil's appointment to Kamloops.

In a previous communication you have spoken of Kamloops Indian Residential School as being the most important Catholic school in British Columbia. I quite realize this, have endeavored to give you as its principal, one of the most capable managers at my disposal.

Writing from Kamloops, Fr Duplanil finds the school in a sound financial condition, but regrets that there are only one hundred children in attendance. This is due, he thinks, to a variety of causes, the chief one being a general feeling of unrest among the Indians of the Kamloops district.

Referring to the last quarterly returns of Fr McGuire which were sent back, and only \$4000.00 paid instead of \$5142.50; Fr Duplanil says that his predecessor had a way of his own in granting holidays, and it is not easy to know how he stood. Nevertheless he sincerely believes that the greater part of the balance is honestly due the school. This being the case, I will ask you in this connection to deal as generously as you can with the new principal. At this time, support from your Department will be of great encouragement to him, and a pledge of your confidence.

With regard to your promise to ask Parliament for an appropriation to complete the fine building at Kamloops, I need not say what satisfaction this has given us. Further delay in finishing the School, to my mind and in the opinion of others, would be almost disastrous. Certainly until the building is completed, the school can never be run successfully, and the longer the work is postponed, the more I fear conditions will go from bad to worse.

~~During the winter months we have and believe that you will succeed in pre-~~

We all sincerely hope and believe that you will succeed in procuring the appropriation, and that the Boys' wing will be begun and completed next year.

I have the honour to be

Yours faithfully,

J. Welch. D.M.S.

June 25th. 27

Hon Chas Stewart.

Ottawa.

Dear Mr Stewart:

You will note from enclosed that a condition exists at the Indian School which requires some immediate consideration and attention.

You have in Father Mc Guire a real, live, and very much interested party. In fact he is a real Jew when it comes to buying anything for that institution, price being his only consideration.

However he is much concerned as to present conditions. We tried to get hold of Mr Graham of Merritt to talk same over with him, but he is away. Therefore I am taking this matter up with you and paid a visit to the institution yesterday.

The Medical Health officers report requires attention. Accommodation for the boys is required, under present conditions they cannot take care of the boys in this district for which the building was built for.

If present conditions continue and when the Fall term at August 1st, starts if some changes are not made, it will cause not only unrest among your staff but also among the Indians.

The school was built to cover a large territory and a definite policy to Father Mc Guire should be made, and I would suggest that an independent official be sent to investigate conditions at once.

If you wish me to have Mr Graham write you I will do so, or anything that will help in this matter.

Yours sincerely,

Jas. R. Colley

Kamloops, B. C. June 15th, 1927.

Reverend Father McGuire,
Superintendent, Industrial School,
Kamloops, B. C.

Dear Sir:

At your request I have recently examined the sanitary conditions at your school and find as follows:-

The recreation room for the younger boys is the old laundry which is most inadequate and most unsanitary. The wood about the floor is water-soaked and the surrounding soil is saturated with the accumulation of years. It is most unsanitary besides being very cold in winter. The younger boys going from this room to the heated dormitories of the new building where they sleep are subjected to conditions very detrimental to their health, and we have had experience of numerous infections, colds, bronchitis and pneumonia during the past winter.

The dormitories and school room of the older boys consists of two buildings which are scarcely an improvement on the old laundry. They are cold in winter and absolutely unsuitable for the purposes for which they are intended. I looked over the wash-room of the dormitories yesterday which is decidedly dilapidated and unsanitary atate,

Besides this, these old buildings have outside toilets which are in a tumble-down, rotten condition; the soil about them is saturated with sewerage and the stench from ^{them} is unbearable. These toilets are a distinct menace to the health of the children and not at all in keeping with the appointments of a modern school. I would advise that these be demolished at once and some new arrangements made.

During the past year we have had a succession of infections in the school which it is impossible to eradicate in the presence of such unsanitary conditions,

Yours very sincerely,

MEDICAL HEALTH OFFICER.

Memorandum:

Mr. Buskard

RP

The Department deems it advisable to have the property occupied by the Kamloops Indian Residential school, which was acquired in 1888 from an Indian holder surveyed, and I should like to be advised of the name of a surveyor to whom the work might be entrusted. The property is situated in the Cariboo Electoral district, close to the city of Kamloops, and the survey could be most economically performed by a surveyor from that city. It is thought that the area of the school property is in the neighbourhood of 160 acres. The Kamloops Band is most anxious to have the school property definitely defined as difficulty has arisen from time to time when leasing land adjacent to the school property.

MEMORANDUM

Hon. Charles Stewart -

So far as I am aware all the necessary furniture has been bought for the new wing at Kamloops. It is invariably our practice to buy beds and standard furnishings of this nature from the wholesalers. It is quite impossible for Dalgleish and Sons to compete with them, and our experience has been that when wholesalers find that retailers are being asked to tender they withdraw. For this reason in 1925 Dalgleish and Sons cost the Department \$95 on a consignment of 100 beds, as the Simmons people, whose price was \$7.00 withdrew and we had to accept the tender of J. L. Gordon at \$7.95; the price of Dalgleish and Sons was \$8.75.

In your letter to Hon. Dr. King you stated that we would give Dalgleish and Sons an opportunity to tender on what they could supply; what is meant by that is utensils, etc., etc. As you know I am quite keen to look after the local merchants but not for purchases which we should make through the wholesalers.

If you so desire I can find out from Mr. Ditchburn whether there are any rooms to be furnished and with what articles.

Memorandum.

Mr. Pratt.

Kindly note the telegram which I sent to Mr. Ditchburn on the subject of purchases from Dalgleish & Sons of Kamloops, B.C. I explained to Dr. King that the orders may already have been given because Mr. Ditchburn has had this matter in hand for some time. He had the name of the Dalgleish Firm but as we are not supplying any small wares such as kitchen utensils etc., etc., it may not be possible to purchase anything from them.

My dear Colleague,-

In reply to your letter of the 23rd instant I have pleasure in informing you that Messrs. Johnston & Co., Kamloops, are the successful tenderers for the Kamloops Indian residential school. Their contract is inclusive and it is not known here who has the sub-contract for the plumbing and heating. I will ask my Deputy for Indian Affairs to make inquiry from the general contractor as to the arrangements he has made for the plumbing and heating.

Yours faithfully,

December 6, 1927.

Dear Father Welch:

I have your letter of the 30th ultimo, with reference to the situation at the Kamloops Indian Residential School. I wish to assure you that the needs of this work are receiving my most careful consideration and I am pleased to inform you that the Honourable Mr. Stewart has agreed to ask Parliament for an appropriation to complete the building there next summer. I shall see that the work is commenced at the earliest possible date.

I have asked Mr. Ferrier to write to Father Duplanil concerning the September quarter per capita grant. There is undoubtedly a balance due and our officers understood this. The \$4,000 was advanced only as an interim payment.

With warm personal regards,

Yours very truly,

Duncan C. Scott

8-4.

Dear Sir:-

I have the honour to report that I am in receipt of an application from Rev. Father John Duplanil, O.M.I., Principal of Kamloops Indian Residential School, for a flag for Kamloops Indian Residential School.

The flag which has been use for the past several years is now badly worn out, practically torn to shreds. This flag is kept flying continuously and is daily hoisted and lowered in a ceremonious manner while the school is in session. Owing to the size of the building and the height of the flag staff, a very large flag is required.

I wish to recommend that the Department either send me one of the largest flags from Ottawa, or authorize me to purchase same. On account of the high winds prevailing in this area most of the year, the flag should be of the very best material available.

I have the honour to be, Sir,

Your obedient servant,

Ewen MacLeod

KAMLOOPS RESIDENTIAL SCHOOL

At the time of my visit there were 292 children in the school. Their health has been very good up to date, with the exception of two diphtheria cases, (mild) which did not spread, owing to the care of the principal in conjunction with the medical officer. All the children were inoculated. The children were going to have potatoes and stew for supper. Everything was clean and tidy. Fire drill is carried out satisfactorily.

The new agent, Mr. Ferguson, accompanied me, and we went over all the school and outhouses, such as barns, etc., and made an inspection. The Principal has greatly improved the school grounds, etc., and made all tidy, but it has necessitated a tremendous lot of work.

The manual training has been very successful. and an extension to the building used for same, is being built. The boys are now doing most of this work around the school.

The survey of the school land has, I understand, just been completed.

The Secretary,
Department of Indian Affairs,
Ottawa, Ont.

Dear Sirs:

In regard to your cheque No. 3008
for \$27.60 received at this Branch Sept. 29th,
1931.

I will be pleased if you will advise
us as to what invoices this cheque was intended
to cover. Please advise the dates and the amounts
of the invoices.

I am sorry to trouble you but this
information was not noted here when the cheque was
received.

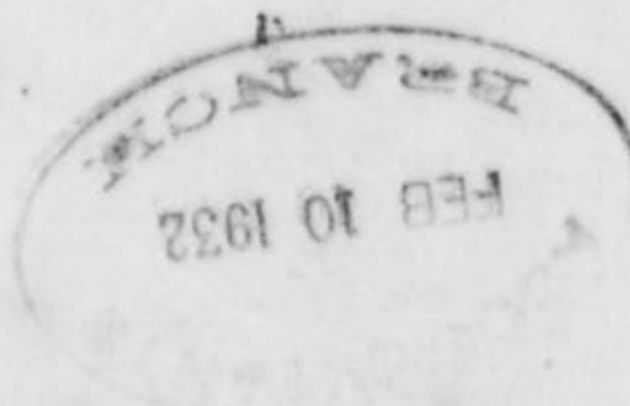

Yours truly,

P. G. Barr

Sir:

I have your 15/4/23971 of the 9th instant, enclosing copy of a communication which you received from the Rev. Principal of the Kamloops Indian Residential School in which he requests that a washing machine, with motor and shaft, be supplied for use in the laundry.

In reply I have to say that, in view of the recent orders for strict economy, the Department will be unable to provide the funds required in the supplying of this equipment.

Your obedient servant,

A. F. MacKenzie

No. 15/4/23971.
ALSO TO DATE OF THIS LETTER

[Handwritten signature]

Dear Sir:-

In July last when visiting the Kamloops Indian Residential School, Reverend John DuPlanil, Principal, drew my attention to the fact that an addition was required for the laundry equipment and I believe that this matter was also referred to in the report of Captain G.H. Barry, Inspector of Indian Schools when dealing with his report on this School. I am attaching hereto copy of a letter I have received from the Rev. Principal in this matter and will be pleased to know what action the Department is prepared to take to meet the request.

WED/KD.

Enclosure:-

Your obedient servant,

W.E. Ditchburn, Esq.,
Indian Commissioner for B. C.,
Victoria, B. C.

Dear Mr. Ditchburn:-

Some time ago during your official visit to the Kamloops Indian Res. School, I called your attention to the fact that the equipment for laundry work was not quite adequate for the number of children we have in the building. Both you and the late Mr. MacLeod agreed to the need of another washing machine, with electric motor and shaft. Since then Captain Barry has also recommended the matter. Over three thousand five hundred pieces of clothing go through the laundry each week. You may figure the work and time connected with it, at least as long as we have the present number of washing machines.

Will you be kind enough to write the Dept. about this matter.

With kindest regards,

I remain,

Yours sincerely,

"John DuPlanil"

EX-1.

Ottawa, February 15, 1932.

Sir:

Mr. Barry, Inspector of Indian Schools for the Province of British Columbia, in a report on his inspection of the Kamloops Indian Residential School, states that on the day he visited the school the classroom was far too cold - there being no heat in the radiators - and that it seems absurd that small children should have to sit in such a cold room.

I have to request that you will draw the matter of the proper heating of the classrooms to the attention of the Principal. It is thought that, with the heating equipment at the school, there should be no reason for not having the classrooms in a comfortable condition for the children. Please give this matter your early attention.

Your obedient servant,

A. F. MacKenzie,
Secretary.

Ottawa, February 12th, 1932.

Sir,-

Last September, the former Agent, Mr. MacLeod, submitted Voucher No. 311-31 for \$27.60, in favour of the Free Text Book Branch of the Department of Education, Victoria, covering the cost of books supplied to the Kamloops Indian Residential School. In this regard, I would point out that such vouchers should not be submitted to this Department as books and stationery supplied to Indian day and residential schools are ordered through the Government Stationery Office and, therefore, accounts received from firms supplying these books should be sent to the Department of Public Printing and Stationery, Ottawa. Please be guided by these instructions in future.

Your obedient servant,

A. F. MacKenzie

Ottawa, February 12th, 1932.

Sir,-

With further reference to your letter of the 30th ultimo, I beg to say that this payment has been reviewed and it is found that cheque No. 3008 for \$27.60, forwarded to you from this Department, covered the following sales slips, as stated in official letter of the 11th instant:-

Sales Slip No. 6286 for \$24.00
" " " 6287 for 3.60

The Government Stationery Office advises that sales slip No. 6286 covered the cost of Spellers supplied to the Kamloops Indian Residential School and the amount due for them, viz., \$24.00, has been paid to you by the Department of Public Printing and Stationery. Under these circumstances, a refund of this amount should be made to this Department. I would appreciate receiving your cheque as soon as possible.

We have no information here regarding the exact books for which the amount of \$3.60 was charged on sales slip No. 6287. No doubt, you can let me know for what books this charge was made and, also, the school to which they were supplied. It is possible that payment of this amount has also been made by the Department of Public Printing and Stationery, in which event a cheque for this sum should also be refunded to this Department.

Your obedient servant,

A. F. MacKenzie.
Secretary.

Ottawa, February 23, 1932.

Sir:

I have your 182/4/24055 of the 16th instant, enclosing copy of a communication which you received from the Principal of the Kamloops Indian Residential School in which he requests that a carload of mixed lumber be supplied for the use of the boys in their manual training work in erecting a pigpen, implement shed and other out buildings; also for \$100 worth of lumber for manual training purposes.

Regarding the lumber for manual training purposes to the amount of \$100, I have to inform you that Mr. Agent Ferguson was authorized on the 13th instant to arrange for the purchase of a quantity of lumber not exceeding the amount stated.

You may arrange for the purchase, from a firm on the list to receive consideration, of a carload of mixed lumber to an amount not exceeding \$350, and have same forwarded to the school. It might be advisable to ascertain from the Principal details of the lumber required. After the purchase has been made please forward an account, in duplicate, properly certified covering the cost, and you should state thereon that same is to be paid from B. C. Special Appropriation. As this material is to be used for manual training purposes, it is considered that it is properly chargeable to that Appropriation. In view of the recent orders for strict economy, our funds for General Appropriation for Indian Education will be extremely limited during the next fiscal year. It is understood that the school authorities will be responsible for the carrying out of the work as mentioned in the Principal's letter without cost to the Department.

I might add that Mr. Inspector Barry further recommended that a quantity of battleship linoleum be supplied for the floor of the kitchen, but it is regretted that the Department will have no funds to provide this equipment.

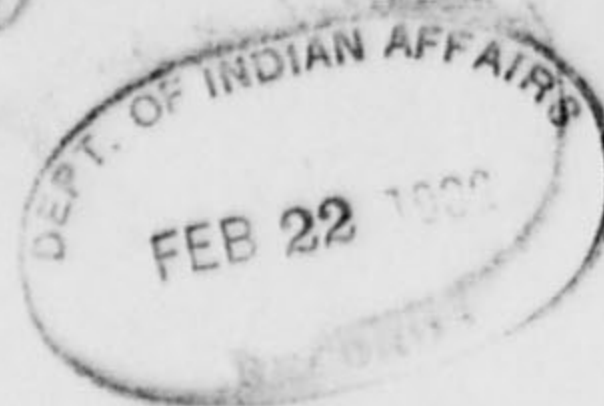

Your obedient servant,

A. F. MacKenzie,
Secretary.

Sir:

I have the honor to transmit herewith copy of a letter dated February 14th, instant, which has been received at this office from Reverend Father John Duplanil, Principal of Kamloops Indian Residential School, B.C. This letter will be self-explanatory.

On January 26th, a letter was addressed to the Department from this office covering the report of the Inspector of Schools. If the Department will kindly refer to Inspector Barry's report of his inspection on November 30th and December 1st, last, it will be seen that he recommended the purchase of \$100.00 worth of lumber for manual training purposes, in addition to the car load of lumber to the value of about \$350.00, together with other expenditures, in connection with which in my covering letter of January 26th, ultimo, I suggested that the Indian Agent be asked to furnish the Department with details of material required together with an estimate of cost so that the Department may be in a better position to authorize the same.

KAMLOOPS INDIAN RESIDENTIAL SCHOOL

Kamloops, B.C., Feb. 14, 1932.

W. E. Ditchburn, Esq.,
Indian Commissioner for B.C.,
Victoria, B.C.

Dear Mr. Ditchburn:

On Sept. the 26th 1929 I received from Ottawa a letter which read as follows:....."Materials with which to work, texts and benches have been directed to you and the Dept. wishes to make this phase of the school activity a real success. Please let me know what has been done and what is required to make the work as efficient as possible....."

Later on I had the following letter...." Whenever it is possible to increase the efficiency (of the manual school) you should not hesitate to address a letter to the Dept....." Both communications were signed by Mr. J.D. McLean, asst. Deputy and Secretary.

As you know, I have not asked and therefore I have not received. In preparing my work for the coming year, I find that I need a car load of mixed lumber, the approximate cost being \$350.00. This material is to be used for building pig pens, implement shed and other out buildings. I do not know of any work more practical for our children. Last year they built an up to date chicken house (without any help from the Dept.) they painted the barn (no help from the Dept.) and built a great deal of the furniture used in the buildings. I wish to know how far you are willing to go in recommending this matter of help to the Indian Dept. I understand that Captain Barry recommended the purchase of lumber for the school. His report will show his opinion on the matter.

The manual school has been very practical and very successful, but I cannot make it as efficient and practical as I wish unless further assistance be given me by your Dept.

With kindest regards, I remain,

Yours sincerely,

"John Duplanil"

Dear Sirs: Attention: Mr. F.H. Paget

I have your letter of February 11th re
cheque No. 3008 for \$27.60.

When this cheque was received it was
posted to the credit of the Department of
Indian Affairs but owing to the rush of work at
the time it was not checked off against the
individual invoices.

Cheque No. 5533 of December 3rd drawn by
the Department of Public Printing for \$122.24
covers among others the two invoices 6286 and
6287 which according to your letter received to-day
were supposed to be paid by cheque No. 3008.

I will be pleased if you will check this
matter up and advise us how we are to handle this
double payment.

Yours truly,

P. G. Barr,
Officer in Charge.

OFFICE OF
INDIAN AGENT

Kamloops, B.C.,
February 25th, 1932.

8-7259.

Dear Sir:-

With reference to your letter of the 15th inst., file 154-0-5, regarding a report made by Mr. Barry, Inspector of Indian Schools, to the effect that the classroom was far too cold on the day he visited Kamloops Indian Residential School.

I took the matter up with the Reverend Principal, and was informed by him that on the day Mr. Barry visited the School, a general overhaul of the heating apparatus was under way, and that this was the reason for the low temperatures on that day. He also informed me that five carloads of coal and 200 cords of wood have been consumed during the winter.

However, from personal visits made during the winter, I may say that at all times I found the temperatures of the building very comfortably heated and well ventilated.

Yours truly,

COMMISSIONER'S OFFICE,
P. O. BOX 666

VICTORIA, B.C., March 29, 1932.

IN YOUR REPLY REFER TO
No. 182/4/24467.
ALSO TO DATE OF THIS LETTER

Dear Sir:

I have the honor to attach hereto extract of tender No.60 from book No.6 for lumber purchased for the use of the Kamloops Indian Residential School. It was found cheaper to obtain this lumber in Kamloops, as in addition to the prices quoted in Victoria the freight would have amounted to approximately \$195.00.

This expenditure was authorized in your letter No.154-0-5 of the 23rd of February last, and is to be paid from the B.C. Special Appropriation.

Voucher No.114-32 of the Kamloops Agency is also attached hereto.

Your obedient servant,

W. E. Ditchburn,
Indian Commissioner for B.C.

Encl.

OFFICE OF
INDIAN AGENT

Kamloops, B.C. RECORDS
July 16th, 1932.

8-4-7600

Dear Sir:-

I have a request from Rev. John Duplanil, O.M.I., Principal of Kamloops Indian Residential School, to the effect that the cesspool at the School is in a dangerous condition as a menace to health, and that something be done immediately to remedy the matter.

I have visited the school and found that the cesspool had been overflowing and things were in a very messy state. Since then the sludge has been cleaned out and hauled away. After this was done, it was found that the automatic suction valve was out of order, and this will likely have to be replaced at a cost of \$30.00. While this will relieve the situation somewhat, the main trouble will still continue which is, from all opinions, in the disposal beds which have been clogged with sediment, and the liquid, instead of draining away into the ground, is forced back through the overflow pipe.

To overcome this there are two alternatives. One is to dig up and clean out the drain tiles in the disposal bed. The other is to make a cut of about twenty to twenty five feet down into gravel beds which underlie the sand in which the present disposal beds were laid, but I think that this is a matter for an engineer to look into and report on, and I would ask that it be referred to the Water Power and Reclamation Service.

I have in the office here, a report on the proposed repairs to this system, by E.H. Tredcroft, late of the above service, which I am quoting hereunder inasfaras the present situation is concerned.

Proposed repairs to system. (April 3, 1930)

" In view of the fact that without taking up the drain tile it is impossible to tell exactly how much of this system is blocked, it is not possible to give an exact estimate of what the cost of repairs to this system will be.

Should it be found after these tiles had been exposed that the entire system is blocked, then the cost of repairing same would probably amount to \$12,00. but should the blocking of these pipes have taken place only at or close to the point where they leave the main sewer pipe, the cost of repairs will be considerably less.

The Secretary,
Department of Indian Affairs,
OTTAWA, Ont.

\$1200.

10/11

Indian Affairs (RG 10 Volume 6449, file 882-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

July 16th, 1932.

I would therefore recommend that a competent sewerage contractor be employed under the supervision of this office on a cost-plus basis to expose and repair that part of this drain tile system which may be necessary, and that in addition to these repairs the tank be thoroughly cleaned out and overhauled, and an auxiliary 6" diameter vitrified pipe be installed from a point immediately above the tank to the centre of the garden, which pipe would act as a by-pass in the future for any repairs to the system that may require to be undertaken, and which would permit work being carried on on this system without sewage facilities in the school being interfered with.

The cost of installation of this additional pipe, together with a concrete diversion chamber, valves, etc., would amount to \$400.00, and the total cost would therefore be \$400.00 plus the cost of cleaning out the drain tile, which might vary from \$100 to \$1,200.

I would point out that this school is located in a particularly difficult situation as far as sewage disposal is concerned. It is on the extreme edge of the river with the ground sloping only one way. The Department of Health will not permit the sewage to be drained into the river, owing to the fact that the City of Kamloops obtains its water supply a short distance downstream. The depth of the foundations of the school and the low elevation at which the drainage pipes leave the school building make it impossible to direct the flow of sewage in any direction other than the one in which it has already been carried, and the nature of the soil, which is a sandy gravel (mostly sand) makes it impossible to guarantee that these beds will not become clogged after five or six years unless great care is taken in the operation of the septic tank.

In addition to the above, the sewage in the school carries a large proportion of soap (from the school baths) which is very difficult to handle satisfactorily in disposal beds.

The only other method of handling this sewage would be means of a system of mechanical filters, which would be expensive to install and which would require continual cleaning and care; and the cost of their operation, together with the cost of installation, would not, in my opinion, be warranted at the present time.

It would appear that repairs to the system as outlined in this report should first of all be carried out, and provided ordinary care is exercised in the maintenance of the septic tank I do not consider that further trouble will be experienced, but should it be found that after another five or six years the same condition occurs, then the Department can consider the advisability of installing mechanical filters. "

In the above report, in paragraphs 3 and 8, mention is made of an auxiliary by-pass pipe at a cost of \$400.00. This pipe was installed some time ago, and at present being used to pass the sewage by the septic tanks..

The Secretary,

-3-

July 16th, 1932.

Before closing, I would like to impress the Department with the fact that this repair work will have to start in sufficient time to allow completion before the opening of the School on August 29th next, otherwise, for sanitary reasons, the school would have to remain closed.

Yours faithfully,

W. J. Ferguson

Ottawa, July 22, 1932.

Sir: ① *Mr. Webb*
② *Sec.*

I wish to refer to your 2543-W"A" of October 14, 1930, with reference to the sewage disposal plant at the Kamloops Indian Residential School. You will recall that repairs, at a cost of approximately \$1400, were made two years ago. At that time, the by-pass was installed.

The local Indian agent reports that the disposal plant is again out of order. It appears that the automatic suction valve needs replacing and that the disposal beds are clogged. He writes in part as follows: "To overcome this, there are two alternatives. One is to dig up and clean out the drain tiles in the disposal beds. The other is to make a cut of about 20 to 25 feet down into gravel beds which underlie the sand in which the present disposal beds were laid, but I think that this is a matter for an engineer to investigate".

At present the by-pass is being used, but it is very urgent that the disposal plant be put in good condition at the earliest possible date. Will you please telegraph to your Mr. Webb, asking him to arrange for a report, with estimate of the cost, concerning what should be done.

Your obedient servant.

OFFICE OF
INDIAN AGENT

R

July 19th, 1932.
Kamloops, B.C.,

3-4-7620

Dear Sir:-

I am enclosing herewith Vouchers 285-32, in the sum of \$10.41 in favour of B.C. Electric Railway, and 286-32 in favour of Rev. John Duplanil, Principal, Kamloops Indian Residential School.

These expenditures were of an emergent nature, and were made in connection with the high tension wire, which crosses the South Thompson River and carries electric current from the B.C. Electric Railway Company to Kamloops Indian Residential School, and is school property.

Owing to the high water and the slack which had worked into the sag of the wire, there was not enough clearance to allow a steamboat, the "C.R. Lamb" to pass under the wire, and while she was manoeuvring to get by, her smokestack caught the wire and stretched it down to within a few feet of the wire. As the wire was carrying a current of some 2000 volts, a man was put to work as guard to keep small boats and others away from the wire until the B.C. Electric were able to bring in a crew and equipment to make the necessary repairs.

In this connection, I do not think that the Department has any claim for the cost of repairs against the owners of the boat as the Thompson River is a navigable stream, and the boat would likely be built according to the specifications required by the Department of Marine and Fisheries. The owners of the boat claim that the height of the boat from the water line to the top of the smokestack at the time of the accident, was 33½ feet, which does not seem to be out of reason.

In view of the past accident and the present height of this power line, I would be obliged if you could obtain for me the regulations governing the height of transmission lines across the North and South Thompson Rivers.

Yours faithfully,

W. J. Ferguson

Vancouver, B. C.,
August 3, 1932.

Sir: Inspection of Sewage System,
Kamloops Indian Residential
School.

In accordance with your instructions,
I inspected the above mentioned system on July
28th and 29th and beg to report thereon.

This system was installed originally
in 1924 for the disposal of sewage from the
school and to provide for an ultimate population
of 250 persons. Until 1929 the system seems
to have functioned in a satisfactory manner although
it was badly neglected. In 1930 the system was
overhauled and put in good repair and it appears
to have given satisfaction until this year.

As described in previous reports, the
system consists of a two chamber septic tank
with the necessary disposal beds. A by-pass valve
and pipe line installed in 1930 permits the
direct discharge of sewage to pits situated on
the farm near the school. Drainage water from
the school laundry is carried through a separate
pipe line direct to the land in the school orchard.

Early this summer the septic tank was
cleaned and it was found the Anthes Syphon Valve
in the septic tank was broken due to corrosion.
How long it had been in this condition is unknown
but it is possible that it had been out of order
long enough to again result in the disposal beds

C.E. Webb, Esq.,
District Chief Engineer,

VERY

POOR-COPY

of slightly over 300 persons. This care must include the following:-

1. Cleaning of septic tank at least once every three months.
2. Cleaning of grease traps in building at least twice each week.
3. Prevention of newspaper and other deleterious material being put into sewage system.

To ensure the septic tank being cleaned frequently, it seems advisable to supply a small portable power driven trash pump. Such a pump unit could be procured for about \$160.00. With a power pump there is more likelihood of this work being frequently carried out as the present system of hand cleaning is laborious and noxious.

RECOMMENDATIONS FOR FUTURE CONSIDERATION

Should the system after a fair trial be still found to give trouble it will then be advisable to consider one or both of the following proposals or to consider the replacement of the present system by an expensive mechanical disposal plant.

1. Soap, fats and oils from the kitchens of the school are to a certain extent caught in grease traps below the sinks but undoubtedly the waste water still contains a heavy percentage of such substances. This soap, fat and grease interferes with the proper digestion of the sludge in the septic tank and also forms a film over the inside of the land tile of the disposal beds thus preventing the ready seepage of the effluent

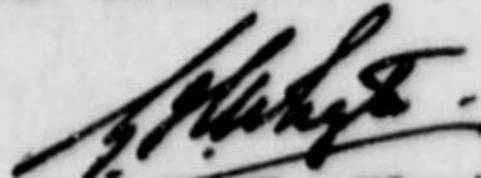

to the soil. If this kitchen waste water was diverted to the laundry waste disposal system it would thus relieve the septic tank and disposal beds. To make this diversion would necessitate the installation of 400 feet of 3-inch pipe from the kitchen to the sump pit where the pump now used in connection with the laundry waste water system is located. This waste water would then be passed to the school orchard with that from the laundry.. To install this pipe and the necessary valves would cost some \$600.00.

2. As the present system has already to accomodate an excess of 25% over its designed capacity the installation of a second septic tank unit with the necessary disposal beds might well be considered in the near future. This second unit would be contiguous and parallel to the present one and of similar design. The cost of installing this unit would be approximately \$3,000.00.

CONCLUSION

The question of installing a mechanical disposal system has not received serious consideration as the initial cost and cost of upkeep of such a system is much greater than seems warranted unless the school population is likely to greatly increase.

Your obedient servant,

G. H. Whyte

Inspector*
Sir, -

With reference to the repairs to the sewage disposal system at Kamloops Indian Residential School, Mr. Webb writes as follows, under date of September 1st:

"I am now in receipt of a letter from Mr. C.B. Corbould, Junior Power Development Engineer, dated August 29th, advising that the Kamloops Plumbing & Heating Company have replaced the Anthes syphon valve in the septic tank for the Kamloops Indian Residential School.

Mr. Corbould further advises that he has been informed by the Principal of the school that the tank is now working in a satisfactory manner although he stresses the point that at the moment the children are not yet back at school. The cost of installing this valve was \$40. and I would be pleased if you would advise me as to whether the account should be paid from our advance for Indian General Surveys or will a separate advance cover expenses incurred in connection with this work."

Will you please advise me as to how the expenditure for this valve is to be met.

Your obedient servant,

J.T. Johnston,
Director.

for M.F.C.

Your file 2543-A

Sir,-

In further reference to your letter of July 22nd regarding the sewage disposal plant at Kamloops Indian Residential School, I enclose herewith a report received from Mr. Webb, which describes the existing conditions of the installation and makes some recommendations as to its future operation. The new syphon valve has been ordered through the Kamloops Plumbing and Heating Company and will be installed as soon as it arrives. It is expected that with the installation of the new valve and some cleaning of the disposal beds that the system will function satisfactorily, although it may be necessary to make some further changes in view of the fact that the School is now accommodating over 300 persons in place of the 250 for which the system was designed.

Your obedient servant,

J. T. Johnston,
Director.

K-R-6

Kamloops, B.C.,
December 8th, 1932.

R

Dear Sir:-

" I beg to enclose herewith Voucher 563-32, in the sum of \$43.90, in favour of the B.C. Electric Railway Company, for work done in connection with repairs to the power and telephone line to Kamloops Indian Residential School.

In this respect, I wish to report that a bird had built a nest in the cross-arms on the top of one of the poles of the line, and owing to wet weather and friction, a short circuit was made, causing the pole and wires to catch fire. This happened on the evening of November 21st, and owing to the necessity of their supply of light and power for the school, a repair crew was ordered by the Principal, from the B.C. Electric Company. Temporary repairs were made that evening, and the work ordered completed next day, by myself.

In this regard, I am enclosing a clipping from a local paper, in which a kingfisher is referred to as the culprit. The paper was in error, as a kingfisher, I think, generally builds his nest in a clay bank. However, it was a large bird of some sort.

In view of the circumstances, I trust that this report will be favourably received and the account paid.

Yours faithfully,

W.J. Ferguson

Reverend Sir:

I have to acknowledge receipt of your letter of the first instant, with reference to the inspection of the septic tank at the Kamloops Indian Residential School.

Mr. Agent Ferguson was authorized, by telegram of the third instant, to purchase a small, portable, power-driven trash pump. It is understood that the use of this pump will insure the cleaning of the septic tank being done in a sanitary manner.

Your obedient servant,

A. F. MacKenzie,
Secretary.

Kamloops Indian Residential School

Kamloops, B.C., November 1st, 1932

The Secretary,
Department of Indian Affairs,
Ottawa, Ont.

Dear Sir:-

I beg to inform you that three months have passed by since the inspection of the Septic Tank was made by the Dominion Water Power Branch Official, and the time has arrived when further attention should be given to it.

The Tank should be cleaned, but it will not be done until the proper equipment has been supplied by the Department.

Since Mr. E. Fredercroft supervised the installation of the new drains and the cleaning of the old ones, according to instructions, the Tank was cleaned and washed every three months. The School children used common pails for the purpose, but I do not approve of this method of cleaning the tank, as it is not sanitary or practical. I, therefore, cannot allow the boys to clean the tank in this way.

I take this occasion to make a strong objection to the report sent by one of the so called Engineers in the employ of the Dominion Water Power Branch, Mr. Whyte. When he came to the School, he complained that the Tank had not been cleaned and washed thoroughly. There was no sediment of any kind in the Tank, not even water. It had been thoroughly cleaned, scrapped and washed about two weeks previously to the inspection.

I would also like to draw your attention to the fact that the grease boxes in the scullary, kitchen and dairy had been thoroughly cleaned, as instructed, in the same manner as the Tank. My word is just as good as his and I certainly object to this Report.

Yours sincerely,

John A. L. [Signature]

Ottawa, November 3, 1932.

Sir:

I have your letter of the 28th ultimo, regarding the installing of a small portable power-driven trash pump to be used in connection with the cleaning of the tank of the sewage disposal system at the Kamloops Indian Residential School. In this connection I have to confirm the following night lettergram to you of today's date:

ENCUMB.
REQ'N. No. 82

"Reference your letter twenty-eighth ultimo. May arrange for purchase from indicated sources supply of small portable power-driven trash pump costing one hundred sixty dollars for use in connection sewage system Kamloops Residential School".

The Department regrets that the recommendation of the Inspector of the Dominion Water Power Branch in connection with the supplying of the above pump was overlooked. After you have made the purchase, you should forward an account, in triplicate, covering the cost, which you should certify in the usual manner and forward for payment.

In connection with the report of the Water Power Branch, it is noted that it is recommended the care of the present sewage system must include the following:

1. Cleaning of septic tank at least once every three months.
2. Cleaning of grease traps in building at least twice each week.
3. Prevention of newspaper and other deleterious material being put into sewage system.

You will be good enough to see that the school authorities carry out the above recommendations of the Inspector of the Dominion Water Power Branch.

Your obedient servant,

A. F. MacKenzie,
Secretary.

W. J. Ferguson, Esq.,
Indian Agent,
Kamloops, B.C.

Kamloops, B.C.,
October 28th, 1932.

Self Pools

K-L-3

Dear Sir:-

I wish to refer you to a report, dated August 3rd last, by Mr. G.H. Whyte of the Dominion Water Power Branch, in connection with the sewage system at Kamloops Indian Residential School of this Agency.

In this report, certain recommendations were made for repairs to the present system. One was the advisability of installing a small portable, power driven trash pump, at a cost of \$160.00, which was to be used for the cleaning of the septic tank at least once every three months.

Up to the present, no further word has been received by me or the Rev. Principal regarding this pump, and today, Rev. Father John Duplanil informed me that the tank requires immediate cleaning, and the only way to assure the cleaning being done in a sanitary way, and to protect the health of the children was by use of a pump. He also further advised me that should he have to clean the tank by baling with buckets which would create a smelly and unhealthy mess, he would not be responsible should typhoid fever break out amongst the children.

I quite agree with the Rev. Father in his request for this pump, as I have been at the tank when it was cleaned by baling with buckets, and it was more than I could understand how the men employed could stand the stench and filth in connection with the work. The children also have to put up with this, as it is in the centre of their playground, while the staff get their share with a favourable wind.

In view of this necessity for this expenditure, I would ask that the Department please wire the necessary authority.

Yours faithfully,

W.J. Ferguson
(W.J. Ferguson)
Indian Agent.

POOR COPY

Ottawa, September 14, 1932.

Sir:

The Department is in receipt of the report of the engineer of the Public Works Department on his inspection of the boilers at the Indian residential school, Kamloops, B.C. The Department is pleased to note that, generally speaking, the whole of the plant is kept in good condition.

With reference to boiler No. 43711, the engineer recommends that the steam gauge be renewed, at a cost of approximately \$10. He states that the glass front of the steam gauge on this boiler and also on boiler No. 43710 was broken and that moisture and dust had got inside and spoiled the interior mechanism. The school authorities should at once arrange to have the steam gauges on these boilers renewed, and you will see that this is done.

The engineer further states the blow down pipes of these boilers are in fair condition, but are connected together and have no check valve between each and the boiler, which is a dangerous method in case anyone is working around one of the boilers and the blow down valve is left open and the other one is blown down, the boiling water would blow back into the empty boiler and burn the one working in the boiler which is being cleaned. These pipes will need renewing in the near future, and when it is done check valves must be installed. You should draw this matter to the attention of the Principal, and he should in due course have check valves installed.

Regarding boiler No. 43794, which supplies steam to the school laundry, the engineer states that, if a reducing valve was installed on this machine and 100 pounds carried on the boiler, it would increase the efficiency of the laundry plant. This matter should also received the consideration of the Principal.

T. R. L. MacInnes
Your obedient servant,

T. R. L. MacInnes,
Acting Secretary.

Public Building,
Victoria, B. C.,
August 23rd, 1932.

C. F. Dawson, Esq.,
Dist. Res. Architect,
Dept. Public Works, Canada,
Victoria, B. C.

Dear Sir: Re. Inspection of Boilers and Machinery,
 Indian Industrial School, Kamloops, B.C.

On August 12th I made an inspection of this plant, which consists of two Birchfield tubular boilers of 79 H.P. each, and one vertical tubular boiler having a rating of 9 H.P., manufactured by the Vulcan Iron Works of Vancouver in 1924-25.

These Birchfield boilers are a practically new venture in boiler construction, embodying the advantages of the Scotch Marine, Return Tubular, and the Locomotive, and having the disadvantages of all three in strains, and small water spaces, and they have all welded seams, instead of rivetted. They are a very economical boiler, but need a very careful inspection.

Boiler #43710.

I inspected this boiler, giving it a careful hammer test, and found that all stays, shell, furnace plates and combustion chamber, were in sound condition.

The interior plates are in first class condition. Lime and soda has been used, added to the feed water, and I would recommend that the same treatment be continued.

I then gave it a Hydrostatic Test of 45 lbs. and found that all seams and joints were perfectly tight, and in good condition. The fusible plug was renewed, but the steam gauge must be renewed at an approximate cost of Ten Dollars (\$10.00).

There are two spring loaded pop safety valves, one 3" in diameter and the other 3 1/2" in diameter, manufactured by Crane Co. I set them to blow off at 14 lbs., full, 15 lbs., cold water pressure.

I have issued a certificate allowing a steam pressure of 15 lbs., and condition good.

I understand that a new set of firebars have been ordered for both boilers.

Boiler No. 43711.

On the same date I inspected this boiler, giving it a careful hammer test and found that all stays, shell, furnace plates, and combustion chamber, were in sound condition.

.

Indian Affairs (RG 10 Volume 6449, file 882-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR COPY

Boiler No. 43711. Cont'd.

The interior of this boiler is also in first class condition. There were more loose scales in the bottom of the wet legs than in boiler No. 43710, and some on the tubes. These were removed and the same water treatment recommended.

I gave this boiler a Hydrostatic Test of 45 lbs. and found that all seams and joints were perfectly tight and in good condition. The fusible plug was renewed. The steam gauge must be renewed at a cost of approximately Ten Dollars (\$10.00). The glass front of both these gauges was broken and the moisture and dust had got inside and spoiled the interior mechanism.

There are two safety valves, one 3" in diameter and the other 3 1/2" in diameter, manufactured by Crane Co., spring loaded pop. I set them to blow at 14 lbs. full, 15 lbs. cold water pressure.

I have issued a certificate allowing a steam pressure of 15 lbs. and condition good.

Blow Down Pipes.

The blow down pipes of these boilers are in fair condition, but are connected together and have no check valve between each and the boiler, which is a dangerous method in case anyone is working around one of the boilers and the blow down valve is left open and the other one is blown down, the boiling water would blow back into the empty boiler and burn the one working in the boiler which is being cleaned. These pipes will need renewing in the near future, and when it is done check valves must be installed.

Condensation Pumps, Etc.

There is a duplicate set of condensation pumps working from one common cast iron receiver.

They are in good condition and have the appearance of being well kept. I tested them both and they were quite free.

Boiler No. 43794.

On the same date I inspected this boiler, giving it a careful hammer test and found that the shell plates, furnace, furnace tube sheet, top tube sheet, rivets and longitudinal seam, were in sound condition.

This boiler is 34" in diameter, 7'7" high and has 54 - 1 3/4 tubes. The top end of the tubes have the appearance of having been slightly burnt. This could have been caused by raising steam too quickly. I pointed this out to the attendant and he promised to raise steam more slowly.

.

Boiler No. 43794. Cont'd.

I gave this boiler a Hydrostatic Test of 190 lbs. and found 27 tubes leaking. There was a tube roller at the school, so I rolled the leaking tubes and they are now tight, but they are quite thin. They will stand being carefully rolled two or three times more before they will need renewing.

The fusible plug was renewed, and the safety valve set to blow off at 75 lbs. cold water pressure. This boiler supplies steam to the school laundry and the safety valve is set at that pressure on account of the ironing machine. If a reducing valve was installed on this machine and 100 lbs. carried on the boiler it would increase the efficiency of the laundry plant.

I have issued a certificate allowing a steam pressure of 130 lbs. and condition fair.

The same water treatment should be continued as with the rest of the plant.

The whole of this plant is kept in a very clean condition.

Yours respectfully,

T. J. Arnall
T. J. Arnall,
Engineer.

OFFICE OF
INDIAN AGENT

Kamloops, B.C.,
April 25th, 1933.

K-L-6.

7

Dear Sir:-

With reference to your letter of the 16th ^{April} ~~Feb.~~, file 154-0-5 regarding a report in connection with the raising of the electrical transmission line and telephone line which extends from Kamloops to the Indian Residential School, which the Public Works Department reports does not give sufficient clearance over the South Thompson River at extreme high water for the S.S. C.R. Lamb.

In this respect I wish to report as follows:
Last summer, I reported by letter dated August 26th, 1932, File K-S-7747, that the C.R. Lamb had fouled the line and pointed out that these wires would very likely have to be raised.

In connection with your above request, I have now gathered from investigations:

1. That to raise the telephone line 4.6 feet, and the power line 2.1 feet, as required by the Public Works Department, and in accordance with sketch "A" attached hereto, the estimated cost would be \$80.00.

The maximum height that these wires can be raised using the poles as at present is:- Telephone wires 5.0 feet, Power wires 4.0 feet. This estimate is based on the assumption that power will be cut off while work is in progress. If continuous power is necessary, the estimate would be doubled.

I have interviewed the Rev. Principal, Father John Duplanil, and he informs me that it can be arranged for a shift of six hours during the day. It will take two or three shifts to do the work. During this period that the current would be cut off, every care would have to be taken to guard the School against fire, as they would have only a limited supply of water in the reservoir. However, with everyone cautioned to be careful during the cut-off, and with the supply of chemical hand fire extinguishers that are in place over the building, I am sure that everything in this respect would be safe enough.

In the construction referred to in sketch "A", the present poles, anchors, wire and insulation will be used. The balance of the material to be supplied new, such as cross-arms, bolts, braces and some guy wire.

The Secretary,
Department of Indian Affairs,
OTTAWA, Ont.

Indian Affairs (RG 10 Volume 6449, file 882-5, part 7)

PUBLIC ARCHIVES

The Secretary.

-2-

April 25th, 1933.

While the estimate of \$80.00 will likely be sufficient to complete the construction work as laid out in Sketch "A", there will also be a charge by the Power Company cutting the current off and on again, and possibly some other unforeseen expense, and I would ask that an allotment be made of at least \$100.00 to cover the expenditure in connection with the raising of these lines.

The attached sketch "A" was prepared by Mr. M.L. Wade, a registered civil and electrical engineer, who was formerly Superintendent for the West Kootenay Power and Light Company, Ltd., and I feel certain that his survey and estimate of this matter can be relied upon. Mr. Wade has very kindly reported on the work for me without charge, and I would ask that he be allowed to tender on the work, if it is put up to competitive bids, which I would recommend be done, the work to be allotted to the lowest bidder, provided they have suitable equipment for the proper carrying out of the work. The other local firms who would likely tender are the B.C. Electric and C.L. Wain.

I might add that this work should be under progress shortly and be completed not later than May 26th next, as the highest water of the year in the Thompson River usually occurs during the first week in June.

Yours faithfully,

W. J. Ferguson
(W.J. Ferguson)
Indian Agent.

Ottawa, March 30, 1933.

Sir:

The Department is in receipt of a report from the Dominion Water Power and Hydrometric Bureau, with reference to the recent visit of Mr. W. C. Warren to the Kamloops Indian Residential School, in connection with the septic tank. This report reads in part as follows:-

"The pump was not used, the sewage being allowed to run down to the garden by way of the by-pass. The Indian Agent suggests that the pump be returned to Messrs. Pumps & Power and a refund obtained. Apparently, the school authorities do not care to use it."

It is presumed that the above refers to the syphon, the purchase of which was authorized by official wire of November 8th, last, and payment for which was made on receipt of your voucher 12-33, for \$81.85, on January 27th, last. If the school authorities do not intend to use this pump, the Department wishes you to communicate with Messrs. Pumps & Power, 40 Cordova St. East, Vancouver, and see if arrangements can be made to have it returned and a refund obtained. Please advise what action you take in this matter.

For your information, I may add that the Department is again communicating with the Dominion Water Power and Hydrometric Bureau, regarding the sewage disposal system at the Kamloops School. From the report received, it appears that, in order to insure the disposal system functioning with the least trouble, it will be necessary to incur an expenditure of approximately \$1,650. As our Appropriation has been reduced, it will not be possible to consider such a large expenditure. However, we are requesting the Dominion Water Power & Hydrometric Bureau to give the matter further consideration, with a view to ascertaining if temporary measures could be taken to improve the sewage system at a considerably less cost than the amount mentioned above.

Your obedient servant,

A. F. MacKenzie,
Secretary.

W. J. Ferguson, Esq.,
Indian Agent,
Kamloops, B. C.

2543-WA

Ottawa, March 30, 1933.

Sir:

I have to acknowledge receipt of your letter of the 27th instant, enclosing the report of your engineer regarding the sewage disposal system at the Kamloops Indian Residential School.

It is noted that, in order to have a disposal system that will function with the least trouble and with the least possibility of contaminating the domestic water supply of the adjoining municipality, it will be necessary to incur an expenditure of approximately \$1650.

I regret that, owing to the fact that our Appropriation for the fiscal year 1933-34 has been considerably reduced, this Department is not in a position to authorize an expenditure of the amount mentioned.

As a matter of fact, the Department has only \$500 available for the fiscal year 1933-34 for necessary repairs and improvements at the Kamloops School. I would appreciate if you would arrange to have your engineer give this matter further consideration. Possibly, the suggestion contained in the second paragraph of Mr. Warren's report would meet the situation for the present and, it is noted, would not involve any heavy expenditure.

It is also noted that the pump which has been recently supplied has not been used, and the Indian Agent is being written and instructed to make arrangements for returning this to the firm from which it was purchased, provided the school authorities do not intend to use it. Possibly our Agent did not purchase a suitable pump, and you might request Mr. Warren to indicate if he considers some other make of pump is necessary.

Your obedient servant,

A. F. MacKenzie,
Secretary.

J. T. Johnston, Esq.,
Director,
Dominion Water Power & Hydrometric Bureau,

FILE NO. 2543-WA

Your file 154-0-5.

OTTAWA, ONT., March 27, 1933.

Sir,

In further reference to my letter of January 16 last regarding the sewage disposal system at the Kamloops Indian residential school, I enclose a report received from Mr. Webb in this connection resulting from a visit by Mr. Warren during the first week in March.

It will be noted that the system is not functioning satisfactorily in so far as the septic tank is concerned and that this is due to the rapid rate of the passage of sewage through the tank.

Owing to the fact that the water supply intake of the City of Kamloops is downstream from the school site, septic tanks are the only available means for disposing of sewage from this institution. For this reason it becomes necessary to have a disposal system that will function with the least trouble and with the least possibility of contaminating the domestic supply of the adjoining municipality. It will be noted that Mr. Warren recommends the construction of an additional tank unit and re-arrangement of sewer pipes to provide for a slower rate of flow through the disposal system. The estimated cost of this work is \$1650.

Mr. Webb concurs in this recommendation and asks that the matter be given early consideration.

Your obedient servant,

J. T. Johnston,
Director.

AY

OR-COPY

Vancouver, B. C.,
March 10, 1933.

Memorandum to Mr. Webb:

Kamloops Industrial School,
Septic Tank.

In reference to the above it has been necessary to clean out the septic tank again at the school owing to the solid matter being carried into the second chamber. This was completed just before I arrived in Kamloops. The pump was not used, the sewage being allowed to run down to the garden by way of the by-pass. The Indian Agent suggests that the pump be returned to Messrs. Pumps & Power and a refund obtained. Apparently the school authorities do not care to use it.

It appears to me that the septic tank has not sufficient capacity now that the school population is in excess of 300. I have suggested to the Indian Agent that an extension of the by-pass between the two chambers in a downward direction about 15 inches would stop for a time at least the conveyance of solids through the tank and also that an extension of the inflow pipe about the same amount would prevent the disturbance of the surface to the same extent as at present occurs. These alterations if made of a temporary nature would not be costly. They might help to stimulate the present very slow rate of conversion.

The present capacity of the septic tank, less than 20 gallons per head per day, does not correspond with the actual rate of sewage flow which is nearer 50 gallons per head per day. As a result of the lack of capacity the rate of change of the settling or liquefying chamber is from 2½ to 3 times daily, and should normally be one change for best results.

Until one year ago the present septic tank was operating satisfactorily. The increase in population from 250 to over 300 recently has overtaxed the capacity of the tank to operate satisfactorily and it has now developed into considerable of a nuisance for the school authorities and will become more so when the warm weather arrives. The tank was cleaned out in the early part of December last and again about the first week of March. From my recent observations it is safe to say that little, if any, bacterial development takes place, due in my opinion to the high rate of inflow which disturbs the surface, and to the rapid rate of flow through the tank.

I would suggest that an additional unit of the same capacity be provided so that the sewage flow could be equally divided between the two tanks.

Indian Affairs (RG 10 Volume 6449, file 882-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR-COPY

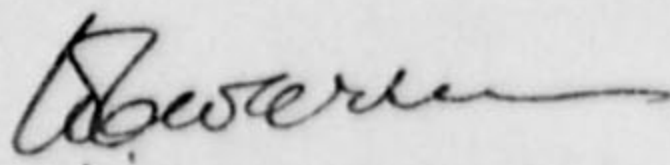

The capacity of the system would then be sufficient to provide for the present population at a rate of about 40 gallons per head per day. Some slight changes would be required in the layout of the sewage pipelines to allow for the equal division of flow and for disposal of the effluent.

In regard to the sewage disposal beds. I was unable to examine them as the ground still remains frozen. I have, however, requested the Indian Agent to inspect the tile so soon as circumstances permit.

The cost of providing an additional tank unit and re-arrangement of pipes has been estimated at \$1650. No outlay for the filter beds is included in this estimate as without examination it is impossible to say in what condition they are in. If in good shape now no further extension would be required.

It has been suggested that by the diversion of drainage from the kitchens and boiler rooms less unnecessary flow would pass through the tank, that is true, but I am doubtful if the amount diverted would be sufficient to reduce the amount going to the septic tank to a quantity well within its capacity.

The difficulty about disposing of sewage by means of septic tanks in institutions such as the Kamloops School is that there is no regularity of flow, but rather a concentrated flow about three times daily, which is each time in sufficient quantity to almost exactly displace the contents of the tank, thus allowing only a very short interval of time for bacterial action.

W.C. Warren

DEPT. OF INDIAN AFFAIRS
MAR 25 1933
RECORDS

EXTRACT from Letter received from Inspector
G. S. Pragnell, dated March 11th, 1933, reporting on
the KAMLOOPS INDIAN RESIDENTIAL SCHOOL.

Original on File 154-0-6.

The septic tank for the disposal of sewerage is not giving satisfaction now, and has to be frequently cleaned out. I think the trouble is that this tank was built for a capacity of 250 people, and counting the staff, there are about 300 people at the school. A large quantity of water is used, and I think, owing to this strong flow and overtaxing of its real capacity, the bacteriological action necessary in a septic tank is not getting a chance to work. As it happened that Mr. Warren, Engineer of the Dominion Water Power Branch was here, I drew his attention to the matter which, in short, is that this tank is now not working as a septic tank, but more like an ordinary cesspit. I asked him to report the matter to his Chief, Mr. Webb. My personal opinion is that the feasible solution is the building of another septic tank alongside, with a division in the main pipe from the building, so that the flow will be halved into each tank. Failing that, perhaps the diversion of some of the waste water from the kitchens, dairies, etc., might help lessen the strain on the existing tank.

EXTRACT from Letter of C. C. Perry, Asst. Indian Commissioner for B. C., dated March 18th, 1933, forwarding Inspector Pragnell's report on the KAMLOOPS INDIAN RES. SCHOOL. - Original on File 77-154.

It is unfortunate that the matter of the septic tank at the school has been the cause of conflicting views as between the Principal of the school and the engineers of the Water Bureau. There is no doubt that the use of this system is very extensive and I think the engineers should be looked to to see that the problem is adequately dealt with and what is wrong with the system duly corrected. Mr. Webb's attention has been called to the Inspector's observations in this report. When his answer is received, the same will be forwarded to the Department.

Dear Sir,-

I am today in receipt of a letter from the Secretary of the Public Works Department advising that their Engineers have reported that the electrical transmission line and telephone line from Kamloops to the Residential School crossing the South Thompson River does not provide sufficient clearance at extreme high water for the S.S. "C. R. Lamb."

The Engineers have further reported that the lines are respectively 2.1 feet for the transmission line and 4.6 feet for the telephone line short of the minimum requirements.

Will you kindly investigate these conditions and advise me the amount of work required to remedy the condition and the probable cost.

Yours very truly,

A. P. MacKensie.
Secretary.

Sir: Re: Kamloops Indian Residential
 School, Septic Tank.

On August 19th a report was forwarded to you on inspection of sewage system, Kamloops Indian Residential School, dated August 3rd, by Mr. G.H. Whyte. This report contained several recommendations, one of which, being the installation of a new syphon valve, was immediately authorized and completed.

Later, on the 10th of November, I received a telegram from Mr. Indian Agent Ferguson asking me to inspect a trash pump ordered for the school from the local firm of Pumps & Power, Vancouver. Upon inspection the pump was found to be unsuitable for the handling of raw sewage. An ejector pump was substituted on trial and used to clean out the septic tank early in December, under the supervision of Mr. W.C. Warren of our staff. The septic tank when cleaned out at the first of December was found to be out of order, due to the blocking of the screened passage between the syphon and settling chambers, which caused the settling chamber to fill and overflow into the syphon chamber. This situation was, of course, unsatisfactory.

The screened passage was cleaned out and at present the tank is functioning satisfactorily. You will note Mr. Warren suggests the tank be cleaned out at least twice a year under ordinary operating conditions.

I am enclosing his memorandum in duplicate dated the 3rd inst. reporting his findings.

You will note it is suggested a basin be developed at the foot of the garden which should be fenced off and used as a bed to receive the sludge which may be used for fertilizer.

This latter may be done through the local officials of the Department of Indian Affairs.

Your obedient servant,

C.E. Webb
District Chief Engineer

J.T. Johnston, Esq. C.E.,
Director,

Vancouver, B. C.,
January 3, 1933.

Memorandum to Mr. Webb:

Re: Kamloops Industrial School,
Septic Tank.

I visited the above school December 2nd to 7th and with a man supplied by the Indian Agent had the septic tank cleaned out using for this purpose an ejector pump purchased by the Department of Indian Affairs.

The septic tank was found to be not in working order due to the blocking of the screened passage between the settling and syphon chambers. This stoppage caused the settling chamber to fill up completely before allowing a flow to take place through the overflow passage between the two chambers, by which means a large percentage of solids passed to the syphon chamber. Normally the settling chamber should remain only about 75% full, overflowing to the syphon chamber by means of the screened passage.

The accumulation of solids in the syphon chamber congests the passages for the movement of liquid sewage and eventually clogs the sewage disposal beds. Unfortunately the ground had frozen solid at the time of my visit making an examination of the disposal beds impossible. As the plant has operated successfully since cleaning I do not believe a very great amount of solids got into the disposal beds. It would be desirable to have an examination made of the disposal beds to determine to what extent solids have been carried there so soon as the ground thaws sufficiently.

Disposal of Sludge

Due to the extremely cold weather during the cleaning operation the material from the septic tank was pumped into the by-pass sewer line from the school and allowed to run down to the foot of the garden about five hundred or six hundred feet from the school. This procedure should not be carried on regularly as an acceptable method of disposing of the sludge. It would be preferable to have a wide shallow pond created in the garden at the end of the by-pass pipe so that the sludge would be confined to one location. A pond about 30 feet wide by 50 feet long would provide ample accommodation for the collection of the material pumped out of the septic tank. The area should be dyked with stout banks about two feet high and fenced. This sludge is of a harmless nature and all offensive odor disappears after a few hours of exposure to sun and air and may be used successfully as a fertilizer.

Cleaning of Tank

The septic tank including the passage-ways for the movement of sewage through the chambers

Indian Affairs (RG 10 Volume 6449, file 882-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

ERY

POOR-COPY

should be cleaned at least twice a year. While it is possible for the tank to operate longer without cleaning, the passage of the liquid part through the congested tank after six months would increase in rapidity eventually resulting in a flow of undigested solids to the disposal beds.

Operation of Pump

The pump provided for cleaning the septic tank worked satisfactorily. Some large solids which are bound to accumulate in such a receptacle could not be handled by the pump successfully. Some difficulty was also experienced due to the presence of small stones in the water line clogging the jets. The operation was however better than any other type of pump of reasonable cost which it is possible to supply.

The difficulties in respect to stoppages may be overcome by screening. To prevent large size solids accumulating in the tank a large mesh screen may be placed in the by-pass box adjacent to the septic tank and cleaned every other day or so and in connection with the stones a screen, Crane No. 986, Standard 2 inch, may be employed in the water line.

The pump operates by means of the normal pressure of the water system. Additional power may be secured by using the water system supply pump to increase the pressure but is unnecessary. The school fire hose is the medium employed to connect the pump to the water system by way of a fire hydrant within 200 feet of the septic tank and a valve on the pump is employed to stop the operation or start it. The pump will under favourable conditions, evacuate the septic tank in from four to five hours.

Summary

So soon as conditions will permit, an examination of the disposal beds should be carried out to determine to what extent solids have filled up the land tiles, so that if necessary they may be removed for cleaning.

A basin or pond should be created at the foot of the garden and fenced off for the reception of sludge from the settling tank when found necessary to clean it. The septic tank should be cleaned twice a year. Screens as mentioned would make the cleaning operations by means of a pump less difficult.

and Patrick
Sir,

In further reference to your letter of March 30th regarding the sewage disposal system at the Kamloops Indian residential school in which you ask that this matter be given further consideration, I enclose copy of a letter from Mr. Webb dated the 26th ultimo in which the various points raised have been dealt with.

It will be noted that Mr. Webb is trying to find means of reducing the amount of liquid now passing through the tank so that it will not continue to be so heavily overloaded, and will report later as to what may be done in that direction.

Your obedient servant,

J. T. Johnston,
Director.

May 26, 1933.

Sir: Kamloops School, Sewage Disposal.

With reference to your letter of the 1st ultimo, regarding the above, I note that the Department of Indian Affairs will not have sufficient funds available this year for the addition to the septic tank, found to be necessary.

With regard to the request of the Secretary in his letter of March 30th, that further consideration be given to the possibility of alterations to the existing septic tank as suggested in the second paragraph of Mr. Warren's report dated March 10, 1933, be given. I wish to point out that the suggestions contained therein were offered to the Indian Agent with the recommendation that the changes be made when it is again found necessary to clean the septic tank, in order that the work be carried out as cheaply as possible. It would not be advisable to anticipate that the suggested changes would overcome the difficulty encountered in connection with the disposal of sewage at this institution. The only permanent solution may be found in either reducing the quantity of sewage or augmenting the machinery to handle it.

Means may be found for reducing somewhat the flow of sewage of a harmless nature to the septic tank. The reduction would, however, be insufficient to provide the low rate of flow through the tank which is desirable. I will, however, have further consideration given to this problem at an early date and advise you of the findings. I presume that funds up to the extent of \$500. are available for whatever improvement may be warranted by an expenditure within that limit.

Regarding the pump purchased for the cleaning of the septic tank. Mr. Warren informs me that it is the most suitable for the work which may be purchased within a reasonable cost. A power pump to pass solids of equal size, (slightly larger than 2"), to that which may be handled by the ejector pump purchased, would cost in the neighborhood of \$750. on account of the large power unit required to operate it.

The cost of the mechanical pump increases at a much greater rate than the increase in capacity, measured in size of solids, owing to this

J.T. Johnston, Esq. C.E.,
Director,
Dom. Water Power & Hydrom. Bureau,
Department of the Interior,
OTTAWA.

J.T. Johnston, Esq.

-2-

May 26, 1933.

same factor. I do not believe that any other kind of pump would serve the purpose better than the one supplied. All have limitations or objectionable features with some kinds of material, especially so in small sizes.

Regarding the recently adopted practice in cleaning the septic tank of allowing the contents to run out the by-pass pipe to the ground at the foot of the garden, I am of the opinion that means should immediately be provided for confining it to a small area as suggested in Mr. Warren's memorandum of January 3rd under heading "Disposal of Sludge", as in the interests of health the practice above referred to should not continue.

Your obedient servant,

C.E. Webb
District Chief Engineer

Kamloops, B.C.,
June 1st., 1933.

K-L-6

Dear Sir:-

With reference to your letters of March 16th and May 4th last, file 154-0-5, regarding the raising of the electrical transmission line and telephone line crossing of the South Thompson River from Kamloops to Kamloops Indian Residential School to provide sufficient clearance at extreme high water for SS. C.R. Lamb

The heights to be raised, required by the Department of Public Works Engineers were to be 2.1 feet for the transmission line and 4.6 for the telephone line.

In this respect, I now beg to advise you that I have had the B.C. Electric Railway Company do the work and the transmission line has been raised 5.0 feet and the telephone line 5.7 feet, which is well above the requirements of the Department of Public Works.

Vouchers for the cost of the work will follow in due course.

Yours faithfully,

W. J. Ferguson
(W. J. Ferguson)
Indian Agent.

VICTORIA, B.C. May 18, 1933.

Sir:-

I beg to advise the Department that I have been informed by Mr. Indian Agent Ferguson of the Kamloops Agency that he has been instructed to proceed with the raising of electrical transmission wires crossing the South Thompson River and serving the Indian Residential School.

In this connection I beg to say that on April 28th, ultimo, Mr. Ferguson reported to this office on the matter but he did not state who owned the line. As our files did not contain the information I wrote to Agent Ferguson on May 4th, asking him if he could give me the desired particulars. On May 12th, Mr. C.E. Webb, District Chief Engineer of the Dominion Water Power & Hydrometric Bureau, at Vancouver, addressed a letter to Mr. Ferguson, in reply to a letter received by Mr. Webb from him dated May 11th, stating that he would be pleased to have Mr. Corbould obtain the necessary elevations and asking him to whom he had entrusted the work. It was my intention to have Mr. Webb's advice and to make a formal recommendation to the Department in view of instructions recently received that all requisitions for expenditure should be forwarded to the Department through this office with a recommendation.

I have discussed this matter with Mr. Webb, who was here today in connection with a review of water licences in the Okanagan Agency, and he states that he does not object to Mr. Ferguson having this work carried out himself provided it is understood that he will assume any responsibility in regard to the matter. Mr. Webb added that he had not received a reply from Mr. Ferguson to his letter of May 12th.

Your obedient servant,

P/KD.

Chas. C. Perry,
Asst. Indian Commissioner for B. C.

The Secretary,
Department of Indian Affairs,
Ottawa.

Dear Sir,-

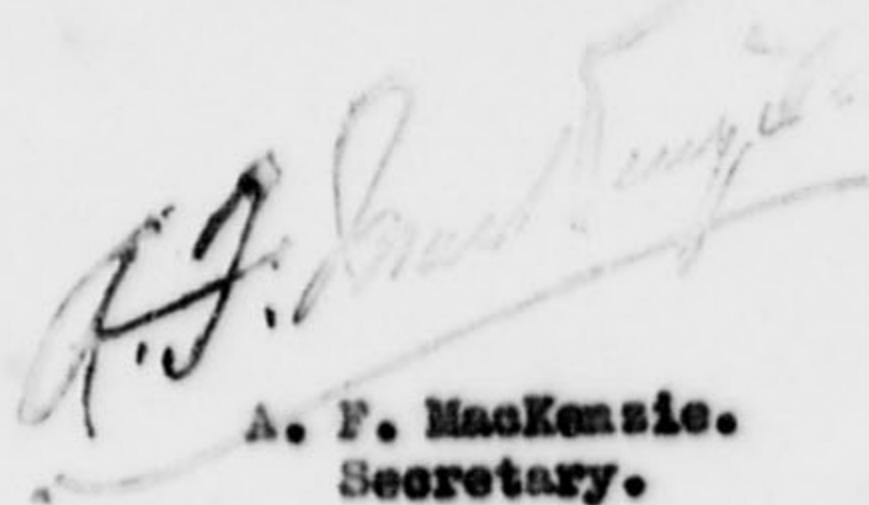

Referring to your letter of the 20th of June, with reference to the repairs required to the motor operating one of the pumps in the heating system, the amount mentioned of \$660.00 appears to be excessive for the repairs to this type of motor.

Will you please furnish me with a detailed estimate showing how this amount is made up. The plans for this building provide for two pumps and two motors. Kindly advise if the other pump and motor are working satisfactorily.

Yours very truly,

W. J. Ferguson, Esq.,
Indian Agent,
Kamloops, B. C.

A. F. MacKenzie.

Dear Sir:-

Enclosed herewith is Voucher No. 283-33, in the sum of \$12.50, in favour of M.L. Wade.

This was an emergency expenditure. The line to the school was put out of order by a high wind on April 3rd last. A short circuit was caused, burning out one of the motors and immediate action had to be taken. This was reported upon by on under date of April 27th last, when reporting on the condition of this transmission line and electrical equipment.

The motor burned out is a $1\frac{1}{2}$ H.P. 1800 R.P.M. 3-phase, 60 cycle motor of Lincoln make, and the cost of repairs will amount to \$660.00 re-installed.

Authority should be granted for this expenditure as soon as possible, as this motor will be required to operate the return feed pump to the boilers, and should be repaired before the cold weather sets in in the fall.

Yours truly,

W.J. Ferguson
(W.J. Ferguson)
Indian Agent.

Victoria, B. C.

Dear Sir: re: Inspection Boilers and Machinery,
Indian Residential School, Kamloops, B.C.

Boilers No. 43710B.C. and 43711 B.C.

On July 27th, 1933, I gave these boilers a careful hammer test and found all stays, plates and fire crowns in good condition.

I then gave them a Hydrostatic Test of 40 Lb. per square inch and found all seams perfectly tight.

The internal condition of these boilers is very good, only a few small scale blisters are showing and no signs of pitting. The soda and lime treatment must be continued.

The bridges are in good condition and will need no repairs.

The firebars of both boilers are in very bad condition. One new set should be obtained as soon as possible, which will cost about Sixty-five Dollars (\$65.00). The best of the bars of both boilers can then be made into a complete set, giving a complete new set for one boiler and a good set of old bars for the other.

The test gauges and water gauges are in good condition, the steam gauges are correct.

The blowdown cocks are in good condition but the blowdown pipes are very rigidly connected together which causes severe contraction and expansion strains on the boiler plates and pipe nipples. These should be disconnected and led separately to the sump. This will cost about Seven or Eight Dollars, the work to be done by the staff.

The safety valves work freely and are set to blow off at 15 Lb.

I have issued a certificate allowing a steam pressure of 15 Lb. and condition good.

Attention should be given to the drains under the boiler room floor as from appearances when they were laid they were only carried to the walls of the building and then allowed to seep through the soil which has now become clogged. If they were carried to the nearest surface drain about 100 feet, good drainage would be obtained. This should not cost over One Hundred and Fifty Dollars (\$150.00), and then the boiler room floor could be kept dry as at present water will stay for days which is very injurious to the plant.

I would also suggest that consideration be given to the installation of underfeed Mechanical Automatic Stokers. If they were installed local coal could be used and a saving of at least 30% in the operation of the plant could be obtained as well as an increased efficiency of at least 20%, which in this plant would amount to quite a considerable sum.

VERY

POOR COPY

Boiler No. 43794 B.C.

On the same date I gave this boiler a careful hammer test and found that all plates, rivets and crowns were in good condition.

I then gave it a Hydrostatic test which I could not complete as several tubes were leaking at the top tube sheet. In my last report I pointed out that these tubes were getting very thin. They will need re-expanding and with care might last this season but must be retubed next summer or replace it with a new larger boiler as this one is 30% too small for the work it has to do, and required forcing. If this is done then the old boiler can be retubed and used in another school where conditions are the same.

I have issued a certificate allowing 75 Lb. steam pressure and condition, on account of the tubes, fair.

The Laundry machines are well kept and also well guarded and from present appearances will need no repairs except for breakages.

One of the motors of the condensation units has been burnt out and is now under repair which must be done before the firing season starts.

The approximate cost of repairs mentioned is as follows,

Firebars for boilers		\$65.00
Drain,		150.00
Blowdown repairs,		8.00
Retubing boiler,		100.00
3 Fusible Plugs,		4.00
		<u>\$327.00</u>

Yours respectfully,

Ottawa, September 14, 1933.

Sir,-

I beg to acknowledge the receipt of your K-S-2 of the 7th instant, with reference to the pump which was purchased last November for the Kamloops Indian Residential School.

It is noted that this pump has been returned to Pumps & Power Ltd., and that they have issued a credit note for \$64.50, this credit to apply on future purchases. Your action in returning this pump and securing the credit note is approved.

In your other letter of the 7th instant, you state that you have recently requested the firm of Pumps & Power Ltd. to quote a price on repairs required to the motors. You should forward this information to the Department and, if it is decided to give the business to this firm, the credit note can be used.

Your obedient servant,

A. F. MacKenzie.
Secretary.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Kamloops, B.C.
September 7th, 1933.

K-S-2.

Dear Sir:-

With reference to your letter of March 30th last, file 154-0-5, in which I was instructed that should the Kamloops Indian Residential School authorities not intend to make use of the pump purchased November 29th last for their sewerage disposal plant, to make arrangements for the return of this pump to Pumps & Power Ltd., Vancouver, B.C., and to obtain a refund from them.

The account for the pump, in the amount of \$81.85, was submitted by me under Voucher No. 12-33, and covered the cost of the pump, -\$79.50- and the transportation charges, -\$2.35.-

In this respect I beg to report as follows: After allowing enough time to elapse, to be reasonably sure that no use could be made of this pump, and as the school authorities were agreeable to the return of the pump, arrangements were made through Mr. C.E. Webb, Chief Engineer of the Dominion Water Power Service for the return of the pump under the following conditions:

Pumps & Power Ltd., agreed to accept the return of the pump and issue a credit note for the full amount of the cost of the pump, -\$79.50,- less a rental charge of \$15.00 for the time the pump was in use, provided the pump was returned in good order, this credit to apply on future purchase made by this Department.

As the pump had to be in a condition to meet with their approval, before they would accept it and issue a credit note, I returned the pump to them on August 12th last, freight prepaid at a cost of \$1.19, and have since received their credit note for the full amount of \$79.50, along with a charge account for the rental of \$15.00, which leaves a credit balance with them at present, in our favour for \$64.50. Copies of these accounts are enclosed herewith.

In regard to the rental of \$15.00, I beg to advise that as the pump was in use for several days in December, at the School, pumping the sewage out of the tank, this use would make it second hand, and in view of this, I think that Pumps & Power were very fair in taking the pump back and charging only \$15.00 rental for the use we had out of it.

K-S-2.

Dear Sir:-

With reference to your letter of the 25th ulto., file 154-0-5, regarding the cost of repairs required to one of the twin motors which operate the pumps in the heating plant at Kamloops Indian Residential School.

In reply I wish to advise you that the amount of \$660.00, which apparently appeared in my letter of June 20th, must have been a typographical error as the correct amount is \$60.00. This estimate was based on figures prepared for me by Mr. M.L. Wade, an electrical engineer here, but even the amount of \$60.00 now appears high to me for repairs of this nature to a motor of this type, and in view of this, I have written two firms in Vancouver for prices on a new motor and also prices on a second hand one, as I think it possible that a replacement could be made at less cost than to have the burnt out one re-wound.

One of the firms written to in this respect is Pumps & Power, Ltd., who have recently allowed the Department credit to the amount of \$64.50 on the return of the sewage pump supplied the School last winter. A letter of explanation in connection with this is being mailed to the Department today, and if the Department approves of this credit, the repairs to the pump, or the replacement, as the case may be, could be placed with this Company, and advantage taken of this credit.

However, rather than furnish you with a detailed estimate at this time, I would ask you to wait until I have their prices from Vancouver, when I will advise you further on this matter. In the meantime the School will be able to operate their heating plant at this time of the year with the other motor.

Yours faithfully,

W.J. Ferguson
(W.J. Ferguson)
Indian Agent.

PUMPS & POWER, LIMITED,

48 Cordova Street, East,
Vancouver, B.C.

Mr. W.J. Ferguson,
Indian Agent,
Kamloops, B.C.

Dear Sir:-

Thank you for your letter of the 7th, received
this morning.

We are sorry that we cannot duplicate your
Lincoln Motor as this make has not been generally
handled here for some years, and moreover the 1½
H.P. size is hardly ever kept in stock.

The best we could do would be to offer you a
2 H.P. Howell rimken bearing Motor at \$42.50, complete
with base and pulley, or we have a 2 H.P. Bullock at
\$35.00 complete. The latter is a sleeve bearing motor.

A new 1½ H.P. Westinghouse or General Electric
Motor costs \$55.00 plus \$8.00 for base and pulley, if
needed.

We would think that it would probably be worth
your while to rewind the old motor, as we could do the
job for \$22.50. This would not include anything more
than rewinding and if new bearings were required these
would be extra.

All prices are for 220 volt motors and f.o.b.
Vancouver warehouse.

We shall look forward to hearing from you again
by return,

Yours very truly,

PUMPS & POWER LIMITED

Per C. Notzel.

Ottawa, January 25, 1934.

Sir:

I have your letter of the 18th instant, giving particulars concerning the range required to provide additional cooking facilities at the Kamloops Indian Residential School, with an estimate of the cost.

In reply I have to say that you may arrange for the purchase, from Messrs. Marlatt & MacKenzie, of Kamloops, of a 7 ft. by 3 ft. extra heavy steel French range, with one firebox, two ovens and high warming closet covering this range and the old range in the school. You may also arrange for the work of installing and connecting the new range and for any plumbing required.

It is noted that the total cost of supplying the range, including installation, will be \$360. After it has been installed to your satisfaction, please obtain an itemized account, in triplicate, covering the cost. This, you should attach to proper voucher forms, certify in the usual manner and forward for payment.

It is desired that this account reach the Department before our books close for the present fiscal year, viz.: March 31st, next, in order that payment can be made from the current year's Appropriation. The purchase and installation of the range should, therefore, receive early attention.

Your obedient servant,

A. F. MacKenzie
A. F. MacKenzie,
Secretary.

[Handwritten signature]
K-S-2.

Dear Sir:-

With reference to your letter of the 12th instant, file 154-0-5, regarding an estimate in connection with the supplying of Kamloops Indian Residential School with additional cooking accommodation.

In reply I beg to advise that from Messrs. Marlatt & MacKenzie, of Kamloops, B.C., I have been quoted a price of \$335.00 delivered at the School, to cover the cost of the range required, namely, a 7 foot by 3 ft. extra heavy steel French range, with one fire box and two ovens, 2400 lbs., with high warming closet covering this range and the old range in the school, (seventeen feet in all). This cost does not cover the price of the stove pipe to connect, nor the cost of the plumbing that will be necessary when the present stove is shifted. I have been unable to obtain an estimated price of these two items of work and material from the local dealers, but would say that in this respect, the cost should not exceed \$25.00, making a total of \$360. in all.

Since writing the Department on the 5th ulto., I again talked the matter of this additional new range for the school over with the Rev. Principal, and he was quite satisfied with my proposal as outlined in my letter to you as referred to above.

In comparing Messrs. Marlatt & MacKenzie's bid with wholesale prices which I have obtained, I find that their price is fair, and I would recommend that if the purchase is made, it be made from them.

Yours faithfully,

[Handwritten signature: W.J. Ferguson]

Ottawa, January 12, 1934.

Sir:

I have to draw attention to official letter dated November 24th, last, and your reply thereto of the 8th ultimo, regarding a new kitchen range for the Kamloops Indian Residential School. In your reply, you stated that the present range is too small and recommended that another cooking unit, of the same make and size, with one fire-box and two ovens, be installed in addition to the present range. You also stated that you were obtaining an estimate of the cost of the new range, the warmer, repairs to old range and plumbing, and that you would forward it to the Department with a further report.

I should be pleased to hear at an early date regarding requirements and cost involved, as, if same can be authorized, funds will be taken from the Appropriation for the current fiscal year and it would be necessary to have purchase made and equipment installed so that accounts would reach the Department before our books close at the end of March, next.

Your obedient servant,

A. F. MacKenzie,
Secretary.

OFFICE OF
INDIAN AGENT

Kamloops, B.C.,
December 8, 1933.

K-S-G-7

Dear Sir:-

With reference to your letter of the 24th ulto., file 154-C-5, requesting a report from me in connection with a new range for Kamloops Indian Residential School.

In reply I beg to advise that for some time the authorities at the School have been complaining that the present range is not large enough for the present population of the school, and recently the Reverend Principal, Father Kennedy requested that at the first opportunity he would like me to have a look at it.

Yesterday, I visited the School in company with Inspector Colonel Pragnell and went into the matter.

Without doubt the present range is too small for the amount of cooking they have to do at present. When the range was installed, I think the intention was to provide for a population of only 180. The present number, with the pupils and staff, amounts to well over 300.

The present range, which was made by the Albion Iron Works, has a cooking surface of 10 x 3 feet, with one fire box and three ovens 24"x30", and is still good for many years of service, if lining and fire box are kept in repair.

But, in view of its being too small, as already stated, I would recommend that another cooking unit of the same make and size, but with one fire box and only two ovens be installed in addition to the present range. A new unit of this size would have a further cooking surface of 7 x 3 feet and would be sufficient to take care of the increased population since the old range was installed. In addition to this, a warmer along the full seventeen feet of both the old and new range should also be installed.

In installing the new unit the old range will have to be shifted sideways some four feet. This will entail changes of the piping for the hot water boilers at a corresponding cost.

I am having an estimate of the cost of the new range, the warmer, repairs to old range and plumbing prepared, and as soon as I have it in hand, I will forward it on to the Department with further comments.

Yours faithfully,

W. J. Ferguson
(W. J. Ferguson)

November 20, 1933.

Memorandum:

Mr. Bushard.

In response to a phone inquiry from your office with reference to the Kamloops Indian Residential School, I beg to say that on October 25th the Acting Indian Commissioner at Victoria forwarded a letter from the Indian Agent asking for authority to purchase and install new grate bars for the large heating boilers at the School. The boilers in this school are Birchfield boilers, and it is necessary to purchase the grates for these boilers from the Vancouver Engineering Works Limited, who have the manufacturing rights. The cost of the grates will be approximately \$95.00, and the Commissioner was instructed to have same installed.

There does not appear to be any correspondence on file containing a request for a kitchen range.

H. W. W.

Deputy Superintendent General.

COMMISSIONER'S OFFICE
P. O. BOX 666

VICTORIA, B.C. October 25, 1933.

IN YOUR REPLY REFER TO

197/4/31592.

ALSO TO DATE OF THIS LETTER

Dear Sir:

I have the honor to transmit herewith the original of a duplicate letter addressed to the Department and sent through this office by Agent Ferguson, dated October 19th, instant, in which request is made for authority to expend the sum of \$94.80 on the purchase of 24 grate bars for two boilers of Kamloops Indian Residential School. In this connection I beg to say that attention is particularly called to the 5th paragraph in which 16 bars are referred to instead of 24. This suggestion would appear to deal with a recommendation made by the boiler inspector in his report to the District Resident Architect, Department of Public Works, dated August 21st, copy of which was forwarded to the Department. The following is an extract from Engineer Arnall's report:-

"The firebars of both boilers are in very bad condition. One new set should be obtained as soon as possible, which will cost about \$65.00. The best of the bars of the boilers can then be made into a complete set, giving a complete new set for one boiler and a good set of old bars for the other."

Under these circumstances I would recommend that the sum of approximately \$65.00 be authorized by Encumbrance Requisition for the purchase of these bars by Mr. Indian Agent Ferguson in accordance with the price which he has obtained and which is shown in Form No.55, which is attached to his letter.

Your obedient servant,

C. C. Perry,

Asst. Indian Commissioner for B.C.

OFFICE OF
INDIAN AGENT

Kamloops, B.C.,
October 19th, 1933.

Ks/g-2.

Dear Sir:-

I am enclosing herewith a requisition for 24 grate bars for the boilers of Kamloops Indian Residential School.

Upon request of the Principal, I inspected the fire boxes of the two main boilers at the School, and found that to put these grates in good working order for the winter months, 24 grate bars⁴ would be needed. There are 16 of these bars in each fire box, making a total of 32 bars in both fire boxes. Of these present bars, eight of them are in good shape, and can be used over again by setting them on the far sides of the grates. The two centre bars and the four end bars can also be used again.

I might add that when in December, 1927, these grates were burnt out, complete new grate bars, end bars and centre bars were all installed.

Since this replacement took place, six years ago, some improvements were made two years ago to this equipment, lowering the bottom of the ash pit to 2 feet, six inches below the grates, which should, in future, lengthen the life of these bars.

While I am recommending that the full number of 24 bars should be supplied, it is possible, should there be a shortage of funds for this purpose, for the school, to make-shift for a while, if only 16 bars are supplied, but they would be unable to keep the fires functioning with less.

In 1927, these bars were purchased from the Vulcan Iron Works. Since then, the Vancouver Engineering Works, Ltd., have taken over the manufacturing rights of Birchfield Boilers, and I have had to obtain my price quotation from them, which you will note, are some 40 cents per bar higher in price than the ones formerly supplied by the Vulcan Iron Works, but in the event of the Department allowing the purchase, before ordering I will point this out to the Manufacturers ~~before ordered~~, and get them to confirm the price quoted.

Yours faithfully,

W. J. Ferguson

154-05
OFFICE OF
INDIAN AGENT

Kamloops, B.C.,
September 22nd., 1933.

Sefton
K-S-2.

Dear Sir:-

Further in regards to my letter of the 7th inst., and in reply to your letter of the 14th instant regarding the repairs to the motor which operates the return feed to the boilers at Kamloops Indian Residential School,

I am enclosing herewith, copies of quotations on replacement and repairs in this respect, from Pumps & Power Ltd., and Graham Electric Co., Ltd., both of Vancouver.

The prices quoted by both these firms appear quite reasonable and are much lower than can be obtained locally.

Since the receipt of these prices, I again took the matter up with the school authorities and they prefer that the damaged motor be repaired rather than have a new one of different make and type installed.

In view of this, I would recommend that the Department grant me permission to have the repairs made, and in consideration of the credit of \$64.56 we have established with Pumps & Power Ltd., which can be taken advantage of, and their lower price tendered, I would say that the work should be given to them.

In addition to the charge of \$22.50 for the rewinding, the amount bid by Pumps & Power Ltd., for these repairs, provided new bearings are not required, and which will be a charge against our credit with them, there will be the freight charges to Vancouver and return and the cost of installation. For this, I should have authority for the expenditure of say, \$10.00..

The School will require that this motor be in operation by the 15th of October.

Yours faithfully,

W.J. Ferguson
(W.J. Ferguson)
Indian Agent.

EXTRACT FROM LETTER FROM DR. P. S. TENNANT,
Medical Superintendent, Kamloops, B. C.,
addressed to Dr. Stone, dated April 10, 1934.

Orig. on 76-154.

The sewage disposal system at Kamloops Residential School is inadequate for present requirements. I believe the system was built for a maximum school population of two hundred and fifty. There are present at the school over three hundred, inclusive of the staff. This results in overworking the tank, and offensive odors as well as an unsanitary condition of the playgrounds.

The anserobic chamber is too small and consequently the tank flushes a partially digested effluent. The disposal bed was placed three feet below ground surface as it was found that better drainage could be procured at this depth. As a result aerobic action which is necessary with a partially digested effluent is considerably slowed up. I believe that the present disposal bed would handle the effluent, provided that the anerobic action had been complete on discharge of the tank.

The disposal bed is laid in silt. The silt runs down and readily blocks the drainage pipes necessitating relatively frequent cleaning of the bed.

The dairy drain pipe is blocked probably due to the large amount of fatty material which passes through it.

I would make the following suggestions, which I believe would be the most economic in overcoming the present inefficiencies of the system at the school:

That a new anaerobic tank be installed between the present tank and the building to overflow into the present tank which discharges automatically.

That when it is next found necessary to clean the disposal bed that the joints between the tile drains be covered with a heavy tar paper to avoid silting of the pipes.

That the dairy drain pipe be cleaned and a grease trap installed to prevent the blocking of this system by fat.

Electric Light:

The Electric Light and Power are brought from the City of Kamloops. The voltage in this line is high of necessity, about 2000 volts. The wooden poles on which the wires are strung are very much worn, and might fall over at any time. Should one of these poles break off at the ground level, the place where they appear to me to be weakest, great inconvenience would certainly result. I consider that the Department would be well advised to have a survey made of this Pole Line from the school to the city of Kamloops.

 EXTRACT FROM LETTER FROM ASST. COMMISSIONER
 C. C. PERRY, forwarding Inspector Barry's Report,
 letter dated March 13, 1934.

With regard to the expenditures which are recommended in this report, I would refer to the Estimates of the Kamloops Indian Agency for 1934-35, in which the following items were provided for by the Indian Agent, viz.:

..... Repairs to power line \$300.

.....
 In regard to the power line serving the school, we do not appear to have any record of the arrangements under which the power line is operated but I would refer the Department to its correspondence No. 21154-12-3 and in particular departmental letter dated 10th February, 1933, addressed to Mr. Indian Agent Ferguson, in which he was requested to indicate on a blue print the approximate position of all transmission lines in the Kamloope Reserve and submit the same to the Department.

[Handwritten note:]
 Mr. Perry
 If you ascertain
 that the above is
 necessary, funds can
 be secured for an amount
 of approx \$300 & from our
 vote for 1934-35

EXTRACT FROM REPORT OF G. H. BARRY, INSPECTOR
 OF INDIAN SCHOOLS FOR BRITISH COLUMBIA, FOLLOWING
 HIS INSPECTION OF THE KAMLOOPS INDIAN RESIDENTIAL
 SCHOOL ON FEBRUARY 12th and 13th, 1934. Report
 forwarded under cover of Asst. Commissioner
 Barry's letter dated MARCH 13, 1934.

Original on 154-0-6.

XX

KITCHEN: I wish to recommend that a proper floor covering be placed on the floor of the kitchen. Battleship linoleum, 40 feet by 30 feet, is required. This is an urgent matter, as the present covering is in pieces. When laid it is most necessary that the edges of the linoleum be cemented down and bound with metal. It ought to be possible to wash this floor easily with a mop to keep the kitchen in a sanitary condition.

LAUNDRY: This is a poor place for children to work under the present unsatisfactory conditions. When the water is emptied from two of the washing machines and from one set of tubs, it simply covers the floor to a depth of an inch or two till it makes its way out by a drain on the other side of the room. The children working here have to wear gum boots all the time. With damp and steam, this is no fit place for children to work. I beg to recommend that a pipe be placed in the cement floor to carry into the drain the water from the two washing machines and the row of tubs.

From the laundry the water runs into a cesspool, from which it is pumped out by an automatic pump. This is a poor system. To remedy these poor conditions, as well as those mentioned below, under the heading of Laundry, I recommend the construction of a drain from the Dairy and from the Laundry, to take off all this water. This new drain should be carried right down the hill, away from the school buildings. It would be quite easy to dig and lay, and the fall towards the river is quite sharp. The boys could do much of the work.

DAIRY: The drain from the Dairy is blocked. I am informed that it never has worked well after the first six months. The Sisters have done their best to clean it out, without success. This drain is smelling and should certainly be cleaned out at once. This is an urgent matter.

Original on 154.-0-6.

XXXXXXXXXXXXXXXXXXXX

XXXXXXXXXXXXXXXXXXXX

XXXXXXXXXXXXXXXXXXXX

CHAPEL ROOF AND WALLS: The shingles on the chapel roof in some cases should be replaced. The rain often appears to make its way into the interior of the chapel and run down the walls, thus spoiling the plaster. When the necessary work is done on the roof, the walls inside will need to be repaired (plaster work) and kalsomined. Looking from the ground, I believe that the water gets in under the last few rows of shingles, where they meet the metal with which the eaves are covered.

DRAINAGE: The need for a drain from the laundry, in place of the present system, has been mentioned above. As the Principal reports that the Dairy is filled with flies in summer or when closed up for a time, and that the smell from this Dairy drain becomes unbearable at times, it is very necessary that something be done at once to improve conditions. New drains from the Dairy and the Laundry would solve the difficulty. About \$200.00 worth of pipe is required and authority to do the work, and the boys, under supervision, can dig and lay these drains. The main cesspool is reported as too small and a source of trouble. Possibly it requires to be cleaned out. It should be examined by a qualified person.

Sir:

I have the honor to transmit herewith, a report dated February 14th, instant, received from Col. G. S. Pragnell, Inspector of Indian Agencies for British Columbia, with regard to his official inspection of the Kamloops Agency, B.C.

x

x

x

Kamloops Indian Residential school.

Perhaps the Department may wish to bring to the attention of the Principal or agent, the requirements as to the improvement of the sanitation in the dairy drains, the testing of fire hose, repairs of storm windows and toilets, stalls for the accommodation of cattle, and the proposed extension to the barn. No doubt some of these expenses will have to be taken care of from the per capita grant.

KAMLOOPS INDIAN AGENCY INSPECTION REPORT NO.6 (Cont'd)

6. SCHOOLS:

KAMLOOPS RESIDENTIAL SCHOOL: In company with the Indian Agent, I went over the school. The new Principal, Rev. Father Kennedy, seems to be doing very well, and I found everything as a whole, in very good order. There were 288 children in the school on the day of my visit, and all looked healthy and contented. The children were having meat stew, bread and vegetables for their next meal, with plenty of milk. The kitchen range, however, is totally inadequate for the requirements of the school, and I instructed the Agent to get in touch with the Department and try and get an extension. I understand that this has since been done. Heating accommodation for plates and food is also required. Why this was not originally asked for, I do not know for certain, but if I recollect rightly, for some reason, the then principal did not want it. The kitchens were clean and tidy. The drain in the dairy does not, for some reason, seem to be working, and is most unsanitary, and smells. It seems to be hard to find out exactly where this drain actually drains out.

The chemical fire extinguishers have all been properly filled. The inside fire hose, however, wants testing. The fire alarm was rung, and all the children were out of the building in two and a half minutes, with the boys at the proper fire station, and the rolls called. This is very good. The storm windows of the building are badly in need of repair, and in some cases need re-glazing.

The dormitories and class rooms were all clean and tidy, as were the bathrooms and toilets. However, the girls' toilets downstairs are most unsatisfactory, owing to the fact that all work on a single flush system, not automatic, and it necessitates someone climbing up a ladder to start the flush each time one of the toilets is used,--a waste of water,-- or if this is not done each time, it means an unsanitary condition with a bad smell. This should be converted to individual closet flush.

The outhouses, barns, styes, stables and cellars were all in very good shape and everything about the farm and grounds was well kept and tidy. Mr. Bann, the outside foreman, is to be congratulated.

However, the cow barn is quite inadequate to contain the number of cows necessary to keep the school in milk and butter. Stalls for ten or twelve more cows are most necessary. This school has now got one of the finest Jersey berds in B.C.

February 14, 1934.

6. SCHOOLS: KAMLOOPS RESIDENTIAL SCHOOL: (Cont'd)

I should recommend that the Indian Agent be instructed to obtain plans and prices for possible extension and addition to the existing barn, perhaps in the form of a lean-to, or a separate barn built for horses, bulls and young stock. Possibly most of the building required beyond the cement work could be done by the boys, if material were supplied.

There seems to be a distinct improvement in the scholastic side of this school since my last inspection. The children speak up well, and seem more alert. In company with the Agent, I visited a number of the class rooms, and as far as the value of my findings goes, the following were the results of my inspection:

Grades 1 and 2, girls, Sister M. Eugenia. The drawing was good, though in this grade there were some rather oldish girls, and the language difficulty is still there.

Grades 3 and 6, girls; Sister Mary Austin. All read very well and clearly, particularly grade 6. Spelling and writing good in grade 6, writing good in grade 3. Grade 6 good at mathematics. Drawing good all round.

Grade 4 and 5, boys, Mr. Murphy. A very distinct improvement in this class. Both grades read well and distinctly. Grade 5 was very good at mathematics and grade 4 at writing.

Grades 4 and 5 girls, Sister M. Austin. I heard these two grades in reading only and they were very good and grade 5 had a good grasp of what they were reading about.

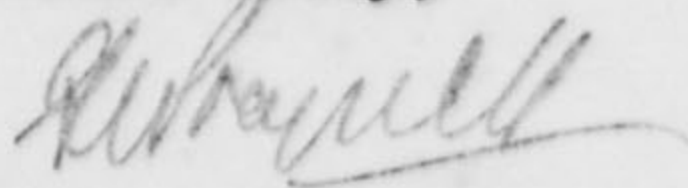

Grade 1, boys, Sister Mary Bridget. All very well advanced with good discipline. Could read quite well and spoke up.

Grades 2 and 3, boys, Mr. Murphy. Read well, spoke up, and excellent discipline.

Taken in all, therefore, the principal seems to have a most excellent teaching staff.

Manual Training: This branch of the school work is also most excellent, though under a different instructor than at the time of my last visit. Personally, I was sorry to see the old instructor removed as he certainly brought the boys along very well. However, I understand the present man is also employed part time on other work at the school.

Yours truly,

(Geo. S. Pragnell)
Inspector of Indian Agencies.

Dear Sir,-

Replying to your letter of the 27th, with reference to the Kamloops Indian Residential School, I beg to say that at present it is difficult to determine the amount of money that will be available for repairs, etc. to this school.

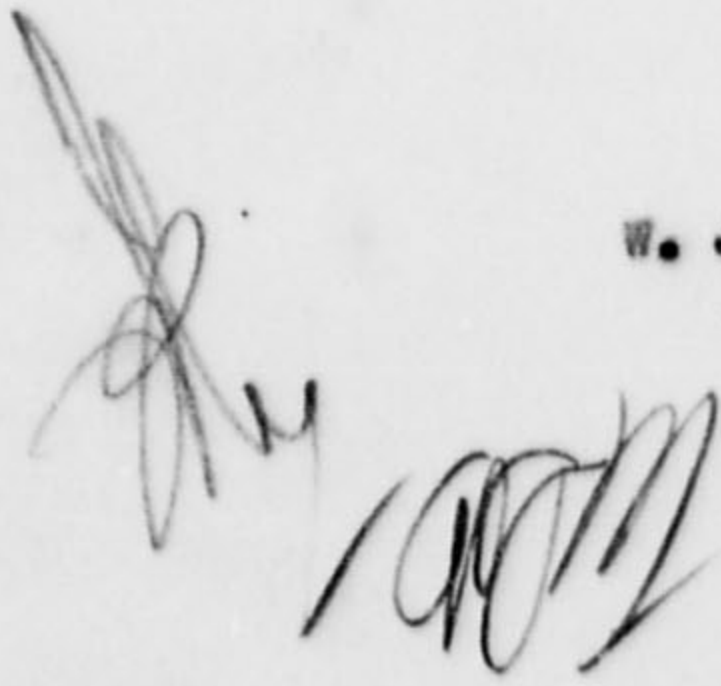

In the meantime, however, I would ask you to obtain a detailed estimate of the cost of the items included in your letter, with the exception of the cess pool, drains, irrigation ditch, barn and land. The different items should be listed separately and in having this estimate prepared kindly consult Johnston and Company (James McGill) Kamloops or W. J. Moffatt of Kamloops.

After this information is received instructions will be sent you as to what work will be authorized during the coming summer.

Yours very truly,

A. P. MacKenzie.
Secretary.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Kamloops, B.C.,
February 3, 1934.

KS-G-2.

Dear Sir:-

With reference to your letter of the 25th ultimo, file 154-0-5, in which I was authorized to arrange for the purchase of a range for Kamloops Indian Residential School, from Marlatt & MacKenzie, of Kamloops B.C., at an estimated cost of \$360.00 installed.

In this respect I beg to advise that upon going into the matter of installation with the heating engineer employed by Messrs. Marlatt & MacKenzie, it was found that with the additional draft that would be required for the proper functioning of both ranges, the opening into the chimney would have to be enlarged, and to convey the smoke from both pipes into the chimney so that there would be no blocking of the smoke at the connecting point a brichen will have to be installed. Besides this there will be more 10 and 12 inch stove pipe required than was figured on in my estimate for the installation.

It will therefore be necessary to increase the expenditure by \$25.00, making a total of \$385.00 instead of \$360.00 authorized, and before placing the order and proceeding with the installation I would be obliged if I be authorized to make this increased expenditure.

The estimate on installation of range at the School by Marlatt & MacKenzie is as follows:

4 sheets.	\$13.70
1½ days making pipe.....	12.00
C. Hurst, estimate cutting chimneyhole.....	4.00
Taxi.....	1.50
Thimble.....	1.00
Clean-out.....	1.50
Brichen--30" length.....	4.00
Taxi.....	1.50
Disconnecting & Connecting.	10.00

\$49.20

~~1 Sheet steel 4 ft X 96"~~
~~for under range..... 5.00~~

The additional expenditure is made up of the following items from the above estimate:

The Secretary,
Department of Indian Affairs,
OTTAWA, Ont.

Indian Affairs (RG 10 Volume 6449, file 882-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES

The Secretary

-2-

February 3, 1934.

Approximately half of the	
pipe charge.....	13.00
Cutting hole in chimney.....	4.00
Taxi for Mason.....	1.50
Thimble.....	1.00
Clean-out.....	1.50
Brichen.....	4.00

TOTAL.....	\$25.00
------------	---------

After going into this matter in detail on the ground, I am of the opinion that this additional expenditure is necessary to assure the proper draft for the two ranges and would recommend same.

I would ask, in order that the installation may be commenced without delay, that the Department advise me of their reply by wire.

Yours truly,

W. J. Ferguson

CANADA

February 1, 1934.

Memorandum:

Dr. McGILL

With reference to the letter dated the 31st ultimo, which you received from J. A. Fraser, M.P., relative to the request for the erection of a new barn at the Kamloops Indian Residential School, I would say that a communication was received today from the local Indian Agent, Mr. W. J. Ferguson, regarding the need for more barn space to provide accommodation for the cows.

The barn now being used can accommodate 22 cows. At the present time, the school is sheltering some of the cattle in the implement shed, and it was found necessary to sell a number of good cows, which were needed for the milk supply at the school, as there was no place to keep them during the winter. The Agent states while it is true that the school requires more accommodation in this respect ~~and~~ to double their present barn capacity, it would require a new barn as large as the present one. He recommends the erection of a lean-to on the east side of the present barn, along its full length, with one row of stalls and a re-arrangement of the bull pens in the present building into stalls for the cows and either arranging other accommodation for the bulls or erecting a small building apart from the cow barns for them.

No estimate of the cost of the work recommended by the Agent has been given. He has suggested that he obtain the services of a local builder to prepare an estimate and plans for the work. I may say that we have no funds available in the current year's Appropriation to cover the cost of any additional barn accommodation, nor has there been any amount for the purpose included in our Estimates for the coming fiscal year.

The last return received shows the following stock at the school:-

12 Pure bred Jersey cows,	1 pure bred Holstein cow,
4 Grade Jersey "	5 Grade Holstein cows,
8 pure bred Jersey calves,	2 pure bred Jersey bulls,
1 Grade Holstein Heifer	
7 horses	
1 colt.

Kamloops, B.C.,
January 27th, 1934.

KS-G-2

Dear Sir:-

In connection with a request from the Rev. Principal of Kamloops Indian Residential School, for certain improvements in respect to this school in general, I beg to submit my report as follows:

While from previous correspondence with the Department, I have arrived at the conclusion that the Department has very little funds available at the present time for expenditure in this connection, it is thought as well to report on this request so that some provision may be made from the appropriation for next fiscal year, to take care of the improvements deemed necessary. While I have not included in my estimates for next year an amount large enough to cover the whole expenditure for all the improvements required, the following amounts have been included for improvements and maintenance:

Repairs building and maintenance	\$500.00
Repairs machinery	100.00
Repairs Transmission line	300.00
	<u>\$900.00</u>

Done

In dealing with the individual improvements applied for, I will report them in order of importance, quoting the request of the school authorities, followed by my comments in each respect.

1. **"Poles:** The electric poles are in a very dangerous state and should be replaced. Should any of them fall it might mean a great loss and at least great inconvenience."

Electrical transmission line from south Thompson River to school. These repairs were reported on by me to the Department under date of April 27th, 1933. Estimated cost at that time for allotting of funds \$275.00. Owing to further deterioration during the lapse of time \$75.00 should be included in this estimate making a total cost of \$350.00.

2. **"Chapel Roof and Walls:** Shingles should be repaired and painted. The rain goes through the roof and runs down the chapel walls. The plaster is giving way. The walls are dirty and should be repainted."

The Secretary,
Department of Indian Affairs,
OTTAWA, Ont.

Indian Affairs (RG 10 Volume 6449, file 882-5, part 7)

VERY

POOR-COPY

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

January 27th, 1934.

The shingles on this roof have lifted in several places, which allows the rain to leak through and run down the Chapel walls. If this condition is allowed to exist, more shingles will be loosened by the wind, and the result is bound to be more damage. I would suggest that I be given permission to have a practical builder examine the walls and prepare an estimate.

It is also necessary that some maintenance work be done to the roof of the main building in the way of painting and repairs to the shingles. In my estimate for this year I included a sum of \$500.00 for this purpose, and this could be estimated on at the same time as the Chapel roof.

Owing to faulty materials and workmanship by the contractors, the mortar between the bricks in the Boys Building (new wing) is weathering and falling out, making the building drafty. This could also be examined at the same time, and an estimate prepared. All these estimates to be submitted to the Department with a further report.

3. "Cess Pool: The main cess pool is too small and is always a source of trouble."

About a year ago, when Rev. Father John Duplanil was in charge at the school, considerable trouble was experienced with this cess pool, which, as you know, led to investigation being made by the Dominion Water Power Engineers, and to considerable correspondence with the Department. The last word I have on file here in this respect, is under date of your letter of March 30th last, in which the Department referred to a report of the Dominion Water Power & Hydrometric Bureau, and also to the cost of the necessary repairs, in the amount of \$1,650.00, and informed me that they were requesting the Dominion Water Power & Hydrometric Bureau to give the matter further consideration, with a view to ascertaining if temporary measures could be taken to improve the sewage system at a considerably less cost than the amount mentioned. Since then I have had no further word on the matter.

However, during the past summer, and up until the present, by giving the tank a thorough cleaning and flushing through the outlet valve at the base of the tank, while not functioning to the degree that is required, has been handling the sewage as well as can be expected, in fact, is working much better than was expected following the trouble we had with this system a year ago. The main trouble now, as in the past is the disposal of the fluid that is delivered from the tank and the sludge when the tank is flushed out every few months. Without doubt, the tiles in the disposal beds have become clogged to some extent, due to improper functioning of the tank, and chiefly a result of the time that the syphon valve was out of order previous to a year ago.

Indian Affairs (RG 10 Volume 6449, file 882-5, part 7)

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

VERY

POOR-COPY

January 27th, 1934.

At the present time the surplus fluid that cannot be disposed of in the beds, and the sludge when the tank is cleaned, passes down through a pipe which empties some 300 feet below the tank on to the open ground, and I would suggest that a basin be erected at this point, either of concrete or timber, to catch the solids and liquids. The installation of this basin can be considered as permanent works, as it will always be required to catch the sludge from the tanks when they are cleaned out, which, as far as I can see would still be required every so often, possibly only once a year, even though the tank was enlarged and the disposal beds improved.

The solids caught in the basin could be used for fertilizer, as well as improving the sanitary condition at this point. If this work could be done, I think that the enlarging of the tank and the improvement of the disposal beds can be left in abeyance for the time being, or until further funds are more easily obtained. However, before anything is done, I would prefer that the engineers of the Dominion Water Power & Reclamation Service be consulted and their opinion obtained on the matter.

4. "Drains. The drain in the dairy floor has no outlet and never gave satisfaction. The dairy is filled with flies in summer and when closed the odor becomes unbearable. It is impossible to keep it fresh and clean.

The drain from the laundry floor leads into a reservoir which is emptied by an automatic pump. It would be much more satisfactory if this drain were connected to a drain from the dairy into a cess-pool. At the same time more openings should be made in the laundry floor so that the children working there would not have to stand in running water all day."

The condition existing in this respect in the dairy is, without doubt, unsanitary, and the cost to rectify the trouble would not amount to a great deal. The work would consist of digging a trench in which to lay a drain pipe deep enough to be below frost, a distance of 250 feet, the digging of a pit, say 8'x 8' in the ground and cribbing it with logs, and I would suggest that this matter be referred to the Engineer of the Water Power Branch for a report and plans.

5. "Irrigation Ditch. It is gradually cutting its way through the soil. It should have a layer of gravel and concrete. The cost has been stated to be about \$1000.00."

I am of the opinion that the School can overcome their trouble in this respect without lining their present ditch with concrete by extending their present delivery pipe from the pump to an elevation of from 10 to 20 feet above the present outlet, and by digging an entirely new main ditch, well above the old ditch, to irrigate their land east of the school. where they are having their present trouble.

January 27th, 1934.

By doing this, they would somewhat increase their cultivable acreage, and I would recommend that the Department refer the matter to the Dominion Water Power Branch for a report.

6. "Barn. The present barn is built for only twenty-two cows. In order to have a sufficient supply during the whole year for the large number of children we have here, we should have from thirty five to forty milch cows. We are sheltering some of our cattle in the implement shed, and we find ourselves forced to sell good cows which are greatly needed in a school of this size. We must sell them now while the price is low, as we have no place to keep them during the winter."

While it is quite true that the school requires more accommodation in this respect, and to double their present barn capacity, it would require a new barn as large as the present one, and which would involve a larger expenditure at this time than the Department would be prepared to authorize. My suggestion therefore, in this respect, would be to build a lean-to on the east side of the present barn along its full length, with one row of stalls, and to re-arrange the bull pens in the present barn into stalls for the cows, and either arrange other accommodation for the bulls, or build a small building apart from the cow barns for them. If the Department is prepared to assist the school in this connection, I would suggest that I be instructed to have a local builder prepare an estimate and plans for this work for your further consideration.

7. "Land. For a school of this size we should have more land. That part on the reserve to the west of us, now rented to Chinamen would be of no value were it not for the fact that it is being irrigated from the school. Were we to stop irrigation it would be of no value. Did it belong to the school we would be able to make good use of it as our system of irrigation brings the water on this land."

In this respect, if my suggested improvement to the irrigation system is carried out as contained in this report, the area that can be cultivated will be somewhat increased, and I would advise that this be left in abeyance for the present, or until such time as we have a report from the Engineers on the improvement to the irrigation system.

Yours faithfully,

W. J. Ferguson
(W. J. Ferguson)
Indian Agent.

WJF/S.

February 1, 1934.

Memorandum:

Dr. MCGILL.

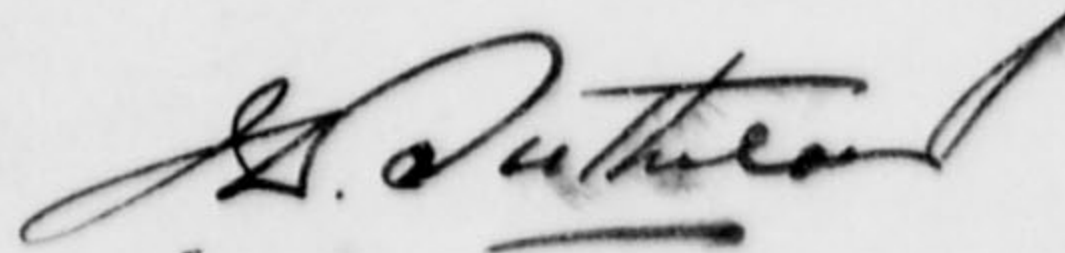

With reference to the letter dated the 31st ultimo, which you received from J. A. Fraser, M.P., relative to the request for the erection of a new barn at the Kamloops Indian Residential School, I would say that a communication was received today from the local Indian Agent, Mr. W. J. Ferguson, regarding the need for more barn space to provide accommodation for the cows.

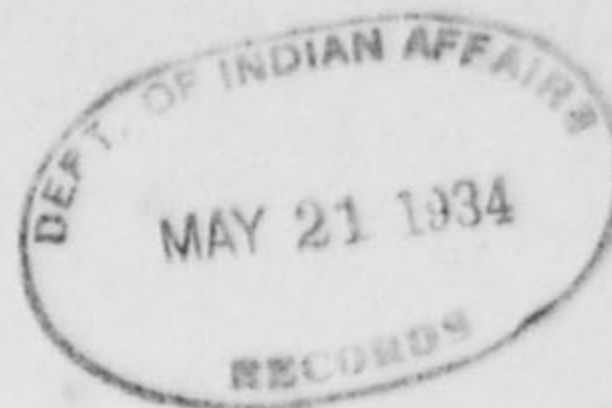

The barn now being used can accommodate 22 cows. At the present time, the school is sheltering some of the cattle in the implement shed, and it was found necessary to sell a number of good cows, which were needed for the milk supply at the school, as there was no place to keep them during the winter. The Agent states while it is true that the school requires more accommodation in this respect, and to double their present barn capacity, it would require a new barn as large as the present one. He recommends the erection of a lean-to on the east side of the present barn, along its full length, with one row of stalls and a re-arrangement of the bull pens in the present building into stalls for the cows and either arranging other accommodation for the bulls or erecting a small building apart from the cow barns for them.

No estimate of the cost of the work recommended by the Agent has been given. He has suggested that he obtain the services of a local builder to prepare an estimate and plans for the work. I may say that we have no funds available in the current year's Appropriation to cover the cost of any additional barn accommodation, nor has there been any amount for the purpose included in our Estimates for the coming fiscal year.

The last return received shows the following stock at the school:-

12 Pure bred Jersey cows,	1 pure bred Holstein cow,
4 Grade Jersey "	5 Grade Holstein cows,
8 pure bred Jersey calves,	2 pure bred Jersey bulls,
1 Grade Holstein Heifer	
7 horses	
1 colt.

INDIAN AGENT

Kamloops, B.C.
May 26th, 1934.

KS-2.

Dear Sir:-

I am advised by the Reverend Principal of Kamloops Indian Residential School that the Fire Protection Equipment at the School requires replacement.

Upon going into the matter I have found that the fire extinguishers require the following re-fills:

12 Foamite Refills @ \$2.30.....	\$27.60
3 F.C. Re-fills @ \$1.72.....	5.16
11 Soda & Acid re-fills @ 80¢.....	8.80

Freight and incidentals

\$41 .56
3. 44

\$45 .00

The above prices were quoted by the La France Fire Engine & Foamite Ltd., of Vancouver, B.C.

I might say in regard to these refills, that due to the change of a year ago of the Principalship of the School, it is about impossible to determine for certain the exact date upon which these extinguishers were last refilled and rather than have any question of uncertainty in case of fire in respect to the effectiveness of the material contained in them, I would recommend that authority be obtained for this expenditure.

Yours truly,

W. J. Ferguson
(W.J. Ferguson)

Ottawa, June 11th., 1934.

Sir,-

In reference to your letter of the 26th ultimo, in which you request authority to purchase refills for the fire protection equipment in the Kamloops Indian Residential School, I am enclosing herewith the necessary authority. In future you will be good enough to use this form when requesting similar material.

SS

I may say that it is now the custom to make these purchases through the Purchasing Branch of the Department. In this case, however, we are unable to do so, as you do not give sufficient detailed information as to the type of refill required. The first item 12 Foamite Refills is clear enough; the second, however, 3 F.C. Refills does not convey any meaning as to what type or size of refill is required. It is noted also that these prices were obtained by you from the La France Fire Engine & Foamite Ltd., of Vancouver, and that they quote on the 11 Soda & Acid re-fills required. Our records in the Department, however, show that the extinguishers using Soda and acid refills were the Guardene type which is manufactured by the Pyrene Manufacturing Co. of Canada.

Will you be good enough when forwarding invoices covering these items to let the Department have a full report with respect to the type of extinguishers in each case, and also the capacity.

The Superintendent,
Department of Indian Affairs,
Ottawa, Ontario.

Dear Sir:

We are in receipt of a letter from Father Kennedy, O.M.I., of the Indian Residential School at Kamloops, B.C., in which he states there is a possibility that stokers may be installed in that school.

As we manufacture the Canadian Fire King Automatic Stoker we are writing to enquire if you contemplate the installation of mechanical stokers in this school, and if so, we would be glad to have an opportunity of submitting our tender on the work.

We have nearly eighty installations of the Canadian Fire King throughout the Dominion, which have effected a very substantial reduction in fuel costs as well as given entire satisfaction in performance.

Thanking you for an early reply, we are,

Yours truly,

Ottawa, Sept. 22, 1934.

Sir:

The Department is in receipt of the report of the Engineer, Department of Public Works, Victoria, B.C., on his inspection, in July, last, of the boilers and machinery at the Kamloops Indian Residential School. He reports as follows:-

Boiler No. 43794 - After careful internal and external inspection, this boiler was found in poor condition. The Engineer states that this boiler is much too small and is forced almost beyond its capacity. He says that, after this season, it should be replaced with a new one, as its present condition is such that another year the allowable pressure will be so low that it would be useless for laundry purposes and will not warrant any expenditure for repairs.

I would request that you submit a report regarding the matter of installing a new boiler next year and give an estimate of the cost involved. I shall be pleased to have this information at an early date, in order that, when our Estimates for the next fiscal year are being prepared, consideration can be given to providing funds for the purpose of installing a new boiler.

Boiler No. 43710 - Found in good condition. The Engineer recommends that the water gauge be raised 1-1/2 inches, to give the tubes more coverage of water. The main stop valve is leaking quite badly and should be made tight. The fusible plug must be renewed.

Boiler No. 43711 - Found in very good condition. The Engineer states the steam gauge is 2 lbs. light and also that the fusible plug must be renewed and that the same feed water treatment must be continued.

Please draw the recommendations of the Engineer to the attention of the Principal, and he should arrange to see that they are carried out. The Department understands that the certificates of inspection of these boilers have been forwarded to the Principal. He should see that they are posted up in a prominent place in the boiler room at the school.

Your obedient servant,

A. F. MacKenzie
A. F. MacKenzie,
Secretary.

August 29th, 1934.

C.F. Dawson, Esq.,
Dist. Res. Architect,
Dept. Public Works, Canada,
Victoria, B.C.

Dear Sir: Re: Inspection of Boilers & Machinery,
 Indian Residential School,
 Kamloops, B.C.

Boiler No. 43794.

On July 12th, 1934, I made a careful internal and external inspection of this boiler and found it in a poor condition.

This boiler has been reported upon before. I could not complete the Hydrostatic test on account of the tubes leaking on the top tube plate. There were also some rivets leaking on the firebox seam.

I have reported before that this boiler is much too small and is forced almost beyond its capacity, and after this season must be replaced with a new one as its present condition is such that next year the allowable pressure will be so low that it will be useless for Laundry purposes and will not warrant any expenditure for repairs.

When a new boiler is installed, I would recommend one of a submerged tube type.

The Safety Valve works freely by hand. I have issued a certificate allowing a steam pressure of 75 lbs. and condition poor.

Boiler No. 43710.

On the same date I gave this boiler a careful internal and external inspection and found it in very good condition.

The Water gauge must be raised 1-1/2 inches higher up to give the tubes more coverage of water. The main stop valve is leaking quite badly and must be made tight.

I gave it a Hydrostatic Test of 40 lbs. and found the boiler quite tight. I set the Safety Valves to blow off at 15 lbs. water pressure. The fusible plug must be renewed. The steam gauge is fairly correct.

I have issued a certificate allowing a steam pressure of 15 lbs. and condition good.

.....

Indian Affairs (RG 10 Volume 6449, file 882-5, part 7)

VERY

POOR-COPY

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

Boiler No. 43711.

On the same date I gave this boiler a similar inspection and found it in a very good condition.

I gave it a Hydrostatic Test of 40 lbs. and found it perfectly tight.

I set the Safety Valve to blow off at 15 lbs. water pressure. The Steam Gauge is 2 lbs. light.

The brick bridges on both of these boilers has been repaired and is in good condition. The fusible plug must be renewed.

I have issued a certificate allowing a steam pressure of 15 lbs. and condition good.

The same feed water treatment must be continued.

My attention was again drawn to the amount of fuel used and as before reported, the only way to reduce it is to install automatic underfeed coal stokers, which, in this particular plant, will make quite a large saving as a much lower and cheaper grade of coal can be used.

Auxiliary Machinery.

The auxiliary machinery is in good condition and is well kept.

Yours respectfully,

T. J. Amall.

T.J. Amall,
Engineer.

Kamloops, B.C.,
October 11, 1934.

KS-2.

Dear Sir:-

With reference to your letter of the 22nd. ultimo, file 154-0-8, regarding an estimate for the next fiscal year on a new boiler for the laundry for Kamloops Indian Residential School, I beg to advise that I have had the Kamloops Plumbing and Heating Co., examine the present equipment in this respect at the School, and they have prepared an estimate as follows:

To supplying and installing new 20 H.P. Vertical Tubular Boiler, 125# Working pressure, diameter 38", height overall 9' 3", complete with all fittings and fixtures to comply with B.C. Inspection, 1" Penberty Injector (bypassed), self grinding globe vales and check valves; also removing and rebuilding brick wall, complete with transportation, cartage, and all materials and labour for.....\$1,275.00

Besides the replacement of the boiler the Kamloops Plumbing & Heating Co., engineer recommends that owing to the higher pressure of a new boiler that a new main should be installed to be slightly larger, and with extra heavy pipe and fittings and with extra heavy valves controlling each opening from the main, also installation of new coils in the drying machine. For this equipment, they estimate \$225.00 in addition to the \$1,275.00, a total of \$1,500.00 for the two jobs.

In regard to Boiler No. 43794, I have, in company with the Public Works Engineer, when he was here on his visit, examined this boiler and agree with the engineer that it should be replaced with a new one, and also that this replacement should be made within the next six months.

In regard to the other equipment recommended by the Heating Company engineer and covered by the estimate of \$225.00, I have not had time to check up on this, but am of the opinion that it would be as well to give this consideration in the estimates for the next fiscal year.

In the meantime, or before requisition is made for this expenditure, I will obtain from the Public Works Engineer on his next visit to the school, his opinion on the necessity of this expenditure and advise you in the matter.

The Secretary,
Dept. of Indian Affairs,
OTTAWA, Ont.

EX'D.

October 15, 1934.

Dear Sir,-

I have your letter of the 29th September with reference to the repairs required to the Kamloops Indian Residential School, and I wish to compliment you on the very careful way in which you have submitted your estimates for the repairs required.

E.R. 2545

For the present you are authorised to have the repairs made to the roof of the main building and chapel, which it is noted will cost \$286.29.

The balance of the repairs will be left over until the Architect of the Department has had an opportunity to inspect the School. This inspection will be made sometime this fall.

Yours very truly,

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Kamloops, B.C.,
September 29th, 1934.

KS-2.

Dear Sir:-

With reference to your letter of February 13th last, file 154-0-5, in regard to repairs to Kamloops Indian Residential School, I am enclosing herewith an itemized list of repairs required, which I have prepared from an estimate submitted by James A. Gill of Johnston & Co.

You will please note that I have, for reference, listed these repairs under separate headings and numbered them accordingly.

In regards to expenditures in this respect, I beg to make the following recommendations:

Funds OK for

No.1. Main Building and Chapel: All the repairs under this heading should be carried out as soon as possible, and completed before winter sets in, at a total cost of \$286.29. These repairs are very necessary on account of the leaky roof, from which there is bound to be further damage to the interior, as soon as any amount of wet weather sets in.

No.2. Dairy and Laundry: Item: Sterilizing room floor with cement slab, etc.....\$52.40.
The present floor in the sterilizing room of the dairy is of concrete, but was laid much too level, and does not allow the water or other liquids to drain away freely, and due to this it is proposed to lay a concrete slab over the present floor, with a good slope towards the sink hole, so that the floor can be easily scrubbed, and kept clean and free of moisture and filth.
Item: Drain from laundry and sterilizing room, etc....\$90.00.
The purpose of this drain is to carry the liquids from the sterilizing room, which at present has no hole other than a hole through the concrete to the earth below, which of course, does not allow the liquids to get away, and is always running over and flooding the floor. This same drain would also be connected up so as to drain the floor of the laundry which at present is covered with from one to two inches of water on wash days. At present the water is delivered from the laundry to a drain system from the kitchen by an automatic pump, and with this system it is impossible to keep the floor dry, but with this proposed drainage by gravity, the difficulty now encountered should be overcome.

The Secretary,
Department of Indian Affairs,
OTTAWA, Ont.

Indian Affairs (RG 10 Volume 6449, file 882-5, part 7)

VERY

POOR COPY

PUBLIC ARCHIVES
ARCHIVES PUBLIQUES
CANADA

The Secretary.

-2-

September 29th, 1934.

Item: Laundry floor to have drain or gutters to outlet,
with grating over..... 48.00

If the drain from the sterilizing room of the dairy and laundry is installed, it will be necessary to cut gutters into the present concrete floor of the laundry so as to drain all liquids to the outlet. The cost in respect to these three items totals \$190.40, and I would recommend that the expenditure be made.

I should say that while in your letter of Feb. 13th last, I was not instructed to submit an estimate on drains, I am fully confident that Mr. James A. Gill is fully competent in regard to the carrying out of this work, also that satisfactory works will be installed and that it will not be necessary to refer these works to the Dominion Water Power Engineers for their opinion.

The painting of the lockers could wait for the present, or until funds are more readily obtained.

West Wing, Boys' Side: This wing of the school is certainly in need of a general overhaul and re-decorating, but for the present the most necessary are:

Patching of plaster.....35.00
Repairs soap-trap washroom,
Concrete step shower bath and
repair 9 doors lavatory.....17.00 \$52.00

Besides this, the lavatories, washroom and bathrooms should receive some attention with paint and ka lsomine.....73.00 73.00 \$125.00

The balance of the repairs estimated should be carried out within the next fiscal year.

4. Main Building: All repairs to the linoleum, as estimated, should be carried out. If not, in its present loose condition, and with water getting under the loose edges and worn out spots, in a year or so, new linoleum will be required for both these floors, but with these proposed repairs, it should be serviceable for several years. The cost is \$81.00.

The re-decorating of the dining room could wait for another year.

5. Boiler Room: As in the case of the sterilizing room, no consideration was given at the time of construction of this room to ~~connect~~ installation of works for the proper drainage of this room, and in consequence, whenever the boilers are drained, the floor is a mess for days after.

T.S. Arnell, engineer of the Department of Public Works, after inspection of the boilers at the school, in his report of August 31st., 1933, states: "Attention should be given to the drains under the boiler room floor, as from appearances, when they were laid they were only carried to the wall of the building and allowed to seep through the soil, which has now become clogged. If they were carried to the nearest surface drain, about 100 feet good drainage would be obtained. This should not cost over \$150.00, and then the boiler room floor could be kept dry, as at present water will stay for days, which is very injurious to the plant."

The Secretary.

-3-

September 29th, 1934.

In regard to Mr. Arnell's report, I am sure that he is wrong in that the surface drain could be used to carry away the liquids in this respect, as the floor of the boiler room is much too low for this, and the only practical drain that can be installed at a moderate cost is the drain pipe to a sump pit as estimated on by Mr. Gill, at a cost of \$69.10.

East Wing (Girls'): This wing is in a much better state of repair than the west wing or boys' wing, and at this time, I would only recommend that minor repairs be carried out, such as repairs to radiators and the lavatory doors, at a cost of \$25.00. The balance of the repairs to be given consideration at some future date.

7. Barn: These repairs could wait until consideration is given to this school for additional stable room for their dairy stock. A report in this respect will follow for consideration in the next fiscal year.

3. Shoeroom: Patching plaster in 3 places.....2.00
Staff-room: Repairs to plaster in 2 places.....1.50
Schoolroom: Patching plaster in 3 places.....3.00
Schoolroom #2: Patching plaster in 5 places.....3.00
Bedroom: Dormitory, repair plaster 4 places.....2.00
Boys' Playroom: Patching plaster.....3.00
Laundry: Patching plaster.....4.00
Dormitory: In attic. Patching plaster 24 places.....5.00

Remarks of James A. Gill: "The boys' playroom in the west wing, if it is painted 5 feet up with two coats of paint and one coat of enamel, there wouldn't be any more cost for years to come, and it needs kalsomining up above. The washrooms and lavatories need two coats of paint and one coat of enamel five feet up. In one of the washrooms in the boys' room it needs a cement step to stop the water from going into the nurse's dispensary.

2. Dairy & Laundry: 36'x12'x10' and lockers 10'x 7'x 3'
Paint.....42.35
Laundry floor to have drain or gutters to outlet with grating over.....48.00
Dairy Sterilizing room floor with concrete slab to required level, 20'x12', with gutters to drain to sump hole or outlet.....52.40
Drain from laundry and sterilizing room, 100 lineal feet with soap or grease trap, vitrified pipe, with 2" pipes from laundry tubs to drain.....90.00
4. Main building: First aid room, joint floor cloth and cement down, size 14'x 10' centre wing..... 6.00
Battleship linoleum, kitchen floor to be jointed and repaired, cemented down, size 27'x 36', centre wing, 24 yds. @ \$2.50... (New).....75.00
Dining room, centre building, 60'x 33'x 11'x 5' high, kalsomine and paint.....47.49
Scullery, 15'x 24'x 5' high, painted.....33.60
Dining room, 60'x 33'x 11, kalsomine.....47.49
5. Boiler Room: Drain from boiler to sump, 90 ft.....27.00
Sump pit for boiler-room, built with large rock, 6' deep x 7'.....42.10
6. East Wing (Girls)
Lavatory: 34'x 14'x 10' partitions 36'x 6' and 8 bathroom partitions 7'x 6' and 10 toilets 4'x 6'x 6', painted.....94.54
Washroom: 9'x 7'x 5' high, painted..... 6.65
Sister's room: 31'x 14'x 10', kalsomine..... 6.50
Staff toilets: 16'x 10'x 10' kalsomine.....19.93
Stairways: 9'x 16', 3 storeys high, kalsomine..... 8.90
Girls' Washroom: Radiator to be bolted through wall; 1 doz. bolts 5/8"x 20.....12.00
Porch Entrance (Girls') Repair to roof and flashings, centre wing.....\$5.00
Lavatory: 13 doors to be repaired with stops and hinges.....13.00
7. Barn: Ventilators; 6 require replacing.....12.00

Kamloops, B.C.,
September 29th, 1934.

KS-2.

Dear Sir:-

With reference to your letter of February 13th last, file 154-0-5, in regard to repairs to Kamloops Indian Residential School, I am enclosing herewith an itemized list of repairs required, which I have prepared from an estimate submitted by James A. Gill of Johnston & Co.

You will please note that I have, for reference, listed these repairs under separate headings and numbered them accordingly.

In regards to expenditures in this respect, I beg to make the following recommendations:

No.1. Main Building and Chapel: All the repairs under this heading should be carried out as soon as possible, and completed before winter sets in, at a total cost of \$286.29. These repairs are very necessary on account of the leaky roof, from which there is bound to be further damage to the interior, as soon as any amount of wet weather sets in.

No.2. Dairy and Laundry: Item: Sterilizing room floor
with cement slab, etc.....\$52.40.
The present floor in the sterilizing room of the dairy is of concrete, but was laid much too level, and does not allow the water or other liquids to drain away freely, and due to this it is proposed to lay a concrete slab over the present floor, with a good slope towards the sink hole, so that the floor can be easily scrubbed, and kept clean and free of moisture and filth.
Item: Drain from laundry and sterilizing room, etc....\$90.00.
The purpose of this drain is to carry the liquids from the sterilizing room, which at present has no hole other than a hole through the concrete to the earth below, which of course, does not allow the liquids to get away, and is always running over and flooding the floor. This same drain would also be connected up so as to drain the floor of the laundry which at present is covered with from one to two inches of water on wash days. At present the water is delivered from the laundry to a drain system from the kitchen by an automatic pump, and with this system it is impossible to keep the floor dry, but with this proposed drainage by gravity, the difficulty now encountered should be overcome.

The Secretary,
Department of Indian Affairs,
OTTAWA, Ont.

Indian Affairs (RG 10 Volume 6449, file 882-5, part 7)

ARCHIVES PUBLIQUES
CANADA

VERY

POOR-COPY

September 29th, 1934.

Item: Laundry floor to have drain or gutters to outlet,
with grating over..... 48.00

If the drain from the sterilizing room of the dairy and laundry is installed, it will be necessary to cut gutters into the present concrete floor of the laundry so as to drain all liquids to the outlet. The cost in respect to these three items totals \$190.40, and I would recommend that the expenditure be made.

I should say that while in your letter of Feb'y. 13th last I was not instructed to submit an estimate on drains, I am fully confident that Mr. James A. Gill is fully competent in regard to the carrying out of this work, also that satisfactory works will be installed and that it will not be necessary to refer these works to the Dominion Water Power Engineers for their opinion.

The painting of the lockers could wait for the present, or until funds are more readily obtained.

West Wing, Boys' Side: This wing of the school is certainly in need of a general overhaul and re-decorating, but for the present the most necessary are:

Patching of plaster.....35.00
 Repairs soap-trap washroom,
 Concrete step shower bath and
 repair 9 doors lavatory.....17.00 \$52.00

Besides this, the lavatories, washroom and bathrooms should receive some attention with paint and ka isomine.....73.00 73.00 \$125.00

The balance of the repairs estimated should be carried out within the next fiscal year.

4. Main Building: All repairs to the linoleum, as estimated, should be carried out. If yet, in its present loose condition, and with water getting under the loose edges and worn out spots, in a year or so, new linoleum will be required for both these floors, but with these proposed repairs, it should be serviceable for several years. The cost is \$81.00.

The re-decorating of the dining room could wait for another year.

5. Boiler Room: As in the case of the sterilizing room, no consideration was given at the time of construction of this room to ~~connect~~ installation of works for the proper drainage of this room, and in consequence, whenever the boilers are drained, the floor is a mess for days after.

T.S. Arnell, engineer of the Department of Public Works, after inspection of the boilers at the school, in his report of August 31st., 1933, states: "Attention should be given to the drains under the boiler room floor, as from appearances, when they were laid they were only carried to the wall of the building and allowed to seep through the soil, which has now become clogged. If they were carried to the nearest surface drain, about 100 feet good drainage would be obtained. This should not cost over \$150.00, and then the boiler room floor could be kept dry, as at present water will stay for days, which is very injurious to the plant."

The Secretary.

-3-

September 29th, 1934.

In regard to Mr. Arnell's report, I am sure that he is wrong in that the surface drain could be used to carry away the liquids in this respect, as the floor of the boiler room is much too low for this, and the only practical drain that can be installed at a moderate cost is the drain pipe to a sump pit as estimated on by Mr. Gill, at a cost of \$69.10.

East Wing (Girls): This wing is in a much better state of repair than the west wing or boys' wing, and at this time, I would only recommend that minor repairs be carried out, such as repairs to radiators and the lavatory doors, at a cost of \$25.00. The balance of the repairs to be given consideration at some future date.

7. Barn: These repairs could wait until consideration is given to this school for additional stable room for their dairy stock. A report in this respect will follow for consideration in the next fiscal year.

DEPARTMENT OF INDIAN AFFAIRS
CANADA

OFFICE OF
INDIAN AGENT

Kamloops, B.C.,
October 11, 1934.

KS-2.

Dear Sir:-

With reference to your letter of the 22nd. ultimo, file 154-0-5, regarding an estimate for the next fiscal year on a new boiler for the laundry for Kamloops Indian Residential School, I beg to advise that I have had the Kamloops Plumbing and Heating Co., examine the present equipment in this respect at the School, and they have prepared an estimate as follows:

To supplying and installing new 20 H.P. Vertical Tubular Boiler, 125# Working pressure, diameter 38", height overall 9' 3", complete with all fittings and fixtures to comply with B.C. Inspection, 1" Penberty Injector (bypassed), self grinding globe valves and check valves; also removing and rebuilding brick wall, complete with transportation, cartage, and all materials and labour for.....\$1,275.00

*Noted for
Estimates
17/10/34
E.M.*

Besides the replacement of the boiler the Kamloops Plumbing & Heating Co., engineer recommends that owing to the higher pressure of a new boiler that a new main should be installed to be slightly larger, and with extra heavy pipe and fittings and with extra heavy valves controlling each opening from the main, also installation of new coils in the drying machine. For this equipment, they estimate \$225.00 in addition to the \$1,275.00, a total of \$1,500.00 for the two jobs.

In regard to Boiler No. 43794, I have, in company with the Public Works Engineer, when he was here on his visit, examined this boiler and agree with the engineer that it should be replaced with a new one, and also that this replacement should be made within the next six months.

In regard to the other equipment recommended by the Heating Company engineer and covered by the estimate of \$225.00, I have not had time to check up on this, but am of the opinion that it would be as well to give this consideration in the estimates for the next fiscal year.

In the meantime, or before requisition is made for this expenditure, I will obtain from the Public Works Engineer on his next visit to the school, his opinion on the necessity of this expenditure and advise you in the matter.

The Secretary,
Dept. of Indian Affairs,
OTTAWA, Ont.

Yours faithfully,

W. J. Ferguson

Sir:

I have your letter of the 11th instant, giving an estimate of the cost of supplying and installing a new boiler for the laundry at the Kamloops Indian Residential School. In this connection I have to say that this matter will receive consideration when our Estimates for the next fiscal year are being prepared. I would suggest that the need for a new boiler be brought to the attention of the Architect of this Department during his visit to the school, some time this fall.

Your obedient servant,

Gentlemen:

Attention Mr. A. F. McKenzie, Secy.
Re- Your File 154-0-5.

We are writing to enquire if there is any change in the situation with regard to the installation of mechanical stokers in the Kamloops Indian Residential School.

In July of this year, you were good enough to reply to our enquiry stating that it was not the intention to make the installation at that time. However, now that the firing season has started, the situation may have changed and we would be glad to let you have our quotation if you are in the market for this type of equipment.

Thanking you, we are,

Yours very truly,

THE MANITOBA BRIDGE & IRON WORKS LIMITED.

KS-OM-2

Dear Mr. Orr:

With reference to your letter of March 5th last in regards to the proposed new barn for the Kamloops Indian Residential School and also blue print of plan received under separate cover. I wish to say that I have discussed the matter several times with the school staff. I might also say for your information that Mr. Bann, who was the dairy and farm foreman at the time you were here, at the end of March, due to some disagreement with the staff and principal, resigned from his position. That, at the time somewhat upset matters at the school, and since, cause for the delay in my reply. I regretted very much to see Mr. Bann leave the position, as he was much interested in his work, and the care of the herd of milch cows under his charge.

I am enclosing herewith a copy of a letter from the Rev. Principal, in which he outlines certain suggestions for your consideration, which to me all appear to be reasonable, and on them, I will comment as follows:

WINDOWS: The solution to give them more sunlight would be to carry out the construction of the full number of windows on the front and east side in accordance with the tracing submitted by Mr. Bann. I have marked these in with red on the blue print, returned under separate cover. And on the west side a window between every second studding, as per your plan. In regards to ventilation, I am forwarding with the blue print, a tracing which I think carries out a very good idea in this respect. The windows to open in with sheilds on top.

DOORS: Due to the high winds here, swinging doors do not stand up, and have always proven unsatisfactory, and sliding doors of the right type would be preferable.

STALLS: This question of shorter stalls comes from the new dairy man at the school, and possibly he is right, but I do not see where just a couple of inches would make much difference, and the length of 4' 10", shown in your plan should suit the purpose.

PASSAGE
WAY:

Passage way to the old barn should be walled in with roof over.
If you will compare your plan of the proposed new barn with the plan of the old barn, you will get the principal idea of placing the passage way in alignment.

Cont. Page 2.

Continued.

-2-

May 2nd, 1935.

DAIRY: Owing to local dairy regulations it will be necessary to place this building fifty feet distant from the barn. This building would have to be erected on the east side, and there should be a walled-in covered passage way connecting it with the proposed barn. Size of dairy, 12' x 14'.

Both the principal and myself are of the opinion that while the calf pen could do with more sunlight, its location, as you have it in the north end of your plan, would be more convenient all round, than to have it in ^{the} front or south end.

In regards to the ladder to the loft. I think that if it can be worked into the plan, a stairway would be more convenient, and possibly prevent accidents of children falling from the ladder.

I do not know of anything else at this time that I can comment on. However, should you require any further information in this respect, I will be pleased to do my best in obtaining it for you.

Yours very truly,

W. J. Ferguson

Kamloops Indian Residential School

FOUNDED IN 1889
IN CHARGE OF THE OBLATE FATHERS

Kamloops, B.C., April 29-35. 1913

Mr. W.J. Ferguson,
Indian Agent,
Kamloops, B.C.

Dear Sir:

I was delighted to receive the plans for the new cow barn for our school. Our herd which now numbers near fifty head of jerseys will need this barn very badly this coming fall. In fact, as you undoubtedly know, we had to shelter our young stock in a makeshift arrangement of stalls in the impliment shed last winter. Quite a number of these will freshen during the next six months and we will have to have some place to put them.

Our farm help have made the following suggestions which I wish you would submit to Mr. Orr for his consideration.

WINDOWS.

Prefer larger or additional windows on both sides and front of building to afford more sunlight.

DOORS.

Prefer sliding on account of the high winds here.

STALLS.

Our herd is all Jersey cows which require a stall 4'6" or 4'8" and we therefore ask that the stalls be 4'8" in length on the west side and 4'6" on the east side. The stalls in our present barn are 5'2" on one side and 4'8" on the other. The latter would take care of any cows that are particularly big.

COVERED PASSAGEWAY.

As no provision seem to have been made for grain feed and as there is no way of getting our grain supply into the loft of the new barn it would seem necessary to have a covered passageway between the two barns. This passageway

(2)

could be built so as to connect the cross walks of both barns. Assuming that the front of the new barn will be built in alignment with the old one we wish to bring to your attention that the cross walk in the old barn is 39' (inside measurement) back from the front entrance. There are eleven stanchions between the front and the cross walk. They are the standard 3'6" in width. We therefore suggest that you ask Mr. Orr to consider placing the cross walk in the new barn in alignment with the one in the present one. This will give a straight run through from one barn to the other. As there is a driveway into the loft of the old barn all grain feed could be mixed there and the necessary amount could be run through in the covered passageway that we suggest.

The plans have been given very careful consideration and while we would like the abovementioned changes carried out our need for a new barn is so great that we would not like these changes to hold up the construction.

Owing to the fact that we have no dairy at the present time and as it is absolutely necessary to have one for a school of this size, we suggest that a dairy be built 12' X 14' about fifty feet east of the new barn. This could be built in line with the cross walks and connected with a covered passageway.

I wish to take advantage of this opportunity to thank you for your efforts in connection with this matter and trust that it will not be long before we receive word that the Department is going ahead with the barn.

Very truly yours,
KAMLOOPS INDIAN RESIDENTIAL SCHOOL.

KAMLOOPS INDIAN AGENCY INSPECTION REPORT NO. 7. (CONT.)

7. SCHOOLS: KAMLOOPS RESIDENTIAL SCHOOL: In company with the Indian Agent I inspected the above residential school, and made a longer and more thorough inspection than I have done of this school for a considerable time. I gave no notice of my visit to the school. There were 289 children in the school at the date of my visit, the 5th. of March. I found the building thoroughly clean and tidy, and all the dormitories and lavatories, etc. in perfect order.

The defects in the building itself, such as the falling out of the pointing and mortar in the brick work on the boys wing outside, and also constructural troubles, the Agent informs me were shown to Mr. Orr during his visit. I understand too, from the Agent that the laundry is to be improved and altered. I, however have to point out that since Mr. Orr visited, the floor in the kitchen has been sinking, directly under the stoves, and I should think that this is due to the heavy weights in the way of big boilers, etc., that have to be used to cook the meals on the stoves. Cooking for such a large number, roughly 325 or perhaps more, means large quantities of heavy food. Undoubtedly this floor will have to be strengthened and levelled. There is a possibility in my mind that some leakage from the drains, that I understand pass under this floor, may have weakened the ground under the foundation. An extra unit in the kitchen range had to be installed as already reported, but the cooks inform me that they are having difficulty in getting a good draft in the ranges. This may be due to the fact that the kitchen chimney has not sufficient diameter to carry the extra draft required. However, Indian Agent Ferguson is having the matter looked into. I am of the opinion, too, that something will have to be done shortly to take care of the overflow from the school cesspit. I may be wrong, but it seems to me to be tempting providence to have this overflow come out in the open during the summer time when the flies and mosquitoes are around. I have an idea that the Dominion Water Board have this in hand, but what exactly is proposed I do not know. I found the fire apparatus and fire escapes all in good order and in their correct positions, and the Agent informs me that he conducted the test alarm not long ago, which was quite in order.

During the date of my visit the children were having the following meals: mid-day, potatoes, meat and dumplings; supper, meat broth, potatoes and bread; breakfast, honey and bread with plenty of milk for all. I think the meals are quite satisfactory at the school and the children are all looking healthy and well fed. I understand, too, that there has been very little sickness.

I found all the class rooms clean and tidy and in good order. I visited all the grades and heard and examined the children in their work.

Primary 1B, boys, under J. Schubert. The discipline in this class was good. Their writing was good and their answers to questions intelligent. This class shows a big improvement.

The Secretary.

-6-

March 8th, 1935.

School

Grades 2A and B, boys, under J. Schuber. During my visit to this class room the boys were doing exercises in connection with the monitory system. They seemed quite good and quick at it. The discipline of the class was good, but when reading they did not speak up quite so well as they might. However, Mr. Schuber seems to be a very good teacher.

Grades, 4, 5, 6, boys, under D. Murphy. When I went into the class room, the boys were doing exercises picking out nouns, adverbs and adjectives from the narrative. The reading of this class was particularly good, very plain to understand and all the boys were able to answer intelligently about what they were reading. There is particularly a big improvement in this class. Grade 3, boys, under D. Murphy. The way the boys of this grade did their mathematical exercises before me was a credit to the teacher. They also read well and intelligently. A great improvement is very noticeable in the classes for boys in this school. They used to be quite a bit behind the girls grade for grade and the improvement is most noticeable, and credit is due to both the men teachers.

I have to report on the boys side of the school too, that Mr. Holmes, whom I reported on very well in my last report has been transferred to the Kamloops School. He is giving the boys physical training, and instructing them in football and games. About 20 of the boys gave me a demonstration of gymnastics with the vaulting horse, under his charge and it was exceedingly well done. This training in games under proper discipline has undoubtedly helped a lot to pull the boys side of the school together and credit is due to Mr. Holmes in the matter, besides the good sense of the principal in obtaining such a man. The general tenor all around on the boys side has been greatly raised. I also examined the manual training classes in wood work and boot mending.

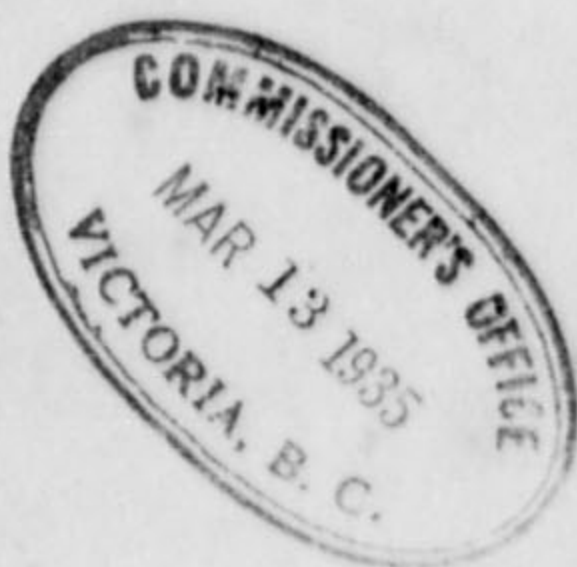

Grades 1B and 1C, girls under Sister May Elaine. These children sing very well and pronounce their words well in reading. The discipline in this class is excellent. Grades 1A and 2, girls under Sister Mary Elaine. Grade 2 was particularly good at reading and both grades seemed well ahead for their ages, in fact grade 2 might almost be called grade 3. They were very fair at their mathematical exercises which they demonstrated to me, though somewhat nervous.

Grades, 5, 6, 7, girls, under Sister Mary Austin. These children gave me a demonstration of physical drill with song, which was very well done. The majority were very good at their reading and intelligent about what they were reading. They spoke up very plainly. The mathematical work as a whole was good as was their writing.

You will notice there are a few girls in Grade 7 and I hope to see the same later on on the boys side.

The school choir also gave me a demonstration of singing. They are taking part for the first time this year in the Musical Festival in Kamloops and stand a very

good chance of coming out well in the competition. I think that the idea of their taking part was well thought of on the principal's part. It will give the public some idea of what is being done at the schools, and help bring the Indians out of themselves. Whilst not bad before it is very noticeable that the whole spirit of the school has been raised. This school spirit has been fostered by the principal, Rev. T. Kennedy, and the children now have school colours, and all seem very contented and happy. I can only say that great credit is due to the principal of this noticeable improvement in the school. I could find no fault at all in the school, despite the fact that my visit was a surprise one.

Yours very truly,

G. S. Pragnell,
Inspector of Indian Agencies.

Ottawa, March 5, 1935.

Dear Mr. Ferguson,-

Referring to your letter of the 10th December with regard to the proposed new barn for the Kamloops Indian Residential School, I have prepared a rough sketch showing plan of a building with the accommodation which I think would meet the requirements.

Since making this plan, however, it has occurred to me that it might be better to reverse the location of the calf pen so that it would come on the south end of the building instead of the north end. This would provide ample sunlight for the young stock.

I am sending you, under separate cover, blue print copies and would be glad if you would look them over, discuss them with the Principal, and return one copy to me with your comments, when plans will be prepared for the building.

Provided funds are made available it is the intention to proceed with the erection of the barn during the summer months.

Yours very truly,

R. Gurney Orr.
Architect for the Department.

Dear Sir:

In regards to my letter of Dec. 10th. last in connection with the proposed improvements for the Kamloops Residential School.

In this respect I would say that the school are inquiring whether I have had any word as to the possibility of any work being carried out before the end of the fiscal year.

In regards to the proposed cowbarn. If funds are available, work could be started on this at any time. The frost is out of the ground and the teams at the school are idle now, while in another six weeks they will be busy with spring farm work.

I would be obliged if you would please advise me in this connection and if nothing can be done before March 31st., will it be probable that funds will be available early in the next fiscal year.

Yours very truly,

W. J. Ferguson
W. J. Ferguson,

K-S-10

Ottawa, March 5, 1935.

Sir:

I have your letter of the 13th ultimo, regarding the request of the Principal of the Kamloops Indian Residential School, that the Department purchase a new motor truck, to replace the one purchased for the use of the school in 1929.

In reply I have to say that the Department is not prepared to consider the supplying of a new truck. However, should the Principal make the purchase, himself, from school funds, the Department will agree to the trade in of the old truck, for which it is noted that an allowance of \$250 will be made.

Regarding the question of registration of the new truck, I have to say that, as the truck will not be the property of the Department and as the license will be carried in the name of the school, it is considered that the Principal will have to pay the Provincial Authorities the regular license fees. The Department will be unable to grant a certificate that the new truck is government-owned.

Your obedient servant,

A. F. MacKenzie
A. F. MacKenzie,
Secretary.

Kamloops, B. C.
February 13th, 1935.

FEB 18 1935

RECORDS

K-S-10.

Dear Sir:

The Principal of the Kamloops Indian Residential School has approached me with the matter of a new truck for the school. Their present one, a Chevrolet Model 1929 has become unfit for further economical service.

It appears that this truck purchased in 1929 was supplied to the school by the Department, and in view of this the Principal feels that the Department should assume the responsibility of making the required replacement.

There is no doubt by that the school needs a new truck, for to put it in shape for the coming season would cost some \$300.00, but in view of the grant received by the school, I do not think they should expect this additional assistance. However, as it is possible that the request might be given consideration, I am enclosing herewith a tender prepared by the Kamloops Motors covering a new truck.

Should the Department not give this matter consideration, and the school make the purchase themselves there is the question of the trade-in allowance of \$250.00 for the old truck and I should have authority to grant this permission to trade in this old truck.

There is also the question of registration with the Provincial authorities. At present the truck is registered in the name of the Department at the minimum fee of \$2.00 per year for licence. If the school made the purchase themselves the registration would have to be carried in their name and if so, could the truck still be considered as being in Dom. Government service and be licenced at the minimum rate. You might please advise me on this point.

Yours very truly,

W. J. Ferguson

KS-2

Dear Sir:-

Attention, Mr. Orr.

I am today forwarding under separate cover, a plan prepared by Mr. Bann, the dairy man of Kamloops Indian Residential School covering the proposed barn for the dairy cattle at this school.

This plan, as far as I can see, covers, in detail all the requirements necessary to meet the purpose of drawing up complete plans for this improvement required by the school.

You will note that this plan shows a capacity of thirty stalls, which I would mention exceeds the capacity of the present barn of twenty two by eight. Besides this, there is also included three maternity pens and a bull pen, and I am of the opinion that should there be any question of insufficient funds to complete the structure in accordance with the plans, the number of stalls may be somewhat reduced say to 22 or 24, and the pens cut to three. This would still give sufficient room to stable enough cows to supply all the milk required by the present population of the school as 50 cows of the superior type that they have should produce between 175 to 225 gallons of milk a day, which would allow for the 300 population, over two quarts per capita daily.

Mr. Ban has informed me that it will cost far more, owing to the extra excavation work and the making of a fill to a height of 7' 5" if the building is erected with the side facing the south and now proposes that it be laid out paralleling the present barn as shown in the block plan of the sketch. He also claims that everything will be handier for the delivery of feed and the carrying away of manure and liquids. I think he is right in this as it does appear more convenient after looking over the plan although there will be some loss of sunlight. This would only affect the building during the winter months, when as a rule it is generally cloudy here; during the most of the spring and fall months and all summer, a good share of sunlight would reach the interior.

The plan does not show any building for the dairy, which in my opinion I consider most important in view of the unsanitary cubby hole they are using at present. The dairy, which should be of about 16'x20' floor dimension should be built on the east side of the new barn.

The Secretary,
Department of Indian Affairs,

The Secretary.

-2-

December 10th, 1934.

Drains: The drains for both buildings should be to the rear, that is, the north end, instead of as at present, With this drainage out in the front yard, which ~~would~~ place it near the new dairy under the proposed plan. In the rear there is more fall, and it could also be run into the manure pile and increase its value as fertilizer. I have had a talk with Mr. Bann over this, and in making the repairs to the drain in the old barn as talked over with you when you were out here, he has decided to change the grade so as the flow will be to the rear instead of to the front. The cost will not exceed the \$25.00 allowed.

In regards to the construction work, the school is prepared to do all the excavating and the boys at the school can assist with the concrete, and construction work up to the first eight feet. The Reverend Principal does not care to have them work above the ground any higher than this during the process of framing the building owing to the possibility of accidents, but they could assist with the laying of the roof.

After you have looked over the plan and if there should be any points on which I can give further information I would be pleased to hear from you.

Mr. Bann has expressed the wish that after you are through with the plan he would be obliged if you would return it to him.

Trusting that the Department will soon have funds available with which to assist this school with this much needed improvements, I am,

Yours faithfully,

W. J. Ferguson
(W. J. Ferguson)
Indian Agent.

Ottawa, December 13, 1934.

Sir:

With reference to your letter of the 30th ultimo, enclosing voucher in favour of Johnston & Co., Kamloops, for \$286.28, I beg to say that it has been found necessary to return this voucher for further information.

You should have Johnston & Co. prepare a detailed account showing the manner in which the amount of \$286.28 is arrived at. This detailed account should be attached to the voucher and returned for payment.

Your obedient servant,

A. F. MacKenzie

OFFICE OF
INDIAN AGENT

Kamloops, B.C.,
November 30th, 1934.

K-S-2.

Dear Sir:-

I enclose herewith Vouchers Nos. 462-34 and 463-34, amounting to \$286.28 and \$38.83 respectively, in favour of Messrs. Johnston & Co., Kamloops, B.C., for repairs and extras in connection with main building at Kamloops Residential School.

This expenditure was authorized by Departmental letter No. 154-0-5, dated October 15th, 1934, and Mr. Orr's verbal instructions of November 16th, 1934, for item of \$16.00 for painting cornice.

In regards to the items in Voucher No. 463-34, besides that of \$16.00 for painting the cornice, I beg to report as follows: This work was carried out without any instructions from me. The work, however, was of an emergent nature. It appears that before painting the cornice around the kitchen and sterilizing room, the gutters were cleaned out and the drain pipe from the roof to the sump pit, which had worked apart, was connected up. Following this there was a heavy rain and the sump pit which apparently had been clogged previously, would not run the water away, causing it to flood over the flat roof of this part of the building. The roof was found defective and the water flooded into the rooms below. During the afternoon of the 20th the School authority called me over to look over the situation. The repairs were under way at the time and were about completed with the exception of the cribbing up the sump hole with rock. I then instructed that the hole be covered up until authority could be obtained from the Department to complete the repairs.

While the School should have got in touch with me before starting the repairs, without doubt to avoid further damage the work done was very necessary and I would recommend payment.

There is one point, however, about the account for this extra work that I do not like, and that is that Johnston & Co., are charging all that they can for the job, and I feel that in connection with any future work, a change of contractors will be in order.

Yours faithfully,

W.J. Ferguson

Vancouver

The Secretary,
Department of Indian Affairs,
OTTAWA, Canada.

Dear Sir,

Re: KAMLOOPS RESIDENTIAL SCHOOL.

I was at this School on the 8th and 12th inst., and authorized the Agent to spend \$200.00 for paint.

You will also, in the near future, hear from Mr. Ferguson regarding items mentioned in this year's appropriation, namely, the barn, painting, etc., as well as the laundry equipment. The laundry equipment is very necessary, and also the barn.

It is Mr. Ferguson's intention to write you full particulars regarding these and to request the Department to proceed at once with the building of the barn and the purchasing of the laundry equipment.

It has been decided that the repairing of the girls' toilets, for which \$900.00 is available, should be deferred until the other improvements are made. This will mean that if the cost of the laundry equipment, etc., amounts to more than what is provided in this year's appropriation, the repairs to the toilets will be allowed to stand until next year.

When you hear from Mr. Ferguson I would strongly recommend that you make the necessary arrangements to proceed with the work at this School at the earliest possible date.

The Secretary, D. I. A.

-2-

June 15, 1935.

Mr. Ferguson will also write you with reference to the septic tank. It is absolutely necessary that this be opened and cleaned. The cost will probably amount to nearly \$400.00, but in its present condition it is a menace to the health of the pupils.

The only satisfactory solution at this School is to build another septic tank next year. The one at present in use is certainly too small for the number of children at this School.

With reference to the laundry machinery, I believe that ^{when} Mr. Orr visited this School last year he took a list of what is necessary, so you have complete information on file. The only question is to get things moving as soon as possible.

Dear Sir,-

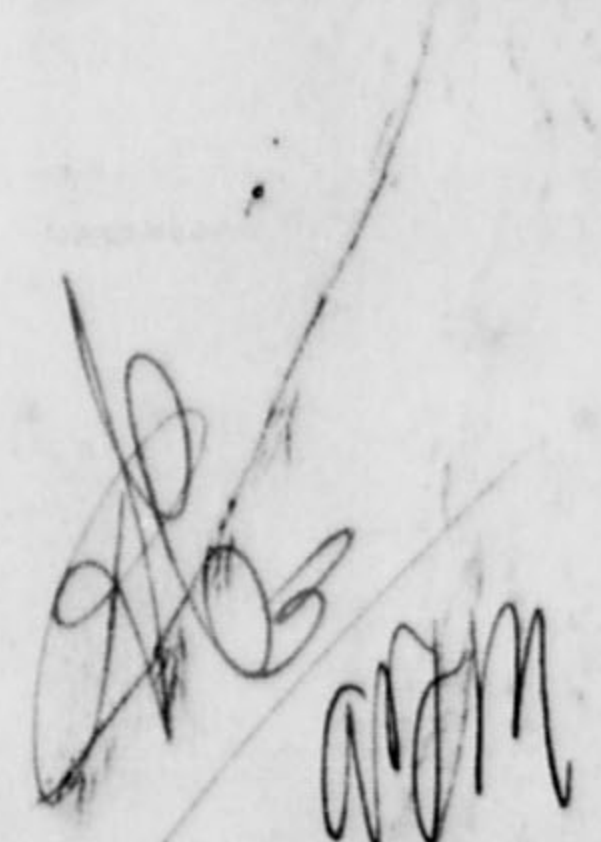

Replying to your letter of the 9th with reference to the disposal of the pneumatic tank stored at the Kamloops School, I beg to say that government regulations are such that this department cannot sell equipment of any kind, and it will therefore be necessary, if this tank is to be sold, to transfer it to the government Salvage Officer, and he will arrange for the sale.

I am today writing to Col. R. H. Beer, Dominion Salvage Officer, advising him of the request of Fernie Bros. and no doubt he will communicate with them.

Yours very truly,

A. F. MacKenzie.
Secretary.

File No. 174 - 2C

Dominion Water Power & Hydrometric Bureau

Vancouver, B.C.
May 1, 1935.

Sir,-

Attached hereto is a letter from Fernie Brothers of Kamloops tendering for the purchase of a pneumatic tank stored at Kamloops Industrial School.

This tank was part of the domestic supply system constructed in 1920 to serve the old school. The Pneumatic system was replaced in 1928 by a gravity system. Since that time the tank has not been in use. A few years ago it was cleaned and painted. The replacement value is approximately \$375.

In view of the fact that no use has been found for this old plant in the past seven years and to the possibility of deterioration I would suggest that it be offered for sale.

The tender of \$100. by Fernie Brothers although it does not represent the value of the tank, is probably reasonable in view of the small market for such equipment, and is unlikely to be exceeded.

I shall be pleased if you will bring this matter to the attention of the Department of Indian Affairs.

Your obedient servant,

(SGD) C.E.Webb.

K-S-2

Dear Mr. Orr:-

In regard to the proposed improvements for this year at the Kamloops Indian Residential School, would advise that Mr. P. Phelan of the Education Branch, was here this week, and together with the Reverend Principal, Father Kennedy we looked over and discussed the work to be done.

Mr. Phelan informed me that in the appropriation for this year funds had been provided for as follows:

Laundry Machinery.....	\$2,500.00	
Dairy Barn.....	4,000.00	
Paint, brick & stone.....	1,250.00	
Girls' toilet.....	<u>900.00</u>	\$8,650.00

If authorization for these expenditures can now be obtained, I would suggest that the laundry machinery be considered of first importance, and the work in this connection be started immediately. The children leave the school for their Summer Vacation, so that it may be completed before their return.

I would place the dairy barn in order of next importance, and work on this could be started at any time.

In regards to the laundry machinery, it appears to me that possibly the matter of a new boiler to replace the old one, condemned last year by the engineer of the Department of Public Works, Victoria, was overlooked and not included in the estimates. In this respect I would refer you to my letter of October 11, 1934. If this be the case, and as it is very necessary that this replacement be made, it would be as well to delay authorization of the other two expenditures, namely Paint, Brick and Stone, \$1,250.00, and Girls' Toilet, \$900.00, until we are assured that the repairs to the laundry, including the boiler, will be completed. The estimates I submitted on this boiler amounted to \$1500.00, but I am sure that amount can be somewhat reduced if both jobs are under way at the same time.

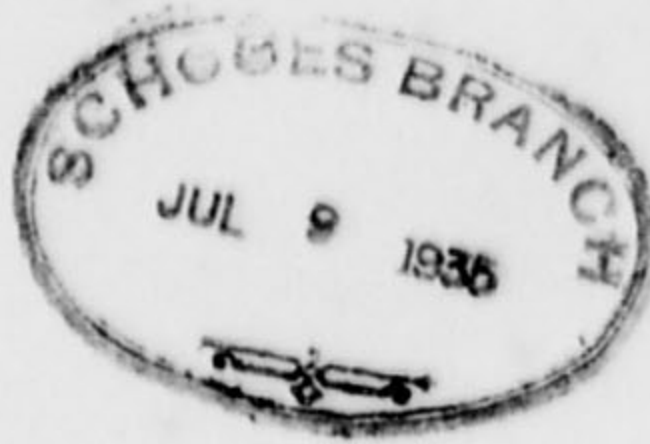

Yours truly,

W. A. Ferguson

GOVERNMENT CONTRACTS SUPERVISION COMMITTEE.

SALE OF A PNEUMATIC STORAGE TANK, KAMLOOPS

TENDERS for the purchase and removal of the following will be received until 12 o'clock noon, Wednesday, August 14th, 1935:

ONE (1) Pneumatic Storage Tank,

This tank may be inspected on application to the Kamloops Indian Residential School, Kamloops, B.C. Tenderers should satisfy themselves as to condition and value as no responsibility will be accepted either by the Department of Indian Affairs, or this Committee, for any description or information furnished by anyone.

Tender must be made on the enclosed form, and forwarded in the accompanying envelope, properly sealed, marked "Storage Tank, Kamloops, due August 14th, 1935," and addressed to the Government Contracts Supervision Committee, Ottawa, Ontario.

The successful bidder will be promptly advised of the acceptance of his bid, and must make payment in full and take delivery within ten (10) days of such advice. Purchaser to pay all expenses in connection with removal and delivery.

No tender will be accepted either by the Department of Indian Affairs, or this Committee, unless accompanied by a CERTIFIED cheque for twenty-five (25) per cent of the approximate total value of this tender, made payable to the credit of the Receiver General of Canada. These cheques will be returned to unsuccessful tenderers. The cheque of the successful tenderer may be applied as part payment but will be subject to forfeiture in the event of contractor's default.

The right to reject any or all tenders is reserved.

OFFICE OF
INDIAN AGENT

Kamloops, B.C.,
August 1, 1935.

K-S-2.

Dear Sir:-

Further in connection with my letter of June 15th last in regards to the proposed repairs, new barn, etc., at Kamloops Indian Residential School here, I beg to advise that in connection with the new boiler required for the laundry, I recently took up the matter of the cost of same with the Vancouver Engineering Works of Vancouver, who quoted me as follows:

"One only 40x90, 190 square feet of heating surface, Vertical boiler, 128 lbs. W.P., complete with necessary mountings, hood and stack. Price F.O.B. School at Kamloops, including Sales Tax, \$788.00."

This is a much better price than the one of Kamloops Plumbing & Heating, who quoted \$1275.00 installed, as per my letter of October 11th last. Although this quotation covered the removing and rebuilding of the brick, which would not call for all the difference in the two prices.

This month, when Mr. Arnell, Dominion Public Works Boiler Inspector was here, we discussed the matter of this boiler for laundry, and he suggested that when the new boiler is installed at the school, the old one could be overhauled, the old tubes replaced, and shipped to LeJacques School at Vanderhoof, for use in the laundry there.

Today the Reverend Principal, Father Kennedy, called me up about the repairs to the laundry, and informed me that he is very anxious that this work be carried out before the School opens on August 26th.

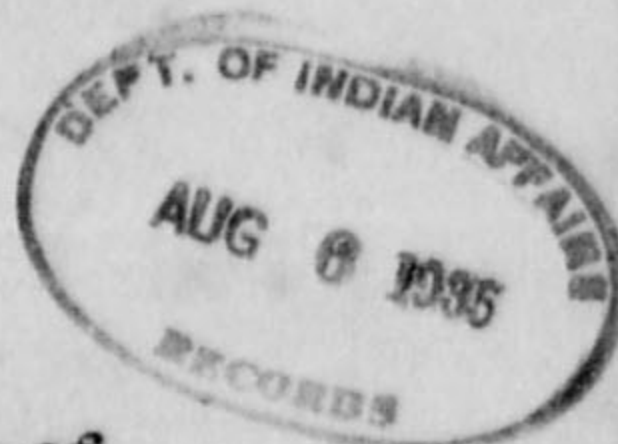

In view of this, I would be obliged if the Department would please advise me of their intention in regard to this work.

I might add that I wrote your Mr. Orr, Architect, in this respect, on June 15th last, but have not yet had a reply.

The Secretary,
Dept of Indian Affairs,

Ottawa, September 9, 1935.

MEMORANDUM FOR FILE:

Rev. Father Kennedy, Principal of the Kamloops Indian Residential School, telephoned the Schools Branch from Kamloops this afternoon stating that the school was quarantined owing to an outbreak of scarlet fever.

As a result, all washing has to be done at the school, and he, therefore, urged immediate action with reference to supplying the boiler recommended in Agent Ferguson's letter of August 1st and telegram of August 29th.

On receipt of this telephone message, Mr. Buskard's attention was directed to our memorandum of the 3rd instant, and he promised to advise the Department on September 10th.

K-O/M-4

Dear Sir:

In regards to Tender No. G. S. 1877, covering the disposal of one (1) Pneumatic storage tank at the Kamloops Residential School through the Government Contract Supervision Committee, beg to advise that Mr. Gale of this city has advised me that he was the successful bidder and now wishes to obtain possession of the property. I would therefore be obliged if the Department would instruct myself or the principal at the school to turn over this property to him.

Also in connection with this tank, there is a quantity of piping, valves, etc. and an old dynamo, which were not included in the tender which called for just the tank. If it is the Department's intention that these articles should be included in the sale, please advise me.

Yours very truly,

W. J. Ferguson

Dear Sir:

I have wired you today as follows, in connection with the boiler in the laundry at the Kamloops Residential School.

"Department of Public Works advise cannot sanction temporary use of laundry boiler Kamloops School considered unsafe for further operation Stop In view of this new boiler necessary immediately would recommend purchase in accordance my letter first instant with additional allowance for installation."

The reason for the wire was the enclosed letter.

Yours truly,

W. J. Ferguson

DISTRICT RESIDENT ARCHITECT'S OFFICE

VICTORIA, B. C. August 27th, 1935.

Rev. Thos. M. Kennedy, O. M. I.,
Principal,
Kamloops Indian Residential School,
Kamloops, B. C.

Dear Sir:

Having reference to your letter of the 21st instant sent to this office, attention of Mr. T. J. Arnall, with regard to the temporary use of the vertical tubular boiler in the laundry for which no certificate was issued by Mr. Arnall as inspector, I beg to advise you that this office cannot give you sanction to use this boiler even temporarily. You have been informed that the boiler is not safe for further operation and it would be useless to have an Inspector go to the buildings if we issued temporary certificates for unfit boilers.

You will have to take this matter up directly with your own Department to have this boiler replaced.

Yours faithfully,

"C. F. Dawson,"
Dist. Res. Architect.

Memorandum:

Mr. Bushard.

The high pressure boiler used in the Laundry at the Kamloops Indian Residential School, Kamloops, B. C. has been condemned for further use by the Dominion Public Works Boiler Inspector. It is necessary to arrange immediately for the installation of a new vertical boiler.

The Indian Agent has obtained a price of \$788.00 installed from the Vancouver Engineering Works of Vancouver. Will you please advise if the order may be placed with this firm?

Deputy Superintendent General.

Dear Sir,-

With reference to the rearranging of the laundry at the Kamloops Indian Residential School, I am enclosing herewith blue prints showing the changes to be made, which consist mostly in the removal of the concrete wall to enlarge the laundry.

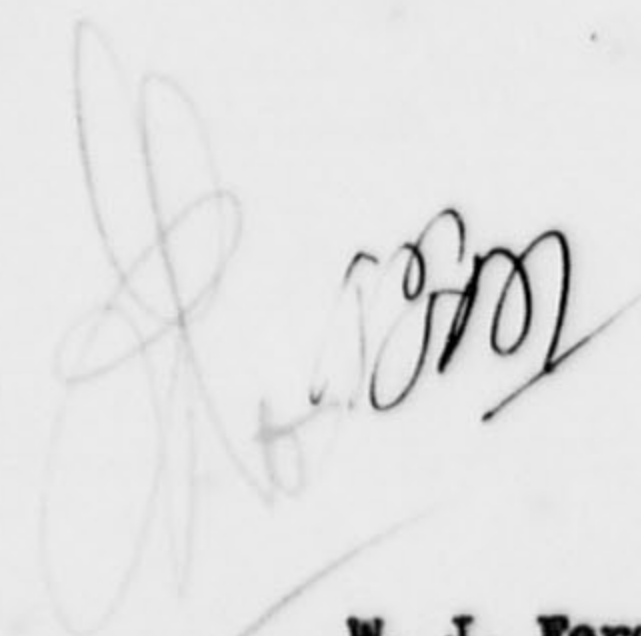

Mr. Chas. Reedman and H. E. Dayton, both of Kamloops are to be employed for this work.

I would ask you to kindly indicate on one of the blue prints sent you the exact location of the existing laundry machinery and the measurements of each machine. This information is required in order to make a new layout for the existing laundry machinery and the additional equipment it is proposed to purchase.

Yours very truly,

A. F. MacKenzie.

Dear Sir:-

Some time ago, Mr. Webb, Chief Engineer, Dominion Water Power Bureau, suggested that, in connection with the sewerage disposal plant at the Kamloops Indian Residential School, that I have the tile in the disposal bed dug up in the odd place to see if they were blocked. I have had this done about half way up the beds. An end near the tank and an end at the farthest end of the beds was dug up and found to be completely blocked with solid matter from the tank, so that no liquid could pass through the tile at these points. This leads me to believe that the same condition exists over the entire beds. At present, most, if not all of the liquid is flowing in the main sewerage pipe past the beds, out on to the open ground. *quote.*

Just what would be best to do to remedy the situation is a matter that should be dealt with by the Dominion Water Power Branch, and I would ask you to please refer the matter to them for a report. Some temporary work might be done this fall to make shift with until next year, when a sum sufficient to put this system up to full capacity and proper working order in relation to the population of the school, should be included in the estimates for next year.

Yours very truly,

Kamloops, B.C., Sept. 10th, 1935.

Dear Sir:

X X X

Representation has already been made to Ottawa to expedite the delivery of a new boiler for the school. (Kamloops Residential) The old boiler has been condemned, The principal reports that this boiler is not being used, and the school washing is being done without a supply of hot water. This is not a very desirable state of affairs when Scarlet Fever is present in the institution. I trust that this deficiency will have been rectified ere my letter reaches you.

*This has been done
PP*

The defective sewage disposal at the school looms up as a greater menace at a time like the present. As I have already informed you, the tank is not sufficiently large to allow full digestion before the sewage discharges into the disposal plant. The disposal bed, moreover, is poorly laid out. I wish that repairs could be made as soon as possible. It has been known for a number of years that the sewage disposal is both inadequate and unsafe.

Mr. W. J. Ferguson
Indian Agent,
Kamloops, B. C.

Dear Mr. Ferguson:

I am returning the plan of the School Laundry which you gave me and also a plan drawn by our Technical Instructor, Mr. Frank Bosco, showing dimensions and location of the machines we now have in the laundry, as requested.

I am most anxious that the two washing machines which are now placed along the West wall enclosing the boiler and the Coal Store should be moved to the East wall where is the drain. All the machines which have to be drained should be placed along this latter wall so as to avoid having the children working in running water as is the case at the present time as the water has to run across the floor to enter the drain. The washing machines and the extractors, therefore, should be placed along the East wall. Either the present extractor or the new one might be placed near the outside entrance in the North East corner. There is a six foot space in that corner.

I do not feel that it is so important as to where the other machines are placed as long as they are in convenient positions for the work and for supervision.

Thanking you for the interest you have taken in this matter, I remain

Sincerely yours,

Thos. M. Kennedy, C.M.I.
Principal.

Deflection Test-	Normal.	Condition under Test-	Good.
W.P.allowed,-	130 Lbs.	Water Gauge-	Good.
Test Cocks-	Good.	Steam Gauge-	Correct.
Safety Valves set to-	100 Lbs.	Fusible Plug-	Good.
Blow off pipes-	Good.	Blow off cock-	Good.
Brick side walls-		Brick Bridges-	
Brick Front Walls-		Brick Back walls-	
Brick Front Arches-		Brick Back Arches-	
Smoke Pipes and Breeching-	Good.		

REMARKS:-

Boiler new, just installed.
Safety valve set at 100 lbs. on account of jacket of mangle
requiring not above 100 lbs.
When higher pressure is required a reducing steam valve must
be installed on steam line leading to mangle. This will cost
approximately Thirty-five Dollars (\$35.00).

MEMORANDUM

The Honourable The Superintendent General.

It has been found necessary to supply new laundry machinery for the Kamloops Indian Residential School, Kamloops, B.C.

Prices have been obtained from Messrs. Stanley Brock Limited, of Winnipeg, and the Beaver Soap and Chemicals Ltd., of Winnipeg, on one 26" solid curb extractor and one Drytex tumbler, both machines to be motor driven. The net prices delivered at Kamloops are as follows:

Stanley Brock Limited - - - \$1,657.68

Beaver Soap & Chemicals Ltd - \$1,687.00

I would respectfully request authority to place this order with Stanley Brock Limited, of Winnipeg, who are Agents for the Canadian Laundry Machinery Company, whose laundry machines are made entirely in Canada.

Memorandum:

Mr.  Parker.

Please purchase for the Kamloops Indian Residential School one 26 inch solid curb Extractor, motor driven, also one 36 x 48 inch Drytex Tumbler, motor driven, similar to that manufactured by the Canadian Laundry Machinery Co., of Toronto.

The firms figuring should obtain from Kamloops all information as to the phase and cycle of the motors required before submitting their prices.

K-S-2

Dear Sir:-

With reference to your letter of the 11th instant, file 154-0-5, with enclosure of blueprints on which I was requested to indicate the exact location of the laundry machinery with measurements of each machine, I am enclosing herewith a sketch which I have had prepared, which I trust gives the desired information.

I am also enclosing a letter from the Rev. Principal in which you will note he has made certain suggestions regarding the re-arrangement of the machinery.

In regard to the boiler I have placed the order with the Vancouver Engineering Works, and delivery is expected this week. In connection with the smoke stack of the new boiler, some changes had to be made on account of height and it is possible some additional charge will be made for this, but it should not amount to a great deal.

Yours truly,

W. J. Ferguson

154-0-5
[Signature]
R
K-S-2.

Dear Sir:-

I enclose herewith Vouchers Nos. 377-35 and 378-35, amounting to \$813.00 and \$10.00, in favour of Vancouver Engineering Works, Ltd., Vancouver, B.C., and John Milton Co., Kamloops, B.C., for boiler and equipment for Kamloops Residential School, and hauling same from the C.P.R. Depot to the School.

This expenditure was authorized by Departmental Wire of September 10th, 1935.

E.A. 3752
You will note that the total of these vouchers exceeds the amount of \$788.00 authorized by the Department by \$35.00. \$25.00 of this was due to the extra height of the new boiler over that of the old one. When plans of the new boiler were received from the Vancouver Engineering Works Ltd., after the order was placed with them, it was found that the hood and stack quoted on would not do, and a special uptake with a side outlet to chimney, with damper, had to be ordered at this extra cost. The top of the uptake is covered with a cap of steel bolted down, which can be removed and flues cleaned from a trap door in the floor from the room above. This trap door has not as yet been cut into the floor, but allowance can be made for it when the rest of the machinery is being installed in the laundry.

The other over-expenditure of \$10.00, covered transportation of the boiler from the C.P.R. Station to the School. The Vancouver Engineering Works quoted the price f.o.b. Mission School at Kamloops. In this respect I took the matter up with them, and you will find attached hereto, copy of their explanation.

Yours truly,

VANCOUVER ENGINEERING WORKS, LTD.,

VANCOUVER, B.C., Nov. 19th, 1935.

W.J. Ferguson, Esq.,
Indian Agent,
Kamloops, B.C.

Dear Sir:-

Your letter of the 15th has been referred to the writer for reply. In respect to the delivery of the boiler to the Mission School at Kamloops, we regret that the wording in our tender was in error. The writer unfortunately had in mind at the time we made out the tender that the boiler was going to the Mission School at Kamloops, and with that thought in mind worded the tender accordingly. Our estimate sheet has no provision thereon for delivering the boiler to the School, this in view of the fact that we do not know where the school is in relation to the railway, and have no way of determining just what the cartage would be. and trust therefore that you will take these facts into consideration in deciding the question of such amount despite the fact that our letter did read F.O.B. Mission School.

With further reference to this boiler, another unfortunate circumstance occurred in that the freight in our estimated amounted to \$16.17, whereas we actually paid \$48.43, thereby incurring a definite loss of \$32.26, thus making the whole transaction anything but profitable.

Whilst we are not complaining, we merely submit the above facts and leave the matter with you feeling that you would wish to treat the whole thing with every fairness.

Awaiting with pleasure your further comments, and thanking you in anticipate, we are,

Yours truly,

VANCOUVER ENGINEERING WORKS, LTD.

February 17, 1936.

Dear Father Scannell:

I have your letter of the 7th instant, with reference to the requirements at the St. Mary's Mission, Kamloops and Kootenay Indian Residential Schools and enclosing a communication which you received from the Reverend Principal of the Kamloops School.

Regarding the request for an increased pupilage at the St. Mary's Residential School, I would say that, owing to a drastic cut in our Estimates, it has not been possible to provide for an increase in pupilage at this school for the coming fiscal year. I have noted that there are a sufficient number of children eligible for admission to fill the school to its present accommodation.

With reference to the request contained in the communication from Reverend Father Kennedy, Principal of the Kamloops Indian Residential School, I would say that the laundry machinery has been supplied and instructions have recently been issued to make the alterations required to the laundry and install the machinery. Certain funds will be available in our appropriation for the coming fiscal year to carry out repairs, painting, etc., and to repair the sewage disposal system. I regret that it was not possible to proceed with the erection of the barn. A supply of supplementary reading material has recently been sent the Principal, and he will be advised with reference to retaining in the classroom a number of the pupils who are over 16 years of age.

Regarding the supplying of storage batteries for the lighting system at the Kootenay Indian Residential School, I would say that this matter is now before the Honourable the Minister to approve the expenditure required, and we are awaiting his directions in the matter.

Yours very truly,

HAROLD W. MCGILL

Deputy Superintendent General.

CARR & SON.

Kamloops, B.C., Feb. 10th, 1936.

Indian Agent,
Kamloops, B.C.

Dear Sir:-

We beg to submit tender for alterations and additions to the Laundry at the Indian School, Kamloops.

The steam main operating the present unit will be too small for the additions, therefore we would carry a two inch steam line from boiler to a point over the present unit, then along over the machines reducing a size at each machine; also install all necessary valves on this line, and cover all pipes and exposed fittings with asbestos Pipe Covering and Asbestos Cement;

Carry water pipe to all machines requiring same, move mangle to new position. This will mean installing a new motor for to operate the mangle, as at present it operates off the old unit by belt drive. Owing to three extra motors being installed we propose to install a gutter box below the entrance switch with necessary break down switches.

Remove brick wall and insert a 10x 12 wood beam to carry floor above, cover beam with metal to correspond with the metal ceiling. Make good walls and floors after partition is removed. Cut double channel in concrete floor to receive machines and carry waste water to drains; Cut trap door in floor equipped with hinges and loose handle, line sides of opening with asbestos board covered with galvanized iron.

Trap in the floor to enable the attendant to clean the boiler tubes.

The above is the necessary work to be done, which was arrived at by the Indian Agent, the Superintendent and myself going over the site;

Enclosed find a tracing of the layout of the machines when moved and installed in their new position, the machines are not to scale, there will be more space between machines than shown on tracing.

Our price for the job complete is ~~six~~ hundred and ninety two dollars and forty cents (692.40)

Dear Sir:-

In connection with the installation of the laundry machinery at Kamloops Residential School, I beg to confirm my telegram of today's date, as follows:-

"Carr Estimate re installation laundry machinery. stop. Supply two inch steam main pipe and valves, all required water pipe to machines, new motor for mangle, cover pipe with asbestos, install gutter box with break-down switches, remove brick wall, insert ten by twelve wood beam, cut double channel in concrete floor for water, move mangle, cut trap door over boiler. stop. Total estimate six hundred and ninety three dollars. Advise."

I am enclosing herewith a copy of Messrs. Carr & Son's estimate covering installation, along with a sketch which shows the machinery as it will appear after rearrangement.

In regards to the trap door mentioned in the estimate. this in connection with the new boiler installed last fall. This new boiler is much higher than the old one, and to clean the flues this trap door has to be built in the floor above the steel cap of the uptake from the boiler.

Yours truly,

[Handwritten signature: W. J. Ferguson]

CARR & SON

Kamloops, B.C., February 10th, 1936.

Indian Agent,
Kamloops, B.C.

Dear Sir:-

We beg to submit Tender for alterations and additions to the Laundry at the Indian School Kamloops.

The steam main operating the present unit will be too small for the additions, therefore we would carry a two inch steam line from boiler to a point over the present unit, then along over the machines reducing a size at each machine; also install all necessary valves on this line, and cover all pipes and exposed fittings with asbestos pipe covering and asbestos cement;

Carry water pipe to all machines requiring same, Move Mangle to new position. This will mean installing a new motor for to operate the mangle, as at present it operates off the old unit by belt drive. Owing to three extra motors being installed we propose to install a gutter box below the entrance switch with necessary breakdown switches;

Remove brick wall and insert a 10x12 wood beam to carry floor above, cover beam with metal to correspond with the metal ceiling. Make good walls and floors after partition is removed. Cut double channel in concrete floor to receive machines and carry waste water to drains; cut trap door in floor equipped with hinges and loose handle, line sides of opening with asbestos board covered with galvanized iron.

Trap in the floor to enable the attendant to clean the boiler tubes.

The above is the necessary work to be done, which was arrived at by the Indian Agent, the Superintendent and myself going over the site;

Enclose find a tracing of the layout of the machines when moved and installed in their new position, the machines are not to scale, there will be more space between the machines than shown on tracing.

Our price for the job complete is six hundred and ninety two dollars and forty cents (\$692.40)

Memorandum:

MR. ORR,-

The following items are provided in the Estimates for Indian Education for the current fiscal year at the Kamloops Indian Residential School:-

- | | | | |
|----|---|---|----------|
| 1. | Repairing sewage disposal system and installing a second septic tank unit, with the necessary disposal beds | - | \$3,500. |
| 2. | Painting roof of girls' and boys' wings and outside of windows and doors, entire building | - | 500. |
| 3. | Repairs to girls' toilets | - | 900. |
| 4. | Miscellaneous repairs | - | 500. |

I would request that you make the necessary arrangements for the carrying out of the above work.

EXD.

Ottawa, June 5, 1936.

Dear Mr. Ferguson,-

An amount of \$2,000 is available in this year's appropriation for repairs required to the Kamloops Indian Residential School.

This does not include repairs or alterations to the sewerage system for which work a special amount is being made available, and of which you will be advised at a later date.

It has been suggested that the following repairs are required,-

Painting the roof of the girls' and boys' wings and outside of windows and doors of the entire building.

New toilets in the girls' side of the building.

Miscellaneous repairs.

Under the miscellaneous repairs I think it would be advisable to give consideration to the pointing up of all of the stone coping around the building as if I remember correctly when I visited there last the joints were becoming badly opened.

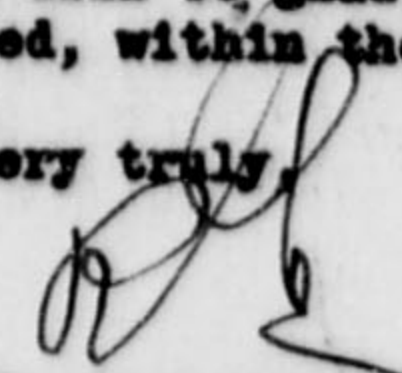

The following firms are to be employed for this work.

Painter - R. C. Blackburn of Kamloops.
Stone Mason - V. Durante " "
Plumber - Carr and Son " "

If you wish to get estimates from these firms the same will be in order and before commencing the work I will be glad to have your recommendations as to the most urgent work required, within the amount of \$2,000 above mentioned.

Yours very truly,

W. J. Ferguson, Esq.,
Indian Agent,
Kamloops, B. C.
